

## Teleflex Receives FDA Clearance for 150 cm Length Arrow® GPSCath® Balloon Dilatation Catheters

July 29, 2014

*PTA balloon catheters combine angioplasty with targeted injection system in a single device for use in below the knee procedures.*

WAYNE, Pa.--(BUSINESS WIRE)--Jul. 29, 2014-- Teleflex Incorporated (NYSE: TFX), a leading global provider of medical devices for critical care and surgery, has announced that its subsidiary Hotspur Technologies, Inc. received FDA 510(k) clearance to market the Arrow® GPSCath® Balloon Dilatation Catheters designed for use with .014" guide wires and in 150 cm length. These novel products enable a variety of peripheral vascular procedures to be performed below the knee with one dual function catheter, potentially reducing procedure time, radiation dosage, and expense for both patients and medical professionals.

The Arrow® GPSCath® Balloon Dilatation Catheter is the first dual functional balloon dilatation catheter that combines angioplasty with the proprietary VisioValve™ Injection System. This innovative combination enables physicians to perform peripheral below the knee angioplasty and inject physician selected fluids, such as contrast media, while maintaining guide wire position.

"With this latest product approval we continue our commitment to enabling medical professionals to perform peripheral access procedures that simplify and improve the doctor and patient experience while reducing health care costs," said Benson Smith, Chairman, President & CEO of Teleflex. Added Smith, "We are excited to bring this innovative product for use in below the knee peripheral interventions to the market."
