Note on Forward-Looking Statements

This presentation contains forward-looking statements, including, but not limited to our expectation that momentum with respect to our launch of the UroLift System in Japan will continue into 2023; our forecasted 2023 GAAP and constant currency revenue growth, GAAP and adjusted gross and operating margins and GAAP and adjusted earnings per share and, in each case, our estimates with respect to the items expected to impact those forecasted results; our expectation that procedure momentum will build into 2023; and other matters which inherently involve risks and uncertainties which could cause actual results to differ from those projected or implied in the forward–looking statements. These risks and uncertainties are addressed in our SEC filings, including our most recent Form 10-K. We expressly disclaim any obligation to update forward-looking statements, except as otherwise specifically stated by us or as required by law or regulation.

Note on Non-GAAP Financial Measures

This document contains certain highlights with respect to our fourth quarter 2022 and developments and does not purport to be a complete summary thereof. Accordingly, we encourage you to read our Earnings Release for the quarter ended December 31, 2022 located in the investor section of our website at www.teleflex.com and our Annual Report on Form 10-K for the year ended December 31, 2022 to be filed with the Securities and Exchange Commission.

Appendices

Non-GAAP Financial Measures

The presentation to which these appendices are attached and the following appendices include, among other things, tables reconciling the following applicable non-GAAP financial measures to the most comparable GAAP financial measure:

- ***Constant currency revenue growth.*** This non-GAAP measure is based upon net revenues, adjusted to eliminate the impact of translating the results of international subsidiaries at different currency exchange rates from period to period. The impact of changes in foreign currency may vary significantly from period to period, and generally are outside of the control of our management. We believe that this measure facilitates a comparison of our operating performance exclusive of currency exchange rate fluctuations that do not reflect our underlying performance or business trends.
- ***Adjusted diluted earnings per share.*** This non-GAAP measure is based upon diluted earnings per share from continuing operations, the most directly comparable GAAP measure, adjusted to exclude, depending on the period presented, the impact of (i) restructuring, restructuring related and impairment items; (ii) acquisition, integration and divestiture related items; (iii) "other items" identified in note (C) to the reconciliation tables appearing in Appendices A1, A2, A3, and A4, as applicable; (iv) certain costs associated with the registration of medical devices under the European Union Medical Device Regulation; (v) intangible amortization expense; and (vi) tax adjustments. Management does not believe that any of the excluded items are indicative of our underlying core performance or business trends.
- ***Adjusted gross profit and margin.*** These measures exclude, depending on the period presented, the impacts of (i) restructuring, restructuring related and impairment items, (ii) acquisition, integration and divestiture related items and (iii) "other items" identified in note (C) to the reconciliation tables appearing in Appendices A1, A2, A3, and A4, as applicable.
- ***Adjusted operating profit and margin.*** These measures exclude, depending on the period presented, the impact of (i) restructuring, restructuring related and impairment items; (ii) acquisitions, integration and divestiture related items; (iii) "other items" identified in note (C) to the reconciliation tables appearing in Appendices A1, A2, A3, and A4, as applicable; (iv) intangible amortization expense; and (v) certain costs associated with the registration of medical devices under the European Union Medical Device Regulation.
- ***Adjusted tax rate.*** This measure is the percentage of the Company's adjusted taxes on income from continuing operations to its adjusted income from continuing operations before taxes. Adjusted taxes on income from continuing operations excludes, depending on the period presented, the impact of tax benefits or costs associated with (i) restructuring, restructuring related and impairment items; (ii) acquisition, integration and divestiture related items; (iii) "other items" identified in note (C) to the reconciliation tables appearing in Appendices A1, A2, A3, and A4, as applicable; (iv) certain costs associated with the registration of medical devices under the European Union Medical Device Regulation; (v) intangible amortization expense; and (vi) tax adjustments.

Non-GAAP Adjustments

The following is an explanation of certain of the adjustments that are applied with respect to one or more of the non-GAAP financial measures that appear in the presentation to which these appendices are attached:

Restructuring, restructuring related and impairment items - Restructuring programs involve discrete initiatives designed to, among other things, consolidate or relocate manufacturing, administrative and other facilities, outsource distribution operations, improve operating efficiencies and integrate acquired businesses. Depending on the specific restructuring program involved, our restructuring charges may include employee termination, contract termination, facility closure, employee relocation, equipment relocation, outplacement and other exit costs associated with the restructuring program. Restructuring related charges are directly related to our restructuring programs and consist of facility consolidation costs, including accelerated depreciation expense related to facility closures, costs to transfer manufacturing operations between locations, and retention bonuses offered to certain employees as an incentive for them to remain with our company after completion of the restructuring program. Impairment charges occur if, due to events or changes in circumstances, we determine that the carrying value of an asset exceeds its fair value. Impairment charges do not directly affect our liquidity, but could have a material adverse effect on our reported financial results.

Acquisition, integration and divestiture related items - Acquisition and integration expenses are incremental charges, other than restructuring or restructuring related expenses, that are directly related to specific business or asset acquisition transactions. These charges may include, among other things, professional, consulting and other fees; systems integration costs; legal entity restructuring expense; inventory step-up amortization (amortization, through cost of goods sold, of the increase in fair value of inventory resulting from a fair value calculation as of the acquisition date); fair value adjustments to contingent consideration liabilities; and bridge loan facility and backstop financing fees in connection with loan facilities that ultimately were not utilized. Divestiture related activities involve specific business or asset sales. Depending primarily on the terms of a divestiture transaction, the carrying value of the divested business or assets on our financial statements and other costs we incur as a direct result of the divestiture transaction, we may recognize a gain or loss in connection with the divestiture related activities.

Other items - These are discrete items that occur sporadically and can affect period-to-period comparisons.

European medical device regulation - The European Union (“EU”) has adopted the EU Medical Device Regulation (“MDR”), which replaces the existing Medical Devices Directive (“MDD”) and imposes more stringent requirements for the marketing and sale of medical devices in the EU, including requirements affecting clinical evaluations, quality systems and post-market surveillance. Manufacturers of currently marketed medical devices had until May 2020 to meet the MDR requirements, although certain devices that previously satisfied MDD requirements can continue to be placed on the EU market until May 2024, subject to certain limitations. Significantly, the MDR will require the re-registration of previously approved medical devices. As a result, Teleflex will incur expenditures in connection with the new registration of medical devices that previously had been registered under the MDD. Therefore, these expenditures are not considered to be ordinary course expenditures in connection with regulatory matters (in contrast, no adjustment has been made to exclude expenditures related to the registration of medical devices that were not registered previously under the MDD).

Teleflex®

Non-GAAP Adjustments

Intangible amortization expense - Certain intangible assets, including customer relationships, intellectual property, distribution rights, trade names and non-competition agreements, initially are recorded at historical cost and then amortized over their respective estimated useful lives. The amount of such amortization can vary from period to period as a result of, among other things, business or asset acquisitions or dispositions.

Tax adjustments - These adjustments represent the impact of the expiration of applicable statutes of limitations for prior year returns, the resolution of audits, the filing of amended returns with respect to prior tax years and/or tax law or certain other discrete changes affecting our deferred tax liability.
