Part II Organizational Action Attach additional statements if needed. See back of form for additional questions.

14 Describe the organizational action and, if applicable, the date of the action or the date against which shareholders' ownership is measured for the action ▶ Issuer made a cash distribution to its shareholders in excess of its current and accumulated earnings and profits. See Part II, line 15 for the amount of these distributions per share.

15 Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis ▶ The distribution reduced the basis of the security in the hands of the US taxpayers as follows:

Date	Per Share Reduction of Basis
<u>12/16/2024</u>	<u>\$0.04</u>

16 Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates ▶ When a cash distribution (or other distribution of property) is made by a corporation, it is treated as a taxable dividend to the extent of the current and accumulated earnings and profits ("E&P") of that corporation at the date of the distribution or, in certain cases, at the end of the tax year in which the distribution was made. In order to determine what portion of this cash distribution should be treated as a taxable dividend versus return of capital, Issuer completed a computation of accumulated E&P for the tax year ended December 31, 2024. According to these computations, Issuer had a deficit of current and accumulated E&P. As a result, the distribution is expected to be a nontaxable distribution and result in a reduction in basis of up to \$0.04 per share.
