

Teleflex to Highlight Safety and Education at 64th PGA of The New York State Society of Anesthesiologists

December 10, 2010

Products and Education designed to minimize risk and maximize outcomes

LIMERICK, Pa., Dec 10, 2010 (BUSINESS WIRE) --

Teleflex Incorporated will showcase a number of anesthesia products designed to help providers minimize risk and maximize outcomes for their patients at the 64th PostGraduate Assembly in Anesthesia (PGA) of The New York State Society of Anesthesiologists at the New York Marriott Marquis Hotel on December 10-14, 2010. These products include:

- **Arrow(R) StimuCath(R) Safety Kits:** StimuCath Safety Kits are designed to help facilities be more compliant with OSHA and JCAHO guidelines by including Sharps SafetyGlide(R) injection needles, locking Sharps Away II(TM) cup and medication labels combined with StimuCath, the #1 selling stimulating peripheral nerve block catheter in North America. StimuCath's wire-coil helix allows for accurate placement of block using stimulation and/or ultrasound. This unique catheter aids in improving block success by allowing physicians to confirm catheter location before, during and after placement.
- **Arrow FlexTip Plus(R) Epidural Catheter:** With its unique wire-embedded polyurethane design, the FlexTip Plus is the only epidural catheter clinically proven to minimize the risk of intravascular cannulation^{1,2,3} and effectively reduce transient paresthesia.⁴
- **Arrow SureBlock(TM) Spinal Anesthesia Trays:** Safety-engineered in compliance with the latest guidelines from OSHA and JCAHO, SureBlock trays feature the Sprotte(R) Spinal Needle. The Sprotte Spinal Needle, with its special polished finish, has been clinically proven to significantly reduce postdural puncture headaches.^{5, 6, 7, 8}

Educational Opportunities

Teleflex is dedicated to supporting physicians and advancing the practice of regional anesthesia through its clinical education program. At the PGA meeting on Friday, December 10, 2010 from 5:30- 8:00pm at the Marriott Marquis- Empire Complex, 7th Floor, Teleflex will host up to 150 physicians at a Corporate non-CME Educational Update Dinner Symposium: "Peripheral Nerve Blocks in Surgery--Improving Patient Outcomes". The speaker for this program is Dr. Krishna Boddu, MBBS, MD, DNB, FANZCA. Dr. Boddu is the Associate Professor, Department of Anesthesiology, Director- Division of Orthopaedic Anesthesia, Regional Anesthesia & Acute Pain Medicine Fellowship Program and Director, Regional Anesthesia & Acute Pain Medicine at The University of Texas Medical School at Houston & Memorial Hermann Hospital.

Additionally, Teleflex has partnered with several facilities throughout the United States to allow physicians to observe all aspects of establishing and running peripheral nerve block and acute pain management programs. Teleflex also sponsors a Pain Management Center of Excellence, which allows physicians to gain hands-on peripheral nerve block training at a world-class teaching institution.

All of these educational programs provide training on Teleflex's Arrow brand of regional anesthesia products.

"We look forward to presenting and meeting customers at the PGA as we build on our efforts to support physicians with products and education to address the concerns anesthesiologists face daily," said Cary Vance, Executive Vice President, Teleflex, North America. "Teleflex is pleased to continue to work with the anesthesia industry as a trusted resource and partner."
