

Teleflex to Focus on Enhanced Regional Anesthesia Solutions at 32nd European Society of Regional Anesthesia and Pain Therapy Congress (ESRA)

August 26, 2013

LIMERICK, Pa.--(BUSINESS WIRE)--Aug. 26, 2013-- Teleflex Incorporated (NYSE: TFX), a leading global provider of medical devices for critical care and surgery, will showcase its regional anesthesia and pain management products featuring improved practices during the ESRA Congress in Glasgow, UK, on September 4-7, 2013.

At the ESRA, September 4-7, Teleflex will highlight its diversified range of regional anesthesia and pain management products. The Company will place particular attention upon its newly designed FlexBlock™ catheterization sets, UltraQuik™ peripheral nerve block needles and the ambIT® PCA pump.

The FlexBlock™ catheterization sets provide clinicians with an echogenic stimulating / non-stimulating needle and the option of ultrasound techniques. The FlexBlock catheter's unique design offers a combination of ultrasound visibility, flexibility, excellent kink-resistance and a catheter tip that is designed to provide a predictable spread of anesthetic.

Arrow brand clinician inspired UltraQuik peripheral nerve block needles are designed to help increase overall block success when performing single-shot peripheral nerve blocks using ultrasound. To make it as straightforward as possible to identify the needle under ultrasound, the distal end of the needle cannula has five grooved rings.

The ambIT PCA pump ambulatory pain control systems for post-operative pain management from Summit provide flexible, accurate and safe therapy-specific configurations at the lowest cost-in use.

About Teleflex Incorporated
