

Teleflex to Present at the 52nd European Renal, Dialysis and Transplant Congress (ERA-EDTA)

May 26, 2015

WAYNE, Pa.--(BUSINESS WIRE)--May 26, 2015-- Teleflex Incorporated (NYSE: TFX), a leading global provider of medical devices for critical care, urology and surgery, will showcase its range of interventional products at the 52nd European Renal, Dialysis and Transplant Congress in London on May 28 - 31, 2015.

During the event, Teleflex will highlight its Arrow® chronic hemodialysis catheter portfolio, which offers both split-tip and step-tip catheters for both retrograde and antegrade insertion techniques.

The Arrow® NextStep® Retrograde and Antegrade product family consists of step-tip catheters that can easily be inserted and tunneled using retrograde or antegrade technique, respectively. These step-tip catheters also have the advantage of split-tip high flow characteristics. The step-tip on these catheters is designed for smooth, over-the-wire transitions during insertions and exchanges. The Arrow® Cannon® II Plus and Arrow Edge® products are split-tip catheters that can be tunneled using retrograde or antegrade technique, respectively.

Teleflex will also anticipate the upcoming availability of the new ARROW-Clark™ VectorFlow™ hemodialysis catheter. The ARROW-Clark™ VectorFlow™ catheter (available in both retrograde and antegrade insertion platforms) is a symmetrical tip tunneled hemodialysis catheter that is designed to reduce loss of lock solution, give sustained high flows, minimise recirculation and reduce the risk of thrombus accumulation due to platelet activation resulting from shear stress.

About Teleflex Incorporated
