

Teleflex to Present at the 6th European Conference of Interventional Oncology (ECIO)

April 20, 2015

WAYNE, Pa.--(BUSINESS WIRE)--Apr. 20, 2015-- Teleflex Incorporated (NYSE: TFX), a leading global provider of medical devices for critical care, urology and surgery, will showcase a wide array of products for minimally invasive interventional applications at the 6th European Conference of Interventional Oncology (ECIO) in Nice, France, on April 22-25, 2015.

This portfolio includes the Arrow® OnControl® Powered Bone Access System.

Teleflex will present a wide array of technologically advanced products for minimally invasive interventional applications from its Arrow® product line that are designed to enhance performance in interventional access and peripheral vascular procedures. These include peripherally inserted catheters, highly kink-resistant sheath introducers and a broad technology platform that is defining the field of intraosseous (inside the bone) medicine.

Current applications include vascular access, emergency and disaster medicine, oncology and spinal surgery.

Key product of focus will be the Arrow® OnControl® Power Driver and the Arrow® OnControl® Bone Lesion Biopsy Tray. Using patented technology, this device provides interventional radiologists and oncologists a faster, more reliable solution for accessing dense and hard-to-reach bone lesions. The Arrow® OnControl® Bone Lesion Biopsy Tray contains all the instruments needed for multiple, high-quality bone lesion biopsies, from a single cortical penetration.

Teleflex aims to offer patients and physicians the latest treatment options to save procedure steps, time and costs, in order to help enhance clinician efficiency and patient care.

About Teleflex Incorporated
