

Teleflex to Present at European Association of Urology's 30th Annual Congress

March 19, 2015

WAYNE, Pa.--(BUSINESS WIRE)--Mar. 19, 2015-- Teleflex Incorporated (NYSE: TFX), a leading global provider of medical devices for critical care, urology and surgery, will showcase a number of urological and surgical products for customers in the hospital and home care markets at the European Association of Urology's ("EAU") 30th Annual Congress to be held in Madrid, Spain on March 20-24, 2015.

Teleflex will highlight its new hydrophilic coated flexible and stiff nitinol guidewires which are suitable for a wide range of urological applications. The guidewires' three layers - nitinol core with a black hydrophilic coated polyurethane jacket - enable precise handling during treatment, provide high visibility in dark endoscopy rooms and during x-ray images and facilitate application even when faced with narrow passages. Our comprehensive range offers nitinol guidewires with straight or angled tip, in 2 different lengths and 3 sizes.

Furthermore, Teleflex will present its irrigation system for ureterorenoscopy, which is a unique, comfortable, highly efficient and cost-effective device that ideally complements our Rusch® stone extraction instruments in order to facilitate diagnostics and ureterorenoscopic treatment of calculi in the upper urinary tract. The sensitive, hands-free irrigation system provides optimal pressure and flow control during both rigid and flexible ureterorenoscopy.

Apart from this, Teleflex will also focus on two intermittent catheter concepts. To fit modern women's lifestyles, Teleflex has developed the Liquick Pure® catheter, a new female catheter which is discreet, easy and convenient to use. Its handy packaging is not only functional, it also features a cosmetic look and feel. The SafetyCat Active® catheter is an innovative catheter system especially suited for active people. Providing a ready-to-use, precoated safety catheter in a convenient protective sheath, it allows for greater freedom, mobility and maximum comfort. The SafetyCat Active® catheter in its modern packaging is available for women, men and children.

The product portfolio Teleflex will present during the EAU includes other bladder management products and products for endourology. It is complemented by a range of surgical products.
