Chesapeake Financial Shares, Inc. (CPKF - OTC)

CPKF: Maintaining 2013 EPS Estimate at $2.45, up 6% from 2012

Current Recommendation	**Outperform**
Prior Recommendation	Neutral
Date of Last Change	05/26/2011
Current Price (04/08/13)	$17.40
Twelve-Month Target Price	**$20.75**

OUTLOOK

We are maintaining our 2013 diluted EPS estimate at $2.45, up 6% over 2012's $2.32, following CPKF's fourth quarter results. CPKF reported fourth quarter diluted EPS of $0.39 that was $0.10, or 20%, lower than our $0.49 estimate as nonoperating items dragged down results. Specifically, net losses from sales of securities and OREO plus other noninterest expense were larger than we had expected, though this was partly offset by other noninterest income and an effective tax rate that were better than anticipated. Relative to the year-ago quarter, net earnings slid 17% to $1.3 million, while 2012's fourth quarter diluted EPS fell 20% from the $0.49 posted in 2011's fourth quarter due to a greater number of shares outstanding. For the year, CPKF earned $7.7 million, or $2.32 per diluted share, up 10% from the $7.0 million, or $2.16 per diluted share, posted in 2011. Primary contributors to this growth were a 10% gain in noninterest income on the back of higher merchant card revenues, a 50% reduction in the loan loss provision, and continuing strong control over operating expenses. CPKF recently hiked its quarterly dividend by 9% to $0.12, following a 10% increase earlier in 2012. Notably, CPKF has increased the annual dividend payment every year for the past twenty years since 1991. In December, CPKF completed a tender offer to repurchase $1.5 million of company stock (about 2% of outstanding shares) at $18.50 per share. CPKF was ranked 16th (up from 20th a year ago) out of all banks nationally with less than $2 billion in total assets by the ABA.

FOURTH QUARTER OVERVIEW

We are maintaining our 2013 diluted EPS estimate at $2.45, up 6% over 2012's $2.32, itself an 8% gain over 2011's $2.16. This estimate is supported by projected net interest income expansion of over 3% based upon loan growth of about 4% and a 10 basis-point drop in the net interest margin to 4.50%; an almost 3% increase in noninterest income due to a strong 20% jump in cash flow income, though this will be partly offset by the absence of a couple of items that occurred in 2012, including a one-time accounting adjustment in recognizing merchant card income and higher-than-normal levels of pare-off fees from residential mortgage loans that were originated and closed with FHLMC; and a modest 1 ½% advance in noninterest expense as a 4 ½% rise in compensation costs will be partly offet by a decline in other expense.

CPKF reported 2012 fourth quarter diluted EPS of $0.39 that was $0.10, or 20%, lower than our $0.49 estimate as nonoperating items dragged down results. Specifically, net losses from sales of securities and OREO plus other noninterest expense were larger than we had expected, though this was partly offset by other noninterest income and an effective tax rate that were better than anticipated.

Relative to the year-ago quarter, net earnings slid 17% to $1.3 million, while 2012's fourth quarter diluted EPS fell 20% from the $0.49 posted in 2011's fourth quarter due to a greater number of shares outstanding.

For the year, CPKF earned $7.7 million, or $2.32 per diluted share, up 10% from the $7.0 million, or $2.16 per diluted share, posted in 2011. Primary contributors to this growth were a 10% gain in noninterest income on the back of higher merchant card revenues, a 50% reduction in the loan loss provision, and continuing strong control over operating expenses.

Sequential net income declined 46% from third quarter's record $2.5 million and diluted EPS decreased by 47% from the $0.74 peak in the third quarter of 2012. The primary reasons for the fourth quarter's drop versus the third quarter were: (1) a $0.3 million increase in the combined loss from the sales of securities and OREO to a loss of $0.4 million from a loss of $0.1 million in the third quarter; (2) a $0.2 million, or 29%, tumble in income from fiduciary activities; we note that the third quarter typically represents the peak for the year due to accruals for certain trust accounts, so it is not unusual for this to slip in the fourth quarter; (3) a $0.6 million, or 20%, jump in salaries, with the fourth quarter typically representing peak quarterly salary expense; and (4) a $0.4 million, or 24%, rise in other noninterest expense.

Compared to our projections, net income was $0.3 million, or $0.10 per diluted share, below our $1.6 million, or $0.49 per share, estimate, respectively. This primarily reflected combined losses from the sales of securities and OREO that were $0.3 million higher than our estimate plus other noninterest expense that was $0.4 million larger, partially offset by other noninterest income that came in $0.2 million above our estimate and an effective tax rate of 14.4% that was below our 21.9% estimate.

On October 23, 2012, CPKF hiked its quarterly dividend by 9% to $0.12 per share from $0.11 per share, paid on December 15, 2012 to shareholders of record on December 1, 2012. This was the second dividend increase in 2012—earlier, CPKF hiked the dividend 10% from the $0.10 quarterly rate. Notably, CPKF has increased the annual dividend payment every year for the past twenty years since 1991.

On October 29, 2012, CPKF announced a tender offer to repurchase up to $1.5 million of company stock at a price of $18.50 per share for shareholders of record (a 12% premium to the $16.50 share price at that time) as of October 25, 2012, with shares tendered by the close of business on December 10, 2012. As the entire $1.5 million was repurchased, this reduced shares outstanding by 2% and increased annual diluted EPS by a penny.

We note that American Banker ranked CPKF 16th (up from 20th a year ago) out of all banks nationally with less than $2 billion in total assets, which includes approximately 6,000 banks, and #1 of all banks in Virginia for the second year in a row. This ranking was based upon three-year average returns on equity, which for Chesapeake Financial was 14.00%. The Company has steadily risen through the rankings in the past five years, reflecting its solid financial performance during this difficult banking environment.

Below, we discuss fourth quarter results more fully. Details of our projections are shown at the back of our report.

Net Interest Income

Net interest income shed 4% year over year (and was flat sequentially) at $5.7 million (the same as our estimate), as 2% growth in loans and receivables outstanding partially offset by a net interest margin that fell 28 basis points to 4.49% from 4.77% earned in the year-ago quarter. The 4.49% net interest margin was down 1 basis point from 4.50% in the third quarter and was 4 basis points above our 4.45% estimate.

We are raising our 2013 NIM estimate to 4.50% from 4.45% as it appears that loan pricing is stabilizing, despite fierce competitive pricing pressures from larger national and regional banks. In addition, the taxable-equivalent NIM appears to be benefitting from a build-up in the municipal securities portfolio.

Noninterest Income

Noninterest income advanced $0.7 million, or 21%, year over year to $3.9 million ($0.1 million above our estimate), largely the result of strong gains in merchant card income (up $0.2 million, or 13%) as the Company added new clients, other income (up $0.4 million, or 52%) due to higher-than-normal levels of pare-off fees from residential mortgage loans that were originated and closed with FHLMC, and cash flow income (up $0.1 million or 12%) due to product line expansion.

While merchant card income is expected to continue to benefit from the addition of a new service to its line-up and the cash flow business from new products and a recent new hire, in 2013 the Company faces headwinds in trying to top 2012's excellent performance. One-time gains from the merchant card revenue recognition and higher-than-normal pare-off fees will likely not recur. That said, we are still projecting an almost 3% increase in noninterest income for 2013 (versus 9 ½% in 2012).

Loss Provision

The loan loss provision decreased 25% to $0.15 million (the same as our estimate). Loan loss reserves fell $0.1 million from $6.5 million (1.81% of loans) year over year and increased nominally from $6.34 million (1.73% of loans) sequentially to $6.35 million (1.69% of loans) as of December 31, 2012.

Including the loss allowance for cash flow receivables, the total loan loss allowance fell marginally to $7.49 million (1.88% of loans plus cash flow receivables) from $7.51 million (2.01% of loans plus cash flow receivables) at the end of the comparable year-ago quarter, but was up marginally from $7.44 million (1.92% of loans plus cash flow receivables) at the end of the previous quarter.

As to other asset quality measures, CPKF charged off $135,000 of loans in the fourth quarter. This is down $251,000, or 65%, from the $386,000 charged off in the year-ago quarter and compares to net loan charge-offs of $0.7 million for full-year 2012.

We are estimating that the loss provision will remain flat at $0.6 million in 2013. This compares to 2012's 50% decline from 2011's $1.2 million.

We estimate that the total loss allowance will drop from 1.88% of loans plus receivables at the end of 2012 to 1.86% at yearend 2013.

Noninterest Expense

Total noninterest expense increased $0.7 million, or about 10%, year over year to $7.9 million ($0.4 million higher than our estimate), as total compensation expense climbed 4% and other noninterest expense rose 16%. The efficiency ratio deteriorated, rising to 79.7% from 75.0% in the prior-year quarter and from 66.6% 2012's third quarter.

Income Taxes

The Company's effective tax rate in the fourth quarter was 14.4%, compared to 8.9% in the year-ago quarter and our 21.9% estimate.

We are estimating an effective tax rate of roughly 22.5% in 2013, which compares to a full-year effective tax rate of 20.9% in 2012.

Net Income

CPKF posted net earnings of $1.3 million (or $0.39 per diluted share). This was down 17% from the $1.6 million ($0.49 per diluted share) earned in the year-ago quarter. This compares to our $1.6 million net income estimate ($0.49 per diluted share).

Profitability

CPKF posted an 8.7% ROE and 0.81% ROA for the fourth quarter of 2012, compared to 12.5% and 1.00%, respectively, in the prior-year quarter.

Loans and Asset Quality

Gross loans outstanding increased $19 million, or about 5%, year over year and $8 million, or 2%, sequentially to $375 million, as the Company witnessed better loan demand. Sequentially, categories that posted the largest increases were commercial real estate, which rose $6.4 million, or 5%, to $134.6 million, and commercial and industrial loans, up $5.8 million, or 10%, to $63.8 million. In addition, cash flow receivables surged $2.6 million, or 13%, to $22.5 million. Most other loan categories were down modestly on a dollar basis.

We continue to expect annual loan growth of about 4% in 2013. CPKF opened a commercial loan production office in Richmond, Virginia in mid-August 2011, which should contribute to additional commercial and industrial lending gains for 2013. Moreover, a new array of more attractive offerings, designed specfically for customers in the cash flow business, should contribute to substantial gains in this segment. However, effects of the sequestration on lending operations could be more heavily felt in some of CPKF's key markets, given Viriginia's large exposure to the US military, and lead to lower-than-expected growth.

Asset quality measures deteriorated on a sequential basis, mainly reflecting a $2.7 million, or 47%, jump in restructured loans to $8.6 million as about 5-6 loans encompassing 2-3 client lending relationships had to be restructured due to financial difficulties. Nonperforming loans edged up a modest $0.1 million to $6.8 million, while other real estate owned posted a $0.2 million decrease to $4.4 million.

Thus, nonperforming assets (NPAs), including troubled debt restructurings that are current in payments, rose 54 basis points to 4.93% of outstandings + OREO at December 31, 2012 from 4.39% at September 30, 2012, and 45 basis points year over year from 4.48%.

The loss allowance as a percent of nonperforming assets fell sequentially to 32.1% from 43.3%, mainly reflecting the jump in restructured loans. The loan loss reserve for both loans and cash flow receivables was $7.49 million, or 1.88% of gross outstandings, versus $7.44 million, or 1.92% of gross outstandings at the end of the September quarter.

Liquidity and Funding

Cash and equivalents more than doubled to $54 million, while the securities portfolio fell by roughly $5 million sequentially, reflecting the paydown of the US government-related mortgage-backed securities

($11 million) and private-label mortgage securities ($1 million) portfolios, partly offset by a $7 million gain in the municipal securities portfolio. This had the effect of reducing the total US government-related securities portfolio by 600 basis points to 21% of the entire available-for-sale securities portfolio and simultaneously raising the municpal securities portfolio by a like amount to 64%. The private-label mortgage securities portfolio was flat at 15%.

CPKF's liquidity ratios improved compared to the previous quarter, as the $29 million jump in cash and equivalent more than offset the $11 million paydown of the US government-related mortgage-backed securities portfolio. At December 31, 2012, liquid assets represented 14% of total assets (up from 12% at the end of the third quarter), while loans plus receivables accounted for 60% of total assets (down from 61% at September 30, 2012).

Core deposits rose $37 million, or 9%, sequentially to $459 million and funded 115% of loans and receivables.

Capital Adequacy and Dividends

The Company's capital adequacy ratios worsened during the quarter, primarily due to strong growth in risk-weighted assets. The Tier 1 capital ratio fell 26 basis points sequentially to 13.55% at the end of 2012's fourth quarter from 13.81% at September 30, 2012, and the Total capital ratio also decreased 26 basis points to 15.80% from 15.06%.

Total shareholders' equity advanced $0.1 million during the fourth quarter, due to a combination of $0.2 million growth in retained earnings, a $0.1 million decline in other capital changes, and a 47,000 decrease in common shares outstanding following the fourth quarter share buyback. Reflecting these factors, tangible book value per share also increased during the fourth quarter, by $0.29 per share to $18.80 from $18.51.

OVERVIEW

Chesapeake Financial Shares, Inc. (CPKF or the Company) is a bank holding company headquartered in Kilmarnock, Virginia, with $668 million in total assets at December 31, 2012. CPKF is predominantly a small business lender with 11 branch offices that serve customers in the eastern region of Virginia between the Potomac and James Rivers. These offices are located in Kilmarnock, Lively, Irvington, Mathews, Hayes, and Gloucester, with four branches in Williamsburg. CPKF, which began as Lancaster National Bank on April 13, 1900, has a long history and strong ties with the communities it serves. In addition, CPKF opened a commercial loan production office in Richmond, Virginia in mid-August 2011.

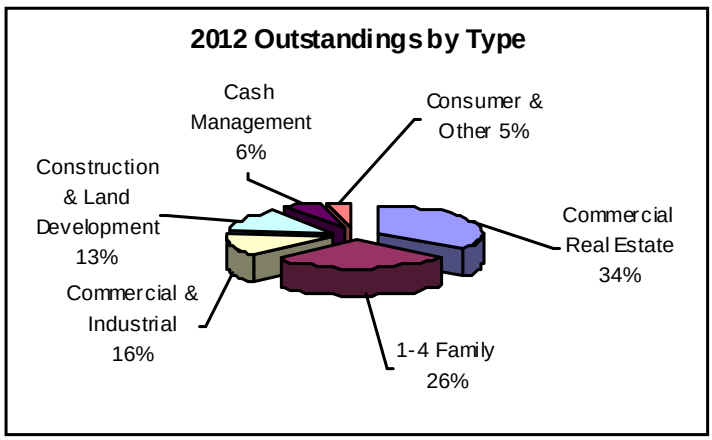
Operations are carried on through Chesapeake Bank, a state-chartered bank as well as Federal Reserve and FDIC member bank, and Chesapeake Investment Group, Inc. (CIG), an independent wealth management firm that manages about $330 million in assets (at 2012 yearend) through its subsidiaries involved in asset management (CIG is a registered investment adviser), brokerage, and trust services. Other activities of the Company include Chesapeake Payment Systems, Cash Flow program, Clear Sky accounts, and its secondary market mortgage banking operation.

Chesapeake Payment Systems offers merchant processing services such as credit card and debit card processing, electronic benefits transfers, and loyalty and gift card processing to companies involved in travel, entertainment, restaurant, hospitality, retail, mail order, and e-commerce. At yearend 2012, Chesapeake Payment Systems had 607 merchants in its system and processed over $133 million in merchant card transactions.

The Cash Flow program, which provides an attractive financing option to growing businesses, involves the purchase of the client company's accounts receivables. The Cash Flow program is currently offered in the Eastern half of the United States and had 76 customers at the end of 2012.

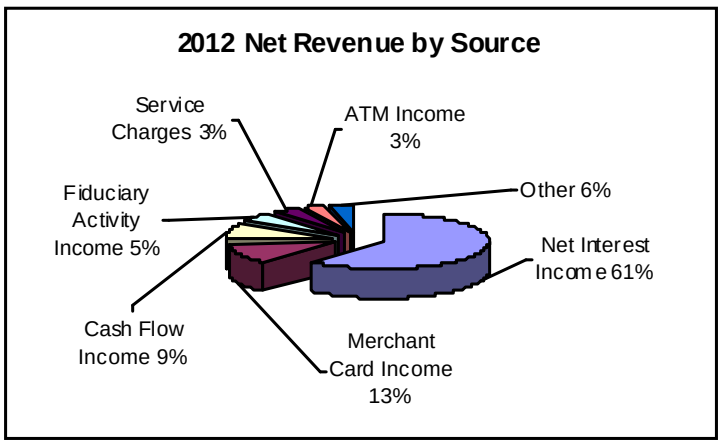
Clear Sky accounts, which offer internet-based retail deposit services for checking and saving accounts and certificates of deposit (CDs), expands CPKF's retail deposit base geographically. At December 31, 2012, Clear Sky deposits totalled $44 million, with customers in all 50 states.

Through Chesapeake's secondary market mortgage banking operation, the Company services a $207 million loan portfolio (as of December 31, 2012) of residential mortgage loans for Federal Home Loan Mortgage Corporation (FHLMC or Freddie Mac), for which it earns a 25 basis-point fee (approximately $520,000 annually) on the outstanding loan portfolio balance. Additionally, CPKF earns a pare-off fee for residential mortgage loans that are originated and closed with FHLMC, which added $952,000 to revenues in 2012 (both types of fees are included in other noninterest income in the Company's financial statements).



The lending portfolio is dominated by real estate loans, as shown in the chart at left. At December 31, 2012, the lending book consisted of commercial real estate (accounting for 34% of total gross outstandings), 1-4 family (26%), commercial and industrial (16%), construction and land development (13%), cash flow (6%), and consumer and other (5%). A majority of loans are secured, usually by real estate, inventory, accounts receivable, equipment, machinery, or corporate assets.

At December 31, 2012, the liquidity portfolio, which consists of cash, short-term investments, federal funds sold, and US agency mortgage obligations, represented about 14% of total assets and 21% of the securities portfolio. In addition, the available-for-sale portfolio includes municipal and private label mortgage securities, which accounted for 64% and 15%, respectively, of the total. Core deposits represented 81% of total deposits at December 31, 2012, with certificates of deposit larger than $100,000 at 19%.



In 2012, net interest income contributed 61% of net revenue, with a significant 39% coming from noninterest income sources. Major contributors to noninterest income include merchant card income (13% of net revenues), cash flow income (9%), income from fiduciary activities (5%), service charges on deposit accounts (3%), and ATM income (3%).

VALUATION

CPKF stock has risen 3.6% year to date, below the small-cap bank industry's median price increase of 12.2%, as shown in the following table, as well as the 9.6% gain for the S&P 500. We note that the share price surged 49.3% last year in 2012 compared to 13.4% for the S&P 500.

At its current price, CPKF is trading at a discount to the industry median P/E of 40% in 2013, based upon our most recent CPKF EPS estimate for 2013. This is below the average 51% P/E discount for CPKF, based upon 5-year historical P/E averages. Applying the historical discount of 51% to our 2013 EPS estimate results in a price of about $14.75.

Turning to Price/Tangible Book Value, CPKF is valued at 0.94X versus the industry median of 1.04X. This represents a 10% discount, well below the average historical premium of 19% for CPKF since the end of 2005. Applying the historical premium of 19% to our estimated book value for CPKF twelve months out results in a price of approximately $24.75.

At a minimum, we believe that CPKF should be trading in line with the industry's 1.04X Price/Tangible Book Value, given CPKF's strong performance throughout the financial crisis, its superior profitability measures, and its above-average yield on the recently increased dividend. Applying this metric to our estimated book value for CPKF twelve months out results in a price of approximately $20.75.

With $20.75 as our target price (versus CPKF's $17.40 current market price) and a 2.8% dividend yield, this indicates a total return of 22%, above our expectations for gains in the broader market index over the next year. Therefore, we are maintaining our recommendation on CPKF at Outperform.

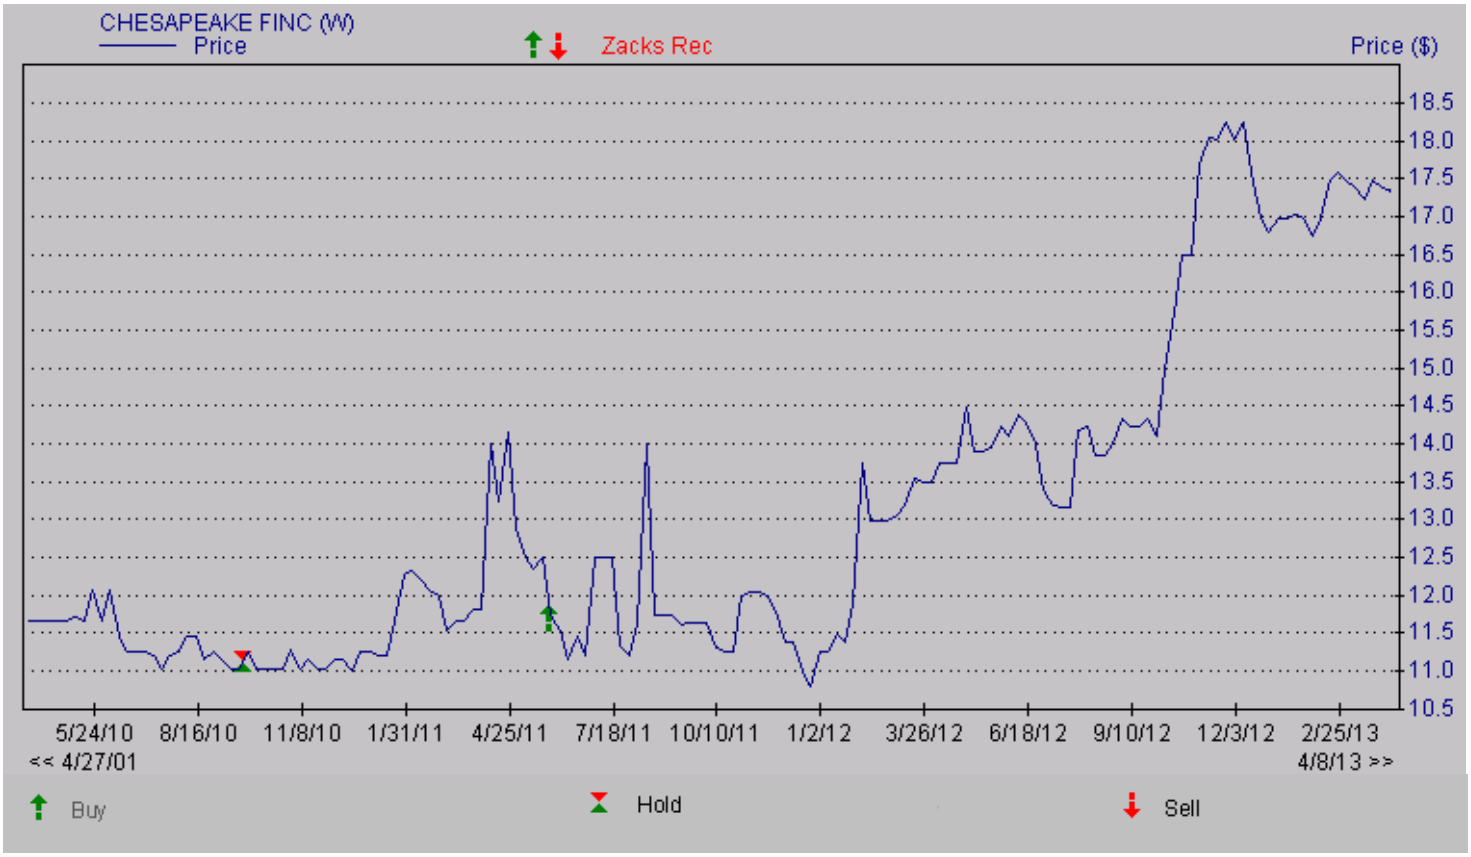
HISTORICAL ZACKS RECOMMENDATIONS



DISCLOSURES

The following disclosures relate to relationships between Zacks Investment Research ("ZIR") and Zacks Small-Cap Research ("Zacks SCR") and the issuers covered by the Zacks SCR analysts in the Small-Cap Universe.

ZIR or Zacks SCR Analysts do not hold or trade securities in the issuers which they cover. Each analyst has full discretion on the rating and price target based on their own due diligence. Analysts are paid in part based on the overall profitability of Zacks SCR. Such profitability is derived from a variety of sources and includes payments received from issuers of securities covered by Zacks SCR for non-investment banking services. No part of analyst compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in any report or blog.

ZIR and Zacks SCR do not make a market in any security nor do they act as dealers in securities. Zacks SCR has never received compensation for investment banking services on the small-cap universe. Zacks SCR does not expect received compensation for investment banking services on the small-cap universe. Zacks SCR has received compensation for non-investment banking services on the small-cap universe, and expects to receive additional compensation for non-investment banking services on the small-cap universe, paid by issuers of securities covered by Zacks SCR. Non-investment banking services include investor relations services and software, financial database analysis, advertising services, brokerage services, advisory services, investment research, and investment management.

Additional information is available upon request. Zacks SCR reports are based on data obtained from sources we believe to be reliable, but is not guaranteed as to accuracy and does not purport to be complete. Because of individual objectives, the report should not be construed as advice designed to meet the particular investment needs of any investor. Any opinions expressed by Zacks SCR Analysts are subject to change. Reports are not to be construed as an offer or the solicitation of an offer to buy or sell the securities herein mentioned. Zacks SCR uses the following rating system for the securities it covers. Buy/Outperform: The analyst expects that the subject company will outperform the broader U.S. equity market over the next one to two quarters. Hold/Neutral: The analyst expects that the company will perform in line with the broader U.S. equity market over the next one to two quarters. Sell/Underperform: The analyst expects the company will underperform the broader U.S. Equity market over the next one to two quarters.

The current distribution of Zacks Ratings is as follows on the 1011 companies covered: Buy/Outperform- 14.8%, Hold/Neutral- 78.3%, Sell/Underperform – 6.4%. Data is as of midnight on the business day immediately prior to this publication.
