Teleflex will be Presenting at the 8th Scientific and Annual Meeting of the European Society of Coloproctology (ESCP)

September 24, 2013

LIMERICK, Pa.--(BUSINESS WIRE)--Sep. 24, 2013-- **Teleflex Incorporated (NYSE: TFX), a leading global provider of medical devices for critical care and surgery, will showcase its comprehensive surgical portfolio during the European ESCP Congress in Belgrade, Serbia on September 25-27 and at the same time celebrate the 50th year anniversary of its Weck™ ligation system.**

At the ESCP on September 25-27, Teleflex will showcase its diversified range of surgical instruments, devices for general surgery and other specialized areas – all under the Taut™, Weck™ and Pilling™ brands.

This year Teleflex is celebrating the 50th anniversary of the Weck line of ligation products. Since the former Weck company pioneered the ligating clip in 1963, the Hemoclip™ system has become the surgical standard around the world, while the Hem-o-lok™ clip's unique design and polymer technology have set a standard in ligation.

Teleflex offers surgeons a full line of Weck access devices, the Weck Vista™ series, providing confidence, clarity and control during general and advanced minimally invasive procedures. The asymmetrically dilating Weck Vista optical trocar features excellent light transmission through its transparent tip that enables clear visualization of tissue layers during entry. It incorporates ridges on the cannula providing excellent port stability particularly throughout extended procedures.

The innovative design of the Weck EFx™ Endo Fascial Closure System provides key benefits for the surgeon and patient including a special design for port closure and enables reproducible fascial closure in varying body types with a controlled suture delivery.
