

Teleflex to Acquire Nordisk Aviation Products

September 11, 2007

Agreement Strengthens and Expands Teleflex Aerospace's Air Cargo Equipment and Services Business

LIMERICK, Pa.--(BUSINESS WIRE)--Sept. 11, 2007--Teleflex Incorporated (NYSE:TFX) announced today that the company has signed an agreement to acquire Nordisk Aviation Products a.s. (Nordisk), a world leader in developing, supplying and servicing containers and pallets for air cargo. A subsidiary of Norsk Hydro, with headquarters in Norway, Nordisk has annual revenues of over \$55 million and provides air cargo equipment to more than 150 airlines worldwide. This agreement strengthens and expands Teleflex's air cargo equipment capabilities. Terms of the agreement were not disclosed.

"Air cargo is key to the global economy and an important element of the Teleflex Aerospace portfolio," said John B. Suddarth, president of Teleflex Aerospace. "This transaction reflects our commitment to serving the airline industry with durable air cargo products that use state-of-the-art materials. We are also committed to leading the air cargo industry in aftermarket services."

"We are excited to add Nordisk's experienced management team, strong customer relationships, and global operations and service capabilities to our existing air cargo equipment business," Suddarth continued. "This transaction combines the air cargo container products of both Teleflex and Nordisk. These combined businesses will operate as Nordisk Aviation Products, a Teleflex Aerospace company, with Nordisk and Telair ULD product lines. Tomas Vigeland, the current president of Nordisk, will become managing director of the new business unit."

This transaction is expected to be completed in the fourth quarter, subject to customary closing conditions.

About Teleflex Aerospace

Teleflex Aerospace is a division of Teleflex Incorporated with more than 1,200 employees and operations in five countries, and customers worldwide. The division is composed of Telair International, which provides cargo-handling systems for both narrow body and wide-body aircraft, Telair California, which like Nordisk, provides cargo containment solutions and sophisticated products for actuation, and Airfoil Technologies International, which provides repair services for flight turbine components.
