

Proven to **perform.**

The background of the entire page is an aerial photograph taken from a high altitude. A bright sun is setting on the left side, creating a golden glow over a vast sea of white clouds. A long, diagonal streak of white contrails, illuminated from below, extends from the top left towards the center right. At the end of this streak, a small silhouette of an airplane is visible, flying towards the right. The sky transitions from a deep blue at the top to a lighter blue and then to the golden light of the sunset near the horizon.

2025 ANNUAL REPORT

Who we are.

Searing heat. Crushing stress. Blistering corrosion. Maybe all the above. No matter the challenge, we are honored to be our customers' first call. That's because at ATI, we're solving the world's challenges through materials science.

ATI is a global producer of high-performance materials and solutions for the aerospace and defense markets, with emerging opportunities for specialty energy. Built on the strong foundation of our legacy companies, we are a market-driven powerhouse: advanced, innovative, highly sophisticated and quality driven.

When you need materials to go further and faster, in the most extreme conditions, **ATI is proven to perform.**

Core Markets

AEROSPACE

You can't fly without ATI—our materials are on virtually every commercial aircraft flying today—engines and airframes.

DEFENSE

Our materials power and protect the armed services in the air, in the sea and on the ground, and help to push the limits of space.

SPECIALTY ENERGY

Our alloys fuel electrical energy in nuclear reactors, renewables and land-based turbines. Our oil and gas materials fight heat and corrosion deep in the sea.

ATI FINANCIAL OVERVIEW

In millions, except per share amounts	2023	2024	2025
Sales	\$ 4,174	\$ 4,362	\$ 4,587
Gross profit	\$ 803	\$ 898	\$ 1,007
Restructuring charges (credits)	\$ 8	\$ 4	\$ (2)
Operating income	\$ 466	\$ 609	\$ 641
Results attributable to ATI:			
Net income	\$ 411	\$ 368	\$ 404
Earnings per share	\$ 2.81	\$ 2.55	\$ 2.85
Non-GAAP financial results:			
Adjusted EBITDA ^(a)	\$ 635	\$ 729	\$ 859
Adjusted net income attributable to ATI ^(a)	\$ 373	\$ 355	\$ 460
Adjusted earnings per share ^(a)	\$ 2.56	\$ 2.46	\$ 3.24

BUSINESS SEGMENT RESULTS

High Performance Materials & Components (HPMC)	2023	2024	2025
Sales	\$ 2,120	\$ 2,278	\$ 2,442
Segment EBITDA	\$ 434	\$ 461	\$ 576
As percentage of segment sales	20.5%	20.3%	23.6%

2025 HPMC by quarter	Q1	Q2	Q3	Q4
Sales	\$ 584	\$ 609	\$ 603	\$ 646
Segment EBITDA	\$ 131	\$ 144	\$ 146	\$ 155
As percentage of segment sales	22.4%	23.7%	24.2%	24.0%

Advanced Alloys & Solutions (AA&S)	2023	2024	2025
Sales	\$ 2,054	\$ 2,084	\$ 2,146
Segment EBITDA	\$ 277	\$ 321	\$ 349
As percentage of segment sales	13.5%	15.4%	16.3%

2025 AA&S by quarter	Q1	Q2	Q3	Q4
Sales	\$ 560	\$ 532	\$ 523	\$ 531
Segment EBITDA	\$ 83	\$ 77	\$ 90	\$ 99
As percentage of segment sales	14.9%	14.4%	17.3%	18.5%

(a) Please see pages 7-8 for a reconciliation of adjusted results with the financial results prepared in accordance with accounting principles generally accepted in the U.S.

To our shareholders, customers, and employees

ATI today is a more focused, resilient and competitively advantaged enterprise than at any point in the past decade.

The year 2025 marked another year of disciplined execution and accelerating performance. Revenue reached \$4.6 billion, our highest level since 2012. Adjusted EBITDA increased 18% year over year, and free cash flow grew 53%. We returned \$470 million to shareholders while continuing to invest in high-return growth initiatives.

These outcomes reflect a deliberate multi-year transformation—one that has strengthened our portfolio, sharpened our strategic focus, and expanded our earnings capacity.

A Differentiated, High-Performance Portfolio

Our portfolio continues to evolve toward structurally attractive markets where performance, reliability, and technical depth matter most. In 2025, Aerospace and Defense represented 68% of full-year sales, up from 62% in 2024. This progression is intentional and continues to strengthen our mix.

ATI participates on every major commercial airframe and engine platform in production today and continues to expand across critical defense systems. As next-generation engines enter service, our content per engine continues to increase. We now produce six of the seven most advanced nickel alloys used in modern jet engines—reinforcing our leadership in the most demanding hot-section applications.

These materials are engineered into platforms with long qualification cycles and high technical barriers. Supported by long-term agreements, they provide visibility, pricing alignment and durable customer partnerships.

Defense markets remain compelling, supported by global modernization initiatives and sustained demand for advanced materials. ATI's defense revenue again grew at a double-digit rate in 2025, reflecting both program strength and customer confidence in our execution.

Beyond Aerospace and Defense, Specialty Energy continues to expand. Demand for advanced power infrastructure—including nuclear and land-based gas turbine applications—is strengthening. ATI's differentiated capabilities in zirconium, hafnium and other specialty alloys position us well in these high-barrier markets.

Disciplined Operating Model

Our operating model is designed to build advantage over time.

Differentiated products drive strategic, long-term agreements. Those agreements support margin durability and cash flow strength. That cash flow is reinvested with discipline—expanding capacity, improving reliability and deepening our role across critical customer platforms.

In 2025, we unlocked additional capacity through productivity, yield, and reliability improvements, delivering measurable gains with limited incremental capital. When we invest, it is targeted, contract-aligned, and evaluated against rigorous return criteria.

This reinforcing cycle continues to strengthen ATI's competitive position year after year.

Balanced Capital Allocation

Capital allocation remains balanced and consistent. Since 2022, we have repurchased approximately \$1 billion of shares, including \$470 million in 2025. Our framework prioritizes reinvestment in high-return growth, maintenance of a strong balance sheet and return of capital to stockholders.

Stock performance over recent years reflects sustained operational progress and increasing confidence in ATI's strategic direction.

Positioned for Continued Growth

We enter 2026 with expanding margins, improving cash generation, and strong demand across our core markets. Aerospace production rates are rising. Defense modernization continues. Specialty Energy is gaining scale.

ATI stands today as a premier Aerospace and Defense materials leader—positioned at the center of the world’s most demanding platforms. Aerospace and Defense represented 68% of our revenue in 2025—the highest mix in ATI’s history.

Our long-term agreements provide visibility. Our differentiated technologies provide competitive advantage. And our team continues to execute with discipline and focus.

None of this progress would be possible without the dedication of our ATI team. Across our operations, our employees deliver safely, reliably and with high quality every day. Their commitment to continuous improvement strengthens our operational excellence and enhances the value we create for customers and shareholders.

ATI today is more focused, more profitable, and structurally stronger, and we continue to build from that foundation. We are expanding earnings power, deepening our competitive advantage, and aligning capital with opportunity.

We remain confident in the path ahead and committed to delivering sustained, long-term value.

At the conclusion of the Annual Meeting, I will assume the role of Board Chair. I appreciate Bob Wetherbee’s service during his tenure and his role in supporting ATI’s strategic repositioning. We will continue building on that progress with disciplined execution and a clear focus on long-term value creation. On behalf of the ATI team, thank you for your continued trust and support.

Sincerely,

Kimberly A. Fields
President and Chief Executive Officer

MESSAGE FROM THE EXECUTIVE CHAIRMAN

Dear Shareholders, Customers and Employees,

The past year has been one of remarkable growth and transformation for ATI, including for its Board of Directors, which welcomed new members Elizabeth Lund and Jean Lydon-Rodgers. Each brings to the Board career-spanning experience as a top aerospace industry leader.

As I prepare to retire, I pass chairmanship of the Board to Kim Fields with confidence. She will lead the Board with the same unwavering commitment to excellence that she has demonstrated as President and CEO. Your Board remains dedicated to advocating for our investors’ interests and concerns, and looks forward to continuing dialogue with you.

All the best,

Robert S. Wetherbee
Executive Chairman

ATI is Proven to Perform: Enhancing lives by advancing aerospace; protecting our world; powering energy.

Advancing Aerospace

Advancing what’s possible: more powerful and capable jet engines, space rockets, aerostructures.

- Our commitment to quality makes flight safer and more reliable, instilling confidence with every takeoff and landing.
- We partner with aerospace leaders to pioneer the future of aviation.

Protecting Our World

ATI materials safeguard defense systems, infrastructure and critical industries.

- ATI builds resilience into the technologies that protect nations and people.
- Our materials are trusted to perform under mission-critical conditions.

Powering Energy

ATI’s materials are powering more efficient and reliable energy.

- Our high-performance materials are crucial for expansion of nuclear, hydrogen and renewables.
- We’re helping to meet increasing electrical energy demand driven by AI.

Materials Science

ATI is built on a foundation of materials science and innovation. We’re solving the world’s most difficult challenges, developing materials no one else can. Innovation and progress set us apart from our competitors. Our deep expertise results in reliability and performance that improve everyday lives.

Our commitment to integrity

We at ATI are committed to a strong governance program. We have long believed that integrity is vitally important to the success of our Company. Our Corporate Governance Guidelines, along with the charters of the Board committees, provide the framework for the corporate governance of ATI. These Guidelines reflect the Board's commitment to oversee the effectiveness of decision-making at the Board and management levels, with a view toward achieving ATI's strategic objectives. This information, and more about our corporate governance, is available on our website, [ATImaterials.com](https://www.atimaterials.com).

Our Code of Conduct applies to all directors, officers, employees, agents and consultants and sets forth clear standards to guide the conduct of our daily affairs. Our commitment is to reflect the highest standards of ethical performance in our dealings with all of our stakeholders.

Our compliance program incorporates policies to address key compliance areas for ATI, including antitrust, ethics, environmental compliance, anti-bribery, export compliance and insider trading, as well as cybersecurity matters and various human resources issues, including workplace respect and safety. ATI provides annual compliance training to its employees on a variety of these topics.

We understand that confidence in our Company is in large measure dependent upon the reliability and transparency of our financial statements, including maintaining effective internal control over financial reporting. Accordingly, our Code of Conduct recognizes our responsibility for maintaining accurate records that support timely disclosures that fairly reflect our financial position and results of operations.

We encourage employees to speak up about any concerns they may have. The ATI Speak Up Line, which provides confidential, secure and anonymous reporting capability, is available to all employees 24 hours a day, seven days a week. In addition, our Chief Compliance Officer, our Human Resources Department, our Law Department and our managers are confidential resources for employees to surface their concerns without fear of retaliation. Building and maintaining trust, respect and communication among our employees is essential to the effectiveness of our governance program.

ATI Inc.

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

25-1792394
(I.R.S. Employer
Identification Number)

2021 McKinney Avenue
Dallas, Texas
(Address of principal executive offices)

75201
(Zip Code)

Registrant's telephone number, including area code: (800) 289-7454

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol	Name of each exchange on which registered
Common stock, par value \$0.10	ATI	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark whether the Registrant is well known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the Registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/> (Do not check if a smaller reporting company)	Smaller reporting company	<input type="checkbox"/>
		Emerging growth company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report.

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statement.

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b).

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

On January 30, 2026, the Registrant had outstanding 136,936,299 shares of its Common Stock.

The aggregate market value of the Registrant's voting stock held by non-affiliates at June 29, 2025 was approximately \$12.0 billion, based on the closing price per share of Common Stock on June 29, 2025 of \$86.80 as reported on the New York Stock Exchange. Shares of Common Stock known by the Registrant to be beneficially owned by directors and officers of the Registrant subject to the reporting and other requirements of Section 16 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), are not included in the computation. The Registrant, however, has made no determination that such persons are "affiliates" within the meaning of Rule 12b-2 under the Exchange Act.

PART I

Item 1. Business

The Company

ATI Inc. is a Delaware corporation with its corporate headquarters located at 2021 McKinney Avenue, Suite 1100, Dallas, TX 75201, telephone number (800) 289-7454, Internet website address www.atimaterials.com. Our Internet website and content contained therein or connected thereto are not intended to incorporate into this Annual Report on Form 10-K. References to “ATI,” the “Company,” “the Registrant,” “we,” “our” and “us” and similar terms mean ATI Inc. and its subsidiaries, unless the context otherwise requires.

When used in this Annual Report on Form 10-K, unless the context otherwise requires or unless otherwise specified, any reference to “year” is to the Company’s fiscal year. The Company follows a 4-4-5 or 5-4-4 fiscal calendar, whereby each fiscal quarter consists of thirteen weeks grouped into two four-week months and one five-week month, and its fiscal year ends on the Sunday closest to December 31. Fiscal years 2025, 2024 and 2023 ended on December 28, 2025, December 29, 2024, and December 31, 2023, respectively. All fiscal years presented include 52 weeks of operations.

Our Business

ATI produces specialty materials, highly differentiated by our materials science expertise and advanced process technologies. Our mission is to solve the world’s challenges through materials science. Aerospace & defense, our largest end markets, represent approximately 68% of total sales, led by products for jet engines and airframes in addition to a wide range of defense applications. Additionally, we have a strong presence the specialty energy market and also serve customers in several other markets including conventional energy, medical, electronics and other industrial markets.

We operate in two business segments: High Performance Materials & Components (HPMC) and Advanced Alloys & Solutions (AA&S). HPMC produces a wide range of high performance materials, components, and advanced metallic powder alloys. These products are made from nickel-based alloys and superalloys, titanium and titanium-based alloys, and a variety of other specialty materials. HPMC’s capabilities range from cast/wrought and powder alloy development to production of highly engineered finished components, and 3D-printed aerospace products. The HPMC segment’s primary focus is on maximizing jet engine materials and components growth, with approximately 92% of its revenue derived from the aerospace & defense markets, including nearly 68% from products for commercial jet engines. Commercial aerospace products have been the main source of sales and EBITDA growth for HPMC over the last several years and are expected to continue to drive HPMC and overall ATI results in the future. HPMC has also experienced strong growth in defense products, with fiscal year 2025 sales growth of 24%. Sales of defense products comprise almost 11% of HPMC’s total sales.

The AA&S segment produces nickel-based alloys, titanium and titanium-based alloys, and specialty alloys, including zirconium, hafnium, and niobium, in a variety of forms including plate, sheet, and strip products. AA&S focuses on high-value materials that are utilized in technically challenging and extreme environments, which require materials that can withstand extreme heat, radiation and corrosion. AA&S continued its focus of growing sales to the aerospace & defense end markets, with fiscal year 2025 sales to those markets increasing 15%. Aerospace & defense now comprises approximately 41% of AA&S total revenue. AA&S also serves customers across several other markets, notably specialty energy and conventional energy, as well as electronics and certain industrial markets.

End-use markets for our products include:

Aerospace & Defense. We are a world leader in the production of specialty materials and components for both commercial and military jet engines and airframes, supporting customer needs for initial build requirements and for spare parts. We believe that through alloy development, internal growth efforts, and long-term supply agreements on current and next-generation jet engines and airframes, we are well-positioned with a fully qualified asset base to meet the expected multi-year demand growth from the commercial aerospace market.

Nickel-based alloys and superalloys remain extremely strong at high temperatures and resist degradation under extreme conditions. Next-generation jet engines use advanced nickel-based superalloys and metallic powder alloys to enable increased fuel efficiency requirements that require hotter-burning engines. Typical aerospace applications for the nickel-based alloys and superalloys and advanced metallic powders we produce include jet engine disks, blades, vanes, rings, casings and shafts. Our specialty materials are also used in the manufacture of aircraft landing gear and structural components.

We are a global industry leader in iso-thermal and hot-die forging technologies for advanced aerospace components. We produce highly sophisticated components that have differing mechanical properties across a single product unit and are highly resistant to fatigue and temperature effects. Our precision forgings are used for jet engine components, structural components

for aircraft, helicopters, space propulsion, and other demanding applications. ATI provides a full range of post-production inspection and machining with the certified quality needed to meet demanding application requirements.

Additionally, the products and components made from the titanium and titanium-based alloys we produce, such as jet engine components including disks, blades and vanes, and airframe components such as structural members, landing gears, and hydraulic systems, are also critical in aerospace applications. These materials and components possess an extraordinary combination of properties that help to increase jet engine fuel efficiency and product longevity, including superior strength-to-weight ratios, elevated temperature resistance, low coefficient of thermal expansion, and extreme corrosion resistance.

We produce a wide-range of military-grade materials including titanium, nickel-based alloys, zirconium, tungsten, and hafnium, as well as components for our defense customers. Our materials and components are used for many applications, including naval nuclear products, military jet engines, fixed wing and rotorcraft products, armor applications and munitions materials. In fiscal year 2025, sales to our defense end market increased by 14% and we expect continued growth in this important end market in the coming years.

We continuously seek to develop and manufacture innovative new alloys to better serve the needs of the aerospace & defense markets, and several of the alloys we produce have won significant share in current and next-generation jet engines. ATI's metallic powder technology delivers alloy compositions and refined microstructures that offer increased performance and longer useful lives in high-temperature aerospace environments, as well as improved jet engine efficiency. We continue to increase our production capacity for advanced metallic powders for use in next-generation aerospace products, including additive manufacturing applications. ATI also has a dedicated additive manufacturing and post-processing facility to tap into significant aerospace & defense demand for additively manufactured laser powered bed fusion parts, serving both commercial and defense customers.

Energy. Our products are sold to a variety of end customers in the end-use energy market, with a focus on specialty energy, which includes nuclear power generation and gas turbines. Our high-performance products meet a wide range of needs for protection, conductivity, thermal performance and corrosion resistance. ATI's solutions for the energy industry include specialty materials for solar, geothermal and wind applications, reactor-grade zirconium and hafnium alloys, pioneered by ATI, for nuclear plants; and corrosion-resistant alloys for water systems and scrubbers in coal plants. We believe clean energy needs, the electrification of developing countries, and energy requirements to support data center growth will continue to drive demand for our specialty materials and products for use in these industries over the long term.

Further, we are an industry pioneer in producing nuclear reactor fuel cladding and structural components utilizing zirconium and hafnium alloys for use in nuclear power generation. We also are a technology leader for large diameter components used in natural gas land-based turbines for power generation, and our alloys are used for alternative energy generation, including solar, fuel cell, wind and geothermal applications.

Both of our business segments also produce specialty materials that are critical to the conventional energy market, which includes the oil and gas and chemical and hydrocarbon processing industries. The environments in which oil and gas can be found in commercial quantities have become more challenging, involving deep offshore wells, high pressure and high temperature conditions in sour wells, and other unconventional sources. These challenging offshore environments are located further off the continental shelf, including locations in arctic and tropical waters where drilling is more difficult than previously-sourced locations. Our specialty materials, including nickel-based alloys, duplex alloys and other specialty alloys, have the strength and corrosion-resistant properties necessary to meet these challenging operating conditions. We enable our customers' success in these applications by developing and producing specialty materials for equipment that can operate for up to 30 years in these harsh environments.

Other Markets. We also serve several other customer end markets, including electronics, medical, and industrial. Customers in the medical end market use ATI's advanced specialty materials in medical device products that enhance the quality of lives around the world. Manufacturers of magnetic resonance imaging (MRI) devices rely on our niobium superconducting wire to help produce electromagnetic fields that allow physicians to safely scan the body's soft tissue. Our specialty alloys also are used for replacement knees, hips and other prosthetic devices. The use of our alloys in these replacement devices offers the potential for longer product lifespans versus previous implant generations. Our biocompatible nickel-titanium (nitinol) shape memory alloy is used for stents to support collapsed or clogged blood vessels.

In the electronics market, nickel alloys and Precision Rolled Strip® (PRS) from Specialty Rolled Products (SRP) and our Asian PRS joint venture are used in computers and smart phones. PRS is selected for electronics and communications applications based on corrosion resistance, strength, wear resistance, electrical resistivity or thermal expansion. In addition, metal precursors – which use chemicals produced by ATI, such as hafnium – have a variety of important applications in consumer and industrial electronics.

Finally, ATI's materials and products are used across a wide range of industrial markets, including automotive and construction and mining.

Business Segments

Our two business segments accounted for the following percentages of total revenues of \$4.6 billion, \$4.4 billion, and \$4.2 billion for the fiscal years ended December 28, 2025, December 29, 2024, and December 31, 2023, respectively.

	Fiscal Year Ended		
	December 28, 2025	December 29, 2024	December 31, 2023
High Performance Materials & Components	53 %	52 %	51 %
Advanced Alloys & Solutions	47 %	48 %	49 %

Information with respect to our business segments is presented below and in Note 18 of the notes to the consolidated financial statements.

High Performance Materials & Components Segment

Our HPMC segment produces a wide range of high performance specialty materials, parts and components for our aerospace & defense, specialty energy, and medical markets, with approximately 92% of fiscal year 2025 revenues derived from the aerospace & defense markets. Most of the products in this segment are sold directly to end-use customers, and a substantial portion of our HPMC segment products are sold under multi-year agreements. Demand for our products is driven primarily by the commercial aerospace cycle. Large aircraft and jet engines are manufactured by a small number of companies, such as The Boeing Company (Boeing), Airbus S.A.S. (an Airbus Group company) including the former operations of Bombardier Aerospace, and Empresa Brasileira de Aeronáutica S.A. (Embraer) for airframes. GE Aerospace, Rolls-Royce plc, Pratt & Whitney (a division of Raytheon Technologies Corporation), and Safran Aircraft Engines. These companies and their suppliers form a substantial part of our customer base in this business segment. We have long-term agreements (LTAs) in place with most major aerospace market original equipment manufacturers (OEMs). The loss of one or more of our customers in the aerospace or defense markets could have a material adverse effect on ATI's results of operations and financial condition (see Item 1A. Risk Factors).

Within this segment, our products are manufactured from a wide range of advanced materials including metallic powder alloys made from nickel-based alloys and superalloys, titanium and titanium-based alloys, and a variety of other specialty materials. These materials are made into a variety of product forms that include precision forgings, machined parts and others. We are integrated across these alloy systems in melt, forging, finishing, testing and machining processes.

Principal competitors in the HPMC segment include: Berkshire Hathaway Inc., for nickel-based alloys and superalloys and specialty steel alloys, titanium and titanium-based alloys, and precision forgings through its ownership of Precision Castparts Corporation and subsidiaries; Howmet Aerospace Inc., for titanium and titanium-based alloys; Carpenter Technology Corporation for legacy nickel-based alloys and superalloys and specialty steel alloys; and Aubert & Duval for precision forgings.

Advanced Alloys & Solutions Segment

Our AA&S segment produces nickel-based alloys, titanium and titanium-based alloys, and specialty alloys in a variety of forms, including plate and sheet products. The major end markets for our flat rolled products are aerospace & defense, specialty and conventional energy, automotive, medical and electronics markets. The operations in this segment include our Specialty Rolled Products and Specialty Alloys & Components businesses in addition to our Shanghai STAL Precision Stainless Steel Company Limited (STAL) PRS joint venture in China, in which we hold a 60% interest.

Nickel-based alloys, titanium, and stainless sheet products are used in a wide variety of industrial and consumer applications. In fiscal year 2025, approximately 50% of our stainless sheet products by volume were sold to independent service centers, which have slitting, cutting or other processing facilities, with the remainder sold directly to end-use customers.

Nickel-based alloy, titanium, and specialty alloy plate products are primarily used in aerospace & defense, and corrosion and industrial markets. In fiscal year 2025, approximately 40% of our plate products by volume were sold to independent service centers, with the remainder sold directly to end-use customers.

Principal competitors for nickel-based alloys, superalloys, and specialty alloys produced by AA&S include Haynes International and VDM Metals GmbH, a subsidiary of Acerinox S.A.

Raw Materials and Supplies

Substantially all raw materials and supplies required in the manufacture of our products are available from more than one supplier, and the sources and availability of raw materials essential to our businesses are currently adequate. The principal raw materials we use in the production of our specialty materials are scrap (including iron-, nickel-, chromium-, titanium-, and molybdenum-bearing scrap), nickel, titanium sponge, zirconium sand and sponge, ferrochromium, ferrosilicon, molybdenum and molybdenum alloys, manganese and manganese alloys, cobalt, niobium, vanadium, hafnium and other alloying materials. While we enter into raw materials futures contracts from time to time to hedge exposure to price fluctuations, such as for nickel,

we cannot be certain that our hedge position adequately reduces exposure. We believe that we have adequate controls to monitor these contracts, but we may not be able to accurately assess exposure to price volatility in the markets for critical raw materials.

We source our raw materials through a variety of producers located throughout the world, including the United States (U.S.). The following is a summary of the primary source countries of raw materials that play an important role in our products:

- Nickel: Canada, Norway, Japan, Finland, and South Africa.
- Zirconium: U.S. and China.
- Hafnium: U.S. and China.
- Cobalt: Norway and Japan.
- Chromium: the United Kingdom (U.K.), South Africa, Germany and Turkey.
- Niobium: Brazil.
- Molybdenum: U.S., Brazil, and China.
- Titanium sponge: Japan, Kazakhstan, Saudi Arabia, and China

Some raw materials, such as nickel, titanium sponge, cobalt, and ferrochromium, are mostly available from foreign sources in countries that may be subject to unstable political and economic conditions, which could disrupt supplies or affect the price of these materials. Further, changes in global trade policies could materially impact the total cost of imported materials.

Certain key supplies used in melting and other processing operations, such as graphite electrodes and industrial gases including helium and argon, are from time-to-time limited in availability and may be subject to significant price inflation. We enter into long-term supply contracts where possible to ensure an adequate supply of these products. However, overall industry shortages may impact our operations and scheduling.

Export Sales and Foreign Operations

International sales represent approximately 42% of our total annual sales, with direct export sales by our U.S.-based operations to customers in foreign countries accounting for approximately 34% of our total sales. Our overseas sales, marketing and distribution efforts are aided by our international marketing team or by independent representatives throughout the world. Changes in global trade policies may negatively impact our international sales if export or import tariffs increase the cost of our products.

Our HPMC segment has manufacturing capabilities for precision forging and machining in Poland, primarily serving the aerospace, construction & mining, and transportation markets. Within our AA&S segment, our Asian joint venture makes PRS products, which enables us to offer these products more effectively to markets in China and other Asian countries.

Backlog, Seasonality and Cyclical

Our backlog of confirmed orders was approximately \$3.7 billion at December 28, 2025 and \$3.9 billion at December 29, 2024. We expect that approximately 70% of confirmed orders on hand at December 28, 2025 will be filled during fiscal year 2026. Our HPMC segment's backlog of confirmed orders was approximately \$3.1 billion at December 28, 2025 and \$3.3 billion at December 29, 2024. We expect that approximately 70% of the confirmed orders on hand at December 28, 2025 for this segment will be filled during fiscal year 2026. Our AA&S segment's backlog of confirmed orders was approximately \$0.6 billion at December 28, 2025 and December 29, 2024. We expect that approximately 90% the confirmed orders on hand at December 28, 2025 for this segment will be filled during fiscal year 2026.

Demand for our products is cyclical over longer periods because specialty materials customers generally operate in cyclical industries and are subject to changes in general economic conditions and other factors both external and internal to those industries. Historically, we have experienced modest seasonal weakness in the third quarter of each fiscal year. This is mostly due to planned outages by certain European customers, particularly those in the aerospace supply chain, that are typically scheduled for the late summer months each year.

Research, Development and Technical Services

We believe that our research and development capabilities give ATI a competitive advantage in developing new products and manufacturing processes that contribute to the long-term profitable growth potential of our businesses. We conduct research and development at our various operating locations both for ourselves and, on a limited basis, for customers on a contract basis. Research and development expenditures for the fiscal years ended December 28, 2025, December 29, 2024, and December 31, 2023 included the following:

<i>(In millions)</i>	Fiscal Year Ended		
	December 28, 2025	December 29, 2024	December 31, 2023
Company-Funded:			
High Performance Materials & Components	\$ 10.1	\$ 10.4	\$ 9.6
Advanced Alloys & Solutions	10.3	8.4	10.2
Corporate	0.9	0.8	0.9
	<u>21.3</u>	<u>19.6</u>	<u>20.7</u>
Customer-Funded:			
High Performance Materials & Components	1.9	2.5	1.4
Total Research and Development	<u>\$ 23.2</u>	<u>\$ 22.1</u>	<u>\$ 22.1</u>

Our research, development and technical service activities are closely interrelated and directed toward development of new products, improvement of existing products, quality assurance, development of new manufacturing methods, improvement of existing manufacturing methods, and reducing our manufacturing costs.

We own hundreds of U.S. patents, many of which are also filed under the patent laws of other nations. Although these patents, as well as our numerous trademarks, technical information, license agreements, and other intellectual property, have been and are expected to be of value, we believe that the loss of any single such item or technically related group of such items would not materially affect the conduct of our business.

Environmental, Health and Safety Matters

We are subject to various domestic and international environmental laws and regulations that govern the discharge of pollutants and disposal of wastes, and which may require that we investigate and remediate the effects of the release or disposal of materials at sites associated with past and present operations. We could incur substantial cleanup costs, fines, civil or criminal sanctions, third party property damage or personal injury claims as a result of violations or liabilities under these laws or non-compliance with environmental permits required at our facilities. We are currently involved in the investigation and remediation of a number of our current and former sites as well as third party sites.

We consider environmental compliance to be an integral part of our operations. We have a comprehensive environmental management and reporting program that focuses on compliance with applicable federal, state, regional and local environmental laws and regulations. Each operating company has an environmental management system that includes mechanisms for regularly evaluating environmental compliance and managing changes in business operations while assessing environmental impact.

Safety is one of our core values. We strive for a zero injury culture committed to the safety of our people, our products, and the communities in which we operate. Nearly all of our domestic employees are working in an ATI facility that has achieved its ISO 45001 certification.

Human Capital Management

We believe that our people and culture are a competitive differentiator. We attract, develop, and retain purpose and performance-driven leaders. Those leaders build teams with diverse, empowered and fulfilled employees who want to stay and grow with the company. As of December 28, 2025, we employed approximately 7,600 active employees, 15% of whom are located outside the U.S. across 15 countries.

Our Culture: At the center of our commitment to excellence are our values, which drive how we succeed: Accountability, Integrity, Innovation, Safety & Sustainability, and Teamwork & Respect.

We continuously strive to cultivate and support a highly engaged and productive workforce. We actively seek opportunities for listening and communication by our CEO and other senior executive leaders with our employees. Periodically, we conduct confidential company-wide engagement surveys that offer our employees the ability to provide feedback, which supports employee engagement and our overall human capital strategy.

Our long tradition of innovation and operational excellence demands the contributions of leaders and team members with a wide array of characteristics, backgrounds, experiences, knowledge, and skills. We believe our business success is intricately tied to cultivating a culture in which all members of our workforce are included and empowered to do their best work.

Governance: The Compensation and Leadership Development Committee of our Board oversees the Company's human capital management policies and procedures, including its workforce and professional development programs, and is responsible for establishing and administering the policies governing annual compensation and long-term compensation to ensure the policies are designed to align compensation with our overall business strategy and performance to link to the interests of our stockholders.

Our Code of Conduct establishes the baseline requirements of our integrity and compliance program and promotes an environment where everyone is treated ethically and with respect. It outlines our pledge to recognize the dignity of each individual, respect each employee, provide compensation and benefits that are competitive, promote self-development through training, and value diversity of perspectives and ideas. Employees complete Business Conduct and Ethics training and, where permitted by law, are asked to certify each year that they will comply with the Code.

Talent Acquisition: Our performance and development process is integrated in the ATI business strategy, and is a key component to recruiting, hiring, and developing top-performing talent. We believe in providing an assessment and interviewing process that encourages people from all backgrounds to consider ATI. We partner with top academic institutions that have programs relevant to our business, external professional organizations, trade schools and high schools to identify materials science, STEM and other relevant expertise.

Learning and Development: Developing talent and leaders at all levels of the organization is critical to our long-term success. We have leadership and management development programs as well as broad learning opportunities for our employees to support their career growth and advance their skills. We focus on growing top talent across the enterprise and enhancing Front Line Leader development. Additionally, we maintain a formal talent review process to work in connection with performance management for systematic career development and succession planning at both the individual employee and organizational levels.

Compensation and Benefits: We provide market-based competitive compensation through our salary, annual incentive and long-term incentive programs and robust benefits packages that promote the well-being of our employees across all aspects of their lives. Eligible employees are compensated for their contributions to achievement of our goals with both short-term cash incentives and long-term equity-based incentives. We believe the structure of our compensation packages provides the appropriate incentives to attract, retain, and motivate our employees.

Our well-being focus addresses physical, mental, financial, and individual needs, providing benefits and resources to help employees and their families be their best, both personally and professionally. We have implemented several campaigns to promote well-being and help provide visibility to resources and available benefits. We offer Employee Assistance Programs with therapy sessions to employees and family members, comprehensive mental health benefits to those enrolled in the U.S. medical plan, virtual mental health options and navigation tools to improve access and speed of care, and preventive/mental health resilience programs.

Labor Relations and Collective Bargaining: Approximately 35% of our workforce is covered by various collective bargaining agreements (CBAs), predominantly with the United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied & Industrial Service Workers International Union (USW). On April 22, 2025, we reached agreements with the USW for new CBAs that cover approximately 1,100 USW represented full-time employees within our AA&S operations for a six-year term that extends through February 28, 2031.

Available Information

Our Internet website address is www.atimaterials.com. Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as well as proxy and information statements and other information that we file, are available free of charge through our Internet website as soon as reasonably practicable after we electronically file such material with, or furnish such material to, the U.S. Securities and Exchange Commission (“SEC”). Our Internet website and the content contained therein or connected thereto are not intended to be incorporated into this Annual Report on Form 10-K. The SEC maintains an Internet website at www.sec.gov, which also contains reports, proxy and information statements and other information that we file electronically with the SEC. We routinely post important information on our website, www.atimaterials.com, in the “Investors” section. We also may use our website as a means of disclosing material, non-public information and for complying with our disclosure obligations under Regulation FD. Accordingly, investors should monitor the Investors section of our website, in addition to following our press releases, SEC filings, public conference calls, presentations and webcasts. The information contained on, or that may be accessed through, our website is not incorporated by reference into, and is not a part of, this document.

Item 1A. Risk Factors

There are inherent risks and uncertainties associated with our business that could adversely affect our operating performance and financial condition. Set forth below are descriptions of those risks and uncertainties that we currently believe to be material, but the risks and uncertainties described are not the only risks and uncertainties that could affect our business. See the discussion under “Forward-Looking Statements” in Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations, in this Annual Report on Form 10-K.

RISKS RELATED TO CYCLICAL NATURE OF OUR BUSINESS

Cyclical Demand for Products. The cyclical nature of the industries in which our customers operate causes demand for our products to fluctuate, creating potential uncertainty regarding future profitability. Various changes in general economic conditions may affect the industries in which our customers operate. These changes could include decreases in the rate of consumption or use of our customers' products due to economic downturns. Other factors that may cause fluctuation in our customers' positions are changes in market demand, lower overall pricing due to domestic and international overcapacity, currency fluctuations, lower priced imports and increases in use or decreases in prices of substitute materials. As a result of these factors, our profitability has been and may in the future be subject to significant fluctuation.

Risks Associated with the Commercial Aerospace Industry. A significant portion of our sales represent products sold to customers in the commercial aerospace industry. Fulfilling contractual arrangements to provide various products to customers in this industry often involves meeting highly exacting performance requirements and product specifications, and our failure to meet those requirements and specifications on a timely and cost-efficient basis could have a material adverse effect on our results of operations, business and financial condition. The commercial aerospace industry has historically been cyclical due to factors both external and internal to the airline industry. These factors include general economic conditions, airline profitability, consumer demand for air travel, varying fuel and labor costs, changes in projected build rates, price competition, and international and domestic political conditions such as military conflict and the threat of terrorism. The length and degree of cyclical fluctuation are influenced by these factors and therefore are difficult to predict with certainty. Demand for our products is subject to these cyclical trends. Cyclical and event-driven downturns in the commercial aerospace industry have had, and may in the future have, an adverse effect on the prices at which we are able to sell our products, and our results of operations, business and financial condition could be materially adversely affected.

Risks Associated with Cyclicity in General Industrial Markets. Our exposure to general industrial markets is primarily in our AA&S segment, where we have sales to the oil and gas industry, automotive, food equipment & appliances and construction and mining markets. These markets tend to be highly cyclical and subject to volatility as a result of fluctuations in worldwide economic activity and associated demand, changes in applicable regulation, global geopolitical conditions and numerous other factors. Demand for our products, particularly within the AA&S segment, is subject to these trends, and in recent years, our business has at times been negatively impacted by depressed demand from general industrial markets. We expect that these end markets will remain highly cyclical. Future downturns in these markets could have an adverse effect on the prices at which we are able to sell our products, and our results of operations, business and financial condition could be materially adversely affected.

Risks Associated with Product Pricing. From time-to-time, reduced demand, intense competition, and excess manufacturing capacity have resulted in reduced prices, excluding raw material surcharges, for many of our products. These factors, recent inflationary trends for certain critical raw material costs, and potential international trade actions, as discussed below, have had and may have an adverse impact on our revenues, operating results, and financial condition.

We change prices on certain of our products from time-to-time. Our ability to implement price increases is dependent on market conditions, economic factors, raw material costs and availability, competitive factors, operating costs and other factors, some of which are beyond our control. As such, we may be unable to implement price increases to the degree or within the time frame necessary to fully mitigate the impact of inflationary trends, including those resulting from changes in trade policy, or at all, and the benefits of any price increases may be delayed due to long manufacturing lead times and the terms of existing contracts.

Risks Associated with Key Customers. We have long-term contracts with certain of our customers, some of which are subject to renewal, renegotiation, or re-pricing at periodic intervals or upon changes in competitive supply conditions. Our failure to successfully renew, renegotiate or favorably re-price such agreements, or a material deterioration in or termination of these or other key customer relationships, could result in a reduction or loss in customer purchase revenue. Loss of a key customer could negatively impact our business. Additionally, a significant downturn or deterioration in the markets we serve could cause key customers to change their business strategies or modify their business relationships with us, including to reduce the amount of our products they purchase or to switch to alternative suppliers, as a result of which our financial condition and results of operations may be adversely affected.

RISKS RELATED TO THE RAW MATERIALS AND SUPPLIES THAT WE USE

Dependence on Critical Raw Materials Subject to Price and Availability Fluctuations. We rely to a substantial extent on third parties to supply certain raw materials that are critical to the manufacture of our products. Purchase prices and availability of these critical items are subject to volatility, and in some cases, we have supply arrangements with only a limited number of suppliers for a given material. At any given time, we may be unable to obtain an adequate supply of these critical raw materials on a timely basis, on price and other terms acceptable to us, or at all. If suppliers increase the price of critical raw materials, we

may not have alternative sources of supply. In addition, to the extent that we have quoted prices to customers and accepted customer orders for products prior to purchasing necessary raw materials, or have existing contracts, we may be unable to raise the price of products to cover all or any part of the increased cost of the raw materials. We source some of these materials from China, which has imposed, and may in the future continue to impose, export controls that could limit or significantly delay our access to such materials and could compel us to identify alternative sources, which we may not be able to do in a timely fashion or at all. The prices for many of the raw materials we use have been volatile during the past several years. Due to the long lead times required to manufacture many of our products, volatility in raw material prices exposes us to cash costs that may not be fully recovered through surcharge and index pricing mechanisms. Recently, due to inflationary trends, certain critical raw material costs, such as for nickel, hafnium, titanium sponge, cobalt, chromium, molybdenum, and scrap containing iron, nickel, titanium, chromium and molybdenum, have been volatile, and they may continue to be so in the future, including as a result of changes in international trade policy. While we have been able to mitigate some of the adverse impact of volatile raw material costs through various means, including the application of raw material surcharges or pricing indices to customers, rapid changes in raw material costs cause volatility in, and may adversely affect, our results of operations.

The manufacture of some of our products is a complex process and requires long lead times. As a result, we may experience delays or shortages in the supply of raw materials. In particular, we acquire certain important raw materials that we use to produce specialty materials, including nickel, zirconium, niobium, chromium, cobalt, vanadium and titanium sponge, from foreign sources. Some of these sources operate in countries that may be subject to unstable political and economic conditions. These or similar conditions may disrupt supplies or affect the prices of the materials that are necessary to our operations. If unable to obtain adequate and timely deliveries of required raw materials, we may be unable to timely manufacture sufficient quantities of products. This could cause us to lose sales, incur additional costs, delay new product introductions, or suffer harm to our reputation.

Dependence on Critical Supplies Subject to Price and Availability Fluctuations. We rely on third parties for certain supplies, such as graphite electrodes and industrial gases including helium and argon, that are critical to the manufacture of our products. Purchase prices and availability of these critical items are subject to volatility. At any given time, we may be unable to obtain an adequate supply of these critical supplies on a timely basis, on price and other terms acceptable to us, or at all. The manufacture of some of our products is a complex process and requires long lead times. If suppliers increase the price of these critical supplies, we may not have alternative sources of supply. As a result, we may experience delays or shortages of critical supplies. If unable to obtain adequate and timely deliveries of required supplies, we may be unable to timely manufacture sufficient quantities of products. This could cause us to lose sales, incur additional costs, delay new product introductions, or suffer harm to our reputation.

Availability of Energy Resources. We rely upon third parties for our supply of energy resources consumed in the manufacture of our products. The prices for and availability of electricity, natural gas, oil and other energy resources are subject to volatile market conditions. These market conditions often are affected by political and economic factors and by supply and demand trends that are beyond our control. Disruptions in the supply of energy resources could temporarily impair our ability to manufacture products for customers. Further, increases in energy costs, or changes in costs relative to energy costs paid by competitors, has in the past adversely affected our profitability and may continue to do so in the future. To the extent that these uncertainties cause suppliers and customers to be more cost sensitive, increased energy prices may have an adverse effect on our results of operations and financial condition.

The ongoing conflict between Russia and Ukraine may adversely affect our business and results of operations.

Since February 2022, Russia and Ukraine have been engaged in active armed conflict. The length, impact, and outcome of the ongoing conflict and its potential impact on our business is highly volatile and difficult to predict. It has and could continue to cause significant market and other disruptions, including significant volatility in commodity prices and supply of energy resources, instability in financial markets, supply chain interruptions, political and social instability, trade disputes or trade barriers, changes in consumer or purchaser preferences, and increases in cyberattacks and espionage.

Governments in the European Union, the U.S., the U.K. and other countries have enacted sanctions against Russia and Russian interests. These sanctions include controls on the export, re-export, and in-country transfer in Russia of certain goods, supplies, and technologies, and the imposition of restrictions on doing business with certain state-owned Russian customers and other investments and business activities in Russia. We terminated our Uniti, LLC joint venture with Russian-based VSMPO-AVISMA (Verkhnyaya Salda Metallurgical Production Association - Berezniki Titanium-Magnesium Works), the purpose of which was to market and sell a range of commercially pure titanium products. However, conditions in Ukraine and/or existing or future sanctions may disrupt supplies or affect the prices of materials that are necessary to our operations. If unable to obtain adequate and timely deliveries of required raw materials, we may be unable to timely manufacture sufficient quantities of products. This could cause us to lose sales, incur additional costs, delay new product introductions, or suffer harm to our reputation.

Further, the broader consequences of the current conflict between Russia and Ukraine may also have the effect of heightening many other risks disclosed in our public filings, any of which could materially and adversely affect our business and results of operations. Such risks include, but are not limited to, adverse effects on global macroeconomic conditions; increased volatility in the price and demand of oil, natural gas and other commodities, increased exposure to cyberattacks; disruptions in global supply chains; and exposure to foreign currency fluctuations and potential constraints or disruption in the capital markets and our sources of liquidity.

RISKS RELATED TO OUR WORKFORCE

Risks Associated with the Recruitment and Retention of Key Talent and the Sustainability of our Workforce. Our business and manufacturing processes are complex. We require highly skilled personnel with relevant industry and technical experience to effectively operate, and as such, depend on our ability to recruit, retain and motivate our employees. Shortages in skilled labor and other labor market pressures currently are resulting in greater competition for skilled labor and increased labor costs in some instances. If we fail to attract, develop, retain and motivate a sustainable workforce with the skills and in the locations we need to operate and grow our business, our operations could be adversely impacted.

In addition, the loss of key members of management and other personnel could negatively impact our business, and any unplanned turnover, or failure to develop adequate succession plans for key positions, could result in loss of technical or other expertise or institutional knowledge, delay or impede the execution of our strategic plans and priorities and, ultimately, negatively impact our business and results.

Labor Matters. We have approximately 7,600 active employees, of which approximately 15% are located outside the U.S. Approximately 35% of our workforce is covered by various CBAs, predominantly with the USW. At various times, our CBAs expire and are subject to renegotiation. Generally, CBAs that expire may be terminated after notice by the union. After termination, the union may authorize a strike. A labor dispute, which could lead to a strike, lockout, or other work stoppage by the employees covered by one or more of the collective bargaining agreements, could have a material adverse effect on production at one or more of our facilities and, depending upon the length of such dispute or work stoppage, on our operating results. Additionally, labor organizations may from time to time attempt to organize groups of additional employees who are not currently covered by any of the CBAs to which we are a party. The outcome of any such efforts may be influenced by many factors and is difficult to predict. There can be no assurance that we will succeed in obtaining CBAs to replace those that expire or in negotiating new CBAs on terms acceptable to us or at all.

RISKS RELATED TO INTELLECTUAL PROPERTY, INFORMATION TECHNOLOGY AND SECURITY

Risks Associated with our Intellectual Property. We own valuable intellectual property, including trade secrets, patents, trademarks and copyrights. Our intellectual property protects our investments in technological innovation, research and development, and plays an important role in maintaining our competitive position in the markets we serve. Despite efforts to secure our intellectual property, it may be infringed or misappropriated by our employees, our competitors or other third parties. The pursuit of remedies for infringement or misappropriation of intellectual property is expensive and uncertain. Additionally, our competitors may develop technologies of their own that are similar or superior to our proprietary technologies, or design around our patents, to lawfully avoid our intellectual property rights. A failure to sufficiently secure or successfully enforce our intellectual property rights could adversely affect our business and competitive position.

Risks Associated with Digital Technology. Information technology infrastructure is critical to supporting business objectives; failure of our information technology infrastructure to operate effectively could adversely affect our business. If a problem occurs that impairs this infrastructure, the resulting disruption could impede our ability to record or process orders, manufacture and ship in a timely manner, or otherwise carry on business in the normal course. Any such events could cause us to lose customers or revenue and could require us to incur significant remediation expense. As we integrate, implement and deploy new information technology processes and information infrastructure across our operations, we could experience disruptions in our business that could have an adverse effect on our business, financial condition, results of operations and cash flow.

Risks Associated with Cybersecurity Threats. Increased global information technology threats, vulnerabilities, and a rise in sophisticated and targeted international computer crime pose a risk to the security of our systems and networks and the confidentiality, availability and integrity of our data. We believe that ATI faces the threat of such cyberattacks due to the markets we serve, the products we manufacture, the locations of our operations, and global interest in our technology. Due to the evolving nature of cybersecurity threats, the scope and impact of any incident cannot be predicted. We continually work to strengthen our threat countermeasures, safeguard our systems and mitigate potential risks. Despite our efforts to fortify our cybersecurity and protect sensitive information and confidential and personal data, our facilities and systems, and those of our third-party service providers, may be vulnerable to security breaches. A significant security breach could lead to unanticipated disclosure, modification or destruction of proprietary and other key information, production downtimes, operational disruptions,

the loss of customers, and remediation costs and other losses or liabilities, which in turn could adversely affect our reputation, competitiveness and results of operations.

RISK RELATED TO CLIMATE CHANGE AND OTHER ENVIRONMENTAL MATTERS

Risks Associated with Climate Change.

While the prospect of a lower-carbon economy presents a number of opportunities for our business, the physical impacts of climate change, regulatory efforts to transition to a lower-carbon economy in the regions in which we, our customers and our suppliers operate, and the focus and evolving views of our various stakeholders on climate change issues could create risks to our business.

Physical Risk. Climate related changes in prevailing weather patterns may impact, among other conditions, changes in sea levels and the propensity for flooding in coastal and other regions, long-term changes in precipitation patterns leading to flooding, drought or deterioration in water quality, and increases in the frequency and severity of significant storms and other weather events and related natural hazards, such as wildfire risk. Although we do not believe that our facilities are currently exposed to significant physical risk as a general matter, our operations have at times been, and could in the future be, impacted by adverse climate-related events, such as, for example, unanticipated periods of extreme cold or heat, acute flooding and widespread wildfires such as those experienced in certain regions in the U.S. and elsewhere in recent years. Events such as these could cause damage to critical facilities and equipment, result in significant operational disruption and have meaningfully adverse effects on our employees and the communities in which we operate. Additionally, even to the extent that significant weather events or changes in climate conditions do not directly impact our own facilities and/or operations, our business could be negatively impacted by events or more chronic climate conditions that disrupt or force longer-term changes in operations for our significant customers or suppliers, which could negatively impact the timing or overall volume of demand for our products or the cost and availability of critical raw materials, among other factors. Over time, widespread physical climate changes and risks could drive increases in other operational costs for our business, such as insurance costs.

Regulatory and Other Transition Risks. Worldwide focus on climate change has led to legislative and regulatory efforts to combat both potential causes and adverse impacts of climate change. New or more stringent laws and regulations related to greenhouse gas emissions, water usage and other climate change related concerns may adversely affect us, our suppliers and our customers. We have publicly disclosed efforts to reduce certain environmental impacts, including greenhouse gas (GHG) emissions of our operations, and provide for our compliance with applicable environmental regulations. Nevertheless, new and evolving laws and regulations could mandate different or more restrictive standards; increase operating costs; require (or cause customers to require that we make) capital investments to transition to low carbon technologies or purchase carbon credits; or otherwise adversely impact our ongoing operations. Our suppliers may face similar challenges and incur additional compliance costs that are passed on to us. These direct and indirect costs may adversely impact our results.

Market and Reputational Risks. Technology to support the transition to lower-carbon operations within the timeframe that could be required by future regulation or expected in the future by our customers may not be available at the scale necessary to support our operations in a timely or cost-effective manner or at all. It is possible that, over time, due to both regulatory action and/or changing customer and societal norms and expectations regarding the causes and importance of climate change issues, demand for products in one or more of our significant end markets could decline or, if we fail to keep pace with changing demand and technological advancement, shift in favor of products that we do not produce. If we fail to appropriately adapt to the expectations of our customers or other stakeholders, fail to achieve or properly report progress toward our environmental sustainability goals and targets or otherwise are perceived as failing to adequately address climate change concerns, the resulting negative perceptions could adversely affect our business, reputation and access to capital.

Risks Associated with Other Environmental Compliance Matters. We are subject to various domestic and international environmental laws and regulations that govern the discharge of pollutants and disposal of wastes, and may require that we investigate and remediate the effects of the release or disposal of materials at sites associated with past and present operations. We could incur substantial cleanup costs, fines and civil or criminal sanctions, third party property damage or personal injury claims as a result of violations or liabilities under these laws or non-compliance with environmental permits required at our facilities. We are currently involved in the investigation and remediation of a number of our current and former sites as well as third party sites. With respect to proceedings brought under the federal Superfund laws, or similar state statutes, we have been identified as a potentially responsible party (PRP) at 40 of such sites, excluding those at which we believe we have no future liability. Our involvement is limited or de minimis at approximately 19 of these sites, and potential loss exposure with respect to 13 individual sites is not considered to be material. The potential loss exposure on the remaining eight sites could be material. We are a party to various cost-sharing arrangements with other PRPs at many of the sites. The terms of the cost-sharing arrangements are subject to non-disclosure agreements as confidential information. Nevertheless, the cost-sharing arrangements generally require all PRPs to post financial assurance of the performance of the obligations or to pre-pay into an

escrow or trust account their share of anticipated site-related costs. In addition, the Federal government, through various agencies, is a party to several such arrangements.

From time-to-time, we are a party to lawsuits and other proceedings involving alleged violations of, or liabilities arising from, environmental laws. When our liability is probable and we can reasonably estimate our costs, we record environmental liabilities in our financial statements. In many cases, we are not able to determine whether we are liable or if liability is probable or to reasonably estimate the potential loss or range of loss associated with an alleged claim. Estimates of our liability remain subject to additional uncertainties, including the nature and extent of site contamination, available remediation alternatives, the extent of corrective actions that may be required, and the participation number and financial condition of other PRPs, as well as the extent of their responsibility for the remediation. We intend to adjust our accruals to reflect new information as appropriate. Future adjustments could have a material adverse effect on our results of operations in a given period, but we cannot reliably predict the amounts of such future adjustments. At December 28, 2025, our reserves for environmental matters totaled approximately \$15 million. Based on currently available information, we do not believe that there is a reasonable possibility that a loss exceeding the amount already accrued for any of the sites with which we are currently associated (either individually or in the aggregate) will be an amount that would be material to a decision to buy or sell our securities. Future developments, administrative actions or liabilities relating to environmental matters, however, could have a material adverse effect on our financial condition or results of operations.

OTHER OPERATIONAL AND STRATEGIC RISKS

Risks Associated with Disruptions to our Manufacturing Processes. The manufacture of many of our products is a highly exacting and complex process. If we encounter disruptions to our manufacturing processes due to equipment malfunction, failure to follow specific protocols, specifications and procedures, supply chain interruptions, natural disasters, geopolitical volatility, health pandemics, cybersecurity breaches, labor unrest, or otherwise, it could have an adverse impact on our ability to fulfill orders or on product quality or performance which could result in significant costs to and liability for us that could have a material adverse effect on our business, financial condition or results of operations, as well as negative publicity and damage to our reputation, which could adversely impact product demand and customer relationships. Additionally, our operations depend on the continued and efficient functioning of our facilities, including critical equipment. If our operations, particularly one of our manufacturing facilities, were to be materially disrupted for any reason, we may be unable to effectively meet our obligations to or demand from our customers, which could adversely affect our financial performance.

Risks Associated with Export Sales and International Trade Matters. We believe that export sales will continue to account for a significant percentage of our future revenues. We also import certain raw materials that are important to our business, including nickel, zirconium, niobium, chromium, hafnium, cobalt, vanadium and titanium sponge, among others. Risks associated with such international trade include, among others: political and economic instability, including weak conditions in the world's economies; accounts receivable collection; export controls; trade sanctions; changes in legal and regulatory requirements; policy changes affecting the markets for our products; changes in tax laws, including taxes on repatriation of foreign earnings; and exchange rate fluctuations (which may affect sales to international customers and the value of profits earned on export sales when converted into dollars). Any of these factors could materially adversely affect our results for the period in which they occur. We source some materials from China, which has and may in the future continue to impose export controls that could limit or significantly delay our access to such materials and could compel us to identify alternative sources, which we may not be able to do in a timely fashion or at all.

Additionally, global trade policy may, at times, be volatile and unpredictable, and changes in international trade duties and other aspects of international trade policy, both in the U.S. and abroad, could materially impact our business. Tariffs, or other changes in U.S. trade policy, have resulted in and may continue to trigger, retaliatory actions by affected countries. At times, certain foreign governments have instituted or considered imposing trade sanctions on certain U.S. goods, or taking action to deny U.S. companies access to critical raw materials in response to U.S. trade actions, and these or other foreign governments could continue or expand upon these actions in the future. A "trade war" of this nature or other governmental action related to tariffs or international trade agreements or policies has the potential to adversely impact demand for our products, our costs, customers, suppliers and/or the U.S. economy or certain sectors thereof and, thus, to adversely impact our businesses.

Risks Associated with Strategic Capital Projects and Maintenance Activities. From time to time, we undertake strategic capital projects in order to enhance, expand and/or upgrade our facilities and operational capabilities. Our ability to achieve the anticipated increased revenues or otherwise realize acceptable returns on these investments or other strategic capital projects that we may undertake is subject to a number of risks, many of which are beyond our control, including a variety of market, operational, permitting, and labor-related factors. In addition, the cost to implement any given strategic capital project ultimately may prove to be greater than originally anticipated. If we are not able to achieve the anticipated results from the implementation of any of our strategic capital projects, or if we incur unanticipated implementation costs or delays, our results of operations and financial position may be materially adversely affected. Additionally, we periodically undertake maintenance activities, routine or otherwise, involving facilities and pieces of equipment that are key to our operations, and it is possible that

unanticipated maintenance needs, or unanticipated circumstances arising in connection with planned maintenance activities could result in equipment outages that are longer, or costs that exceed, those originally anticipated. Significant repair delays or unanticipated costs associated with these activities could have a negative impact on our results of operations and financial condition.

Risks Associated with Current or Future Litigation and Claims. A number of lawsuits, claims and proceedings have been or may be asserted against us relating to the conduct of our currently and formerly owned businesses, including those pertaining to product liability, patent infringement, commercial disputes, government contracting, employment matters, employee and retiree benefits, taxes, environmental matters, personal injury and health and safety and occupational disease, and stockholder and corporate governance matters. Due to the uncertainties of litigation, we can give no assurance that we will prevail on all claims made against us in the lawsuits that we currently face or that additional claims will not be made against us in the future. While the outcome of litigation cannot be predicted with certainty, and some of these lawsuits, claims or proceedings may be determined adversely to us, we do not believe that the disposition of any such pending matters is likely to have a material adverse effect on our financial condition or liquidity. However, the resolution in any reporting period of one or more of these matters could have a material adverse effect on our results of operations for that period. Also, we can give no assurance that any other claims brought in the future will not have a material effect on our financial condition, liquidity or results of operations.

In August 2024, the Company received notice that it and certain of its affiliates are parties to two lawsuits, filed in federal district court for the Western District of Pennsylvania, that assert various claims associated with the Company's October 2023 purchase of group annuity contracts to transfer a portion of its U.S. qualified defined benefit pension plan obligations to Athene Annuity and Life Company and Athene Annuity & Life Assurance of New York. These two lawsuits were consolidated in late 2024, and in January 2025, we filed a motion to dismiss the consolidated claims. Following an August 2025 hearing on the motion to dismiss, the magistrate judge covering the Motion issued a report recommending that all of the plaintiffs' claims be dismissed for lack of standing. The recommendation remains subject to review and disposition by the presiding judge. We intend to vigorously defend against these claims, but given the preliminary nature of these matters, cannot predict their outcome or estimate any range of reasonably possible loss at this time.

Risks Associated with Insurance Coverage. We have maintained various forms of insurance, including insurance covering claims related to our properties and risks associated with our operations. Our existing property and liability insurance coverages contain exclusions and limitations on coverage. From time-to-time, in connection with renewals of insurance, we have experienced additional exclusions and limitations on coverage, larger self-insured retentions and deductibles, and significantly higher premiums. As a result, in the future, our insurance coverage may not cover claims to the extent that it has in the past and the costs that we incur to procure insurance may increase significantly, either of which could have an adverse effect on our results of operations.

Risks Associated with Acquisition and Disposition Strategies. We intend to continue to strategically position our businesses to improve our ability to compete. Strategies we employ to accomplish this may include seeking new or expanding existing specialty market niches for our products, expanding our global presence, acquiring businesses complementary to existing strengths, and continually evaluating the performance and strategic fit of our existing business units and their components, as a result of which we may choose to dispose of any such business or related assets. From time-to-time, management holds discussions with management of other companies to explore acquisitions, joint ventures, and other business combination opportunities, as well as possible asset acquisitions or dispositions. As a result, the relative makeup of the businesses comprising our Company is subject to change. Acquisitions, joint ventures, and other business combinations involve various inherent risks, such as: the relative accuracy of our assessment of the value, strengths, weaknesses, contingent and other liabilities and potential profitability of acquisition or other transaction candidates; the potential loss of key personnel of an acquired business; unanticipated conditions or events that impact our ability to achieve identified financial and operating synergies, growth or other benefits anticipated to result from an acquisition or other transaction; and unanticipated changes in business and economic conditions. The relative success of any business or asset acquisitions and other similar transactions, particularly any cross-border transaction, also could be negatively affected by export controls, exchange rate fluctuations, domestic and foreign trade policy and other geopolitical conditions, changes in tax laws and deterioration in domestic and foreign economic conditions.

Risks Associated with Government Contracts. Some of our operating units perform contractual work directly or indirectly for the U.S. Government, which requires compliance with laws and regulations relating to the performance of Government contracts. Various claims (whether based on U.S. Government or Company audits and investigations or otherwise) could be asserted against us related to our U.S. Government contract work. Depending on the circumstances and the outcome, such proceedings could result in fines, penalties, compensatory and treble damages or the cancellation or suspension of payments

under one or more U.S. Government contracts. Under government regulations, a company, or one or more of its operating divisions or units, can also be suspended or debarred from government contracts based on the results of investigations.

Risks Related to Wide-Spread Public Health Crises. The COVID-19 pandemic, including governmental and other actions taken or restrictions imposed to contain its spread and impact, subjected our operations, financial performance and financial condition to a number of risks. In general, our facilities continued to operate throughout the pandemic with federal and state government approvals because our facilities were deemed essential and critical. However, we experienced, and may again in the context of future similar events experience, the temporary shut-down of facilities. The significant macroeconomic impact of the COVID-19 pandemic and the measures designed to contain its spread also negatively impacted several of the Company's most significant end markets, and our sales to customers in those markets. Any future similar event could impact our business, results of operations, financial condition and/or cash flows in similar respects, but the ultimate breadth and duration of any such future event and its impacts on our business are difficult to predict.

Risks Associated with Political and Social Turmoil. The war on terrorism, as well as global political and social turmoil, generally, could put pressure on economic conditions in the U.S. and worldwide. These political, social and economic conditions could make it difficult for us, our suppliers, and our customers to forecast accurately and plan future business activities, and could adversely affect the financial condition of our suppliers and customers and affect customer decisions as to the amount and timing of purchases from us. As a result, our business, financial condition and results of operations could be materially adversely affected.

RISKS ASSOCIATED WITH OUR INDEBTEDNESS; OTHER FINANCIAL AND FINANCIAL ACCOUNTING RISKS

Risks Associated with Indebtedness. Our substantial indebtedness could adversely affect our business, financial condition or results of operations and prevent us from fulfilling our obligations under our outstanding indebtedness. As of December 28, 2025, our total consolidated indebtedness was approximately \$1.7 billion. We also had the ability to borrow approximately \$569 million under our Asset Based Lending (ABL) credit facility, and up to \$100 million of availability under the Delayed-Draw Term Loan as of December 28, 2025. This substantial level of indebtedness increases the risk that we may be unable to generate enough cash to pay amounts due in respect of our indebtedness. Our substantial indebtedness could have important consequences to our stockholders and significant effects on our business. For example, it could:

- make it more difficult for us to satisfy our obligations with respect to our outstanding indebtedness;
- increase our vulnerability to general adverse economic and industry conditions;
- require us to dedicate a substantial portion of our cash flow from operations to payments on our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures, our strategic growth initiatives and development efforts and other general corporate purposes;
- limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate;
- restrict us from taking advantage of business opportunities;
- place us at a competitive disadvantage compared to our competitors that have less indebtedness; and
- limit our ability to borrow additional funds for working capital, capital expenditures, acquisitions, debt service requirements, execution of our business strategy or other general corporate purposes.

A portion of our indebtedness, including amounts outstanding currently or in the future under our ABL, bear interest at variable rates and, accordingly, subject our business to risk, particularly in a rising interest rate environment. In addition, the agreements that govern our current indebtedness contain, and the agreements that may govern any future indebtedness that we may incur may contain, financial and other restrictive covenants that could limit our ability to engage in activities that may be in our long-term best interests. Our failure to comply with those covenants could result in an event of default that, if not cured or waived, could result in the acceleration of all of our debt.

Risks Associated with Retirement Benefits. On October 17, 2023, we purchased group annuity contracts from an insurer covering approximately 85% of our U.S. qualified defined benefit plan obligations. Under these contracts, we transferred the pension obligations and associated assets for the significant majority of our remaining plan participants to the selected insurance company. Using our long-term weighted average expected return on pension plan assets and other actuarial assumptions, we expect to have approximately \$40 million of minimum cash funding requirements to the defined benefit pension plan over the next ten years. Minimum cash funding requirements are not expected to be significant in any individual year. However, these estimates are based on various assumptions and are subject to significant uncertainty, including with respect to the performance of our pension trust assets, and our expectations therefore could prove to be inaccurate. Significantly lower than expected returns on our pension assets could result in otherwise unanticipated pension contribution obligations in the future. Depending

on the timing and amount, a requirement that we fund the U.S. qualified defined benefit pension plan could have a material adverse effect on our results of operations and financial condition.

Risks Associated with Goodwill or Long-Lived Asset Impairments. We have various long-lived assets that are subject to impairment testing. We review the recoverability of goodwill annually, or more frequently whenever significant events or changes in circumstances indicate that the recorded goodwill of a reporting unit may be below that reporting unit's fair value. Our businesses operate in highly cyclical industries, such as commercial aerospace, and as such, our estimates of future cash flows, market demand, the cost of capital, and forecasted growth rates and other factors may fluctuate, which may lead to changes in estimated fair value and, therefore, impairment charges in future periods. For the fiscal year 2025 annual goodwill impairment evaluation, both of our reporting units with goodwill had fair values that were in excess of carrying value. Additionally, we have a significant amount of property, plant and equipment and acquired intangible assets that may be subject to impairment testing, depending on factors such as market conditions, the demand for our products, and facility utilization levels. Any determination requiring the impairment of a significant portion of goodwill or other long-lived assets has had, and may in the future have, a negative impact on our financial condition and results of operations.

Risks Associated with Internal Controls Over Financial Reporting. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Risks Associated with Our Guidance and Other Targets and Expectations. From time to time, we may announce earnings guidance and other future targets or goals for our business. Such information, which consists of forward-looking statements, is based on our then current expectations, estimates, forecasts and projections about the operating environment, economies and markets in which we operate. Future targets and goals reflect our beliefs and assumptions and our perception of historical trends, then current conditions and expected future developments, as well as other factors appropriate in the circumstances. As such, while sometime presented with numerical specificity, earnings guidance and other statements regarding our future targets and goals are inherently speculative in nature and subject to significant business, economic, competitive and other uncertainties and contingencies regarding future events, including the risks discussed herein. Our actual results can, and likely will, be different, and those differences could be material. There can be no assurance that any targets or goals established by us will be accomplished at the levels or by the dates targeted, if at all. Failure to achieve our targets or goals may have a material adverse effect on our business, financial condition, results of operations or the market price of our securities.

Item 1B. Unresolved Staff Comments

None.

Item 1C. Cybersecurity

The Company and its Board recognize the critical significance that cybersecurity has to our operations and the need to continually assess cybersecurity risk and evolve our response in the face of a rapidly and ever-changing environment. We face a range of increasing and evolving cybersecurity threats common to industrial operations and other enterprises, which continue to grow in frequency and scope. See Item 1A, Risk Factors, "Cybersecurity Threats."

The programs and procedures we have implemented to mitigate our exposure to these threats focus on preventing cybersecurity incidents, preserving the confidentiality, security and availability of the information that we generate or collect and store, and effectively responding to cybersecurity incidents if they occur.

Our Comprehensive Program

We take a comprehensive, standards-driven approach to our cybersecurity through an enterprise-wide cybersecurity program aligned with the National Institute on Standards and Technology's Cybersecurity Framework. Our program includes an extensive set of systems, network and application-level controls that protect our corporate data and systems. Our Chief Digital and Information Officer ("CDIO") and our Chief Information Security Officer ("CISO"), each of whom have extensive cybersecurity training and expertise and more than 25 years and 19 years of information technology and cybersecurity experience, respectively, hold primary responsibility within management for assessing, monitoring and managing our cybersecurity risks and program. They are supported by a dedicated, enterprise-wide cybersecurity team that, with the assistance of third-party providers, monitors our program and controls, as well as available cybersecurity intelligence, on a continuous basis to ensure that, as an organization, we are informed of emerging risks, identify specific threats and potential incidents, and promptly escalate the evaluation and management of identified incidents as appropriate. Components of our comprehensive program include, among others:

- **Technical Safeguards.** We deploy technical safeguards that are designed to protect the Company's information systems from cybersecurity threats, including firewalls, intrusion prevention and detection systems, anti-malware

functionality and access controls, which are evaluated through vulnerability assessments and cybersecurity threat intelligence.

- Third-Party Risk Management. We maintain a risk-based approach to identifying and overseeing cybersecurity risks presented by third parties.
- Program Assessments. We engage in regular assessments and testing of our policies and procedures, including efforts such as audits and similar assessments, tabletop exercises, threat modeling, vulnerability testing and other procedures focused on evaluating program effectiveness. Additionally, we periodically engage third parties to perform assessments of our cybersecurity measures, including information security maturity assessments and independent reviews of our information security control environment and operating effectiveness.
- Education and Awareness. We conduct a regular program of enterprise-wide communication and training regarding cybersecurity threats and the policies and procedures we have implemented in response. These programs are designed to elevate threat awareness within the Company and equip our employees with the knowledge and access to resources that they need to appropriately respond to and address the cybersecurity risks that we face.
- Incident Response and Recovery. We maintain extensive incident response and recovery plans and procedures that provide a documented framework for handling high severity security incidents. These plans ensure the appropriate escalation, evaluation, management and reporting of cybersecurity incidents in a prompt and appropriately cross-functional manner, facilitating coordination across multiple parts of the Company, and are the subject of regular tabletop breach simulations and other exercises and evaluations.
- Insurance Coverage. We maintain a cybersecurity risk insurance policy to protect the Company against computer-related incidents and losses.

We have not experienced any material operational or financial impacts as a result of any cybersecurity incident or the cybersecurity risks that we face. At this time, while the threat of a cybersecurity incident is always present, we view our comprehensive mitigation strategies and procedures as appropriately calibrated safeguards against any material impact to our results of operation and financial condition as a result of a cybersecurity incident and believe that we are prepared to appropriately mitigate and respond to such an incident, should it occur.

Governance

Our Board is actively engaged in the oversight of our digital technology risk management and cybersecurity programs. As part of its program of regular oversight, the Audit and Risk Committee oversees ATI's digital technology and cybersecurity risk. The regular review and assessment of the Company's cybersecurity program and related policies, standards, processes and practices is a fully integrated component of the Company's overall enterprise risk management program, and at least quarterly as a key component of each regularly scheduled meeting, the Committee receives regular reports from our CDIO on the Company's cybersecurity risk profile, the functioning of its cybersecurity program, including with reference to key performance indicators and other specific, quantitative measures, and other digital technology risks.

Item 2. Properties

Our principal domestic facilities for the HPMC segment include melting operations and production facilities that perform processing and finishing operations, which are all substantially owned. Domestic melting operations are located in Monroe and Bakers, NC, and Richland, WA (vacuum induction melting, vacuum arc re-melt, electro-slag re-melt, plasma melting, electron beam melting). Production of high performance materials, most of which are in long product form, takes place at our domestic facilities in Monroe and Bakers, NC, Richburg, SC, and Oakdale, PA. Our production of highly engineered forgings and machined components takes place at facilities in Cudahy, Appleton and Coon Valley, WI, and Irvine, CA. In addition, we lease a facility in Margate, Florida to perform metal alloy-based additive manufacturing for the aerospace & defense industries.

Within the AA&S segment, our production of zirconium, hafnium, niobium and related specialty alloys takes place at facilities located in Millersburg, OR and Huntsville, AL. Nickel melting operations are located in Lockport, NY (vacuum induction melting, vacuum arc re-melt, and electro-slag re-melt), and titanium melting operations are located in Albany, OR (vacuum arc re-melt). Our principal AA&S locations for melting flat-rolled specialty materials are located in Brackenridge and Latrobe, PA. Hot-rolling is performed at our domestic facilities in Brackenridge and Washington, PA. Finishing of our flat-rolled products takes place at our domestic facilities located in Vandergrift, WA, Rochester, Monaca, and Zelenople, PA, and Pageland, SC. Substantially all of these properties are owned.

We lease facilities, primarily sales and administrative offices, in a number of foreign countries, including France, Germany, the U.K., Poland, Mexico, and the People's Republic of China. We also own highly engineered forging and machining operations in Stalowa Wola, Poland. Through our STAL joint venture, we operate facilities for finishing PRS products in the Xin-Zhuang Industrial Zone, Shanghai, China.

Our corporate headquarters in Dallas, TX and enterprise resource center in Pittsburgh, PA are leased.

Although our facilities vary in terms of age and condition, we believe that they have been well maintained and are in sufficient condition for us to carry on our activities. See Item 7. “Management’s Discussion and Analysis of Financial Condition and Results of Operations” for further discussion of these impacts.

Item 3. Legal Proceedings

From time to time, we become involved in various lawsuits, claims and proceedings relating to the conduct of our current and formerly owned businesses, including those pertaining to product liability, environmental, health and safety matters and occupational disease (including as each relates to alleged asbestos exposure), as well as patent infringement, commercial, government contracting, construction, employment, employee and retiree benefits, taxes, environmental, and stockholder and corporate governance matters. While we cannot predict the outcome of any lawsuit, claim or proceeding, our management believes that the disposition of any pending matters is not likely to have a material adverse effect on our financial condition or liquidity. The resolution in any reporting period of one or more of these matters, including those described above, however, could have a material adverse effect on our results of operations for that period.

In August 2024, the Company received notice that it and certain of its affiliates are parties to two lawsuits captioned (1) William L. Schoen, Mary J. Nesbit, Robin L. Rosewicz, George E. Poole and James E. Swartz, Jr., individually and as representatives of a class of participants and beneficiaries of the Allegheny Technologies Incorporated Pension Plan v. ATI Inc., The Allegheny Technologies Incorporated Pension Plan Administrative Committee, State Street Global Advisors Trust Co., and John Does 1-5 (Case No. 2:24-cv-01109) and (2) John Souza and Karen Souza, individually and as representatives on behalf of a class of similarly situated persons v. ATI Inc. and State Street Global Advisors Trust Co. (Case No. 2:24-cv-01214), both of which are filed in federal district court for the Western District of Pennsylvania. These lawsuits, which were consolidated in late 2024, assert various claims associated with the Company’s October 2023 purchase of group annuity contracts to transfer a portion of its U.S. qualified defined benefit pension plan obligations to Athene Annuity and Life Company and Athene Annuity & Life Assurance of New York. We filed a Motion to Dismiss the consolidated claims in January 2025. Following an August 2025 hearing on the Motion to Dismiss, the magistrate judge covering the Motion issued a report recommending that all the plaintiffs’ claims be dismissed for lack of standing. The recommendation remains subject to review and disposition by the presiding judge. We dispute and intend to vigorously defend against these claims, but given the preliminary nature of these matters, cannot predict their outcome or estimate any range of reasonably possible loss at this time.

Information relating to legal proceedings is included in Note 21. Commitments and Contingencies of the Notes to Consolidated Financial Statements and incorporated herein by reference.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for the Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Common Stock Prices

Our common stock is traded on the New York Stock Exchange (symbol ATI). At January 30, 2026, there were 1,527 record holders of ATI Inc. common stock. Currently, we do not pay a dividend. The future payment of dividends and the amount of such dividends would depend upon matters deemed relevant by our Board of Directors, such as our results of operations, financial condition, cash requirements, prospects, any limitations imposed by law, credit agreements or senior securities, and other factors deemed appropriate. Further, our ABL credit facility restricts our ability to pay dividends in certain circumstances. For more information on the restrictions under our ABL credit facility, see Note 16 of Item 8. “Financial Statements and Supplementary Data.”

Sales of Equity Securities

Set forth below is information regarding our stock repurchases during the fourth quarter of fiscal year 2025, comprised of shares repurchased by ATI under the \$700 million repurchase program authorized by our Board of Directors in September 2024 and shares repurchased by ATI from employees to satisfy employee-owed taxes on share-based compensation.

Fiscal Period	Total Number of Shares (or Units) Purchased (a)	Average Price Paid per Share (or Unit) (b) (c)	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
September 29 - November 2, 2025	48,165	\$ 81.70	—	\$ 120,000,228
November 3 - November 30, 2025	4,856	\$ 98.81	—	\$ 120,000,228
December 1 - 28, 2025	—	\$ —	—	\$ 120,000,228
Total	53,021	\$ 83.27	—	\$ 120,000,228

(a) Includes shares repurchased by ATI from employees to satisfy employee-owed taxes on share-based compensation.

(b) Share repurchases are inclusive of amounts for any relevant commissions.

(c) Excludes excise taxes incurred on share repurchases.

Cumulative Total Stockholder Return

The graph set forth below shows the cumulative total stockholder return (i.e., price change plus reinvestment of dividends) on our common stock from January 3, 2021 through December 28, 2025, as compared to the S&P 500 Index, the S&P MidCap 400 Industrials Index and the Russell 2000 Index. The graph assumes that \$100 was invested on January 3, 2021. The stock performance information included in this graph is based on historical results and is not necessarily indicative of future stock price performance.

Company / Index	Dec 2020	Dec 2021	Dec 2022	Dec 2023	Dec 2024	Dec 2025
ATI	100.00	94.99	178.06	271.14	330.65	697.38
S&P 500 Index	100.00	128.71	105.40	133.10	168.91	198.55
S&P MidCap 400 Industrials Index	100.00	128.45	113.68	149.41	170.68	193.36
Russell 2000 Index	100.00	114.82	91.35	106.82	119.85	137.17

Item 6. [Reserved]

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) is intended to help the reader understand our results of operations and financial condition or the year ended December 28, 2025 (fiscal year 2025) as compared to the year ended December 29, 2024 (fiscal year 2024). The MD&A includes certain statements that are forward-looking statements. Actual results or performance could differ materially from those encompassed within such forward-looking statements as a result of various factors, including those described below. The MD&A should be read in conjunction with our consolidated financial statements and notes thereto included in Part II, Item 8 (Financial statements and Supplementary Data) of this Form 10-K. Information on the Company's results of operations, financial condition and liquidity for fiscal year 2024 as compared to the year ended December 31, 2023 (fiscal year 2023) is included in our Annual Report on Form 10-K in Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations" filed on February 21, 2025 and is incorporated herein by reference.

ATI Overview

ATI is a global manufacturer of technically advanced specialty materials and complex components. We are a market leader in manufacturing differentiated products that require our materials science capabilities and unique process technologies, including our new product development competence. Our largest markets are aerospace & defense, representing approximately 68% of total sales, led by products for jet engines and airframes. Additionally, we have a strong presence in the specialty energy end market, which includes products for nuclear and renewable energy applications. In aggregate, these markets represent over 73% of our total revenue. We also sell to several other end markets, including industrial, electronics and medical.

We operate in two business segments: HPMC and AA&S. The HPMC segment produces a wide range of high performance materials, components, and advanced metallic powder alloys. These products are made from nickel-based alloys and superalloys, titanium and titanium-based alloys, and a variety of other specialty materials. HPMC's capabilities range from cast/wrought and powder alloy development to production of highly engineered components, and 3D-printed aerospace products. The HPMC segment's primary focus is on maximizing jet engine materials and components growth, with

approximately 92% of its revenue derived from the aerospace & defense markets, including nearly 68% from products for commercial jet engines. Commercial aerospace products have been the main source of sales and EBITDA growth for HPMC over the last several years and are expected to continue to drive HPMC and overall ATI results in the future. HPMC has also experienced strong growth in defense products, with fiscal year 2025 sales growth of 24%. Sales of defense products comprise almost 11% of HPMC's total sales.

The AA&S segment produces nickel-based alloys, titanium and titanium-based alloys, and specialty alloys in a variety of forms including plate, sheet, and strip products. AA&S focuses on high-value materials that are utilized in technically challenging and extreme environments, which require materials that can withstand extreme heat, radiation and corrosion. AA&S continued its focus of growing sales to the aerospace & defense end markets, with fiscal year 2025 sales to those markets increasing 15%. Aerospace & defense now comprises approximately 41% of AA&S total revenue. AA&S also serves customers across several other markets, notably specialty energy and conventional energy, as well as electronics and certain industrial markets.

Overview of Fiscal Year 2025 Financial Performance

Sales in fiscal year 2025 increased 5%, to \$4.6 billion, and gross profit increased 12%, to \$1.0 billion, compared to fiscal year 2024, reflecting increased demand for products within our aerospace & defense end markets, partially offset by softness in the medical, other industrial, and specialty energy end markets. International sales, including both U.S. exports and foreign sales from our foreign operations, were \$1.9 billion in fiscal year 2025 and represented 43% of total sales, compared to \$1.8 billion or 42% of total sales in fiscal year 2024.

Results for fiscal year 2025 included \$70 million of net pre-tax charges and fiscal year 2024 included \$17 million of net pre-tax gains as further described in the Results of Operations section below. The Company's net income for fiscal year 2025 was \$404.3 million, or \$2.85 per share. ATI Adjusted EBITDA for fiscal year 2025 was \$859.3 million, or 18.7% of sales, compared to \$729.1 million, or 16.7% of sales, for fiscal year 2024. See further explanation below for non-GAAP definitions and calculations.

A summary of our results is as follows:

	Fiscal Year	
	2025	2024
<i>(Dollars in millions, except per share amounts)</i>		
Sales	\$ 4,587.4	\$ 4,362.1
Gross profit	\$ 1,007.0	\$ 898.2
Gross profit % of sales	22.0 %	20.6 %
Operating income	\$ 640.9	\$ 608.9
Income before income taxes	\$ 522.3	\$ 486.1
Net income attributable to ATI	\$ 404.3	\$ 367.8
Diluted net income attributable to ATI per common share	\$ 2.85	\$ 2.55

Key financial highlights of fiscal year 2025 include the following:

- Year-over-year sales growth of approximately 5%, with ATI's 2025 sales representing our highest total since 2012. Fiscal year 2025 sales to the aerospace & defense markets increased 14% and represented 68% of our total sales, compared to 62% of total sales in fiscal year 2024.
- Growth in aerospace & defense drove year-over-year increases in operating income of 5% and net income attributable to ATI of 10%. Adjusted EBITDA improved to \$859.3 million compared to \$729.1 million in 2024, an increase of 18%. Adjusted EBITDA as a percentage of sales was 18.7% for fiscal year 2025, an improvement of 200 basis points compared to fiscal year 2024.
- We generated cash flow of \$614.3 million from operating activities in fiscal year 2025, an increase of almost 51% compared to fiscal year 2024, as we continued efforts to focus on operational improvements to positively impact the inventory intensity of our business and reduce the required investment of managed working capital in relation to our growth in sales. Managed working capital as a percent of sales was 32.5% as of December 28, 2025, compared to 30.9% as of December 29, 2024, primarily due to the timing of payments to vendors and the 5% increase in 2025 sales.
- We continued our disciplined approach to capital allocation, funding growth while returning cash to our shareholders through the repurchase of our stock. We repurchased approximately 6.4 million shares of ATI stock for \$470 million in fiscal year 2025. We have approximately \$120 million of share repurchase authorization remaining under the plan approved by our Board of Directors.

- We continued to deleverage our balance sheet, repaying \$150 million of debentures in the fourth quarter of 2025. Further, we reduced our interest expense in fiscal year 2025 by approximately \$9.0 million compared to fiscal year 2024, which was due to the redemption of the \$291.4 million outstanding principal amount of 3.5% Convertible Senior Notes due 2025 (2025 Convertible Notes) during the third quarter of 2024.

Results of Operations

Fiscal Year 2025 Compared to Fiscal Year 2024

Sales

Fiscal year 2025 sales increased \$225.3 million to \$4.6 billion compared to fiscal year 2024, primarily due to increased demand for commercial jet engine products and defense applications. Total sales to the aerospace & defense markets increased by 14% compared to fiscal year 2024. This increase was partially offset by lower sales to the medical, specialty energy, and certain industrial end markets.

Comparative information for our overall revenues by end market, and their respective percentages of total revenues, is as follows:

(In millions)

	Fiscal Year			
	2025		2024	
Aerospace & Defense:				
Jet Engines- Commercial	\$ 1,762.9	39 %	\$ 1,457.8	33 %
Airframes- Commercial	790.9	17 %	772.9	18 %
Defense	557.7	12 %	490.2	11 %
Total Aerospace & Defense	3,111.5	68 %	2,720.9	62 %
Other Markets:				
Specialty Energy	257.3	6 %	284.6	7 %
Electronics	184.8	4 %	194.3	4 %
Medical	139.4	3 %	224.9	5 %
Automotive	244.6	5 %	259.4	6 %
Conventional Energy	328.4	7 %	302.0	7 %
Construction/Mining	145.4	3 %	158.5	4 %
Other	176.0	4 %	217.5	5 %
Total Other Markets	\$ 1,475.9	32 %	\$ 1,641.2	38 %
Total	\$ 4,587.4	100 %	\$ 4,362.1	100 %

Comparative information for our major products, based on their percentages of revenues, is as follows. Hot-Rolling and Processing Facility (HRPF) conversion service sales in the AA&S segment are excluded from this presentation.

	Fiscal Year	
	2025	2024
Nickel-based alloys and specialty alloys	46 %	45 %
Precision forgings, castings and components	22 %	19 %
Titanium and titanium-based alloys	18 %	18 %
Zirconium and related alloys	9 %	9 %
PRS products	5 %	9 %
Total	100 %	100 %

Sales by geographic area and as a percentage of total sales, were as follows:

(In millions)

	Fiscal Year			
	2025		2024	
United States	\$ 2,639.8	57 %	\$ 2,525.2	58 %
Europe	1,024.1	22 %	1,062.4	24 %
Asia	537.6	12 %	508.6	12 %
Canada	169.5	4 %	116.2	3 %
Other	216.4	5 %	149.7	3 %
Total sales	<u>\$ 4,587.4</u>	<u>100 %</u>	<u>\$ 4,362.1</u>	<u>100 %</u>

Gross Profit

Fiscal year 2025 gross profit was \$1,007.0 million, or 22.0% of sales, a \$108.8 million increase compared to fiscal year 2024. Gross profit in fiscal year 2025 includes \$23.6 million of start-up and transaction-related costs, which are excluded from Adjusted EBITDA. Fiscal year 2025 gross profit also includes a benefit of \$7.2 million related to the recognition of previously deferred employee retention tax credits, of which \$4.4 million related to the HPMC segment and \$2.8 million related to the AA&S segment.

Fiscal year 2024 gross profit was \$898.2 million, or 20.6% of sales, and included \$15.3 million primarily for start-up and transaction-related costs, which are excluded from Adjusted EBITDA. Fiscal year 2024 gross profit also included a benefit of \$16.7 million related to the recognition of previously deferred employee retention tax credits, of which \$9.0 million of the benefit was recognized in the HPMC segment and \$7.7 million in the AA&S segment.

The overall 140 basis points improvement in fiscal year 2025 gross profit margin as compared to fiscal year 2024 gross profit was primarily due to favorable sales mix and pricing as well as higher volumes.

Selling and Administrative Expenses

Selling and administrative expenses for fiscal year 2025 were \$365.1 million, an increase of \$22.8 million from 2024. The increase was primarily due to professional fees associated with transformation activities, losses on the sale of customer accounts receivable, and higher incentive compensation costs. Transformation-related costs were \$17.1 million and losses on the sale of customer accounts receivable were \$7.8 million. In addition, fiscal year 2025 selling and administrative expenses included \$2.2 million of transaction-related costs. The charges for transformation-related costs, losses on the sale of customer accounts receivable, and transaction-related costs are excluded from Adjusted EBITDA.

Fiscal year 2024 included \$2.7 million of transaction-related costs and costs associated with our European restructuring, which are excluded from Adjusted EBITDA. Fiscal year 2024 also included charges of \$11.8 million primarily related to a commercial negotiation with a customer. HPMC segment results reflect \$6.3 million of this charge, while the remaining \$5.5 million is reflected in the AA&S segment results.

Restructuring (Credits) Charges

For the fiscal year ended December 28, 2025, restructuring credits were \$1.9 million due to a reduction in severance-related reserves for a previous restructuring, primarily in the AA&S segment. These credits are excluded from Adjusted EBITDA.

For the fiscal year ended December 29, 2024, restructuring charges were \$4.1 million for severance-related reserves primarily related to cost reduction actions in our domestic operations. These charges are excluded from Adjusted EBITDA.

Loss (Gain) on Asset Sales and Sales of Businesses, net

The fiscal year 2025 loss on assets sales and sales of businesses, net is comprised of an \$0.8 million gain for the sale of a non-core business previously reported in the HPMC segment, for which ATI received \$19.3 million of proceeds, net of transaction costs and a working capital adjustment. This gain is offset by a \$3.7 million loss of the sale of certain non-core European operations from the HPMC segment for which ATI received \$5.0 million of proceeds, net of transaction costs. The proceeds from both transactions were reported as an investing activity on the consolidated statement of cash flow.

The fiscal year 2024 gain on asset sales and sales of businesses, net was primarily due to a \$52.9 million gain on the sale of our precision rolled strip operations, for which ATI received \$48.0 million of proceeds, net of transaction costs, that were reported as an investing activity on the consolidated statement of cash flows.

Pension Remeasurement Gains and Losses

The Company recognizes gains and losses from the remeasurement of the projected benefit obligation and plan assets for defined benefit pension plans immediately in earnings through net periodic pension benefit cost. The Company completes the remeasurements of these plans in the fourth quarter of each fiscal year and, as a result, we recognized pension remeasurement losses of \$18.6 million and \$14.1 million in fiscal years 2025 and 2024, respectively. These losses are excluded from Adjusted EBITDA and recorded in nonoperating retirement benefit income/expense on the consolidated statements of operations.

Interest Expense, Net

Interest expense, net of interest income and interest capitalization, was \$98.6 million in fiscal year 2025, compared to \$108.2 million in fiscal year 2024. The decrease in fiscal year 2025 compared to fiscal year 2024 is due to the redemption of the 2025 Convertible Notes during the third quarter of 2024. Further, interest expense is presented net of interest income of \$12.1 million in fiscal year 2025 and \$16.0 million in fiscal year 2024. Interest expense in fiscal years 2025 and 2024 was reduced by \$10.6 million and \$11.8 million, respectively, related to interest capitalization on large, strategic capital projects.

Other Income, Net

Other income, net for fiscal year 2025 of \$14.6 million included a gain of \$10.5 million from the sale of certain oil and gas rights. Other income, net for fiscal year 2024 of \$14.4 million included a gain of \$11.6 million from the sale of certain oil and gas rights.

Income Taxes

The fiscal year 2025 effective tax rate was 19.9%, resulting in an income tax provision of \$103.7 million, compared to an effective tax rate of 21.3%, resulting in an income tax provision of \$103.4 million in fiscal year 2024. The effective tax rates for fiscal years 2025 and 2024 included discrete tax benefits of \$6.0 million and \$6.2 million, respectively. The discrete tax benefits in fiscal years 2025 and 2024 included \$4.3 million and \$3.3 million, respectively, for share-based compensation.

The 140 basis point decrease in the effective tax rate in fiscal year 2025 as compared to fiscal year 2024 was primarily due to higher deductions for benefits that were previously limited due to our net operating losses, such as foreign derived intangible income.

Net Income

Net income attributable to ATI was \$404.3 million, or \$2.85 per share, in fiscal year 2025, compared to \$367.8 million, or \$2.55 per share, for fiscal year 2024.

Results by Business Segment

As discussed above, we operate in two business segments: HPMC and AA&S. HPMC sales increased 7% in fiscal year 2025 compared to fiscal year 2024, primarily due to higher aerospace & defense market sales. Increased demand for commercial jet engines and defense applications resulted in a 14% increase in sales to the aerospace & defense markets. Full fiscal year 2025 AA&S sales increased 3% due to a 15% increase in aerospace & defense sales and a 10% increase in conventional energy market sales partially offset by softness in other certain other markets, including specialty energy, medical and electronics.

Comparative financial information (in millions) for our segments and corporate operations for the year-to-date periods ended December 28, 2025 and December 29, 2024 is shown below.

(In millions)

	Fiscal Year Ended		
	December 28, 2025	December 29, 2024	December 31, 2023
Sales:			
High Performance Materials & Components	\$ 2,441.7	\$ 2,278.5	\$ 2,120.2
Advanced Alloys & Solutions	2,145.7	2,083.6	2,053.5
Total external sales	\$ 4,587.4	\$ 4,362.1	\$ 4,173.7
Segment EBITDA^(a):			
High Performance Materials & Components	\$ 575.8	\$ 461.4	\$ 433.6
% of Sales	23.6 %	20.3 %	20.5 %
Advanced Alloys & Solutions	349.0	320.9	276.6
% of Sales	16.3 %	15.4 %	13.5 %
Corporate, Closed Operations and Other (income) expense^(b):			
Corporate expenses	67.8	64.0	62.3
Closed operations and other (income) expense	(2.3)	(10.8)	13.3
Total Corporate, Closed Operations and Other expense	\$ 65.5	\$ 53.2	\$ 75.6
Depreciation & amortization			
High Performance Materials & Components	84.2	71.6	71.1
Advanced Alloys & Solutions	77.4	73.2	67.9
Other	6.5	6.7	7.1
Total depreciation & amortization	\$ 168.1	\$ 151.5	\$ 146.1

(a) The Company's Chief Operating Decision Maker ("CODM") utilizes the Segment EBITDA as a key metric to evaluate segment performance. Our measure of Segment EBITDA, which we use to analyze the performance and results of our business segments, excludes net interest expense, income taxes, depreciation and amortization, special charges, unallocated corporate expenses, closed operations and other (income) expense. See Note 18 for the reconciliation of Segment EBITDA to Income before taxes.

(b) Amounts exclude depreciation and amortization.

High Performance Materials & Components

(In millions)	Fiscal Year	% Change	Fiscal Year
	2025		2024
Sales to external customers	\$ 2,441.7	7 %	\$ 2,278.5
Segment EBITDA	\$ 575.8	25 %	\$ 461.4
Segment EBITDA as a percentage of sales	23.6 %		20.3 %
International sales as a percentage of sales	45.3 %		50.2 %

Our HPMC segment produces a wide range of high performance materials, including titanium and titanium-based alloys, nickel- and cobalt-based alloys and superalloys, advanced powder alloys and other specialty materials, in long product forms such as ingot, billet, bar, rod, wire, shapes and rectangles, and seamless tubes, plus precision forgings, components, and machined parts.

Fiscal Year 2025 Compared to Fiscal Year 2024

Sales of \$2.4 billion for the HPMC segment in fiscal year 2025 increased 7% compared to fiscal year 2024, primarily due to strong demand in aerospace & defense markets, which were up 14% compared to fiscal year 2024. Sales to the commercial aerospace market increased 13% due to an increase in commercial jet engine sales of 21%, which was partially offset by a decrease in commercial air frame sales of 16%. In addition, sales of defense products increased 24% compared to fiscal year 2024. These increases were partially offset by lower sales to the medical, specialty energy, and other industrial end markets.

Comparative information for our HPMC segment revenues by market, the respective percentages of overall segment revenues for the fiscal years 2025 and 2024, and the percentage change in revenues by market for fiscal year 2025 is as follows:

Market	Fiscal Year					
	2025		2024		Change	
Aerospace & Defense:						
Jet Engines- Commercial	\$ 1,649.6	68 %	\$ 1,365.4	60 %	\$ 284.2	21 %
Airframes- Commercial	312.1	13 %	369.7	16 %	(57.6)	(16)%
Defense	277.7	11 %	224.8	10 %	52.9	24 %
Total Aerospace & Defense	2,239.4	92 %	1,959.9	86 %	279.5	14 %
Other Markets:						
Specialty Energy	75.8	3 %	96.8	4 %	(21.0)	(22)%
Medical	55.2	2 %	115.5	5 %	(60.3)	(52)%
Electronics	—	— %	3.0	— %	(3.0)	(100)%

Automotive	6.5	1 %	15.2	1 %	(8.7)	(57)%
Conventional Energy	6.1	— %	9.8	1 %	(3.7)	(38)%
Other	31.0	1 %	52.0	2 %	(21.0)	(40)%
Total Other Markets	202.3	8 %	318.6	14 %	(116.3)	(37)%
Total	\$ 2,441.7	100 %	\$ 2,278.5	100 %	\$ 163.2	7 %

We utilize LTAs for our specialty materials, including powders, parts and components, with certain of our customers, including several aerospace market OEMs, to reduce their supply uncertainty. These LTAs cover sales of ATI's specialty materials, precision forgings, components, and machined parts that are used in both next-generation and legacy aircraft platforms, including jet engines. Our LTAs include a titanium products supply agreement for aircraft airframes and structural components with Boeing. This LTA covers value-added titanium products and provides opportunities for greater use of ATI's next generation and advanced titanium alloys in both long product and flat-rolled product forms. The agreement includes both long-product forms that are manufactured within the HPMC segment, and a significant amount of plate products that are manufactured utilizing assets of both the HPMC and AA&S segments. Revenues and profits associated with these titanium products covered by the Boeing LTA are included primarily in the results for the HPMC segment. The HPMC segment also includes revenues and profits under our LTA with Airbus for titanium airframe products.

We have LTAs with several aircraft engine manufacturers, including GE Aviation and Safran, to supply premium titanium alloys, nickel-based alloys, and vacuum-melted specialty alloys products for commercial and military jet engine applications. In addition, we have LTAs with Rolls-Royce plc for the supply of disc-quality mill products and precision forgings for commercial jet engine applications and with Pratt & Whitney to provide isothermal and conventional forgings for use in jet engines. We also supply products to other important parts of the aircraft market such as helicopters and rotary engine fixed wing aircraft.

New airframe designs contain a larger percentage of titanium alloys, and the jet engines that power them use newer nickel and titanium-based alloys for improved performance and more economical operating costs. Boeing and Airbus continue to have multi-year backlogs of orders for both legacy models and next-generation aircraft, and there are over 30,000 jet engines with firm orders (Aero Engine News, Fourth Quarter 2025). Due to manufacturing cycle times, demand for our specialty materials leads the deliveries of new aircrafts by approximately 6 to 12 months.

Use of these newer materials, particularly for jet engine applications, is expected to continue to increase for several years, with strong growth expected in powder metal alloys, including increased usage of iso-thermal forging and additive manufacturing production processes.

In addition, as our specialty materials are used in rotating components of jet engines, demand for our products for spare parts is impacted by aircraft flight activity and engine refurbishment requirements of U.S. and foreign aviation regulatory authorities. As the number of aircraft in service and flight activity increases, the need for our materials associated with engine refurbishment is expected to increase.

Comparative information for HPMC's major product categories based on their percentages of the segment's overall revenue is as follows:

	Fiscal Year	
	2025	2024
Nickel-based alloys and specialty alloys	43 %	41 %
Precision forgings, castings and components	40 %	36 %
Titanium and titanium-based alloys	17 %	23 %
Total	100 %	100 %

HPMC Segment EBITDA for fiscal year 2025 increased 25% to \$575.8 million, or 23.6% of sales, compared to \$461.4 million, or 20.3% of sales, in fiscal year 2024. The fiscal year 2025 increase in Segment EBITDA as a percentage of sales was primarily due to favorable sales mix and pricing as well as higher volumes. Results in fiscal year 2025 included \$4.4 million of benefits related to the recognition of previously deferred employee retention tax credits. Results in fiscal year 2024 included \$9.0 million of benefits related to the recognition of previously deferred employee retention tax credits, which were partially offset by a charge of approximately \$6.3 million due to a commercial negotiation with a customer and higher incentive compensation, maintenance and outsourcing costs.

Advanced Alloys & Solutions

<i>(In millions)</i>	Fiscal Year	% Change	Fiscal Year
	2025		2024
Sales to external customers	\$ 2,145.7	3 %	\$ 2,083.6
Segment EBITDA	\$ 349.0	9 %	\$ 320.9
Segment EBITDA as a percentage of sales	16.3 %		15.4 %
International sales as a percentage of sales	39.2 %		33.2 %

Fiscal Year 2025 Compared to Fiscal Year 2024

Sales of \$2.1 billion for the AA&S segment in fiscal year 2025 increased 3% compared to fiscal year 2024, primarily due to an increase in aerospace & defense sales of 15%, driven by growth for commercial airframe products and jet engine products, as well as a 10% increase in sales to the conventional energy market. These increases were partially offset by lower sales to medical, construction and mining and other industrial markets.

Comparative information for our AA&S segment revenues by market, the respective percentages of overall segment revenues, for the fiscal years 2025 and 2024, and the percentage change in revenues by market for fiscal year 2024 is as follows:

(In millions)

	Fiscal Year				Change	
	2025		2024			
Aerospace & Defense:						
Jet Engines- Commercial	113.3	6 %	92.4	4 %	20.9	23 %
Airframes- Commercial	478.8	22 %	403.2	19 %	75.6	19 %
Defense	280.0	13 %	265.4	13 %	14.6	6 %

Other	145.0	7 %	165.5	8 %	(20.5)	(12)%
Total Other Markets	\$ 1,273.6	59 %	\$ 1,322.6	64 %	\$ (49.0)	(4)%
Total	\$ 2,145.7	100 %	\$ 2,083.6	100 %	\$ 62.1	3 %

Our AA&S segment produces zirconium and related alloys including hafnium and niobium, nickel-based alloys, titanium and titanium-based alloys, and specialty alloys in a variety of forms including plate, sheet, and PRS products. AA&S also provides hot-rolling conversion services at its HRPF, including carbon steel products under several LTAs.

Comparative information for the AA&S segment's major product categories, based on their percentages of revenue are presented in the following table. HRPF conversion service sales are excluded from this presentation.

	Fiscal Year	
	2025	2024
Nickel-based alloys and specialty alloys	50 %	49 %
Zirconium and related alloys	19 %	19 %
Titanium and titanium-based alloys	19 %	13 %
PRS products	12 %	19 %
Total	100 %	100 %

Segment EBITDA was \$349.0 million, or 16.3% of sales, an 9% increase from Segment EBITDA of \$320.9 million, or 15.4% of sales, in fiscal year 2024. The margin increase compared to the prior year was primarily due to favorable pricing for exotic alloys and improved sales mix on higher demand for nickel-based alloys and titanium mill products. Results in fiscal year 2025 included \$2.8 million of benefits related to the recognition of previously deferred employee retention tax credits. Fiscal year 2024 also included \$7.7 million of benefits related to the recognition of previously deferred employee retention tax credits, which were partially offset by a charge of approximately \$5.5 million due to a commercial negotiation with a customer and higher incentive compensation and maintenance costs.

Corporate Items

Corporate expenses, which are primarily included in selling and administrative expenses in the statement of operations, were \$67.8 million in fiscal year 2025 compared to \$64.0 million in fiscal year 2024. The increase in expenses in fiscal year 2025 as compared to fiscal year 2024 was primarily due to higher incentive compensation costs and prior year benefits due to insurance settlements.

Closed operations and other income/expenses are presented primarily in selling and administrative expenses in the consolidated statements of operations and include legal, environmental, retirement benefits and insurance obligations associated with closed operations as well as gains from the sale of non-core assets. Closed operations and other expenses provided income of \$2.3

million in fiscal year 2025 and \$10.8 million in fiscal year 2024. Fiscal year 2025 includes a \$10.5 million gain on the sale of certain oil and gas rights, included within other income, net, on the consolidated statement of operations. This gain was offset by unfavorable foreign currency transaction impacts compared to the prior year period. Fiscal year 2024 includes an \$11.6 million gain on the sale of certain oil and gas rights, included within other income, net, on the consolidated statement of operations. Fiscal year 2024 also includes a \$2.3 million gain on the sale of assets for our idled Houston, PA facility included within gain on asset sales and sales of businesses, net, on the consolidated statement of operations.

Managed Working Capital

As part of managing the performance of our business, we focus on controlling Managed Working Capital, which we define as gross accounts receivable, short-term contract assets and gross inventories, less accounts payable and short-term contract liabilities. We exclude the effects of inventory valuation reserves and reserves for uncollectible accounts receivable when computing this non-GAAP performance measure, which is not intended to replace Working Capital or to be used as a measure of liquidity. We employ several strategies to actively manage our Managed Working Capital, seeking to effectively balance the need to maintain appropriate levels of Managed Working Capital to support our growth and operations, while deploying our cash efficiently. Our strategies to actively manage our Managed Working Capital include, but are not limited to, taking advantage of favorable customer and supplier payment terms, participating in supplier financing programs, accounts receivable factoring arrangements and other customer financing programs, managing the timing of purchases of raw materials, and leveling manufacturing process throughput and shipping to limit periodic increases in Managed Working Capital. We assess Managed Working Capital performance as a percentage of the prior three months' annualized sales to evaluate the asset intensity of our business.

At December 28, 2025, Managed Working Capital was 32.5% of annualized total ATI sales compared to 30.9% of annualized sales at December 29, 2024. The increase in Managed Working Capital as a percentage of annualized sales year over year was primarily due to inventory builds to support increased operating levels and the timing of shipments and vendor payments. The \$80.8 million increase in overall Managed Working Capital in fiscal year 2025 is detailed in the table below. Days sales outstanding, which measures actual collection timing for accounts receivable, improved slightly by 3% as of December 28, 2025 compared to fiscal year 2024. Gross inventory turns, which measures how many times we turn over our inventory relative to cost of sales in a year, worsened by 8% in fiscal year 2025 compared to fiscal year 2024. We continue our focus on operational improvements to positively impact the inventory intensity of our business and reduce the required investment of Managed Working Capital in our growing business.

The computations of Managed Working Capital at December 28, 2025 and December 29, 2024 reconciled to the financial statement line items as computed under U.S. GAAP, were as follows.

<i>(In millions)</i>	December 28, 2025	December 29, 2024
Accounts receivable	\$ 686.1	\$ 709.2
Short-term contract assets	72.8	75.6
Inventory	1,403.2	1,353.0
Accounts payable	(568.2)	(609.1)
Short-term contract liabilities	(146.4)	(169.4)
Subtotal	1,447.5	1,359.3
Allowance for doubtful accounts	4.2	15.0
Inventory reserves	80.4	68.5
Net managed working capital held for sale	—	8.5
Managed working capital	\$ 1,532.1	\$ 1,451.3
Annualized prior 3 months sales	\$ 4,708.2	\$ 4,690.5
Managed working capital as a % of annualized sales	32.5 %	30.9 %
December 29, 2025 change in managed working capital	\$ 80.8	

Financial Condition and Liquidity

On June 13, 2025, we amended our Asset Based Lending (ABL) Credit Facility, which is collateralized by the accounts receivable and inventory of our operations and also provides us with the option of including certain machinery and equipment as additional collateral for purposes of determining availability under the facility. This amendment extended the facility through June 2030. The amended ABL includes a \$600 million revolving credit facility, a letter of credit sub-facility of up to \$200 million, a \$200 million term loan (Term Loan), and a swing loan facility of up to \$60 million. Additionally, the amendment gives the Company the ability, through June 13, 2026, and as long as no default or event of default has occurred and is continuing, to borrow an additional term loan of up to \$100 million in total, using one or two draws (the Delayed-Draw

Term Loan). The ABL Term Loan and any Delayed-Draw Term Loan can be prepaid in increments of \$25 million if certain minimum liquidity conditions are satisfied. In addition, we have the right to request an increase of up to \$300 million under the revolving credit facility for the duration of the ABL.

As of December 28, 2025, there were no outstanding borrowings under the revolving credit portion of the ABL, and \$29.3 million was utilized to support the issuance of letters of credit. There were average revolving credit borrowings of \$2.6 million bearing an average annual interest rate of 6.5% under the ABL during fiscal year 2025. There were no revolving credit borrowings under the ABL during fiscal year 2024.

The ABL Term Loan and Delayed-Draw Term Loan have an interest rate of 2.0% above the adjusted Secured Overnight Financing Rate (SOFR). The applicable interest rate for revolving credit borrowings under the ABL credit facility includes interest rate spreads based on available borrowing capacity that range between 1.25% and 1.75% for SOFR-based borrowings and between 0.25% and 0.75% for base rate borrowings.

The ABL credit facility contains a financial covenant whereby we must maintain a fixed charge coverage ratio of not less than 1.00:1.00 after an event of default has occurred and is continuing or if the undrawn availability under the ABL revolving credit portion of the facility is less than the greater of (i) 10% of the then applicable maximum loan amount under the revolving credit portion of the ABL and the outstanding ABL Term Loan balance, or (ii) \$60.0 million. We were in compliance with the fixed charge coverage ratio as of December 28, 2025.

During 2025, we received \$26.8 million of proceeds from the sale of non-core businesses previously reported in the HPMC segment and proceeds of \$11.1 million from property, plant and equipment sales, primarily for oil and gas rights.

At December 28, 2025, we had total liquidity of \$1.1 billion, comprised of \$417 million of cash and cash equivalents, \$569 million of undrawn capacity under the ABL credit facility, and up to \$100 million of availability under the Delayed-Draw Term Loan. Our next meaningful debt maturity is \$350 million of Senior Notes in the fourth quarter of fiscal year 2027.

Our U.S. qualified defined benefit plan has approximately 2,000 participants. Based on current actuarial assumptions, we are required to make a \$4 million contribution to the plan during fiscal year 2026. Using our long-term weighted average expected rate of return on pension plan assets and other actuarial assumptions, we expect to have approximately \$40 million of minimum cash funding requirements to the defined benefit pension plan over the next ten years. Minimum cash funding requirements are not expected to be significant in any individual year. However, these funding estimates are subject to significant uncertainty including the actual pension trust assets and the discount rates used to measure pension liabilities.

Periodically, our Board of Directors authorizes the repurchase of ATI Common stock (the "Share Repurchase Program"), the most recent of which was \$700 million that was announced in September 2024. In fiscal year 2025, ATI used \$470 million to repurchase 6.4 million shares of its common stock under the Share Repurchase Program. As of December 28, 2025, there is \$120 million of authorization remaining under the Share Repurchase Program. Repurchases under these programs can be made in the open market or in privately negotiated transactions, with the amount and timing of repurchases depending on market conditions and corporate needs. Open market repurchases are structured to occur within the pricing and volume requirements of SEC Rule 10b-18. The current Share Repurchase Program has no time limit, does not obligate the Company to repurchase any specific number of shares, and may be modified, suspended, or terminated at any time by the Board of Directors without prior notice.

In managing our overall capital structure, we focus on the ratio of net debt to Adjusted EBITDA, which we use as a measure of our ability to repay our incurred debt. We define net debt as the total principal balance of our outstanding indebtedness excluding deferred financing costs, net of cash, at the balance sheet date. See the explanations above for our definitions of Adjusted EBITDA and EBITDA, which are non-GAAP measures and are not intended to represent, and should not be considered more meaningful than, or as alternatives to, a measure of operating performance as determined in accordance with U.S. GAAP. Our ratio of net debt to Adjusted EBITDA (Adjusted EBITDA Leverage Ratio) measures net debt at the balance sheet date to Adjusted EBITDA as calculated on the trailing twelve-month period from this balance sheet date.

Our Debt to Adjusted EBITDA Leverage Ratio and Net Debt to Adjusted EBITDA Leverage ratio improved in fiscal year 2025 compared to fiscal year 2024, resulting from higher earnings and lower debt as a result of the redemption of the 2025 debentures. The reconciliations of our Adjusted EBITDA Leverage Ratios to the balance sheet and income statement amounts as reported under U.S. GAAP are as follows:

	December 28, 2025	December 29, 2024
Net income attributable to ATI	\$ 404.3	\$ 367.8
Net income attributable to noncontrolling interests	14.3	14.9
Net income	418.6	382.7
Interest expense	98.6	108.2
Depreciation and amortization	168.1	151.5
Income tax provision (benefit)	103.7	103.4
Pension remeasurement loss	18.6	14.1
Restructuring and other charges	48.8	22.1
Loss (gain) on asset sales and sale of business	2.9	(52.9)
Adjusted EBITDA	\$ 859.3	\$ 729.1
Debt	\$ 1,749.4	\$ 1,895.3
Add: Debt issuance costs	11.6	14.2
Total debt	1,761.0	1,909.5
Less: Cash	(416.7)	(721.2)
Net debt	\$ 1,344.3	\$ 1,188.3
Debt to Adjusted EBITDA	2.05	2.62
Net Debt to Adjusted EBITDA	1.56	1.63

We believe that internally generated funds, current cash on hand and available borrowings under the ABL credit facility will be adequate to meet our liquidity needs, including the scheduled debt maturity in the fourth quarter of fiscal year 2027. We regularly review our capital structure, various financing alternatives and conditions in the debt and equity markets in order to opportunistically enhance our capital structure and reduce financing costs. As a result, we may seek to refinance or retire existing indebtedness, incur new or additional indebtedness or issue equity or equity-linked securities, in each case, depending on market and other conditions. Further, in the event we seek additional or new financing, the cost, terms and conditions of such borrowings would be impacted by our credit rating. As of December 28, 2025, we have no off-balance sheet arrangements as defined in Item 303(a)(4) of SEC Regulation S-K.

Cash Flow

Cash provided by operations was \$614.3 million for fiscal year 2025 and \$407.2 million fiscal year 2024. The 2025 period improvement was due to higher net income and improved working capital changes compared to the 2024 period, including cash flows from accounts receivable. Accounts receivable were positively impacted by the sale of \$80 million of accounts receivable in exchange for cash under the new Receivables Facility. Working capital balances, and consequently cash from operations, can fluctuate throughout any operating period based upon the timing of receipts from customers and payments to vendors. However, we actively manage our working capital to allow for the required flexibility to meet our strategic objectives. Other significant fiscal year 2025 operating cash flow items included payment of 2024 annual incentive compensation. Other significant fiscal year 2024 operating cash flow items included payment of 2023 annual incentive compensation.

Cash used in investing activities was \$234.5 million in fiscal year 2025, reflecting \$280.6 million in capital expenditures to grow our capacity and capabilities with a focus on our aerospace & defense market. These investing activity outflows were partially offset by \$26.8 million of proceeds from the sale of non-core businesses previously reported in the HPMC segment and proceeds of \$11.1 million from property, plant and equipment sales, primarily for oil and gas rights. We expect to fund our capital expenditures with cash on hand, cash flow generated from our operations and, if needed, by using a portion of the ABL credit facility. Cash used in investing activities was \$159.6 million in fiscal year 2024, reflecting \$239.1 million in capital expenditures to grow our capacity and capabilities with a focus on aerospace & defense. These investing activity outflows were partially offset by \$48.0 million of proceeds from the sale of our New Bedford, MA operations and Remscheid, Germany operations and \$27.6 million of proceeds from property, plant and equipment sales, which included \$11.6 million of proceeds on the sale of certain oil and gas rights and \$3.5 million of proceeds received for the sale of assets for our idled Houston, PA facility.

Cash used by financing activities in fiscal year 2025 was \$699.9 million, which included \$470.0 million to repurchase 6.4 million shares of ATI stock under our Share Repurchase Program, \$150.0 million for the repayment of our 2025 debentures and \$13.2 million in dividend payments to the 40% noncontrolling interest in our PRS joint venture in China. Cash provided by financing activities in fiscal year 2024 was \$260.4 million, which included \$260.0 million to repurchase 5.3 million shares of

ATI stock under our Share Repurchase Program and \$16.0 million in dividend payments to the 40% noncontrolling interest in our PRS joint venture in China, partially offset by \$76.1 million in cash received from the settlement of the capped call as a result of the redemption of the 2025 Convertible Notes.

At December 28, 2025, cash and cash equivalents on hand totaled \$416.7 million, a \$304.5 million decrease from fiscal year-end 2024. Cash and cash equivalents held by our foreign subsidiaries was \$183.7 million at December 28, 2025, of which \$97.6 million was held by our PRS joint venture in China.

Contractual Obligations

A summary of required payments under financial instruments (excluding accrued interest) and other commitments are presented below.

<i>(In millions)</i>	Total	Less than 1 year	1-3 years	4-5 years	After 5 years
Contractual Cash Obligations					
Total Debt including Finance Leases ^(A)	\$ 1,761.0	\$ 31.6	\$ 402.2	\$ 977.1	\$ 350.1
Interest on Debt ^(B)	427.5	98.9	177.3	133.4	17.9
Operating Lease Obligations ^(C)	110.4	22.3	35.4	24.6	28.1
Other Long-term Liabilities	132.2	—	57.9	37.6	36.7
Pension and OPEB Obligations ^(D)	251.2	32.5	65.1	64.5	89.1
Unconditional Purchase Obligations					
Raw Materials ^(E)	1,032.1	541.5	359.6	131.0	—
Capital expenditures	247.4	148.7	98.7	—	—
Other ^(F)	166.8	89.6	44.6	30.5	2.1
Total	<u>\$ 4,128.6</u>	<u>\$ 965.1</u>	<u>\$ 1,240.8</u>	<u>\$ 1,398.7</u>	<u>\$ 524.0</u>
Other Financial Commitments					
Lines of Credit ^(G)	\$ 673.2	\$ 73.2		\$ 600.0	\$ —
Guarantees	<u>\$ 17.8</u>				

- (A) Amounts exclude \$72 million for certain finance lease contracts the Company has agreed to enter into. See Note 11, Leases for further information.
- (B) Amounts include contractual interest payments using the interest rates in effect as of December 28, 2025 applicable to the Company's ABL Term Loan due 2030, the 5.875% Senior Notes due 2027, the 4.875% Senior Notes due 2029, the 7.25% Senior Notes due 2030, and the 5.125% Senior Notes due 2031.
- (C) Amounts include operating lease obligations at their undiscounted value. These obligations are presented in other current liabilities and other long-term liabilities on the consolidated balance sheets at their discounted value, using applicable interest rates. See Note 11, Leases for further information.
- (D) Based on current actuarial studies, amounts include payments for the next 10 years, which are not significant, to defined benefit pension plans, assuming the expected long-term returns on pension assets are achieved. Projections of minimum required payments to the U.S. qualified defined benefit pension plan are subject to significant uncertainty based on a number of factors including actual pension plan asset returns, changes in estimates of participant longevity, and changes in interest rates. Amounts also include actuarial projections of payments under other post-employment benefit plans for the next 10 years. In most retiree healthcare plans, our contributions are capped based on the cost as of a certain date. See Note 14, Retirement Benefits for further information.
- (E) We have contracted for physical delivery for certain of our raw materials to meet a portion of our needs. These contracts are based upon fixed or variable price provisions. We used current market prices as of December 28, 2025, for raw material obligations with variable pricing.
- (F) We have various contractual obligations that extend through fiscal year 2031 for services involving production facilities, information technology services and administrative operations. Our purchase obligation as disclosed represents the estimated termination fees payable if we were to exit these contracts.
- (G) At December 28, 2025, drawn amounts on the U.S. facility were \$29.3 million utilized for standby letters of credit under the \$600 million ABL credit facility, which renew annually. These standby letters of credit are used to support: \$19.6 million in workers' compensation and general insurance arrangements, \$5.4 million related to environmental matters and \$4.3 million for performance assurances.

Commitments and Contingencies

At December 28, 2025, our reserves for environmental remediation obligations totaled approximately \$15 million, of which \$7 million was included in other current liabilities. These reserves included estimated probable future costs of: \$2 million for federal Superfund and comparable state-managed sites; \$7 million for formerly owned or operated sites for remediation or indemnification obligations; and \$6 million for owned or controlled sites at which our operations have been or plan to be discontinued. We continue to evaluate whether we may be able to recover a portion of future costs for environmental liabilities from third parties and to pursue such recoveries where appropriate. The timing of expenditures depends on a number of factors that vary by site. ATI expects that it will expend present accruals over many years and that remediation of all sites with which it has been identified will be completed within thirty years.

Asset retirement obligations (AROs) recorded by the Company were \$8 million at December 28, 2025. These AROs related to landfill closures, decommissioning costs, facility leases and conditional AROs associated with manufacturing activities using what may be characterized as potentially hazardous materials. During fiscal year 2024, we derecognized \$10 million of AROs in connection with the sale of our precision rolled strip operations.

Based on currently available information, it is reasonably possible that the costs for active matters may exceed our recorded reserves by as much as \$16 million. However, future investigation or remediation activities may result in the discovery of additional hazardous materials, potentially higher levels of contamination than discovered during prior investigation, and may impact costs of the success or lack thereof in remedial solutions. Therefore, future developments, administrative actions or liabilities relating to environmental matters could have a material adverse effect on the ATI's consolidated financial condition or results of operations.

Retirement Benefits

ATI's defined benefit pension plans are closed to new entrants, and at most ATI operations with pension participants, the plans are frozen for all future benefit accruals, with less than 700 participants still accruing benefit service. Additionally, all of the remaining collectively-bargained defined benefit retiree health care plans at ATI's operations are now closed to new entrants, with cost caps in place for these obligations. As a result of these actions, ATI's retirement savings and other postretirement benefit programs have largely transitioned to a defined contribution structure. From fiscal years 2013 to 2022, five annuity buyouts of retired participants and two voluntary cash out programs of deferred participants helped to reduce the total participants in ATI's U.S. qualified defined benefit pension plans by more than 60%. During the fourth quarter of fiscal year 2023, we purchased group annuity contracts from an insurer covering approximately 85% of our U.S. qualified defined benefit pension plan obligations. Under these contracts, we transferred the pension obligations and associated assets for approximately 8,200 plan participants to the selected insurance company. To facilitate this pension derisking strategy, we completed a voluntary cash out for term vested employees and contributed \$222 million to our pension plan in the third quarter of fiscal year 2023, to fully fund remaining pension liabilities ahead of this annuity transaction. After these actions, our U.S. qualified defined benefit pension plan includes approximately 2,000 participants.

At December 28, 2025, our defined benefit pension plans were approximately 86% funded in accordance with U.S. GAAP, and were remeasured at that date using a 5.90% discount rate to measure the projected benefit obligation. Discount rates used to measure pension liabilities for U.S. qualified defined benefit plans for ERISA funding purposes are calculated on a different basis using an IRS-determined segmented yield curve. Funding requirements are also affected by IRS-determined mortality assumptions, which may differ from those used under accounting standards. Based on current actuarial assumptions, we are required to make a \$4 million contribution to our qualified defined benefit pension plan during fiscal year 2026. Using our long-term weighted average expected return on pension plan assets and other actuarial assumptions, we expect to have approximately \$40 million of minimum cash funding requirements to the qualified defined benefit pension plan over the next ten years. Minimum cash funding requirements are not expected to be significant in any individual year. However, these estimates are subject to significant uncertainty, including the performance of our pension trust assets and the discount rates used to measure pension liabilities. Pension trust asset performance for both our accounting and ERISA funding calculations is determined using the market value of plan assets at the end of each year.

Reconciliation of Adjusted EBITDA to Net Income

ATI utilizes Adjusted EBITDA, which is a non-GAAP financial measure, to assist in assessing operating performance on a consistent basis across multiple reporting periods by removing the impact of special items, which can vary from period to period, that management does not believe are directly reflective of the Company's core operations. The Company defines special items as significant non-recurring or non-operational charges or credits, including restructuring charges or credits, gains or losses on the sale of accounts receivable, strike related costs, goodwill and long-lived asset impairments, debt extinguishment charges, pension remeasurement gains and losses, other postretirement/pension curtailment and settlement gains and losses, and gains or losses on sales of businesses.

We define Adjusted EBITDA as net income, excluding net interest expense, income taxes, depreciation and amortization, and special items.

Management believes presenting this non-GAAP financial measure is useful to investors because it (1) provides investors with meaningful supplemental information regarding financial and operating performance by excluding certain items management believes do not directly impact the Company's core operations, (2) permits investors to view performance using the same metrics that management uses to forecast, evaluate performance, and make operating and strategic decisions, and (3) provides additional information useful to investors on a period-to-period consistent basis that are commonly used to analyze companies' operating performance. Management believes that consideration of Adjusted EBITDA, together with Net Income, and the corresponding reconciliation, provides investors with additional understanding of the Company's performance and trends that would be absent such disclosures.

Non-GAAP financial measures should be viewed in addition to, and not superior to or as an alternative for, the Company's reported results prepared in accordance with GAAP. The following table provides the reconciliation of net income attributable to ATI to the Adjusted EBITDA non-GAAP financial measures:

Earnings before interest, taxes, depreciation and amortization (EBITDA)

	<u>Fiscal Year Ended</u>	
	<u>December 28, 2025</u>	<u>December 29, 2024</u>
Net income attributable to ATI	\$ 404.3	\$ 367.8
Net income attributable to noncontrolling interests	14.3	14.9
Net income	418.6	382.7
(+) Depreciation and amortization	168.1	151.5
(+) Interest expense	98.6	108.2
(+) Income tax provision	103.7	103.4
EBITDA	789.0	745.8
Adjustments for special items, pre-tax:		
(+) Restructuring and other charges (a)	48.8	22.1
(+) Pension settlement loss (b)	18.6	14.1
(+/-) Loss (gain) on sales of businesses (c)	2.9	(52.9)
Adjusted EBITDA	\$ 859.3	\$ 729.1
Adjusted EBITDA as a % of sales	18.7 %	16.7 %

Critical Accounting Policies

The accompanying consolidated financial statements have been prepared in conformity with U.S. GAAP. When more than one accounting principle, or the method of its application, is generally accepted, management selects the principle or method that is most appropriate in our specific circumstances. Application of these accounting principles requires our management to make estimates about the future resolution of existing uncertainties; as a result, actual results could differ from these estimates. In preparing these consolidated financial statements, management has made its best estimates and judgments of the amounts and disclosures included in the financial statements giving due regard to materiality.

Asset Impairment

We monitor the recoverability of the carrying value of our long-lived assets. An impairment charge is recognized when the expected net undiscounted future cash flows from an asset's use (including any proceeds from disposition) are less than the asset's carrying value, and the asset's carrying value exceeds its fair value. Changes in the expected use of a long-lived asset group, and the financial performance of the long-lived asset group and its operating segment, are evaluated as indicators of possible impairment. Future cash flow value may include appraisals for property, plant and equipment, land and improvements, future cash flow estimates from operating the long-lived assets, and other operating considerations.

Goodwill is reviewed annually in the fourth quarter of each fiscal year for impairment or more frequently if impairment indicators arise. Other events and changes in circumstances may also require goodwill to be tested for impairment between annual measurement dates. At December 28, 2025, the Company had \$225.2 million of goodwill on its consolidated balance sheet, all of which relates to the HPMC segment.

We performed quantitative goodwill assessments for the two HPMC reporting units with goodwill during the fourth quarter of fiscal year 2025. Fair values were determined using discounted cash flows, which represents Level 3 unobservable information in the fair value hierarchy. These quantitative assessments and valuations require us to make estimates and assumptions regarding revenue growth, changes in working capital, capital expenditures, selling prices, income taxes, and profitability, all of which impact estimated future cash flows. In addition, discounted cash flow valuations are impacted by the determination of our weighted cost of capital (WACC), which also requires us to exercise judgment and make estimates. Although we believe that the estimates and assumptions used were reasonable, actual results could differ from those estimates and assumptions. For example, the WACC utilized in our discounted cash flow assessments was 10.5% and long-term growth rates ranged from 3% to 3.5%. The estimated effect of a 1% change in the WACC would result in a 15% change in the fair value of the Specialty Materials reporting unit and less than a 2% change in the fair value of the Forged Products reporting unit.

Further, to validate the reasonableness of the estimated fair values of the reporting units as of the valuation date, a reconciliation of the aggregate fair values of all reporting units to our market capitalization is performed, taking into account a reasonable control premium.

The \$225.2 million of goodwill remaining as of December 28, 2025 on our consolidated balance sheet is comprised of \$159.2 million at the Forged Products reporting unit and \$66.0 million at the Specialty Materials reporting unit. The goodwill impairment assessment performed in the fourth quarter of fiscal year 2025 determined that our Specialty Materials and Forged Products reporting units' had fair values in excess of their respective carrying values. As a result, no impairments were determined to exist. In addition, no indicators of impairment were observed in fiscal year 2025 associated with any of our long-lived assets.

Income Taxes

The provision for income taxes includes deferred taxes resulting from temporary differences in income for financial and tax purposes using the liability method. Such temporary differences result primarily from differences in the carrying value of assets and liabilities. Future realization of deferred income tax assets requires sufficient taxable income within the carryback and/or carryforward period available under tax law. On a quarterly basis, we evaluate the realizability of our deferred tax assets.

The evaluation includes the consideration of all available evidence, both positive and negative, regarding the estimated future reversals of existing taxable temporary differences, estimated future taxable income exclusive of reversing temporary differences and carryforwards, historical taxable income in prior carryback periods if carryback is permitted, and potential tax planning strategies which may be employed to prevent an operating loss or tax credit carryforward from expiring unused. In situations where a three-year cumulative loss condition exists, accounting standards limit the ability to consider projections of future results as positive evidence to assess the realizability of deferred tax assets. Valuation allowances are established when it is estimated that it is more likely than not that the tax benefit of the deferred tax asset will not be realized.

Retirement Benefits

We have defined contribution retirement plans or benefit pension plans covering substantially all of our employees. We also sponsor several postretirement plans covering certain hourly and salaried employees and retirees that provide health care and life insurance benefits for eligible employees. Company contributions to defined contribution retirement plans are generally based on a percentage of eligible pay or based on hours worked, and are funded with cash.

ATI's defined benefit pension plans are closed to new entrants, and at most ATI operations with pension participants, the plans are frozen for all future benefit accruals, with less than 700 participants still accruing benefit service. Additionally, all of the remaining collectively-bargained defined benefit retiree health care plans at ATI's operations are now closed to new entrants, with cost caps in place for these obligations. As a result of these actions, ATI's retirement savings and other postretirement benefit programs have largely transitioned to a defined contribution structure.

Under U.S. GAAP, amounts recognized in financial statements for defined benefit pension plans are determined on an actuarial basis, rather than as contributions are made to the plan. A significant element in determining our pension income or expense in accordance with the accounting standards is the expected investment return on plan assets. In establishing the expected return on plan investments, which is reviewed annually in the fourth quarter, we take into consideration input from our third-party pension plan asset managers and actuaries regarding the types of securities the plan assets are invested in, how those investments have performed historically, and expectations for how those investments will perform in the future. Our weighted average expected long-term return on pension plan investments was 5.80% in fiscal year 2025. The expected long-term rate of return on pension plan investments for fiscal year 2026 will be 5.80%. We apply the assumed rate of return to the market value of plan assets at the end of the previous year. This produces the expected return on plan assets that is included in annual pension expense for the current year. The actual returns on pension plan assets for fiscal year 2025 was 5.9%. The effect of increasing, or lowering, the expected return on pension plan investments by 0.25% would result in additional pre-tax annual income, or expense, of approximately \$1 million. The cumulative difference between the expected return and the actual return on plan assets is immediately recognized in earnings through net periodic pension benefit cost within nonoperating retirement benefit expense on the consolidated statements of operations when pension plans are remeasured annually in the fourth quarter or on an interim basis as triggering events require remeasurement. The amount of expected return on plan assets can vary significantly from year-to-year since the calculation is dependent on the market value of plan assets as of the end of the preceding year. U.S. GAAP allows companies to calculate the expected return on pension assets using either an average of fair market values of pension assets over a period not to exceed five years, which reduces the volatility in reported pension income or expense, or their fair market value at the end of the previous year. However, the SEC does not permit companies to change from the fair market value at the end of the previous year methodology, which is the methodology that we use, to an averaging of fair market values of plan assets methodology. As a result, our results of operations and those of other companies, including companies with which we compete, may not be comparable due to these different methodologies in calculating the expected return on pension investments.

We also determine the discount rate used to value pension plan liabilities as of the last day of our fiscal year. The discount rate reflects the current rate at which the pension liabilities could be effectively settled. In estimating this rate, we receive input from our actuaries regarding the rates of return on high quality, fixed-income investments with maturities matched to the expected future retirement benefit payments. Based on this assessment, we established a discount rate of 5.90% for valuing the pension liabilities as of December 28, 2025, and for determining the pension expense for fiscal year 2026. The estimated effect of changing the discount rate by 0.50% would decrease pension liabilities in the case of an increase in the discount rate or increase pension liabilities in the case of a decrease in the discount rate, by approximately \$20 million. Such a change in the discount rate would have an insignificant impact to pension expense. The effect on pension liabilities for changes to the discount rate, as well as the net effect of other changes in actuarial assumptions and experience, are immediately recognized in earnings through net periodic pension benefit cost within nonoperating retirement benefit expense on the consolidated statements of operations when pension plans are remeasured annually in the fourth quarter or on an interim basis as triggering events require remeasurement.

With respect to our postretirement plans, under most of the plans, our contributions towards retiree medical premiums are capped based upon the cost as of certain dates, thereby creating a defined contribution. In accordance with U.S. GAAP, postretirement expenses recognized in financial statements associated with defined benefit plans are determined on an actuarial basis, rather than as benefits are paid. We use actuarial assumptions, including the discount rate and the expected trend in health care costs, to estimate the costs and benefit obligations for these plans. The discount rate, which is determined annually at the end of each fiscal year, is developed based upon rates of return on high quality, fixed-income investments. At the end of fiscal year 2025, we determined the rate to be 5.30%, compared to a 5.60% discount rate in fiscal year 2024, and a 5.40% discount rate in fiscal year 2023. The estimated effect of changing the discount rate by 0.50% would decrease postretirement obligations in the case of an increase in the discount rate or increase postretirement obligations in the case of a decrease in the discount rate, by approximately \$6 million. Such a change in the discount rate would have an insignificant impact to postretirement benefit expense. Based upon predictions of continued significant medical cost inflation in future years, the annual assumed rate of increase in the per capita cost of covered benefits of health care plans is 8.5% in 2026 and is assumed to gradually decrease to 4.0% in the year 2051 and remain level thereafter. Assumed health care cost trend rates can have a significant effect on the benefit obligation for health care plans, however, the Company's contributions for most of its retiree health plans are capped based on a fixed premium amount, which limits the impact of future health care cost increases.

Forward-Looking Statements

From time-to-time, the Company has made and may continue to make “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Certain statements in this report relate to future events and expectations and, as such, constitute forward-looking statements. Forward-looking statements include those containing such words as “anticipates,” “believes,” “estimates,” “expects,” “would,” “should,” “will,” “will likely result,” “forecast,” “outlook,” “projects,” and similar expressions. Such forward-looking statements are based on management’s current expectations and include known and unknown risks, uncertainties and other factors, many of which the Company is unable to predict or control, that may cause our actual results or performance to materially differ from any future results or performance expressed or implied by such statements. Various of these factors are described in Item 1A, Risk Factors, of this Annual Report on Form 10-K and will be described from time-to-time in the Company filings with the SEC, including the Company’s Annual Reports on Form 10-K and the Company’s subsequent reports filed with the SEC on Form 10-Q and Form 8-K, which are available on the SEC’s website at www.sec.gov and on the Company’s website at www.atimetals.com. We assume no duty to update our forward-looking statements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

As part of our risk management strategy, we utilize derivative financial instruments, from time to time, to hedge our exposure to changes in energy and raw material prices, foreign currencies, and interest rates. We monitor the third-party financial institutions that are our counterparties to these financial instruments on a daily basis and diversify our transactions among counterparties to minimize exposure to any one of these entities. Fair values for derivatives were measured using exchange-traded prices for the hedged items including consideration of counterparty risk and ATI’s credit risk. Our exposure to volatility in interest rates is presently not material, as nearly all of our debt is at fixed interest rates.

Volatility of Interest Rates. We may enter into derivative interest rate contracts to maintain a reasonable balance between fixed- and floating-rate debt. ATI previously maintained a \$50 million floating-for-fixed interest rate swap which converted a portion of the ABL Term Loan to a 4.21% fixed rate that matured during the quarter ended June 30, 2024. There are no outstanding derivative interest rate contracts at December 28, 2025.

Volatility of Energy Prices. Energy resources markets are subject to conditions that create uncertainty in the prices and availability of energy resources. The prices for and availability of electricity, natural gas, oil and other energy resources are subject to volatile market conditions. These market conditions often are affected by political and economic factors beyond our control. Increases in energy costs, or changes in costs relative to energy costs paid by competitors, have and may continue to adversely affect our profitability. To the extent that these uncertainties cause suppliers and customers to be more cost sensitive, increased energy prices may have an adverse effect on our results of operations and financial condition. We use approximately 6 to 8 million MMBtu’s of natural gas annually, depending upon business conditions, in the manufacture of our products. These purchases of natural gas expose us to risk of higher gas prices. For example, a hypothetical \$1.00 per MMBtu increase in the price of natural gas would result in increased annual energy costs of approximately \$6 to \$8 million. We use several approaches to minimize any material adverse effect on our financial condition or results of operations from volatile energy prices. These approaches include incorporating an energy surcharge on many of our products and using financial derivatives or physical hedges to reduce exposure to energy price volatility.

At December 28, 2025, the outstanding financial derivatives used to hedge our exposure to energy cost volatility included natural gas hedges. At December 28, 2025, we hedged approximately 65% of our annual forecasted domestic requirements for natural gas for fiscal year 2026 and approximately 25% for fiscal year 2027. At December 28, 2025, the net mark-to-market valuation of the outstanding natural gas hedges was an unrealized pre-tax loss of \$0.6 million, comprised of \$1.0 million in prepaid expenses and other current assets, \$0.1 million in other long-term assets, \$1.3 million in other current liabilities and \$0.4 million in other long-term liabilities on the balance sheet. For the year ended December 28, 2025, the effects of natural gas hedging activity increased cost of sales by \$0.4 million.

Volatility of Raw Material Prices. We use raw materials surcharge and index mechanisms to offset the impact of increased raw material costs; however, competitive factors in the marketplace can limit our ability to institute such mechanisms, and there can be a delay between the increase in the price of raw materials and the realization of the benefit of such mechanisms. For example, in fiscal year 2025 we used approximately 70 million pounds of nickel; therefore a hypothetical change of \$1.00 per pound in nickel prices would result in increased costs of approximately \$70 million. While we enter into raw materials futures contracts from time-to-time to hedge exposure to price fluctuations, such as for nickel, we cannot be certain that our hedge position adequately reduces exposure. We believe that we have adequate controls to monitor these contracts, but we may not be able to accurately assess exposure to price volatility in the markets for critical raw materials.

The majority of our products are sold utilizing raw material surcharges and index mechanisms. However, as of December 28, 2025, we had entered into financial hedging arrangements, primarily at the request of our customers, related to firm orders, for an aggregate amount of approximately 2 million pounds of nickel with hedge dates through fiscal year 2027. The aggregate

notional amount hedged is less than 5% of a single year's estimated nickel raw material purchase requirements. These derivative instruments are used to hedge the variability of a selling price that is based on the London Metals Exchange (LME) index for nickel, as well as to hedge the variability of the purchase cost of nickel based on this LME index. Any gain or loss associated with these hedging arrangements is included in sales or cost of sales, depending on whether the underlying risk being hedged was the variable selling price or the variable raw material cost, respectively. At December 28, 2025, the net mark-to-market valuation of our outstanding raw material hedges was an unrealized pre-tax gain of \$0.5 million, comprised of \$0.6 million in prepaid expenses and other current assets and \$0.1 million in other current liabilities on the balance sheet.

Foreign Currency Risk. Foreign currency exchange contracts are used, from time-to-time, to limit transactional exposure to changes in currency exchange rates. We sometimes purchase foreign currency forward contracts that permit us to sell specified amounts of foreign currencies expected to be received from our export sales for pre-established U.S. dollar amounts at specified dates. In addition, we may also hedge forecasted capital expenditures and designate cash balances held in foreign currencies as hedges of forecasted foreign currency transactions. At December 28, 2025, we had no significant outstanding foreign currency forward contracts.

We may also use derivative instruments that are not designated as hedges to protect our results from certain fluctuations in foreign exchange rates, as well as to offset a portion of the foreign currency gains and losses generated by the remeasurement of certain assets and liabilities denominated in non-functional currencies. Changes in the fair value of these foreign exchange contract derivatives not designated as hedging instruments are recorded in cost of sales or selling, general and administrative expenses on the consolidated statement of operations, and we recognized \$2.6 million of income and \$2.2 million of expense, net, for settled foreign currency forward contracts that were not designated as hedges during the fiscal years ended December 28, 2025 and December 29, 2024, respectively, which offset foreign currency gains/losses in the relevant currency. We have no significant outstanding hedges that are not designated as of December 28, 2025.

Item 8. Financial Statements and Supplementary Data

Report of Independent Registered Public Accounting Firm

To the Stockholders and the Board of Directors of ATI Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of ATI Inc. and Subsidiaries (the Company) as of December 28, 2025 and December 29, 2024, the related consolidated statements of operations, comprehensive income, cash flows and statements of changes in consolidated equity for each of the three years in the period ended December 28, 2025, and the related notes (collectively referred to as the “consolidated financial statements”). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company at December 28, 2025 and December 29, 2024, and the results of its operations and its cash flows for each of the three years in the period ended December 28, 2025, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 28, 2025, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework), and our report dated February 20, 2026 expressed an unqualified opinion thereon.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective or complex judgments. The communication of the critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Goodwill impairment assessment

Description of the Matter

At December 28, 2025, the Company had \$225 million of goodwill on its consolidated balance sheet. As discussed in Note 1 to the consolidated financial statements, goodwill is reviewed annually for impairment, or more frequently if impairment indicators arise. The assessment of goodwill for impairment requires a comparison of the fair value of each reporting unit that has goodwill associated with its operations to its carrying amount, including goodwill. If the Company's carrying amount of a reporting unit exceeds its fair value, an impairment loss would be measured as the excess of the carrying value over the calculated fair value.

Auditing the Company's annual goodwill impairment assessment for the Company's reporting units was complex due to the use of valuation methodologies in the determination of the estimated fair value, which included the evaluation of the underlying assumptions, such as the discount rate.

How We Addressed the Matter in Our Audit

We obtained an understanding, evaluated the design and tested the operating effectiveness of controls over the Company's goodwill impairment evaluation process.

Our audit procedures to test management's impairment evaluation of the Company's reporting units included, among others, assessing the valuation methodologies, assessing the historical accuracy of management's estimates and performing independent sensitivity analyses. We involved our valuation specialists to assist in evaluating the methodologies and discount rate used to calculate the estimated fair value of the Company's reporting units.

/s/ Ernst & Young LLP

We have served as the Company's auditor since 1996.

Notes to Consolidated Financial Statements

Note 1. Summary of Significant Accounting Policies

Principles of Consolidation and Reporting

The consolidated financial statements include the accounts of ATI Inc. and its subsidiaries. The financial results of majority-owned joint ventures are consolidated into the Company's operating results and financial position, with the minority ownership interest recognized in the consolidated statement of operations as net income attributable to noncontrolling interests, and as equity attributable to the noncontrolling interests within total stockholders' equity. The results for the Shanghai STAL Precision Stainless Steel Company Limited (STAL) are reported on a one month lag (see Note 7 for further discussion). Intercompany accounts and transactions have been eliminated. Unless the context requires otherwise, "ATI" and the "Company" refer to ATI Inc. and its subsidiaries.

Fiscal Year

The Company follows a 4-4-5 or 5-4-4 fiscal calendar, whereby each fiscal quarter consists of thirteen weeks grouped into two four-week months and one five-week month, and its fiscal year ends on the Sunday closest to December 31. Unless otherwise stated, references to years in this Annual Report on Form 10-K relate to fiscal years, rather than calendar years. Fiscal years 2025, 2024 and 2023 ended on December 28, 2025, December 29, 2024 and December 31, 2023, respectively. All fiscal years presented include 52 weeks of operations.

Risks and Uncertainties and Use of Estimates

The preparation of consolidated financial statements in conformity with United States (U.S.) generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect reported amounts of assets and liabilities at the date of the financial statements, as well as the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates. Management believes that the estimates are reasonable.

The Company markets its products to a diverse customer base, principally throughout the U.S. No single customer accounted for more than 10% of sales for any year presented. The core end markets for ATI's products are customers in the aerospace & defense, specialty energy, electronics, and medical markets.

At December 28, 2025, ATI has approximately 7,600 active employees, of which approximately 15% are located outside the U.S. Approximately 35% of ATI's workforce is covered by various collective bargaining agreements (CBAs), predominantly with the United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied & Industrial Service Workers International Union (USW). On April 22, 2025, we reached agreements with the USW for new CBAs that cover approximately 1,100 USW represented full-time employees within our AA&S operations for a six-year term that extends through February 28, 2031.

Cash and Cash Equivalents

Cash equivalents are highly liquid investments that are readily convertible to cash with original maturities of three months or less.

Accounts Receivable

Accounts receivable are presented net of a reserve for doubtful accounts of \$4.2 million and \$15.0 million at December 28, 2025 and December 29, 2024, respectively. Trade credit is extended based upon periodically updated evaluations of each customer's ability to perform its obligations. The Company determines a reserve for doubtful accounts based on an aging of accounts receivable and reviews of specific accounts identified as collection risks, as well as expected credit losses. Amounts are written-off against the reserve in the period it is determined that the receivable is uncollectible.

Inventories

Inventories are stated at the lower of cost or net realizable value with the cost of inventories determined using either first in, first out (FIFO) or average cost methods. Costs include direct material, direct labor and applicable manufacturing and engineering overhead, and other direct costs. The term net realizable value is defined as estimated selling price in the ordinary course of business, less reasonably predictable costs of completion, disposal and transportation.

The Company evaluates product lines on a quarterly basis to identify inventory carrying values that exceed estimated net realizable value. The calculation of a resulting reserve, if any, is recognized as an expense in the period that the need for the reserve is identified. It is the Company's general policy to write-down to scrap value any inventory that is identified as slow-

moving or aged more than twelve months, subject to sales, backlog and anticipated order considerations. In some instances this aging criterion is up to twenty-four months. Inventory valuation reserves also include amounts pertaining to intercompany profit elimination between different subsidiaries.

Long-Lived Assets

Property, plant and equipment are recorded at cost, including capitalized interest, and include long-lived assets acquired under finance leases. Depreciation is primarily recorded using the straight-line method. The Company periodically reviews estimates of useful life and production capacity assigned to new and in-service assets. Significant enhancements, including major maintenance activities that extend the lives of property and equipment, are capitalized. Costs related to repairs and maintenance are charged to expense in the period incurred. The cost and related accumulated depreciation of property and equipment retired or disposed of are removed from the accounts and any related gains or losses are included in income.

The Company monitors the recoverability of the carrying value of its long-lived assets. An impairment charge is recognized when an indicator of impairment occurs and the expected net undiscounted future cash flows from an asset's use (including any proceeds from disposition) are less than the asset's carrying value and the asset's carrying value exceeds its fair value. If an impairment loss is recognized, the adjusted carrying value of the long-lived asset is its new cost basis and this new cost basis is depreciated over the remaining useful life of the asset. Assets to be disposed of by sale are stated at the lower of their fair values or carrying amounts and depreciation is no longer recognized.

Leases

The Company classifies leases as either operating or financing and records a right-of-use (ROU) asset and a lease liability on the consolidated balance sheets as further discussed below. The lease liability is equal to the present value of the minimum lease payments for the term of the lease, including any optional renewal periods determined to be reasonably certain to be exercised, using the discount rate determined at lease commencement. This discount rate is the rate implicit in the lease, if known; otherwise, the incremental borrowing rate (IBR) for the expected lease term is used. The Company's IBRs approximate the rate the Company would have to pay to borrow on a collateralized basis over a similar term at lease inception. The ROU asset is equal to the initial measurement of the lease liability plus any lease payments made to the lessor at or before the commencement date and any unamortized initial direct costs incurred by the lessee, less any unamortized lease incentives received. The Company has elected to not separate lease components from non-lease components for all asset classes, and has made an accounting policy election to apply the short-term exception, which does not require the capitalization of leases with terms of 12 months or less.

ROU assets for operating leases are classified in other long-term assets, and ROU assets for finance leases are classified in property, plant and equipment on the consolidated balance sheet. For operating leases, short-term lease liabilities are classified in other current liabilities, and long-term lease liabilities are classified in other long-term liabilities on the consolidated balance sheet. For finance leases, short-term lease liabilities are classified in short-term debt, and long-term lease liabilities are classified in long-term debt on the consolidated balance sheet. On the cash flow statement, payments for operating leases are classified as operating activities. Payments for finance leases are classified as a financing activity, except for the interest component of the payment which is classified as an operating activity.

The Company has lease contracts for real property and machinery and equipment. At inception of a contract, the Company determines whether the contract is or contains a lease. If the Company has a right to obtain substantially all of the economic benefits from the use of the identified asset and the right to direct the use of the asset, then the contract contains a lease. Several of the Company's real property lease contracts include options to extend the lease term, and the Company reassesses the likelihood of renewal on at least an annual basis. In addition, several real property leases include variable lease payments, for items such as common area maintenance and utilities, which are expensed as incurred as variable lease expense.

Goodwill

Goodwill is reviewed annually for impairment, or more frequently if impairment indicators arise. The review for goodwill impairment requires a comparison of the fair value of each reporting unit that has goodwill associated with its operations with its carrying amount, including goodwill. If this comparison reflects impairment, then the loss would be measured as the excess of the carrying value over the calculated fair value.

Generally accepted accounting principles provide the option to qualitatively assess goodwill for impairment before completing a quantitative assessment. Under the qualitative approach, if, after assessing the totality of events or circumstances, including both macroeconomic, industry and market factors, and entity-specific factors, the Company determines it is likely (more likely than not) that the fair value of a reporting unit is greater than its carrying amount, then the quantitative impairment analysis is not required. The quantitative assessment may be performed each year for a reporting unit at the Company's option without

first performing a qualitative assessment. The Company's quantitative assessments of goodwill for possible impairment includes estimating the fair value of a reporting unit which has goodwill associated with its operations using discounted cash flows. These impairment assessments and valuation methods require the Company to make estimates and assumptions regarding revenue growth, changes in working capital and capital expenditures, selling prices and profitability that drive cash flows, and the weighted average cost of capital. Many of these assumptions are determined by reference to market participants identified by the Company. Although management believes that the estimates and assumptions used were reasonable, actual results could differ from those estimates and assumptions.

Other events and changes in circumstances may also require goodwill to be tested for impairment between annual measurement dates. While a decline in stock price and market capitalization is not specifically cited as a goodwill impairment indicator, a company's stock price and market capitalization should be considered in determining whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. Additionally, a significant decline in a company's stock price may suggest that an adverse change in the business climate may have caused the fair value of one or more reporting units to fall below carrying value. A sustained decline in market capitalization below book value may be determined to require an interim goodwill impairment review.

Environmental

Costs that mitigate or prevent future environmental contamination or extend the life, increase the capacity or improve the safety or efficiency of property utilized in current operations are capitalized. Other costs that relate to current operations or an existing condition caused by past operations are expensed. Environmental liabilities are recorded when the Company's liability is probable and the costs are reasonably estimable, but generally not later than the completion of the feasibility study or the Company's recommendation of a remedy or commitment to an appropriate plan of action. The accruals are reviewed periodically and, as investigations and remediations proceed, adjustments of the accruals are made to reflect new information as appropriate. Accruals for losses from environmental remediation obligations are not discounted to their present value. The accruals are not reduced by possible recoveries from insurance carriers or other third parties, but do reflect allocations among potentially responsible parties (PRPs) at Federal Superfund sites or similar state-managed sites after an assessment is made of the likelihood that such parties will fulfill their obligations at such sites and after appropriate cost-sharing or other agreements are entered. The measurement of environmental liabilities by the Company is based on currently available facts, present laws and regulations, and current technology. Such estimates take into consideration the Company's prior experience in site investigation and remediation, the data concerning cleanup costs available from other companies and regulatory authorities, and the professional judgment of the Company's environmental experts in consultation with outside environmental specialists, when necessary.

Foreign Currencies

Assets and liabilities of international operations are translated into U.S. dollars using fiscal year-end exchange rates, while revenues and expenses are translated at average exchange rates during the period. The resulting net translation adjustments are recorded as a component of accumulated other comprehensive income (loss) in stockholders' equity. Gains and losses for transactions denominated in foreign currencies are reported in costs of sales or general and administrative expenses in the consolidated statement of operations based on the underlying nature of the transaction.

Sales Recognition

The Company's contracts with customers are comprised of purchase orders, and for larger customers long-term agreements (LTAs). LTAs typically extend multiple years and are utilized by the Company and certain of its customers for its specialty materials, in the form of mill products, powders, parts and components, to reduce supply uncertainty. While LTAs generally define commercial terms including pricing, termination clauses and other contractual requirements, the Company has determined that the contract with a customer is typically established when the customer purchase order is accepted or acknowledged.

Contracts (purchase orders) with customers typically relate to the manufacturing of products, which are defined on a line by line basis, and each distinct good represents a single performance obligation that is satisfied at a point in time when control of the product passes to the customer. For most transactions, control passes at the time of shipment in accordance with agreed upon delivery terms. On occasion, shipping and handling charges occur after the customer obtains control of the good. When this occurs, the shipping and handling services are considered activities to fulfill the promise to transfer the good. Sales for conversion services that transform customer-owned inventory to a different dimension, product form, and/or changed mechanical properties are recognized when the service is completed.

Pricing for the Company's products is also defined in the customer purchase order or LTA on a line item basis and, in some cases, includes variable consideration. Variable consideration is when the selling price of the good is not known or is subject to

adjustment under certain conditions. Types of variable consideration may include volume discounts, customer rebates and surcharges. ATI also provides assurances that goods or services will meet the product specifications contained within the acknowledged customer contract. As such, returns and refunds reserves are estimated based upon past product line history or, at certain locations, on a claim by claim basis.

Certain customer agreements involving production of parts and components require revenue to be recognized over time due to there being no alternative use for the product without significant economic loss and an enforceable right to payment including a normal profit margin from the customer in the event of contract termination. The Company uses an input method for determining the amount of revenue, and associated standard cost, to recognize over-time revenue, cost and gross margin for these customer agreements. The input methods used for these agreements include costs incurred and labor hours expended, both of which give an accurate representation of the progress made toward complete satisfaction of that particular performance obligation.

Contract assets are recognized when ATI's conditional right to consideration for goods or services have transferred to the customer. A conditional right indicates that additional performance obligations associated with the contract are yet to be satisfied. Contract assets are assessed separately for impairment purposes. When ATI's right to consideration from the customer is unconditional, this asset is accounted for as a receivable and presented separately from contract assets. A right is unconditional if nothing other than the passage of time is required before payment of that consideration is due. Performance obligations that are recognized as revenue at a point-in-time and are billed to the customer are recognized as accounts receivable. Payment terms vary from customer to customer depending upon credit worthiness, prior payment history and other credit considerations.

Contract costs are the incremental costs of obtaining and fulfilling a contract (i.e., costs that would not have been incurred if the contract had not been obtained) to provide goods and services to customers. Contract costs for ATI largely consist of design and development costs for molds, dies and other tools that ATI will own and that will be used in producing the products under the supply arrangement. Contract costs are classified as non-current assets and amortized to expense on a systematic and rational basis over a period consistent with the transfer to the customer of the goods or services to which the asset relates.

Contract liabilities are recognized when ATI has received consideration from a customer to transfer goods or services at a future point in time when the Company performs under the contract. Elements of variable consideration discussed above may be recorded as contract liabilities. In addition, progress billings and advance payments from customers for costs incurred to date are also reported as contract liabilities.

Research and Development

Research, development and technical service activities are closely interrelated and directed toward development of new products, improvement of existing products, quality assurance, development of new manufacturing methods, improvement of existing manufacturing methods, and reducing the Company's manufacturing costs. Research and development costs are expensed as incurred. Company funded research and development costs were \$21.3 million in fiscal year 2025, \$19.6 million in fiscal year 2024, and \$20.7 million in fiscal year 2023. Customer funded research and development costs were \$1.9 million in fiscal year 2025, \$2.5 million in fiscal year 2024, and \$1.4 million in fiscal year 2023.

Government Assistance

The Company enters into agreements with U.S. federal agencies, U.S. state and local governments, and foreign governments that provide financial assistance and incentives supporting both new capital projects to expand and enhance manufacturing capabilities and also to sustain and maintain existing operations. Depending on the nature of the government program, the financial impacts may be recorded as a reduction to cost of sales through direct offset of labor and overhead costs or lower depreciation expense, or as a reduction of selling, general and administrative expenses for property tax abatement or other similar categories. Benefits from government assistance are recognized as the activities are incurred, subject to ongoing assessments of meeting other relevant terms such as employment or expenditure levels.

ATI is a party to various U.S. states' economic development incentive programs that provide economic benefits in the forms of property tax relief or cash payments to offset capital expenditures. These programs generally include requirements for levels of capital spending and/or employment to qualify for the government assistance. For the fiscal years ended December 28, 2025, December 29, 2024 and December 31, 2023, these state-level programs reduced selling, general and administrative expenses by \$2.4 million, \$1.7 million, \$1.4 million, respectively, and cash receipts were \$1.8 million, \$2.5 million and \$3.4 million, respectively. Receivables for ongoing programs are \$1.2 million as of both December 28, 2025 and December 29, 2024.

Defined Benefit Pension and Postretirement Plans

The remeasurement of projected benefit obligation and plan assets for defined benefit pension plans are immediately recognized in earnings through net periodic pension benefit cost within nonoperating retirement benefit expense on the consolidated statements of operations, with pension plans to be remeasured annually in the fourth quarter or on an interim basis as triggering events require remeasurement. For the remeasurement of projected benefit obligation and plan assets for defined benefit postretirement plans, the Company defers the recognition of these gains and losses in accumulated other comprehensive loss on the consolidated balance sheet, and the accumulated actuarial gains/losses are then amortized into net periodic benefit costs within nonoperating retirement benefit expense on the consolidated statements of operations over the average expected remaining life of plan participants.

Stock-based Compensation

The Company accounts for stock-based compensation transactions, such as nonvested restricted stock or stock units and performance equity awards, using fair value. Compensation expense for an award is estimated at the date of grant and is recognized over the requisite service period. Compensation expense is adjusted for equity awards that do not vest because service or performance conditions are not satisfied. However, compensation expense already recognized on awards which vest based solely on the attainment of market conditions, such as total shareholder return measures, is not adjusted based on the award attainment status at the end of the measurement period. Compensation expense is adjusted for estimated forfeitures over the award measurement period.

Income Taxes

The provision for, or benefit from, income taxes includes deferred taxes resulting from temporary differences in income for financial and tax purposes using the liability method. Such temporary differences result primarily from differences in the carrying value of assets and liabilities. Future realization of deferred income tax assets requires sufficient taxable income within the carryback and/or carryforward period available under tax law.

The Company evaluates on a quarterly basis whether, based on all available evidence, it is probable that the deferred income tax assets are realizable. Valuation allowances are established when it is estimated that it is more likely than not that the tax benefit of the deferred tax asset will not be realized. The evaluation includes the consideration of all available evidence, both positive and negative, regarding the estimated future reversals of existing taxable temporary differences, estimated future taxable income exclusive of reversing temporary differences and carryforwards, historical taxable income in prior carryback periods if carryback is permitted, and potential tax planning strategies which may be employed to prevent an operating loss or tax credit carryforward from expiring unused. The verifiable evidence such as future reversals of existing temporary differences and the ability to carryback are considered before the subjective sources such as estimated future taxable income exclusive of temporary differences and tax planning strategies.

It is the Company's policy to classify interest and penalties recognized on underpayment of income taxes as income tax expense. It is also the Company's policy to recognize deferred tax amounts stranded in accumulated other comprehensive income (AOCI), which result from tax rate differences on changes in AOCI balances, as an element of income tax expense in the period that the related balance sheet item associated with the AOCI balance ceases to exist. In the case of derivative financial instruments accounted for as hedges, or marketable securities, ATI uses the portfolio method where the stranded deferred tax amount is recognized when all items of a particular category, such as cash flow hedges of a particular risk such as a foreign currency hedge, are settled. In the case of defined benefit pension and other postretirement benefit plans, the stranded deferred tax balance is recognized as an element of income tax expense in the period the benefit plan is extinguished or divested.

Net Income Per Common Share

Basic and diluted net income per share are calculated by dividing the net income available to common stockholders by the weighted average number of common shares outstanding during the fiscal year. Diluted amounts assume the issuance of common stock for all potentially dilutive share equivalents outstanding. The calculations of all diluted income/loss per share figures for a period exclude the potentially dilutive effect of dilutive share equivalents if there is a net loss since the inclusion in the calculation of additional shares in the net loss per share would result in a lower per share loss and therefore be anti-dilutive.

New Accounting Pronouncements Adopted

In December 2023, the FASB issued new accounting guidance related to income tax disclosures. This guidance requires entities to disclose specific categories in its annual rate reconciliation and provide additional information for reconciling items that meet a quantitative threshold. This guidance also requires additional annual disclosures for income taxes paid and requires disaggregation of income before tax, between domestic and foreign, and income tax expense, between federal, state and foreign.

This guidance also eliminates several current disclosure requirements related to the nature and estimate of the range of the reasonably possible change in the unrecognized tax benefits balance in the next 12 months and making a statement that an estimate of the range cannot be made and disclosing the cumulative amount of each type of temporary difference when a deferred tax liability is not recognized because of the exceptions to comprehensive recognition of deferred taxes related to subsidiaries and corporate joint ventures. The Company adopted this new guidance for fiscal year 2025. The adoption of these changes did not have an impact on the Company's consolidated financial statements other than disclosure requirements which are included in Note 17.

Pending Accounting Pronouncements

In November 2024, the FASB issued new accounting guidance related to expense disaggregation disclosures. This guidance requires entities to disclose specified information about certain costs and expenses including (1) the amounts of purchases of inventory, employee compensation, depreciation, and intangible asset amortization, (2) include certain amounts that are already required to be disclosed under current generally accepted accounting principles in the same disclosure as the other disaggregation requirements, (3) a qualitative description of the amounts remaining in relevant expense captions that are not separately disaggregated quantitatively, and (4) the total amount of selling expenses and, in annual reporting periods, an entity's definition of selling expenses. This new guidance for annual disclosures will be effective for the Company for fiscal year 2027 and for interim disclosures will be effective for the Company for fiscal year 2028. The guidance can be applied prospectively or retrospectively and early adoption is permitted. The Company does not expect to early adopt this guidance and does not expect these changes to have an impact on the Company's consolidated financial statements other than disclosure requirements.

Note 2. Revenue from Contracts with Customers

Disaggregation of Revenue

The Company operates in two business segments: High Performance Materials & Components (HPMC) and Advanced Alloys & Solutions (AA&S). Revenue is disaggregated within these two business segments by diversified global markets, primary geographical markets, and diversified products. Comparative information of the Company's overall revenues (in millions) by global and geographical markets for the fiscal years ended December 28, 2025, December 29, 2024 and December 31, 2023 is as follows:

(in millions)	Fiscal Year								
	2025			2024			2023

Total	100 %	100 %	100 %	100 %	100 %	100 %	100 %	100 %	100 %

The Company maintains a backlog of confirmed orders totaling \$3.7 billion, \$3.9 billion and \$3.8 billion at December 28, 2025, December 29, 2024 and December 31, 2023, respectively. Due to the structure of the Company's LTAs, 70% of this backlog at December 28, 2025 represented booked orders with performance obligations that will be satisfied within the next twelve months. The backlog does not reflect any elements of variable consideration.

Accounts Receivable

As of December 28, 2025 and December 29, 2024, accounts receivable with customers were \$690.3 million and \$724.2 million, respectively. The following represents the rollforward of accounts receivable - reserve for doubtful accounts for the fiscal years ended December 28, 2025, December 29, 2024 and December 31, 2023:

(in millions)	
Accounts Receivable - Reserve for Doubtful Accounts	
Balance as of January 1, 2023	\$ 7.7
Expense to increase the reserve	0.1
Write-off of uncollectible accounts	(4.6)
Balance as of December 31, 2023	3.2
Expense to increase the reserve	12.3
Write-off of uncollectible accounts	(0.5)
Balance as of December 29, 2024	15.0
Expense to increase the reserve	1.9
Write-off of uncollectible accounts	(12.7)
Balance as of December 28, 2025	\$ 4.2

Contract balances

The following represents the rollforward of contract assets and liabilities for the fiscal years ended December 28, 2025, December 29, 2024 and December 31, 2023:

(in millions)

Contract Assets

	Fiscal Year		
	2025	2024	2023
Short-term			
Balance as of beginning of fiscal year	\$ 75.6	\$ 59.1	\$ 64.1
Recognized in current year	117.3	88.9	84.1
Reclassified to accounts receivable	(120.1)	(72.4)	(89.5)
Reclassification to/from contract liability	—	—	0.4
Balance as of period end	<u>\$ 72.8</u>	<u>\$ 75.6</u>	<u>\$ 59.1</u>

(in millions)

Contract Liabilities

	Fiscal Year		
	2025	2024	2023
Short-term			
Balance as of beginning of fiscal year	\$ 169.4	\$ 163.6	\$ 149.1
Recognized in current year	158.8	133.6	133.4
Amounts in beginning balance reclassified to revenue	(109.1)	(88.2)	(107.9)
Current year amounts reclassified to revenue	(76.0)	(56.3)	(40.9)
Other	(2.0)	—	(0.7)

(a) Long-term contract liabilities are included in Other long-term liabilities on the consolidated balance sheets.

Contract costs for obtaining and fulfilling a contract were \$15.6 million and \$12.0 million as of December 28, 2025 and December 29, 2024, respectively, which are reported in other long-term assets on the consolidated balance sheets. Amortization expense for the fiscal years ended December 28, 2025, December 29, 2024 and December 31, 2023 of these contract costs was \$1.8 million, \$1.1 million, and \$1.2 million, respectively.

Note 3. Inventories

Inventories at December 28, 2025 and December 29, 2024 were as follows (in millions):

	Fiscal Year	
	2025	2024
Raw materials and supplies	\$ 245.6	\$ 206.4
Work-in-process	1,137.4	1,144.1
Finished goods	100.6	71.0
	<u>1,483.6</u>	<u>1,421.5</u>
Inventory valuation reserves	(80.4)	(68.5)
Total inventories, net	<u>\$ 1,403.2</u>	<u>\$ 1,353.0</u>

Note 4. Property, Plant and Equipment

Property, plant and equipment at December 28, 2025 and December 29, 2024 was as follows:

<i>(In millions)</i>	Fiscal Year	
	2025	2024
Land	\$ 31.2	\$ 30.8
Buildings	759.2	735.2
Equipment and leasehold improvements	3,389.8	3,145.3
	4,180.2	3,911.3
Accumulated depreciation and amortization	(2,239.6)	(2,134.4)
Total property, plant and equipment, net	\$ 1,940.6	\$ 1,776.9

Construction in progress at December 28, 2025 and December 29, 2024 was \$359.4 million and \$262.5 million, respectively. Capital expenditures on the consolidated statements of cash flows for the fiscal years ended December 28, 2025, December 29, 2024, and December 31, 2023 exclude \$37.7 million, \$36.2 million, and \$41.9 million, respectively, of incurred but unpaid capital expenditures that were included in property, plant and equipment and accrued at December 28, 2025, December 29, 2024, and December 31, 2023, respectively. Depreciation and amortization for the fiscal years ended December 28, 2025, December 29, 2024 and December 31, 2023 was as follows:

<i>(In millions)</i>	Fiscal Year		
	2025	2024	2023
Depreciation of property, plant and equipment	\$ 146.6	\$ 118.8	\$ 117.4
Software and other amortization	21.5	32.7	28.7
Total depreciation and amortization	\$ 168.1	\$ 151.5	\$ 146.1

Note 5. Goodwill and Other Intangible Assets

At December 28, 2025 and December 29, 2024, the Company reported goodwill amounts of \$225.2 million and \$227.2 million, respectively, on its consolidated balance sheet, all of which relates to the HPMC segment. Goodwill decreased by \$2.0 million during fiscal year 2025 due to the sale of the Company's East Hartford, Connecticut operations and related allocation of goodwill from the Forged Products reporting unit.

The Company performs its annual goodwill impairment evaluation in the fourth quarter of each fiscal year. The \$225.2 million of goodwill as of December 28, 2025 on the Company's consolidated balance sheet is comprised of \$159.2 million at the Forged Products reporting unit and \$66.0 million at the Specialty Materials reporting unit. For the Company's annual goodwill impairment evaluation in fiscal year 2025, quantitative goodwill assessments were performed for these two reporting units.

Fair values were determined using discounted cash flows, which represents Level 3 unobservable information in the fair value hierarchy. These quantitative assessments and valuations require estimates and assumptions regarding revenue growth, changes in working capital, capital expenditures, selling prices, income taxes, and profitability, all of which impact estimated future cash flows. In addition, discounted cash flow valuations are impacted by the determination of ATI's WACC, which also requires the Company to exercise judgment and make estimates. Actual results could differ from those estimates and assumptions. For the annual goodwill impairment in fiscal year 2025, a WACC of 10.5% and long-term growth rates ranging from 3% to 3.5% were used in the discounted cash flow valuation. Further, to validate the reasonableness of the estimated fair values of the reporting units as of the valuation date, a reconciliation of the aggregate fair values of all reporting units to market capitalization was performed using a reasonable control premium. Although the Company believes that the estimates and assumptions used were reasonable, actual results could differ from those estimates and assumptions.

Based on the annual goodwill impairment evaluation for fiscal year 2025, the Company determined that the fair values of the Specialty Materials and Forged Products reporting units exceeded their respective carrying values. As a result, it was concluded that no impairments existed for the fiscal year ended December 28, 2025. Also, there were no impairments for the fiscal years ended December 29, 2024 and December 31, 2023.

No indicators of impairment were observed in fiscal years 2025, 2024 and 2023 associated with any of the Company's long-lived assets. Accumulated goodwill impairment losses as of December 28, 2025, December 29, 2024 and December 31, 2023 were \$528.0 million.

Other intangible assets, which are included in other assets on the accompanying consolidated balance sheets as of December 28, 2025 and December 29, 2024 were as follows:

<i>(in millions)</i>	December 28, 2025		December 29, 2024	
	Gross carrying amount	Accumulated amortization	Gross carrying amount	Accumulated amortization
Technology	\$ 60.5	\$ (44.4)	\$ 61.2	\$ (41.8)
Customer relationships	24.5	(14.3)	24.8	(13.5)
Trademarks	48.2	(38.6)	48.8	(35.8)
Total amortizable intangible assets	<u>\$ 133.2</u>	<u>\$ (97.3)</u>	<u>\$ 134.8</u>	<u>\$ (91.1)</u>

During fiscal year 2025, total amortizable intangible assets, net, decreased approximately \$0.5 million as a result of the sale of the Company's East Hartford, CT operations. This decrease consists of the sale of approximately \$1.6 million of gross intangible assets, net of approximately \$1.1 million of accumulated amortization.

Amortization expense related to intangible assets was approximately \$7.0 million for each of the fiscal years ended December 28, 2025, December 29, 2024, and December 31, 2023. Annual amortization expense is expected to be approximately \$7.0 million for each of the fiscal years 2026 through 2028 and \$4.0 million in fiscal year 2029 and 2030.

Note 6. Divestitures

During fiscal year 2025, the Company completed the sale of its East Hartford, CT operations, an immaterial, non-core operation that was part of the Forged Products business unit, for \$20.5 million. The Company recognized a gain of \$0.8 million, which is reported in gain/loss on asset sales and sale of business, net, on the consolidated statement of operations. The Company received proceeds, net of transaction costs and working capital adjustments, of \$19.3 million, which are reported as an investing activity on the consolidated statements of cash flows. In fiscal year 2024, this operation had external sales of approximately \$37.0 million and income before tax of approximately \$2.9 million.

During fiscal year 2025, the Company completed the sale of certain immaterial, non-core operations in Birmingham, UK and Dusseldorf, Germany, which were part of our European business in the HPMC Segment. A \$3.7 million loss on the sale of these operations is reported in gain/loss on asset sales and sales of businesses, net, on the consolidated statement of operations. The Company received proceeds, net of transaction costs, of \$5.0 million, which are reported as an investing activity on the consolidated statement of cash flows. The Company will receive additional proceeds of approximately \$4.9 million during fiscal year 2026. In fiscal year 2024, these operations had external sales of approximately \$39.1 million and income before tax of approximately \$2.4 million.

During fiscal year 2024, the Company completed the sale of its precision rolled strip operations in New Bedford, MA, which was part of the Specialty-Rolled Products business in the AA&S segment, and Remscheid, Germany, which was part of our European business in the HPMC segment. A \$52.9 million gain on sale of these operations is reported in gain on asset sales and sales of businesses, net, on the consolidated statement of operations for fiscal year 2024. The Company received proceeds, net of transaction costs, of \$48.0 million and \$2.5 million in fiscal years 2024 and 2025, respectively, which is reported as an investing activity on the consolidated statement of cash flows. In fiscal year 2023, these operations had external sales of approximately \$100 million and income before tax of approximately \$6 million.

Note 7. Joint Ventures

The Company has a 60% interest in the Chinese joint venture known as STAL, which manufactures Precision Rolled Strip® (PRS) stainless products mainly for the electronics and automotive markets located in Asia. The remaining 40% interest in STAL is owned by China Baowu Steel Group Corporation Limited, a state authorized investment company whose equity securities are publicly traded in the People's Republic of China.

As a majority-owned joint venture, STAL is consolidated into the Company's operating results and financial position. The minority ownership interest is recognized in the consolidated statement of operations as net income attributable to noncontrolling interests, and as equity attributable to the noncontrolling interests within total stockholders' equity. Cash equivalents held by STAL as of December 28, 2025 were \$97.6 million.

Note 8. Asset Retirement Obligations

The Company maintains reserves where a legal obligation exists to perform an asset retirement activity and the fair value of the liability can be reasonably estimated. These asset retirement obligations (AROs) include liabilities where the timing and (or) method of settlement may be conditional on a future event, that may or may not be within the control of the entity. At December 28, 2025, the Company had recognized AROs of \$8.3 million related to landfill closures, decommissioning costs, facility leases and conditional AROs associated with manufacturing activities using what may be characterized as potentially hazardous materials.

Estimates of AROs are evaluated annually in the fourth quarter, or more frequently if material new information becomes known. Accounting for asset retirement obligations requires significant estimation and in certain cases, the Company has determined that an ARO exists, but the amount of the obligation is not reasonably estimable. The Company may determine that additional AROs are required to be recognized as new information becomes available.

Changes in asset retirement obligations for the years ended December 28, 2025 and December 29, 2024 were as follows:

<i>(In millions)</i>	Fiscal Year	
	2025	2024
Balance at beginning of fiscal year	\$ 7.9	\$ 18.3
Accretion expense	0.5	0.5
Revision of estimates	—	(0.7)
Divestitures	—	(10.0)
Payments	(0.1)	(0.2)
Balance at end of fiscal year	<u>\$ 8.3</u>	<u>\$ 7.9</u>

During fiscal year 2024, the Company derecognized \$10.0 million of AROs in connection with the sale of its precision rolled strip operations (see Note 6 for further explanation).

Note 9. Supplemental Financial Statement Information

Cash and cash equivalents at December 28, 2025 and December 29, 2024 were as follows:

<i>(In millions)</i>	Fiscal Year	
	2025	2024
Cash	\$ 294.9	\$ 391.5
Other short-term investments	121.8	329.7
Total cash and cash equivalents	<u>\$ 416.7</u>	<u>\$ 721.2</u>

Other current liabilities included salaries, wages and other employee-related liabilities of \$122.8 million and \$113.6 million at December 28, 2025 and December 29, 2024, respectively, and accrued interest of \$23.5 million and \$23.9 million at December 28, 2025 and December 29, 2024, respectively.

Other income (expense) for the fiscal years ended December 28, 2025, December 29, 2024, and December 31, 2023 was as follows:

<i>(in millions)</i>	Fiscal Year		
	2025	2024	2023
Rent, royalty income and other income	\$ 4.1	\$ 3.8	\$ 2.6
Gains from disposal of property, plant and equipment, net	10.5	11.6	0.3
Other	—	(1.0)	(1.6)
Total other income, net	<u>\$ 14.6</u>	<u>\$ 14.4</u>	<u>\$ 1.3</u>

Gains from disposal of property, plant and equipment, net for the fiscal year ended December 28, 2025 and December 29, 2024 include a \$10.5 million and \$11.6 million, respectively, gain on the sale of certain oil and gas rights. These cash gains are reported as an investing activity on the consolidated statement of cash flow for the fiscal year ended December 28, 2025.

Supplier Financing

The Company participates in supplier financing programs with two financial institutions to offer its suppliers the option for access to payment in advance of an invoice due date. Under such programs, these financial institutions provide early payment to suppliers at their request for invoices that ATI has confirmed as valid at a pre-determined discount rate commensurate with the creditworthiness of ATI. As of December 28, 2025 and December 29, 2024, the Company had \$52.8 million and \$34.8 million, respectively, reported in accounts payable on the consolidated balance sheets under such programs. The following represents the rollforward of the Company's obligations under such programs for the fiscal year ended December 28, 2025:

(in millions)	Fiscal Year	
	2025	
Balance as of beginning of fiscal year	\$	34.8
New obligations confirmed		299.7
Obligations paid		(281.6)
Balance as of period end	\$	52.8

Accounts Receivable Securitization

On September 19, 2025, ATI Specialty Materials, LLC ("Specialty Materials") and its indirect wholly owned subsidiary, ATI Securitization LLC ("ATI Securitization") entered into a three-year, \$125.0 million Receivables Purchase and Financing Agreement (the "Receivables Facility") with PNC Bank, National Association, as Administrative Agent, and certain Purchasers/Lenders party thereto. Under the Receivables Facility, Specialty Materials sells or contributes, on an ongoing basis, certain of its trade accounts receivable, together with related security and interests in the proceeds thereof, to its wholly owned subsidiary, ATI Securitization Holdings LLC (ATI Holdings). ATI Holdings subsequently sells or contributes those receivable and related security and interests to ATI Securitization, its wholly owned subsidiary, which is a consolidated bankruptcy-remote special purpose entity created for the sole purpose of transacting under the Receivables Facility. ATI Securitization may borrow from, and/or sell receivables under the Receivables Facility at fair value and will secure its obligations with a pledge of undivided interests in such receivables, together with related security and interest in the proceeds thereof. In all instances, Specialty Materials retains the servicing of the accounts receivable transferred, which includes collection and administrative activities. ATI has agreed to guarantee the performance of Specialty Materials obligations under the Receivables Facility.

The maximum aggregate funding available under the Receivables Facility is \$125.0 million at any one time, subject to the availability of eligible receivables and other customary factors and conditions as well as covenants as set forth in the Receivables Facility. Amounts outstanding under the Receivables Facility accrue interest at an adjusted Secured Overnight Financing Rate (SOFR) plus the applicable margin. The Receivables Facility also requires the maintenance of a minimum utilization level equal to 50% of the facility amount.

ATI Securitization is a separate legal entity with its own creditors. In the event of a liquidation of ATI Securitization, its creditors would be entitled to be satisfied out of the assets of ATI Securitization prior to any assets or value becoming available to creditors or equity holders for other ATI entities. The assets of ATI Securitization, including any funds of ATI Securitization that may be commingled with funds of any of its affiliates for purposes of cash management and related efficiencies, are not available to pay creditors of ATI or any affiliate thereof, except to the extent collections of receivables are in excess of the amounts owed by ATI Securitization under the Receivables Facility.

Sales of accounts receivable under the Receivables Facility meet the sale criteria under ASC 860, *Transfers and Servicing* ("ASC 860"), and are derecognized from the consolidated balance sheet. Cash receipts, received at the time of the sale of receivables under the Receivables Facility, are classified as cash flow from operating activities in the consolidated statement of cash flows. As the Company retains the servicing rights of the receivables sold, the Company assessed the associated servicing liability under ASC 860 and determined that the liability is immaterial to the Company's financial statements.

For the fiscal year ended December 28, 2025, ATI Securitization sold \$80.0 million of accounts receivable in exchange for \$80.0 million of cash. The Company recorded a \$1.8 million charge associated with the sale of the accounts receivable within selling and administrative expenses on its consolidated statement of operations and the amount is excluded from segment results.

There were no borrowings during the fiscal year ended December 28, 2025 under the Receivable Facility.

Sale of Receivables Program

During the fourth quarter of 2024, the Company entered into an accounts receivables purchase agreement (Receivables Purchase Agreement) with a third-party financial institution to periodically sell certain accounts receivables at a discount. These accounts receivable sales are accounted for as a sale of assets under ASC 860, *Transfers and Servicing*, as the Company's continuing involvement is limited to servicing the accounts receivable, collecting the payments for the underlying accounts receivables and remitting such collections to the financial institution. The financial institution is responsible for any credit risk associated with the sold accounts receivables. The Company receives the purchase price, equal to the accounts receivable less the discount, at the time of the sale.

The Company sold \$94.2 million and \$13.5 million of its receivables under this program during the fiscal years ended December 28, 2025 and December 29, 2024, respectively, resulting in de-recognition of the receivables from the Company's consolidated balance sheet. As of December 28, 2025, substantially all amounts under the Receivables Purchase Agreement have been repaid to the financial institution. The losses associated with these transactions of \$0.7 million for the fiscal year ended December 28, 2025 are reflected in the Company's consolidated statement of operations and are excluded from segment results. The loss on the sales of these accounts receivables were not material to the Company for the fiscal year ended December 29, 2024. The cash received on these sales of accounts receivable during the fiscal years ended December 28, 2025 and December 29, 2024 is presented in changes in receivables within operating activities in the consolidated statement of cash flows.

Other Customer Receivable Sales

In the fiscal years ended December 28, 2025, December 29, 2024 and December 31, 2023, the Company sold \$375 million, \$300 million and \$308 million, respectively, of certain customers' accounts receivables through programs established by those customers with third-party financial institutions. These customers have extended payment terms and provide the programs to enable suppliers to receive more timely payments. The Company has no continuing involvement with the receivables sold under these programs, including no servicing requirement. The proceeds from these transactions are presented in changes in receivables within operating activities in the consolidated statement of cash flows. The costs associated with these transactions of \$5.3 million, \$6.0 million and \$6.3 million are reflected in the Company's consolidated statement of operations for the fiscal years ended December 28, 2025, December 29, 2024 and December 31, 2023, respectively, and are excluded from segment results.

Note 10. Debt

Debt at December 28, 2025 and December 29, 2024 was as follows:

<i>(In millions)</i>	Fiscal Year	
	2025	2024
ATI Inc. 7.25% Senior Notes due 2030	\$ 425.0	\$ 425.0
ATI Inc. 5.875% Senior Notes due 2027	350.0	350.0
ATI Inc. 5.125% Senior Notes due 2031	350.0	350.0
ATI Inc. 4.875% Senior Notes due 2029	325.0	325.0
Allegheny Ludlum 6.95% Debentures due 2025 (a)	—	150.0
ABL Term Loan	200.0	200.0
U.S. revolving credit facility	—	—
Foreign credit agreements	—	—
Finance leases and other	111.0	109.5
Debt issuance costs	(11.6)	(14.2)
Total short-term and long-term debt	1,749.4	1,895.3
Short-term debt and current portion of long-term debt	31.1	180.4
Total long-term debt	\$ 1,718.3	\$ 1,714.9

- (a) The payment obligations of these debentures issued by Allegheny Ludlum, LLC are fully and unconditionally guaranteed by ATI.

The \$150.0 million Allegheny Ludlum 6.95% Debentures were fully repaid on their December 15, 2025 due date. The repayment was funded through available cash on hand, and there was no default or adverse impact on the Company's financial

covenants. The transaction resulted in a reduction of long-term debt on the balance sheet, and the Company remains in compliance with all applicable debt agreements.

Interest expense was \$110.7 million in fiscal year 2025, \$124.2 million in fiscal year 2024, and \$105.8 million in fiscal year 2023. Interest expense was reduced by \$10.6 million, \$11.8 million, and \$13.5 million, in fiscal years 2025, 2024, and 2023, respectively, from interest capitalization on capital projects. Interest and commitment fees paid were \$117.8 million in fiscal year 2025, \$131.4 million in fiscal year 2024, and \$114.7 million in fiscal year 2023. Net interest expense includes interest income of \$12.1 million in fiscal year 2025, \$16.0 million in fiscal year 2024, and \$13.0 million in fiscal year 2023.

Scheduled principal payments during the next five fiscal years are \$31.6 million in 2026, \$378.6 million in 2027, \$23.6 million in 2028, \$343.7 million in 2029, and \$633.4 million in 2030. See Note 11, Leases, for the portion of these scheduled principal payments that are related to finance leases.

2030 Senior Notes

In August 2023, ATI issued \$425.0 million aggregate principal amount of 7.25% Senior Notes due 2030 (2030 Notes). Interest on the 2030 Notes is payable semi-annually in arrears at a rate of 7.25% per year. The 2030 Notes will mature on August 15, 2030. Net proceeds were \$418.8 million from this issuance, of which \$222 million was used to fund ATI's U.S. qualified defined benefit pension plan in order to facilitate a pension derisking strategy (see Note 14), and the remaining proceeds were used for liquidity and general corporate purposes. Underwriting fees and other third-party expenses for the issuance of the 2030 Notes were \$6.2 million, and are being amortized to interest expense over the 7-year term of the 2030 Notes. The 2030 Notes are unsecured and unsubordinated obligations of the Company and equally ranked with all of its existing and future senior unsecured debt. The 2030 Notes restrict the Company's ability to create certain liens, to enter into sale leaseback transactions, guarantee indebtedness and to consolidate or merge all, or substantially all, of its assets. The Company has the option to redeem the 2030 Notes, as a whole or in part, at any time or from time to time, on at least 15 days, but not more than 60 days, prior notice to the holders of the Notes at redemption prices specified in the 2030 Notes. The 2030 Notes are subject to repurchase upon the occurrence of a change in control repurchase event (as defined in the 2030 Notes) at a repurchase price in cash equal to 101% of the aggregate principal amount of the Notes repurchased, plus any accrued and unpaid interest on the 2030 Notes repurchased.

2025 Convertible Notes

During the third quarter of 2024, the Company notified holders of the \$291.4 million outstanding principal amount of its 3.5% Convertible Notes due 2025 (2025 Convertible Notes) that they would be redeemed prior to their maturity date. The holders of any outstanding 2025 Convertible Notes had the right to convert the principal amount of such notes into shares of ATI's common stock prior to the redemption date. Any 2025 Convertible Notes not tendered for conversion prior to the redemption date were redeemed in cash at a redemption price equal to the principal amount, plus accrued and unpaid interest.

As a result, \$291.0 million principal amount of the outstanding notes was converted at a rate of 64.7178 shares of ATI common stock per \$1,000 principal amount, equivalent to a conversion price of \$15.45 per share or 18.8 million shares of ATI common stock. Due to the early redemption of the 2025 Convertible Notes, the conversion rate was a premium to the conversion rate of 64.5745 shares of ATI common stock per \$1,000 principal amount, or approximately \$15.49 per share, that would have been due at maturity. The remaining \$0.4 million of outstanding principal balance were not tendered for conversion and, as a result, the Company redeemed those for cash.

For those holders who exercised the conversion rights, the terms of the 2025 Convertible Notes provided that any accrued but unpaid interest at the date of conversion was forfeited. As a result, accrued interest from the last interest payment date of June 15, 2024 through the date of conversion, totaling \$2.3 million, was credited to additional paid-in capital. In addition, the remaining unamortized deferred issuance costs of \$1.6 million at the date of conversion were charged to additional paid-in capital.

Coincident with its redemption of the 2025 Convertible Notes, the Company also settled the capped call transactions initiated as part of the issuance of the 2025 Convertible Notes. The capped call transactions included a cap price of \$19.76 per share and were settled for \$76.1 million in cash, which is recorded as additional paid-in capital on the consolidated balance sheet and as a financing activity on the consolidated statement of cash flows.

The 2025 Convertible Notes had a 3.5% cash coupon rate that was payable semi-annually in arrears on each June 15 and December 15. Including amortization of deferred issuance costs, the effective interest rate up to the time of conversion was 4.2% for the fiscal years ended December 29, 2024 and December 31, 2023. Interest expense on the 2025 Convertible Notes was as follows:

<i>(in millions)</i>	Fiscal Year	
	2024	2023
Contractual coupon rate	\$ 7.2	\$ 10.2
Amortization of debt issuance costs	1.3	1.9
Total interest expense	\$ 8.5	\$ 12.1

Credit Agreements

On June 13, 2025, the Company amended its Asset Based Lending (ABL) credit facility, which is collateralized by the accounts receivable and inventory of the Company's operations. This amendment extended the ABL Facility through June 2030. The amended ABL credit facility includes a \$600 million revolving credit facility, a letter of credit sub-facility of up to \$200 million, a \$200 million term loan (Term Loan), and a swing loan facility of up to \$60 million. Additionally, the amendment gives the Company the ability, through June 13, 2026 and as long as no default or event of default has occurred and is continuing, to borrow an additional term loan of up to \$100 million in total, using one or two draws (the Delayed Draw Term Loan). The Term Loan and any Delayed-Draw Loan each bear interest at a rate of 2.0% above adjusted SOFR and can be prepaid in increments of \$25 million if certain minimum liquidity conditions are satisfied. In addition, the Company has the right to request an increase of up to \$300 million under the revolving credit facility for the duration of the ABL. The ABL facility also provides the Company with the option of including certain machinery and equipment as additional collateral for purposes of determining availability under the facility. The Company previously maintained a \$50 million floating-for-fixed interest rate swap which converted a portion of the ABL Term Loan to a 4.21% fixed interest rate that matured in June 2024.

The applicable interest rate for revolving credit borrowings under the ABL credit facility includes interest rate spreads based on available borrowing capacity that range between 1.25% and 1.75% for SOFR-based borrowings and between 0.25% and 0.75% for base rate borrowings. The ABL credit facility contains a financial covenant whereby the Company must maintain a fixed charge coverage ratio of not less than 1.00:1.00 after an event of default has occurred and is continuing or if the undrawn availability under the ABL revolving credit portion of the facility is less than the greater of (i) 10% of the then applicable maximum loan amount under the revolving credit portion of the ABL and the outstanding ABL Term Loan balance, or (ii) \$60.0 million. The Company was in compliance with the fixed charge coverage ratio as of December 28, 2025. Additionally, the Company must demonstrate minimum liquidity specified by the facility during the 90-day period immediately preceding the stated maturity date of the 5.875% Senior Notes due 2027 and the 4.875% Notes due 2029. Costs associated with entering into the June 2025 ABL amendment were \$2.8 million, and are being amortized to interest expense over the extended term of the facility ending June 2030, along with \$1.9 million of unamortized deferred costs previously recorded for the ABL. The ABL, as amended, also contains customary affirmative and negative covenants for credit facilities of this type, including limitations on the Company's ability to incur additional indebtedness or liens or to enter into investments, mergers and acquisitions, dispositions of assets and transactions with affiliates, some of which are more restrictive, at any time during the term of the ABL when the Company's fixed charge coverage ratio is less than 1.00:1.00 and its undrawn availability under the revolving portion of the ABL is less than the greater of (a) \$120 million or (b) 20% of the sum of the maximum loan amount under the revolving credit portion of the ABL and the outstanding ABL Term Loan balance.

As of December 28, 2025, there were no outstanding borrowings under the revolving portion of the ABL, and \$29.3 million was utilized to support the issuance of letters of credit. There were average revolving credit borrowings of \$2.6 million bearing an average annual interest rate of 6.5% under the ABL during fiscal year 2025. There were no revolving credit borrowings under the ABL during fiscal year 2024. The Company also has foreign credit facilities, primarily in China, that total \$73 million based on December 28, 2025 foreign exchange rates, none of which was drawn as of December 28, 2025 or December 29, 2024.

The Company has no off-balance sheet financing relationships as defined in Item 303(a)(4) of SEC Regulation S-K, with variable interest entities, structured finance entities, or any other unconsolidated entities. At December 28, 2025, the Company had not guaranteed any third-party indebtedness.

Note 11. Leases

The following represents the components of lease cost and other information for both operating and financing leases for the fiscal years 2025, 2024 and 2023:

(\$ in millions)

	Fiscal Year		
	2025	2024	2023
Lease Cost			
Finance Lease Cost:			
Amortization of right of use asset	\$ 17.6	\$ 14.1	\$ 10.9
Interest on lease liabilities	6.7	6.3	4.6
Operating lease cost	21.3	17.0	17.6
Short-term lease cost	5.8	6.3	4.5
Variable lease cost	0.6	0.7	1.0
Sublease income	(1.9)	(1.2)	(0.4)
Total lease cost	\$ 50.1	\$ 43.2	\$ 38.2
Other information			
Cash paid for amounts included in the measurement of lease liabilities			
Operating cash flows from finance leases	\$ 6.6	\$ 6.1	\$ 4.6
Operating cash flows from operating leases	\$ 22.3	\$ 18.8	\$ 16.8
Financing cash flows from finance leases	\$ 32.3	\$ 29.1	\$ 24.9
Right of use assets obtained in exchange for new finance lease liabilities	\$ 26.7	\$ 31.6	\$ 54.6
Right of use assets obtained in exchange for new operating lease liabilities	\$ 39.7	\$ 12.1	\$ 25.8
Weighted average remaining lease term - finance leases	4 years	4 years	4 years
Weighted average remaining lease term - operating leases	6 years	7 years	7 years
Weighted average discount rate - finance leases	6.3 %	6.3 %	5.4 %
Weighted average discount rate - operating leases	6.9 %	7.0 %	7.1 %

The following table reconciles future minimum undiscounted rental commitments for operating leases to the operating lease liabilities recorded on the consolidated balance sheet as of December 28, 2025 (in millions):

Fiscal Year	December 28, 2025
2026	\$ 22.3
2027	18.9
2028	16.5
2029	14.4
2030	10.2
2031 and thereafter	28.1
Total undiscounted lease payments	\$ 110.4
Present value adjustment	(21.4)
Operating lease liabilities	\$ 89.0

The following table reconciles future minimum undiscounted rental commitments for finance leases to the finance lease liabilities recorded on the consolidated balance sheet as of December 28, 2025 (in millions):

Fiscal Year	December 28, 2025
2026	\$ 36.2
2027	32.4
2028	25.9
2029	19.7
2030	8.5
2031 and thereafter	0.1
Total undiscounted lease payments	\$ 122.8
Present value adjustment	(12.4)
Finance lease liabilities	<u>\$ 110.4</u>

The Company has agreed to enter into certain finance lease contracts with lenders for progress payments on machinery and equipment that is being constructed at the request and specification of the Company. As of December 28, 2025, the lenders had made \$38.0 million of progress payments on behalf of the Company, and \$34.3 million of progress payments are scheduled to be paid. Upon payment of the final progress payments by the lenders, finance leases will commence, and \$72.3 million, discounted using the applicable discount rates at lease inception, of ROU assets and lease liabilities will be recognized by the Company. The Company received payments of \$9.7 million and \$2.8 million, respectively, as proceeds on the sale of ongoing construction in progress projects that were converted to leases, for the fiscal years ended December 29, 2024 and December 31, 2023. There were no such payments in the fiscal year ended 2025. These payments are presented as investing activities on the consolidated statements of cash flows.

Note 12. Derivative Financial Instruments and Hedging

As part of its risk management strategy, the Company, from time-to-time, utilizes derivative financial instruments to manage its exposure to changes in raw material prices, energy costs, foreign currencies, and interest rates. In accordance with applicable accounting standards, the Company accounts for most of these contracts as hedges.

The Company sometimes uses futures and swap contracts to manage exposure to changes in prices for forecasted purchases of raw materials, such as nickel, and natural gas. Under these contracts, which are generally accounted for as cash flow hedges, the price of the item being hedged is fixed at the time that the contract is entered into and the Company is obligated to make or receive a payment equal to the net change between this fixed price and the market price at the date the contract matures.

The majority of ATI's products are sold utilizing raw material surcharges and index mechanisms. However, as of December 28, 2025, the Company had entered into financial hedging arrangements primarily at the request of its customers, related to firm orders, for an aggregate notional amount of approximately 2 million pounds of nickel with hedge dates through fiscal year 2027. The aggregate notional amount hedged is less than 5% of a single year's estimated nickel raw material purchase requirements. These derivative instruments are used to hedge the variability of a selling price that is based on the London Metals Exchange (LME) index for nickel, as well as to hedge the variability of the purchase cost of nickel based on this LME index. Any gain or loss associated with these hedging arrangements is included in sales or cost of sales, depending on whether the underlying risk being hedged was the variable selling price or the variable raw material cost, respectively.

At December 28, 2025, the outstanding financial derivatives used to hedge the Company's exposure to energy cost volatility included natural gas cost hedges. At December 28, 2025, the company hedged approximately 65% of the Company's annual forecasted domestic requirements for natural gas for fiscal year 2026 and approximately 25% for fiscal year 2027.

While the majority of the Company's direct export sales are transacted in U.S. dollars, foreign currency exchange contracts are used, from time-to-time, to limit transactional exposure to changes in currency exchange rates for those transactions denominated in a non-U.S. currency. The Company sometimes purchases foreign currency forward contracts that permit it to sell specified amounts of foreign currencies expected to be received from its export sales for pre-established U.S. dollar amounts at specified dates. In addition, the Company may also hedge forecasted capital expenditures and designate cash balances held in foreign currencies as hedges of forecasted foreign currency transactions. At December 28, 2025, the Company had no significant outstanding foreign currency forward contracts.

The Company may enter into derivative interest rate contracts to maintain a reasonable balance between fixed- and floating-rate debt. The Company previously maintained a \$50 million floating-for-fixed interest rate swap which converted a portion of the ABL Term Loan to a 4.21% fixed rate that matured during the quarter ended June 30, 2024. There are no outstanding derivative interest rate contracts at December 28, 2025.

There are no credit risk-related contingent features in the Company's derivative contracts, and the contracts contained no provisions under which the Company has posted, or would be required to post, collateral. The counterparties to the Company's derivative contracts were substantial and creditworthy commercial banks that are recognized market makers. The Company controls its credit exposure by diversifying across multiple counterparties and by monitoring credit ratings and credit default swap spreads of its counterparties. The Company also enters into master netting agreements with counterparties when possible.

The fair values of the Company's derivative financial instruments are presented below, representing the gross amounts recognized which are not offset by counterparty or by type of item hedged. All fair values for these derivatives were measured using Level 2 information as defined by the accounting standard hierarchy, which includes quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, and inputs derived principally from or corroborated by observable market data.

(In millions)

<u>Asset derivatives</u>	<u>Balance sheet location</u>	December 28, 2025	December 29, 2024
Derivatives designated as hedging instruments:			
Foreign exchange contracts	Prepaid expenses and other current assets	\$ 0.1	\$ 0.2
Natural gas contracts	Prepaid expenses and other current assets	1.0	0.8
Nickel and other raw material contracts	Prepaid expenses and other current assets	0.6	—
Natural gas contracts	Other assets	0.1	0.9
Total derivatives designated as hedging instruments		1.8	1.9
Total asset derivatives		\$ 1.8	\$ 1.9
<u>Liability derivatives</u>	<u>Balance sheet location</u>		
Derivatives designated as hedging instruments:			
Natural gas contracts	Other current liabilities	\$ 1.3	\$ 1.7
Nickel and other raw material contracts	Other current liabilities	0.1	4.2
Natural gas contracts	Other long-term liabilities	0.4	0.1
Total derivatives designated as hedging instruments		1.8	6.0
Total liability derivatives		\$ 1.8	\$ 6.0

Assuming market prices remain constant with those at December 28, 2025, a pre-tax loss of \$0.3 million is expected to be recognized over the next 12 months.

For derivative financial instruments that are designated as cash flow hedges, the gain or loss on the derivative is reported as a component of other comprehensive income (OCI) and reclassified into earnings in the same period or periods during which the hedged item affects earnings. For derivative financial instruments that are designated as fair value hedges, changes in the fair value of these derivatives are recognized in current period results. There were no outstanding fair value hedges as of December 28, 2025 or December 29, 2024. The cash flow impact for all derivative financial instruments is reported in cash flows provided by operating activities on the consolidated statement of cash flows. The Company did not use net investment hedges for the periods presented. The effects of derivative instruments in the tables below are presented net of related income taxes, excluding any impacts of changes to income tax valuation allowances affecting results of operations or other comprehensive income, when applicable.

Activity with regard to derivatives designated as cash flow hedges for the fiscal years ended December 28, 2025 and December 29, 2024 were as follows (in millions):

Derivatives in Cash Flow Hedging Relationships	Amount of Gain (Loss) Recognized in OCI on Derivatives		Amount of Gain (Loss) Reclassified from Accumulated OCI into Income (a)	
	Fiscal Year			
	2025	2024	2025	2024
Nickel and other raw material contracts	\$ (0.3)	\$ (3.7)	\$ (3.9)	\$ (3.7)
Natural gas contracts	(0.7)	(1.1)	(0.3)	(6.1)
Foreign exchange contracts	—	0.3	0.1	0.2
Interest rate swap	—	—	—	1.2
Total	\$ (1.0)	\$ (4.5)	\$ (4.1)	\$ (8.4)

- (a) The gains (losses) reclassified from accumulated OCI into income related to the derivatives, with the exception of the interest rate swap, are presented in sales and cost of sales in the same period or periods in which the hedged item affects earnings. The gains (losses) reclassified from accumulated OCI into income on the interest rate swap are presented in interest expense in the same period as the interest expense on the ABL Term Loan is recognized in earnings.

The disclosures of gains or losses presented above for nickel and other raw material contracts and foreign currency contracts do not take into account the anticipated underlying transactions. Since these derivative contracts represent hedges, the net effect of any gain or loss on results of operations may be fully or partially offset.

The Company may also use derivative instruments that are not designated as hedges to protect the Company's results from certain fluctuations in foreign exchange rates, as well as to offset a portion of the foreign currency gains and losses generated by the remeasurement of certain assets and liabilities denominated in non-functional currencies. Changes in the fair value of these foreign exchange contract derivatives not designated as hedging instruments are recorded in cost of sales or selling, general and administrative expenses on the consolidated statement of operations, and the Company recognized \$2.6 million of income and \$2.2 million of expense, net, for settled foreign currency forward contracts that were not designated as hedges during the fiscal year ended December 28, 2025 and December 29, 2024, respectively, which offset foreign currency gains/losses in the relevant currency. We have no significant outstanding hedges that are not designated as of December 28, 2025.

Note 13. Fair Value of Financial Instruments

The estimated fair value of financial instruments at December 28, 2025 was as follows:

(In millions)	Total Carrying Amount	Fair Value Measurements at Reporting Date Using		
		Total Estimated Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)
Cash and cash equivalents	\$ 416.7	\$ 416.7	\$ 416.7	\$ —
Derivative financial instruments:				
Assets	1.8	1.8	—	1.8
Liabilities	1.8	1.8	—	1.8
Debt (a)	1,761.0	1,787.9	1,476.9	311.0

The estimated fair value of financial instruments at December 29, 2024 was as follows:

(In millions)	Fair Value Measurements at Reporting Date Using			
	Total Carrying Amount	Total Estimated Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)
Cash and cash equivalents	\$ 721.2	\$ 721.2	\$ 721.2	\$ —
Derivative financial instruments:				
Assets	1.9	1.9	—	1.9
Liabilities	6.0	6.0	—	6.0
Debt (a)	1,909.5	1,889.7	1,580.2	309.5

(a) The total carrying amount for debt excludes debt issuance costs related to the recognized debt liability which is presented in the consolidated balance sheets as a direct reduction from the carrying amount of the debt liability.

In accordance with accounting standards, fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date. Accounting standards established three levels of a fair value hierarchy that prioritizes the inputs used to measure fair value. This hierarchy requires entities to maximize the use of observable inputs and minimize the use of unobservable inputs. The three levels of inputs used to measure fair value are as follows:

Level 1 – Quoted prices in active markets for identical assets or liabilities.

Level 2 – Observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets and liabilities. This includes certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

The following methods and assumptions were used by the Company in estimating the fair value of its financial instruments:

Cash and cash equivalents: Fair values were determined using Level 1 information.

Derivative financial instruments: Fair values for derivatives were measured using exchange-traded prices for the hedged items. The fair value was determined using Level 2 information, including consideration of counterparty risk and the Company's credit risk.

Short-term and long-term debt: The fair values of the 2025 Convertible Notes (prior to conversion in the third quarter of fiscal year 2024), the Allegheny Ludlum 6.95% Debentures due 2025, the 5.875% Senior Notes due 2027, the 4.875% Senior Notes due 2029, the 2030 Notes and the 5.125% Senior Notes due 2031 were determined using Level 1 information. The fair values of other short-term and long-term debt were determined using Level 2 information.

Note 14. Retirement Benefits

The Company has defined contribution retirement plans or defined benefit pension plans covering substantially all employees. Company contributions to defined contribution retirement plans are generally based on a percentage of eligible pay or based on hours worked. Benefits under the defined benefit pension plans are generally based on years of service and/or final average pay. The Company also sponsors several postretirement plans covering certain collectively-bargained salaried and hourly employees. The plans provide health care and life insurance benefits for eligible retirees. In most retiree health care plans, Company contributions towards premiums are capped based on the cost as of a certain date, thereby creating a defined contribution.

ATI instituted several initiatives over a multi-year period as part of its retirement benefit liability derisking strategy. Future benefit accruals for all participants in the U.S. defined benefit pension plans other than those subject to a CBA were frozen at the end of fiscal year 2014, and subsequently CBAs were negotiated to close these plans to new entrants. As a result of these actions, the Company has completely closed all defined benefit pension plans to new entrants, and has substantially limited the number of employees still accruing benefit service to less than 700 participants. Additionally, all of ATI's remaining collectively-bargained, capped defined benefit retiree health care plans are closed to new entrants. These liability management actions have transitioned ATI's retirement benefit and other postretirement benefit programs largely to a defined contribution structure. From fiscal years 2013 to 2022, five annuity buyouts of retired participants and two voluntary cash out programs of deferred participants helped to reduce the total participants in ATI's U.S. qualified defined benefit pension plans by more than 60%. During the fourth quarter of fiscal year 2023, the Company purchased group annuity contracts from an insurer covering approximately 85% of the Company's U.S. qualified defined benefit pension plan obligations. Under these contracts, the Company transferred the pension obligations and associated assets for approximately 8,200 plan participants to the selected insurance company. To facilitate this pension derisking strategy, the Company completed a voluntary cash out for term vested employees and contributed \$222 million to its pension plan in the third quarter of fiscal year 2023, to fully fund remaining pension liabilities ahead of this annuity transaction. After these actions, the Company's U.S. qualified defined benefit pension plan includes approximately 2,000 participants.

Costs for defined contribution retirement plans were \$46.7 million in fiscal year 2025, \$42.5 million in fiscal year 2024, and \$38.8 million in fiscal year 2023. Company contributions to these defined contribution plans are funded with cash. Other postretirement benefit costs for a defined contribution plan under the terms of a CBA were \$1.0 million for each of the fiscal years ended December 28, 2025, December 29, 2024, and December 31, 2023.

The components of pension and other postretirement benefit expense for the Company's defined benefit plans included the following:

<i>(In millions)</i>	Pension Benefits			Other Postretirement Benefits		
	Fiscal Year					
	2025	2024	2023	2025	2024	2023
Service cost - benefits earned during the year	\$ 5.3	\$ 5.8	\$ 6.0	\$ 0.4	\$ 0.5	\$ 0.6
Interest cost on benefits earned in prior years	17.4	16.4	79.7	9.9	10.2	10.9
Expected return on plan assets	(15.9)	(16.4)	(84.8)	—	—	—
Amortization of prior service cost (credit)	0.4	0.3	0.3	(0.9)	(0.8)	(0.9)
Amortization of net actuarial loss	—	—	—	5.1	5.2	6.0
Recognized actuarial loss (gain) - mark to market	18.6	14.1	26.8	—	—	—
Settlement loss	—	—	41.7	—	—	—
Total retirement benefit expense (income)	<u>\$ 25.8</u>	<u>\$ 20.2</u>	<u>\$ 69.7</u>	<u>\$ 14.5</u>	<u>\$ 15.1</u>	<u>\$ 16.6</u>

Under the Company's accounting method for recognizing actuarial gains and losses for its defined benefit pension plans, remeasurement of projected benefit obligation and plan assets for defined benefit pension plans are immediately recognized in earnings through net periodic pension benefit cost from remeasurements annually in the fourth quarter and on an interim basis due to triggering events that require remeasurement. This resulted in actuarial losses of \$18.6 million, \$14.1 million and \$26.8 million in fiscal years 2025, 2024 and 2023, respectively, within nonoperating retirement benefit income/expense on the consolidated statements of operations.

On October 17, 2023, the Company completed a voluntary cash out for term vested employees and an annuity buyout related to approximately 8,200 U.S. qualified defined benefit pension plan participants. As a result of the annuity buyout, ATI recognized a \$41.7 million pretax settlement loss, which is recorded in nonoperating retirement benefit income/expense on the consolidated statement of operations.

Actuarial assumptions used to develop the components of defined benefit pension expense and other postretirement benefit expense were as follows:

	Pension Benefits			Other Postretirement Benefits		
	Fiscal Year					
	2025	2024	2023	2025	2024	2023
Discount rate (a)	5.85 %	5.60 %	5.55% - 6.40%	5.60 %	5.40 %	5.45 %
Rate of increase in future compensation levels	5.00 %	3.00 %	3.00 %	— %	— %	— %
Weighted average expected long-term rate of return on assets (a)	5.80 %	5.80 %	5.80% - 6.57%	— %	— %	— %

(a) Pension expense for fiscal year 2023 was initially measured at a 5.55% discount rate and 6.57% weighted average expected long-term rate of return on assets. The U.S. qualified pension plans were remeasured using a 6.40% weighted average discount rate and 5.80% weighted average expected long-term rate of return on assets as of October 17, 2023, following the annuity buyout of retirees.

Actuarial assumptions used for the valuation of defined benefit pension and other postretirement benefit obligations at the end of the respective periods were as follows:

	Pension Benefits		Other Postretirement Benefits	
	Fiscal Year			
	2025	2024	2025	2024
Discount rate	5.90 %	5.85 %	5.30 %	5.60 %
Rate of increase in future compensation levels	4.00% - 10.00%	3.00% - 5.00%	—	—

A reconciliation of the funded status for the Company's defined benefit pension and other postretirement benefit plans at December 28, 2025 and December 29, 2024 was as follows:

(In millions)	Pension Benefits		Other Postretirement Benefits	
	Fiscal Year			
	2025	2024	2025	2024
Change in benefit obligations:				
Benefit obligation at beginning of fiscal year	\$ 305.6	\$ 298.4	\$ 189.2	\$ 201.6
Service cost	5.3	5.8	0.4	0.5
Interest cost	17.4	16.4	9.9	10.2
Benefits paid	(12.8)	(3.5)	(24.1)	(25.4)
Net actuarial (gains) losses – discount rate change	(2.0)	(9.7)	3.5	(2.5)
– other	19.5	(1.8)	3.3	4.8
Benefit obligation at end of fiscal year	\$ 333.0	\$ 305.6	\$ 182.2	\$ 189.2

Actuarial effects of changes in discount rates are separately identified in the preceding table.

(In millions)	Pension Benefits		Other Postretirement Benefits	
	Fiscal Year			
	2025	2024	2025	2024
Change in plan assets:				
Fair value of plan assets at beginning of fiscal year	\$ 279.8	\$ 289.1	\$ —	\$ —
Actual returns on plan assets and plan expenses	14.8	(9.1)	—	—
Employer contributions	5.1	3.3	—	—
Benefits paid	(12.8)	(3.5)	—	—
Fair value of plan assets at end of fiscal year	\$ 286.9	\$ 279.8	\$ —	\$ —

Assets (liabilities) recognized in the consolidated balance sheets:

	Pension Benefits		Other Postretirement Benefits	
	Fiscal Year			
	2025	2024	2025	2024
Noncurrent assets	\$ —	\$ 16.6	\$ —	\$ —
Current liabilities	(4.8)	(5.2)	(23.7)	(24.9)
Noncurrent liabilities	(41.4)	(37.2)	(158.5)	(164.3)
Total amount recognized	<u>\$ (46.2)</u>	<u>\$ (25.8)</u>	<u>\$ (182.2)</u>	<u>\$ (189.2)</u>

Changes to accumulated other comprehensive loss related to pension and other postretirement benefit plans in fiscal years 2025 and 2024 were as follows:

<i>(In millions)</i>	Pension Benefits		Other Postretirement Benefits	
	Fiscal Year			
	2025	2024	2025	2024
Beginning of year accumulated other comprehensive loss	\$ (7.1)	\$ (7.4)	\$ (52.3)	\$ (54.5)
Amortization of net actuarial loss	—	—	5.1	5.2
Amortization of prior service cost (credit)	0.4	0.3	(0.9)	(0.8)
Settlement loss	—	—	—	—
Remeasurements	—	—	(6.7)	(2.2)
End of year accumulated other comprehensive loss	<u>\$ (6.7)</u>	<u>\$ (7.1)</u>	<u>\$ (54.8)</u>	<u>\$ (52.3)</u>
Net change in accumulated other comprehensive loss	<u>\$ 0.4</u>	<u>\$ 0.3</u>	<u>\$ (2.5)</u>	<u>\$ 2.2</u>

Amounts included in accumulated other comprehensive loss at December 28, 2025 and December 29, 2024 were as follows:

<i>(In millions)</i>	Pension Benefits		Other Postretirement Benefits	
	Fiscal Year			
	2025	2024	2025	2024
Prior service (cost) credit	\$ (6.7)	\$ (7.1)	\$ —	\$ 0.8
Net actuarial loss	—	—	(54.8)	(53.1)
Accumulated other comprehensive loss	(6.7)	(7.1)	(54.8)	(52.3)
Deferred tax effect	1.8	1.9	27.5	27.0
Accumulated other comprehensive loss, net of tax	<u>\$ (4.9)</u>	<u>\$ (5.2)</u>	<u>\$ (27.3)</u>	<u>\$ (25.3)</u>

Amounts in accumulated other comprehensive loss presented above do not include any effects of deferred tax asset valuation allowances. See Note 15 for further discussion on deferred tax asset valuation allowances.

Retirement benefit expense for fiscal year 2026 for defined benefit plans is estimated to be approximately \$23 million, comprised of \$9 million for pension expense and \$14 million of expense for other postretirement benefits. For other postretirement benefits, the net actuarial loss is recognized in the consolidated statement of operations using a corridor method. For both pension and other postretirement benefits, prior service cost (credit) amortization is recognized in level amounts over the expected service of the active membership as of the amendment effective date. Amounts in accumulated other comprehensive loss that are expected to be recognized as components of net periodic benefit cost in fiscal year 2026 are:

<i>(In millions)</i>	Pension Benefits	Other Postretirement Benefits	Total
Amortization of prior service cost (credit)	\$ 0.4	\$ (0.3)	\$ 0.1
Amortization of net actuarial loss	—	5.2	5.2
Amortization of accumulated other comprehensive loss	<u>\$ 0.4</u>	<u>\$ 4.9</u>	<u>\$ 5.3</u>

The accumulated benefit obligation for all defined benefit pension plans was \$310.3 million and \$292.3 million at December 28, 2025 and December 29, 2024, respectively. Additional information for pension plans with accumulated benefit obligations and projected benefit obligations in excess of plan assets:

<i>(In millions)</i>	Pension Benefits	
	Fiscal Year	
	2025	2024
Projected benefit obligation	\$ 39.0	\$ 42.4
Accumulated benefit obligation	\$ 39.0	\$ 42.4
Fair value of plan assets	\$ —	\$ —

Cash contributions to ATI's U.S. qualified defined benefit pension plans were \$272 million in fiscal year 2023. There were no cash contributions in fiscal year 2025 or 2024. The Company funds the U.S. defined benefit pension plans in accordance with the Employee Retirement Income Security Act of 1974, as amended, and the Internal Revenue Code. The Company has a required cash contribution of \$4 million to its U.S. qualified defined benefit pension plan in fiscal year 2026. In addition, for fiscal year 2026, the Company expects approximately \$5 million of payments for U.S. nonqualified pension benefits.

The following table summarizes expected benefit payments from the Company's various pension and other postretirement defined benefit plans through fiscal year 2035, and also includes estimated Medicare Part D subsidies projected to be received during this period based on currently available information. Pension benefit payments for the U.S. qualified defined benefit pension plan are made from pension plan assets.

<i>(In millions)</i>	Pension Benefits	Other Postretirement Benefits	Medicare Part D Subsidy
Fiscal Year			
2026	\$ 16.4	\$ 23.7	\$ —
2027	17.8	22.3	—
2028	18.7	20.8	—
2029	19.3	19.4	—
2030	20.2	17.8	—
2031-2035	113.1	69.0	—

The annual assumed rate of increase in the per capita cost of covered benefits (the health care cost trend rate) for health care plans was 8.5% in 2026 and is assumed to gradually decrease to 4.0% in the year 2051 and remain at that level thereafter. Assumed health care cost trend rates can have a significant effect on the amounts reported for the health care plans, however, the Company's contributions for most of its retiree health plans are capped based on a fixed premium amount, which limits the impact of future health care cost increases.

The fair values of the Company's pension plan assets are determined using net asset value (NAV) as a practical expedient, or by information categorized in the fair value hierarchy level based on the inputs used to determine fair value, as further discussed in Note 13. The fair values at December 28, 2025 were as follows:

<i>(In millions)</i>	Total	NAV	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Asset category					
Equity securities:					
U.S. equities	\$ 0.1	\$ —	\$ 0.1	\$ —	\$ —
Fixed income and cash equivalents	206.2	1.0	205.2	—	—
Private equity	68.2	68.2	—	—	—
Alternative investments- hedge funds, real estate and other	12.4	12.4	—	—	—
Total assets	\$ 286.9	\$ 81.6	\$ 205.3	\$ —	\$ —

The fair values of the Company's pension plan assets at December 29, 2024 were as follows:

<i>(In millions)</i>			Quoted Prices in Active Markets for Identical Assets	Significant Observable Inputs	Significant Unobservable Inputs
Asset category	Total	NAV	(Level 1)	(Level 2)	(Level 3)
Equity securities:					
U.S. equities	\$ 0.1	\$ —	\$ 0.1	\$ —	\$ —
Fixed income and cash equivalents	199.2	5.3	193.9	—	—
Private equity	60.8	60.8	—	—	—
Alternative investments- hedge funds, real estate and other	19.7	19.7	—	—	—
Total assets	\$ 279.8	\$ 85.8	\$ 194.0	\$ —	\$ —

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. Investments in U.S. equities and Fixed Income are predominantly held in common/collective trust funds and registered investment companies. Some of these investments are publicly traded securities and are classified as Level 1, while others are public investment vehicles valued using the NAV provided by the administrator of the fund. The NAV is based on the value of the underlying assets owned by the fund, minus its liabilities, and then divided by the number of shares outstanding. These investments are not classified in the fair value hierarchy.

Private equity investments include both Direct Funds and Fund-of-Funds. Direct Funds are investments in Limited Partnership (LP) interests. Fund-of-Funds are investments in private equity funds that invest in other private equity funds or LPs. Fair value of these investments is determined utilizing net asset values, and are not classified in the fair value hierarchy.

Alternative investments include hedge fund and real estate investments that are made as a limited partner in funds managed by a general partner. Fair value of these investments is determined utilizing net asset values, and are not classified in the fair value hierarchy.

For certain investments which have formal financial valuations reported on a one-quarter lag, fair value is determined utilizing net asset values adjusted for subsequent cash flows and other significant events.

For fiscal year 2026, the expected long-term rate of return on defined benefit pension assets is 5.80%. In developing expected long-term rate of return assumptions, the Company evaluated input from its third party pension plan asset managers and actuaries, including reviews of their asset class return expectations and long-term inflation assumptions. An expected long-term rate of return is based on expected asset allocations within ranges for each investment category and projected annual compound returns. The Company's actual, weighted average returns on pension assets for the last five fiscal years have been 5.9% for 2025, (2.7)% for 2024, 2.0% for 2023, (14.5)% for 2022, and 12.4% for 2021.

The ATI Pension Plan (the Plan), the Company's remaining U.S. qualified defined benefit pension plan, continues to invest in a diversified portfolio consisting of an array of asset classes that attempts to maintain the Plan's funded status while maximizing returns and minimizing volatility. These asset classes may include U.S. domestic equities, non-U.S. developed market equities, emerging market equities, hedge funds, private equity, traditional fixed income consisting of long government/credit and alternative credit, and real estate. The Company continually monitors the investment results of these asset classes and its fund managers, and explores other potential asset classes for possible future investment.

The ability to redeem investments at year-end are based on the type of investment and the agreements with fund managers. Generally, the Company's fixed income and equity investments are readily redeemable with limited restrictions. The ability to redeem investments in hedge funds can vary significantly. Managers may require longer notice periods and may limit the amount able to be redeemed in a period (e.g., month or quarter) to a percent of the overall investment. Investments in private equity are not redeemable at ATI's option. Distributions are based on the sale of the underlying investments in the fund, subject to the terms in each fund agreement.

The target asset allocations for ATI Pension Plan for fiscal year 2026, by major investment category, are:

Asset category	Target asset allocation range
Equities	0% - 20%
Fixed income and cash equivalents	50% - 100%
Private equity and other	0% - 40%

As of December 28, 2025, the Company’s pension plan had outstanding commitments to invest up to \$29 million in private equity investments. These commitments are expected to be satisfied through the reallocation of pension trust assets while maintaining investments within the target asset allocation ranges.

The Company contributes to several multiemployer defined benefit pension plans under collective bargaining agreements that cover certain of its union-represented employees. The risks of participating in such plans are different from the risks of single-employer plans, in the following respects:

- a. Assets contributed to a multiemployer plan by one employer may be used to provide benefits to employees of other participating employers.
- b. If a participating employer ceases to contribute to the plan, the unfunded obligations of the plan may be borne by the remaining participating employers.
- c. If the Company ceases to have an obligation to contribute to the multiemployer plan in which it had been a contributing employer, it may be required to pay to the plan an amount based on the underfunded status of the plan and on the history of the Company’s participation in the plan prior to the cessation of its obligation to contribute. The amount that an employer that has ceased to have an obligation to contribute to a multiemployer plan is required to pay to the plan is referred to as a withdrawal liability.

The Company’s participation in multiemployer plans for the fiscal years ended December 28, 2025, December 29, 2024 and December 31, 2023 is reported in the following table.

Pension Fund	EIN / Pension Plan Number	Pension Protection Act Zone Status (1)		FIP / RP Status Pending / Implemented (2)	in millions			Surcharge Imposed (3)	Expiration Dates of Collective Bargaining Agreements
		Fiscal Year			Company Contributions				
		2025	2024		Fiscal Year				
		2025	2024	2023					
Steelworkers Western Independent Shops Pension Plan	90-0169564 / 001	Green	Green	N/A	\$ 1.3	\$ 1.1	\$ 0.7	No	2/28/2031
Boilermakers-Blacksmiths National Pension Trust	48-6168020 / 001	Red	Red	Yes	3.1	2.7	2.6	No	9/30/2026
IAM National Pension Fund	51-6031295 / 002	Red	Red	Yes	2.3	2.1	1.9	Yes	Various between 2026-2029 (4)
Total contributions					\$ 6.7	\$ 5.9	\$ 5.2		

- (1) The most recent Pension Protection Act Zone Status is based on information provided to ATI and other participating employers by each plan, as certified by the plan’s actuary. A plan in the “deep red” zone had been determined to be in “critical and declining status”, based on criteria established by the Internal Revenue Code (Code), and is in critical status (as defined by the “red” zone) and is projected to become insolvent (run out of money to pay benefits) within 15 years (or within 20 years if a special rule applies). A plan in the “red” zone had been determined to be in “critical status”, based on criteria established by the Code, and is generally less than 65% funded. A plan in the “yellow” zone has been determined to be in “endangered status”, based on criteria established under the Code, and is generally less than 80% funded. A plan in the “green” zone has been determined to be neither in “critical status” nor in “endangered status”, and is generally at least 80% funded. Additionally, a plan may voluntarily place itself into a rehabilitation plan.

In April 2019, the Company received notification from the IAM National Pension Fund (IAM Fund) that its’ actuary certified the IAM Fund as “endangered status” for the plan year beginning January 1, 2019, and that the IAM Fund was voluntarily placing itself in “red” zone status and implementing a rehabilitation plan. Annually in April of each year from 2020 through 2025, the Company received notification from the IAM Fund that it was certified by its actuary as being in “red” zone status for each of these plan years from January 1, 2020 through December 31, 2025. A contribution surcharge was imposed as of June 1, 2019 in addition to the contribution rate specified in the applicable collective bargaining agreements. The contribution surcharge remains in effect, and ends when an employer begins contributing under a collective bargaining agreement that includes terms consistent with the rehabilitation plan.

In April 2019, the Company received notifications from the Boilermakers-Blacksmiths National Pension Trust (Blacksmiths Trust) that it was certified by its actuary as being in “red” zone status for the plan year beginning January

1, 2019. A rehabilitation plan was adopted for the Blacksmiths Trust, and the Company and the Blacksmiths union agreed to adopt the rehabilitation plan in 2019 prior to a contribution surcharge being imposed. In April 2020 and 2021, the funding status improved for the Blacksmiths Trust as it was certified by its actuary as being in the “yellow” zone for the plan years beginning January 1, 2020 and 2021. In April 2022, the funding status further improved to being in the “green” zone for the plan year beginning January 1, 2022. In April 2023, the Blacksmiths Trust was certified by its actuary as being in “red” zone status for the plan years beginning January 1, 2023, and in April 2024 and April 2025, the Blacksmiths Trust was certified by its actuary as being in “red” zone status for the plan years ending December 31, 2023 and December 31, 2024, respectively. A rehabilitation plan has been adopted for the Blacksmiths Trust, and the Company and the Blacksmiths union agreed to adopt the rehabilitation plan in 2023 prior to a contribution surcharge being imposed.

- (2) The “FIP / RP Status Pending / Implemented” column indicates whether a Funding Improvement Plan, as required under the Code by plans in the “yellow” zone, or a Rehabilitation Plan, as required under the Code to be adopted by plans in the “red” or “deep red” zones, is pending or has been implemented as of the end of the plan year that ended in 2025.
- (3) The “Surcharge Imposed” column indicates whether ATI’s contribution rate for 2025 included an amount in addition to the contribution rate specified in the applicable collective bargaining agreement, as imposed by a plan in “critical status” or “critical and declining status”, in accordance with the requirements of the Code.
- (4) The Company is party to six separate bargaining agreements that require contributions to this plan. Expiration dates of these collective bargaining agreements range between April 26, 2026 and March 31, 2029.

Note 15. Accumulated Other Comprehensive Income (Loss)

The changes in AOCI by component, net of tax, for the fiscal years ended December 28, 2025, December 29, 2024 and December 31, 2023 were as follows (in millions):

	Post-retirement benefit plans	Currency translation adjustment	Derivatives	Deferred Tax Asset Valuation Allowance Revised	Total
Balance, January 1, 2023	\$ (34.7)	\$ (70.1)	\$ 13.5	\$ 23.9	\$ (67.4)

- (a) Amounts were included in net periodic benefit cost for pension and other postretirement benefit plans (see Note 14).
- (b) No amounts were reclassified to earnings.
- (c) Amounts were included in loss on asset sales and sales of businesses, net, as part of the loss on sale of the Birmingham, U.K. and Dusseldorf, Germany operations (see Note 6).
- (d) Amounts related to derivatives are included in sales, cost of goods sold or interest expense in the period or periods the hedged item affects earnings (see Note 12).
- (e) Represents the net change in deferred tax asset valuation allowances on changes in AOCI balances between the balance sheet dates. The income tax provision for the fiscal year ended December 29, 2024 includes \$0.8 million of a tax benefit for the recognition of a stranded deferred tax valuation allowance that was associated with the Company's interest rate swap due to its maturity.

Other comprehensive income (loss) amounts (OCI) reported above by category are net of applicable income tax expense (benefit) for each year presented. Income tax expense (benefit) on OCI items is recorded as a change in a deferred tax asset or liability. Amounts recognized in OCI include the impact of any deferred tax asset valuation allowances, when applicable. Foreign currency translation adjustments, including those pertaining to noncontrolling interests, are generally not adjusted for income taxes as they relate to indefinite investments in non-U.S. subsidiaries.

Reclassifications out of AOCI for the fiscal years ended December 28, 2025, December 29, 2024 and December 31, 2023 were as follows:

Details about AOCI Components (In millions)	Amount reclassified from AOCI (d)			Affected line item in the consolidated statement of operations
	Fiscal year ended			
	December 28, 2025	December 29, 2024	December 31, 2023

	(5.3) (d)	(11.0) (d)	(2.5) (d)	Total before tax
	(1.2)	(2.6)	(0.6)	Tax benefit (e)
	<u>\$ (4.1)</u>	<u>\$ (8.4)</u>	<u>\$ (1.9)</u>	Net of tax

- (a) Amounts are included in nonoperating retirement benefit expense (see Note 14).
- (b) Amounts in 2025 were included in loss on asset sales and sales of businesses, net, as part of the loss on sale of the Birmingham, U.K. and Dusseldorf, Germany operations (see Note 6).
- (c) Amounts related to derivatives, with the exception of the interest rate swap, are included in sales or cost of goods sold in the period or periods the hedged item affects earnings. Amounts related to the interest rate swap are included in interest expense in the same period as the interest expense on the ABL Term Loan is recognized in earnings (see Note 12).
- (d) For pretax items, positive amounts are income and negative amounts are expense in terms of the impact to net income. Tax effects are presented in conformity with ATI's presentation in the consolidated statements of operations.
- (e) These amounts exclude the impact of any deferred tax asset valuation allowances, when applicable, including recognition of stranded balances (see Note 17 for further explanation).

Note 16. Stockholders' Equity

Preferred Stock

Authorized preferred stock may be issued in one or more series, with designations, powers and preferences as shall be designated by the Board of Directors. At December 28, 2025, there were no shares of preferred stock issued.

Dividends

Under the ABL credit facility, there is no limit on dividend declarations or payments provided that the undrawn availability, after giving effect to a particular dividend payment, is at least the greater of \$120 million and 20% of the total facility size, after giving effect to any repayment of term loans, and no event of default under the ABL credit facility has occurred and is continuing or would result from paying the dividend. In addition, there is no limit on dividend declarations or payments if the

undrawn availability is less than the greater of \$120 million and 20% of the total facility size, after giving effect to any repayment of term loans, but more than the greater of \$75 million and 12.5% of the total facility size, after giving effect to any repayment of term loans, if (i) no event of default has occurred and is continuing or would result from paying the dividend, (ii) the Company demonstrates to the administrative agent that, prior to and after giving effect to the payment of the dividend (A) the undrawn availability, as measured both at the time of the dividend payment and as an average for the 60 consecutive day period immediately preceding the dividend payment, is at least the greater of \$75 million and 12.5% of the total facility size, after giving effect to any repayment of term loans, and (B) the Company maintains a fixed charge coverage ratio of at least 1.00:1.00, as calculated in accordance with the terms of the ABL credit facility.

Share-based Compensation

In May 2022, the Company's stockholders approved the ATI Inc. 2022 Incentive Plan (the "2022 Incentive Plan"). Following adoption, all new share-based compensation awards are being made under the 2022 Incentive Plan. Shares previously remaining available for grant under prior incentive plans, or which become available for award due to the forfeiture or cancellation of prior awards under those prior plans, are available for award under the 2022 Incentive Plan. Outstanding grants previously made under prior incentive plans remain in effect in accordance with relevant terms.

Awards earned under the Company's share-based incentive compensation programs are paid with shares held in treasury or newly issued shares depending on the level of treasury shares held. At December 28, 2025, 5.2 million shares of common stock were available for future awards under the 2022 Incentive Plan. The general terms of each arrangement granted under the 2022 Incentive Plan, and predecessor plans, the method of estimating fair value for each arrangement, and award activity are reported below.

The Company's share-based incentive compensation program consists of both service-based and performance/market-based awards. These awards convey participants the right to receive shares of ATI common stock if the service conditions, and performance or market requirements, of the awards are attained.

Service-based awards:

Restricted share units (RSUs) are rights to receive shares of Company stock when the award vests. The RSUs generally vest over three years based on employment service, with one-third of the award vesting on each of the first, second and third anniversaries of the grant date. RSU awards to non-employee directors vest in one year. No dividends are accumulated or paid on the RSUs. The fair value of the RSU award is measured based on the stock price at the grant date.

Compensation expense related to RSU awards was \$16.2 million in fiscal year 2025, \$16.3 million in fiscal year 2024, and \$14.5 million in fiscal year 2023. Approximately \$8.6 million of unrecognized fair value compensation expense relating to restricted stock units is expected to be recognized through fiscal year 2028, with \$6.6 million expected to be recognized in fiscal year 2026, including estimates of service period forfeitures. Activity under the Company's RSU awards for the fiscal years ended December 28, 2025, December 29, 2024, and December 31, 2023 was as follows:

	Fiscal Year					
	2025		2024		2023	
	Number of shares/units	Weighted Average Grant Date Fair Value	Number of shares/units	Weighted Average Grant Date Fair Value	Number of shares	Weighted Average Grant Date Fair Value
Nonvested, beginning of fiscal year	861	\$ 31.0	1,220	\$ 28.0	1,479	\$ 26.0
Granted	272	16.0	465	21.8	512	16.0
Vested	(454)	(14.0)	(717)	(15.3)	(729)	(13.1)
Forfeited	(41)	(1.9)	(107)	(3.5)	(42)	(0.9)
Nonvested, end of fiscal year	638	\$ 31.1	861	\$ 31.0	1,220	\$ 28.0

Market condition awards:

Beginning in fiscal year 2021, the Company awarded performance stock units (PSUs) with market requirements. Generally, these PSUs are issued at a target number of share units, and the number of shares ultimately awarded is based on the Company's total shareholder return (TSR), which represents the measured return of the Company's stock price (including assumed dividend reinvestment, if any) compared to the TSR (including assumed dividend reinvestment, if any) of a group of industry peers. These PSU awards are accounted for as a market condition plan with service vesting requirements, with expense recognized over the service period without regard to the level of TSR attainment or shares awarded. The actual number of

shares awarded at the end of the measurement period may range from a minimum of zero to a maximum of two times target. For the fiscal year 2021 and 2022 awards, TSR is determined over eight distinct quarterly periods as measured from January 1 of the grant year of the award through the end of each quarterly period starting with the first quarter ending in the second year following the grant of the award. For the 2023, 2024 and 2025 awards, TSR is determined over four distinct six-month periods as measured from January 1 of the grant year of the award through the end of each six-month period starting with the second quarter ending in the second year following the grant of the award; earned payouts from each TSR measurement period are averaged to determine the final payout at the conclusion of the three-year period. The fair value for this award was determined by using Monte Carlo simulations of stock price correlation, projected dividend yields and other variables over the three-year time horizon matching the TSR measurement period.

In fiscal year 2025, the Company awarded a new one-time grant of PSUs with market requirements, called the Enterprise Value Acceleration award (EVA). The EVA has a target number of share units, and the number of shares awarded is based on the absolute return on the Company's stock during a four-year measurement period. The service vesting requirements of the EVA award are four years for one half of the award and five years for the remaining half. The EVA award is accounted for as a market condition plan with service vesting requirements, with expense recognized over the service periods without regard to the level of absolute return attainment or shares awarded. The actual number of EVA shares awarded at the end of the measurement period may range from a minimum of zero to a maximum of three times target. The fair value for this award was determined by using Monte Carlo simulations of stock price correlation, projected dividend yields and other variables over the four-year time horizon matching the EVA measurement period.

In fiscal year 2022, the Company awarded a new one-time grant of PSUs with market requirements, called the Breakout Performance Award (BPA). In fiscal year 2025, 229,299 shares were issued due to retirement vesting. In fiscal year 2024, 6,530 shares were issued due to retirement vesting. In fiscal year 2023, 46,046 additional share units under the fiscal year 2022 BPA were awarded to new members of senior management and 4,807 shares were issued due to retirement vesting. The BPA has a target number of share units, and the number of shares awarded is based on the absolute return on the Company's stock during a four-year measurement period. The service vesting requirements of the BPA award are four years for one half of the award and five years for the remaining half. The BPA award is accounted for as a market condition plan with service vesting requirements, with expense recognized over the service periods without regard to the level of absolute return attainment or shares awarded. The actual number of BPA shares awarded at the end of the measurement period may range from a minimum of zero to a maximum of three times target. The fair value for this award was determined by using Monte Carlo simulations of stock price correlation, projected dividend yields and other variables over the four-year time horizon matching the BPA measurement period.

At December 28, 2025, a maximum of 3.7 million shares have been reserved for issuance for all PSU awards. The Company recognized \$12.8 million, \$17.8 million and \$14.6 million of compensation expense in fiscal years 2025, 2024 and 2023, respectively, for all PSU awards. Forfeited share units in fiscal years 2025, 2024 and 2023 were 7,400, 183,418, and 19,863, respectively, with a weighted average grant date fair value of \$0.3 million, \$5.1 million, and \$0.5 million, respectively.

The fair value of each PSU award, the target share units awarded and projected future compensation expense to be recognized for these awards, including actual and estimated forfeitures at December 28, 2025 was as follows:

(Shares in thousands, \$ in millions)

PSU Award Performance Period	Award Fair Value	December 28, 2025 Unrecognized Compensation Expense	Compensation Expense Expected to be Recognized in the next 12 months	Target Share Units
Fiscal Year 2023-2025	\$ 12.6	—	—	330
Fiscal Year 2024-2026	\$ 13.6	2.7	2.7	262
Fiscal Year 2025-2027	\$ 9.6	6.4	3.0	138
Fiscal Year 2022-2025 BPA	\$ 20.3	1.6	1.6	857
Fiscal Year 2025-2029 EVA	\$ 28.2	28.2	5.7	161
Total		<u>\$ 38.9</u>	<u>\$ 13.0</u>	

In fiscal year 2025, the 2023 PSU awards vested with relative TSR attainment of 195.6%, resulting in the issuance of 574,396 shares in the first quarter of 2026. In addition, in fiscal year 2025, the first half of the 2022 BPA awards vested with TSR attainment at the maximum level, resulting in the issuance of 807,289 shares in the first quarter of 2026. In fiscal year 2024, the fiscal year 2022 PSU awards vested with relative TSR attainment of 200.0%, resulting in the issuance of 849,422 shares in the first quarter of fiscal year 2025. In fiscal year 2023, the fiscal year 2021 PSU awards vested with relative TSR attainment of 198.5%, resulting in the issuance of 848,194 shares in the first quarter of fiscal year 2024.

Note 17. Income Taxes

Income (loss) before income taxes for the Company's U.S. and non-U.S. operations was as follows:

<i>(In millions)</i>	Fiscal Year		
	2025	2024	2023
U.S.	\$ 470.6	\$ 421.1	\$ 258.2
Non-U.S.	51.7	65.0	37.0
Income before income taxes	\$ 522.3	\$ 486.1	\$ 295.2

The income tax provision (benefit) was as follows:

<i>(In millions)</i>	Fiscal Year		
	2025	2024	2023
Current:			
Federal	\$ 28.8	\$ (0.3)	\$ 3.0
State	8.5	6.9	0.5
Foreign	6.6	7.0	7.8
Total	43.9	13.6	11.3
Deferred:			
Federal	56.3	84.5	(96.1)
State	2.7	4.3	(42.5)
Foreign	0.8	1.0	(0.9)
Total	59.8	89.8	(139.5)
Income tax provision (benefit)	\$ 103.7	\$ 103.4	\$ (128.2)

The following is a reconciliation of income taxes computed at the statutory U.S. Federal income tax rate to the actual effective income tax provision (benefit):

<i>(In millions)</i>	Fiscal Year					
	2025		2024		2023	
Income before income taxes	\$ 522.3		\$ 486.1		\$ 295.2	
Taxes computed at the federal rate	109.7	21.0 %	102.0	21.0 %	62.0	21.0 %

Other adjustments	2.9	0.6 %	2.7	0.6 %	(0.4)	(0.1)%
Income tax provision (benefit)	\$ 103.7	19.9 %	\$ 103.4	21.3 %	\$ (128.2)	(43.4)%

⁽¹⁾ State taxes in California, Connecticut, Illinois, Massachusetts, New Jersey, Pennsylvania and Wisconsin made up the majority (greater than 50%) of the tax effect in this category.

The Company has elected to recognize GILTI liabilities as an element of income tax expense in the period incurred.

Total credits in the current year are primarily related to research and development benefits and the disallowance of the above the line income related to the Advanced Manufacturing Production Credit (AMPC) as discussed in Note 18. While the AMPC is an above the line credit and refundable, if tax is due, the credit is first applied against the current tax liability. As a result, it has been considered associated with income taxes paid in the table below.

In fiscal year 2025, the income tax provision of \$103.7 million includes discrete tax benefits of \$6.0 million, which primarily related to share-based compensation, release of uncertain tax positions, and the release of valuation allowances. These were offset by unfavorable return to provision adjustments from the 2024 federal and state tax returns.

In fiscal year 2024, the income tax provision of \$103.4 million includes discrete tax benefits of \$6.2 million which includes \$3.3 million for share-based compensation and \$0.8 million related to the recognition of a stranded deferred tax valuation allowance in accumulated other comprehensive loss that was associated with the Company's interest rate swap due to its maturity (see Note 15).

In the fourth quarter of fiscal year 2024, the Company was granted a preferential tax rate related to the PRS joint venture operations in China for tax years 2024 through 2026. The preferential tax rate is 15%, compared to the statutory rate of 25%. The Company must re-apply for the High and New-Technology Enterprise (HNTE) status every three years to be eligible for the preferential rate. This same preferential rate was in effect for tax years 2021-2023.

In fiscal year 2023, ATI recorded a tax benefit associated with the release of the valuation allowance due to the current year income for the U.S. operations and a \$140.3 million additional benefit was recorded related to the valuation allowance release associated with ATI's ability to utilize projections for future income.

The Company recognizes deferred tax assets to the extent it believes these deferred tax assets are more likely than not to be realized. Valuation allowances are established when it is estimated that it is more likely than not the tax benefit of the deferred tax asset will not be realized. In making such determination, the Company considers all available evidence, both positive and negative, regarding the estimated future reversals of existing taxable temporary differences, estimated future taxable income exclusive of reversing temporary differences and carryforwards, historical taxable income in prior carryback periods if carryback is permitted, and potential tax planning strategies which may be employed to prevent an operating loss or tax credit carryforward from expiring unused. If the Company determines that it would not be able to realize its deferred tax assets in the future in excess of their recorded net amount, an adjustment to the deferred tax asset valuation allowance would result.

The Company also maintained valuation allowances on deferred tax amounts recorded in AOCI in fiscal years 2025, 2024 and 2023 of \$23.3 million, \$23.3 million, and \$24.1 million, respectively (see Note 15).

Deferred income taxes result from temporary differences in the recognition of income and expense for financial and income tax reporting purposes, and differences between the fair value of assets acquired in business combinations accounted for as purchases for financial reporting purposes and their corresponding tax bases. Deferred income taxes represent future tax benefits or costs to be recognized when those temporary differences reverse. The categories of assets and liabilities that have resulted in differences in the timing of the recognition of income and expense at December 28, 2025 and December 29, 2024 were as follows:

<i>(In millions)</i>	Fiscal Year	
	2025	2024
Deferred income tax assets		
Net operating loss carryovers	52.9	73.4
Post retirement benefits other than pension	44.5	45.2
Employee compensation and benefits	35.8	29.0
Inventory valuation	26.5	24.3
Federal and state tax credits	21.5	44.0
Operating lease liability	19.9	14.8
Deferred revenue	18.6	20.5
Research and development	12.5	25.7
Other items - assets	26.6	44.5
Gross deferred income tax assets	258.8	321.4
Valuation allowance for deferred tax assets	(49.8)	(57.7)
Total deferred income tax assets	209.0	263.7
Deferred income tax liabilities		
Basis of property, plant and equipment	187.8	180.5
Operating lease right of use assets	18.7	13.8
Amortization of intangibles	11.8	13.4
Other items - liabilities	12.3	14.2
Total deferred tax liabilities	230.6	221.9
Net deferred tax (liability) asset	\$ (21.6)	\$ 41.8

The Company's valuation allowance for deferred taxes was \$49.8 million at December 28, 2025, \$57.7 million at December 29, 2024. The reduction in the valuation allowance in fiscal year 2025 was primarily due to a state valuation allowance release and foreign tax restructuring activities. The reduction in the valuation allowance in fiscal year 2024 was primarily due to a state valuation allowance release, which was mostly offset by the expiration of state tax attributes for income tax purposes.

The Company has recorded \$6.7 million of foreign withholding taxes on earnings expected to be repatriated to the U.S. The Company does not intend to distribute previously taxed earnings resulting from the one-time transition tax under the Tax Act, and has not recorded any deferred taxes related to such amounts. The remaining excess of the amount for financial reporting over the tax basis of investments in foreign subsidiaries is indefinitely reinvested, and the determination of any deferred tax liability on this amount is not practicable.

The following summarizes the carryforward periods for the tax attributes related to NOLs and credits by jurisdiction.

(\$ in millions, U.S. and U.K. NOL amounts are pre-tax, all other items are after-tax, and state is before federal benefit)

Jurisdiction	Attribute	Amount	Expiration Period	Amount expiring within 5 years	Amount expiring in 5-20 years
U.S.	Foreign Tax Credit	\$13	10 years	\$13	\$—
State	NOL	\$64	Various	\$9	\$55
State	NOL	\$1	Indefinite		
State	Credits	\$8	Various	\$3	\$5
U.K.	NOL	\$8	Indefinite		
Poland	Economic Zone Credit	\$2	7 years	\$2	

Income taxes paid and amounts received as refunds were as follows:

<i>(In millions)</i>	Fiscal Year		
	2025	2024	2023
Federal	\$ 52.3	\$ 1.5	\$ 1.1
State	8.9	6.4	3.8
Foreign	15.5	7.1	10.9
Income taxes paid, net	\$ 76.7	\$ 15.0	\$ 15.8

Income taxes paid (net of refunds) exceeded 5 percent of total income taxes paid (net of refunds) in the following jurisdictions:

<i>(In millions)</i>	Fiscal Year		
	2025	2024	2023
State			
California	*	\$ 2.5	*
Illinois	*	\$ 1.0	\$ 1.2
Massachusetts	*	\$ 1.3	*
Pennsylvania	*	*	\$ 0.9
Foreign			
China	\$ 7.7	\$ 4.3	\$ 7.6
Germany	*	\$ 1.4	*
Japan	*	*	\$ 2.2

* Jurisdiction was below the reporting threshold for the period presented.

Uncertain tax positions are recorded using a two-step process based on (1) determining whether it is more-likely-than-not the tax positions will be sustained on the basis of the technical merits of the position and (2) for those positions that meet the more-likely-than-not recognition threshold, the Company records the largest amount of the tax benefit that is more than 50 percent likely to be realized upon ultimate settlement with the related tax authority. The changes in the liability for unrecognized income tax benefits for the fiscal years ended December 28, 2025, December 29, 2024 and December 31, 2023 were as follows:

<i>(In millions)</i>	Fiscal Year		
	2025	2024	2023
Balance at beginning of fiscal year	\$ 7.8	\$ 8.9	\$ 9.1
Increases in prior period tax positions	0.4	—	1.2
Decreases in prior period tax positions	(2.8)	(0.9)	—
Settlements	—	(0.2)	—
Expiration of the statute of limitations	(0.7)	—	(1.4)
Balance at end of fiscal year	\$ 4.7	\$ 7.8	\$ 8.9

For fiscal years ended December 28, 2025, December 29, 2024 and December 31, 2023, the liability includes \$4.1 million, \$6.9 million and \$7.2 million, respectively, of unrecognized tax benefits that are classified within deferred income taxes as a reduction of NOL carryforwards and other tax attributes. The total estimated unrecognized tax benefit that, if recognized, would affect ATI's effective tax rate is approximately \$0.6 million.

The Company recognizes accrued interest and penalties related to uncertain tax positions as income tax expense. The amounts accrued for interest and penalty charges for the fiscal years 2025, 2024 and 2023 were not significant. At December 28, 2025 and December 29, 2024, the accrued liabilities for interest and penalties related to unrecognized tax benefits were \$0.4 million and \$0.8 million, respectively.

The Company, and/or one of its subsidiaries, files income tax returns in the U.S. federal jurisdiction and in various state and foreign jurisdictions. A summary of tax years that remain subject to examination, by major tax jurisdiction, is as follows:

<i>Jurisdiction</i>	Earliest Year Open to Examination
U.S. Federal	2025
States:	
California	2021
Connecticut	2022
Illinois	2022
Massachusetts	2022
New Jersey	2021
Pennsylvania	2021
Wisconsin	2021
Foreign:	
China	2022
Poland	2019

Note 18. Business Segments

The Company operates under two business segments: High Performance Materials & Components (HPMC) and Advanced Alloys & Solutions (AA&S).

HPMC is comprised of the Specialty Materials and Forged Products businesses, as well as the ATI Europe distribution operations thru 2024. Approximately 92% of its revenue is derived from the aerospace & defense markets including nearly 68% of its revenue from products for commercial jet engines and 11% from defense products. HPMC produces a wide range of high performance materials, components, and advanced metallic powder alloys. These products are made from nickel-based alloys and superalloys, titanium and titanium-based alloys, and a variety of other specialty materials. HPMC's capabilities range from cast/wrought and powder alloy development to final production of highly engineered finished components, and 3D-printed aerospace products.

AA&S segment includes the Specialty Alloys & Components business, the Specialty Rolled Products business, and the 60%-owned STAL PRS joint venture. See Note 7 for further information regarding the joint venture. AA&S produces nickel-based alloys, titanium and titanium-based alloys, and specialty alloys in a variety of forms including plate and sheet products. The major end markets for our flat rolled products are aerospace & defense, specialty and conventional energy, automotive, medical and electronics markets.

ATI's Chief Operating Decision Maker (CODM) is the Chief Executive Officer. Segment EBITDA, the Company's segment operating measure, is used by the CODM to assess segment operating performance and to determine the allocation of resources. Segment EBITDA as a percentage of segment revenues is utilized to assess the profitability of each segment and whether the Company's strategies are resulting in margin expansion and expected operating performance improvements. The measure of Segment EBITDA excludes net interest expense, income taxes, depreciation and amortization, goodwill impairment charges, debt extinguishment charges, corporate expenses, closed operations and other income (expense), restructuring and other credits/charges, gains or losses from the sale of accounts receivables, strike related costs, long-lived asset impairments, pension remeasurement gains and losses, other postretirement/pension curtailment and settlement gains and losses, and gains or losses on sales of businesses. Management believes Segment EBITDA, as defined, provides an appropriate measure of controllable operating results at the business segment level.

Intersegment sales are generally recorded at full cost or market.

	Fiscal Year 2025			Fiscal Year 2024			Fiscal Year 2023		
	HPMC	AA&S	Total	HPMC	AA&S	Total	HPMC	AA&S	Total
Sales to external customers	\$2,441.7	\$2,145.7	\$4,587.4	\$2,278.5	\$2,083.6	\$4,362.1	\$2,120.2	\$2,053.5	\$4,173.7

Income before taxes			<u>\$ 522.3</u>			<u>\$ 486.1</u>			<u>\$ 295.2</u>

⁽¹⁾ The CODM is regularly provided with allocated corporate overhead and Segment EBITDA, which is used to assess operating performance. Therefore, the significant expense categories and amounts align with the segment-level information that is regularly provided to the CODM. Intersegment expenses are included within the amounts shown.

⁽²⁾ Other segment items for each reportable segment include: cost of sales, general and administrative expenses, and gain/loss on asset sales. General & administrative expenses consist of non-manufacturing payroll and benefits, office expenses, professional service and legal expenses, occupancy expenses including rent and lease expense, and travel expense.

Total international sales were \$1,947.6 million in fiscal year 2025, \$1,836.9 million in fiscal year 2024, and \$1,922.9 million in fiscal year 2023. Of these amounts, sales by operations in the U.S. to customers in other countries were \$1,562.5 million in fiscal year 2025, \$1,425.4 million in fiscal year 2024, and \$1,498.7 million in fiscal year 2023.

Beginning in 2020, the U.S. government enacted various relief packages in response to the COVID-19 pandemic, including refundable employee retention tax credits. The Company applied for these employee retention tax credits and deferred recognition of a portion of the tax credits pending the completion of any potential audit or examination, or the expiration of the related statute of limitations. During fiscal year ended December 28, 2025, the Company recognized a benefit of \$7.2 million in cost of sales on the consolidated statement of operations due to the expiration of the statute of limitations for a portion of these credits. For the fiscal year ended December 28, 2025, the Company recognized \$4.4 million of the benefit in the HPMC segment and \$2.8 million in the AA&S segment. See Note 21 for further explanation. In addition, results for the fiscal year

ended December 29, 2024 include \$16.7 million related to this government sponsored COVID relief in Segment EBITDA. Results for the fiscal year ended January 1, 2023 include \$34.0 million related to this government sponsored COVID relief in Segment EBITDA.

AA&S Segment EBITDA in fiscal year 2024 and 2023 included benefits from tax credits of \$22.7 million and \$10.1 million, respectively, for the AMPC, which were reported in cost of sales in the consolidated statement of operations. Fiscal year 2024 Segment EBITDA also includes charges of \$11.8 million, primarily reported in selling & administrative expenses, for a commercial negotiation with a customer, of which \$6.3 million was included in the HPMC segment and \$5.5 million in the AA&S segment.

Corporate expenses are primarily classified as selling and administrative expenses in the consolidated statement of operations, and consist of salaries and benefits, incentive compensation, facility leases and other costs of ATI's corporate functions.

Closed operations and other expenses are primarily presented in selling and administrative expenses in the consolidated statements of operations. These items included costs at closed facilities, including legal matters, environmental, real estate and other facility costs, gains from the sale of non-core assets and foreign currency transaction gains and losses primarily related to ATI's European Treasury Center operation. Closed operations and other income (expense) for fiscal year 2025 includes an \$10.5 million gain on the sale of certain oil and gas rights, included within other income, net, on the consolidated statement of operations, and unfavorable foreign currency transaction impacts as compared to the prior year. Closed operations and other income (expense) for fiscal year 2024 includes an \$11.6 million gain on the sale of certain oil and gas rights, included within other income, net, on the consolidated statement of operations, and favorable foreign currency transaction impacts. Fiscal year 2024 also includes a \$2.3 million gain on the sale of assets for the Company's idled Houston, PA facility, which is included within gain on asset sales and sales of businesses, net, on the consolidated statement of operations. The Company received \$3.5 million of proceeds from this sale that are reported as an investing activity on the consolidated statement of cash flows. Closed operations and other expenses in fiscal year 2023 reflect higher insurance costs associated with an outstanding insurance claim involving our captive insurance company.

Depreciation expense in fiscal year 2023 includes \$3.8 million of accelerated depreciation of fixed assets related to the restructuring of our European operations and the closure of our Robinson, PA operations.

Net loss on sales of businesses for fiscal year 2025 relate to the divestiture of certain immaterial, non-core operations. These include an \$0.8 million gain on the sale of the Company's East Hartford, CT operations within the Forged Products business unit, and a \$3.7 million loss on the sale of our European operations in Birmingham, UK and Düsseldorf, Germany, which were part of the HPMC segment. Proceeds, net of transaction costs of \$19.3 million and \$5.0 million, respectively, were received during fiscal year 2025 and are reported as investing activities in the consolidated statements of cash flows, with additional proceeds of approximately \$4.9 million related to the European divestitures expected to be received within the next twelve months. Gain on sales of businesses for fiscal year 2024 is related to a \$52.9 million gain on the sale of the Company's precision rolled strip operations in New Bedford, MA and Remscheid, Germany, for which \$48.0 million and \$2.5 million of proceeds, net of transaction costs, were received in 2024 and 2025, respectively, and are reported as an investing activity on the consolidated statement of cash flows. Loss on sales of businesses for fiscal year 2023 is related to a \$0.6 million loss on the sale of the Company's Northbrook, IL operations, for which no proceeds were received but \$0.3 million of transaction costs were paid and reported as an investing activity on the consolidated statement of cash flows. See Note 6 for further explanation regarding the sale of business transactions in fiscal years 2025 and 2024.

Certain additional information regarding the Company's business segments is presented below:

<i>(In millions)</i>	Fiscal Year		
	2025	2024	2023

Note 19. Restructuring and other charges

For the fiscal year ended December 28, 2025, restructuring and other charges were \$48.8 million and include \$25.8 million of start-up and transaction-related costs, \$17.1 million of transformation-related costs, and \$7.8 million of losses on the sale of customer accounts receivable, partially offset by credits of \$1.9 million due to a reduction in severance-related reserves for approximately 45 employees for a previous restructuring in the AA&S segment. These costs were recorded in the consolidated statement of operations based on the nature of the charge, with \$23.6 million recorded as cost of sales, \$27.1 million recorded as selling and administrative expense and \$1.9 million as restructuring credits on the consolidated statement of operations.

For the fiscal year ended December 29, 2024, restructuring and other charges were \$22.1 million and include \$13.4 million of start-up costs and transaction-related costs, \$4.6 million of charges associated with the Company's European restructuring, and \$4.1 million of severance-related restructuring charges for approximately 100 employees primarily related to cost reduction actions in our domestic operation. These costs were recorded in the consolidated statement of operations based on the nature of the charge, with \$15.3 million recorded as cost of sales, \$2.7 million recorded as selling and administrative expenses and \$4.1 million as restructuring charges on the consolidated statements of operations.

For the fiscal year ended December 31, 2023, restructuring and other charges were \$31.4 million and include \$7.7 million of severance-related restructuring charges and \$23.7 million of charges included within cost of sales on the consolidated statements of operations. The \$7.7 million of severance-related restructuring charges represent severance for the involuntary reduction of approximately 110 employees primarily for the restructuring of the European operations and across ATI's domestic operations. The \$23.7 million of charges within cost of sales include \$11.5 million of start-up costs, \$1.9 million of costs associated with an unplanned outage at our Lockport, NY facility, and \$10.3 million primarily for asset write-offs for the restructuring of our European operations and the closure of our Robinson, PA operations.

Restructuring reserves for severance cost activity is as follows:

	Severance and Employee Benefit Costs		
	December 28, 2025	December 29, 2024	December 31, 2023
Beginning of fiscal year balance	\$ 9.0	\$ 15.2	\$ 9.8
Additions/(Adjustments)	(1.9)	4.1	7.7
Divestitures	(0.5)	(3.5)	—
Payments	(6.2)	(6.8)	(2.3)
End of fiscal year balance	<u>\$ 0.4</u>	<u>\$ 9.0</u>	<u>\$ 15.2</u>

During fiscal year 2025, the Company derecognized \$0.5 million of restructuring reserves in connection with the sale of non-core operations in Birmingham, UK and Dusseldorf, Germany (see Note 6 for further explanation). During fiscal year 2024, the Company derecognized \$3.5 million of restructuring reserves in connection with the sale of its precision rolled strip operations (see Note 6 for further explanation). All of the \$0.4 million restructuring reserve balance at December 28, 2025 is recorded in other current liabilities on the December 28, 2025 consolidated balance sheet. All of the \$9 million restructuring reserve balance at December 29, 2024, is recorded in other current liabilities on the December 29, 2024 consolidated balance sheet.

Note 20. Per Share Information

The following table sets forth the computation of basic and diluted net income per common share:

(In millions, except per share amounts)

	Fiscal Year		
	2025	2024	2023
Numerator:			
Numerator for basic net income per common share -			
Net income attributable to ATI	\$ 404.3	\$ 367.8	\$ 410.8
Effect of dilutive securities:			
3.5% Convertible Senior Notes due 2025	—	5.9	10.6
Numerator for diluted net income per common share -			
Net income attributable to ATI after assumed conversions	\$ 404.3	\$ 373.7	\$ 421.4
Denominator:			
Denominator for basic net income per common share—weighted average shares			
	138.6	130.4	128.1
Effect of dilutive securities:			
Share-based compensation	3.2	3.2	3.1
3.5% Convertible Senior Notes due 2025	—	13.0	18.8
Denominator for diluted net income per common share—adjusted weighted average shares and assumed conversions	<u>141.8</u>	<u>146.6</u>	<u>150.0</u>
Basic net income attributable to ATI per common share	\$ 2.92	\$ 2.82	\$ 3.21
Diluted net income attributable to ATI per common share	<u>\$ 2.85</u>	<u>\$ 2.55</u>	<u>\$ 2.81</u>

Common stock that would be issuable upon the assumed conversion of the 2025 Convertible Notes, prior to their redemption during the third quarter of 2024, and other option equivalents and contingently issuable shares are excluded from the computation of contingently issuable shares, and therefore, from the denominator for diluted earnings per share, if the effect of inclusion is anti-dilutive. There were no anti-dilutive shares for fiscal years 2025, 2024 and 2023.

Periodically, the Company's Board of Directors authorizes the repurchase of ATI common stock (the "Share Repurchase Programs"). The current Share Repurchase Program of \$700 million was announced in September 2024 and does not obligate the Company to repurchase any specific number of shares and may be modified, suspended, or terminated at any time by the Company's Board of Directors without prior notice. Repurchases under the Share Repurchase Program are made in the open market, within the pricing and volume requirements of SEC Rule 10b-18, or in privately negotiated transactions, with the

amount and timing of repurchases depending on market conditions and corporate needs. In fiscal years 2025, 2024 and 2023, ATI used \$470.0 million, \$260.0 million and \$85.2 million, respectively, to repurchase 6.4 million, 5.3 million and 2.0 million shares, respectively, of its common stock under the Share Repurchase Program. At December 29, 2025, the Company had utilized \$580 million of the \$700 million authorized under the Share Repurchase Program.

Effective January 2, 2023, the Company's share repurchases are subject to a 1% excise tax as a result of the Inflation Reduction Act of 2022. Excise taxes incurred on share repurchases represent direct costs of the repurchase and are recorded as part of the cost basis of the shares within treasury stock. The cost of share repurchases may differ from the repurchases of common stock amounts in the consolidated statements of cash flows due to these excise taxes. For fiscal year 2025, the cost of share repurchase of \$474.2 million differs from the repurchases of common stock amounts in the consolidated statements of cash flows due to these excise taxes. For fiscal year 2024, there was no excise tax due to the impact of the conversion of the 2025 Convertible Notes (see Note 10). For fiscal year 2023, the cost of share repurchases of \$85.8 million differs from the repurchases of common stock amounts in the consolidated statements of cash flows due to these excise taxes.

Note 21. Commitments and Contingencies

Future minimum rental commitments under leases are disclosed in Note 11. Commitments for expenditures on property, plant and equipment at December 28, 2025 were approximately \$247.4 million.

The Company is subject to various domestic and international environmental laws and regulations that govern the discharge of pollutants and disposal of wastes, and which may require that it investigate and remediate the effects of the release or disposal of materials at sites associated with past and present operations. The Company could incur substantial cleanup costs, fines, and civil or criminal sanctions, third party property damage or personal injury claims as a result of violations or liabilities under these laws or noncompliance with environmental permits required at its facilities. The Company is currently involved in the investigation and remediation of a number of its current and former sites, as well as third party sites.

Environmental liabilities are recorded when the Company's liability is probable and the costs are reasonably estimable. In many cases, however, the Company is not able to determine whether it is liable or, if liability is probable, to reasonably estimate the loss or range of loss. Estimates of the Company's liability remain subject to additional uncertainties, including the nature and extent of site contamination, available remediation alternatives, the extent of corrective actions that may be required, and the number, participation, and financial condition of other potentially responsible parties (PRPs). The Company adjusts its accruals to reflect new information as appropriate. Future adjustments could have a material adverse effect on the Company's consolidated results of operations in a given period, but the Company cannot reliably predict the amounts of such future adjustments.

At December 28, 2025, the Company's reserves for environmental remediation obligations totaled approximately \$15.0 million, of which \$7.0 million was included in other current liabilities. The reserve includes estimated probable future costs of \$2.0 million for federal Superfund and comparable state-managed sites; \$7.0 million for formerly owned or operated sites for which the Company has remediation or indemnification obligations; and \$6.0 million for owned or controlled sites at which Company operations have been or plan to be discontinued. The Company continues to evaluate whether it may be able to recover a portion of future costs for environmental liabilities from third parties and to pursue such recoveries where appropriate.

Based on currently available information, it is reasonably possible that the costs for active matters may exceed the Company's recorded reserves by as much as \$16.0 million. Future investigation or remediation activities may result in the discovery of additional hazardous materials, potentially higher levels of contamination than discovered during prior investigation, and may impact costs associated with the success or lack thereof in remedial solutions. Therefore, future developments, administrative actions or liabilities relating to environmental matters could have a material adverse effect on the Company's consolidated financial condition or results of operations.

The timing of expenditures depends on a number of factors that vary by site. The Company expects that it will expend present accruals over many years and that remediation of all sites with which it has been identified will be completed within thirty years.

A number of other lawsuits, claims and proceedings have been or may be asserted against the Company relating to the conduct of its currently and formerly owned businesses, including those pertaining to product liability, environmental, health and safety matters and occupational disease (including as each relates to alleged asbestos exposure), as well as patent infringement, commercial, government contracting, construction, employment, employee and retiree benefits, taxes, environmental, and stockholder and corporate governance matters. While the outcome of litigation cannot be predicted with certainty, and some of these lawsuits, claims or proceedings may be determined adversely to the Company, management does not believe that the disposition of any such pending matters is likely to have a material adverse effect on the Company's financial condition or liquidity, although the resolution in any reporting period of one or more of these matters could have a material adverse effect on the Company's consolidated results of operations for that period.

Beginning in 2020, the U.S. government enacted various relief packages in response to the COVID-19 pandemic, one of which was the Coronavirus Aid, Relief, and Economic Security Act (CARES Act). The CARES Act included, among other items, provisions relating to refundable employee retention payroll tax credits. The Company applied for these employee retention tax credits and recognized a portion of the benefit from these credits as they were received in the statement of operations in the fiscal year ended December 31, 2022 (see Note 18). Due to the complex nature of the employee retention credit computations, the Company deferred recognition of a portion of the tax credits pending the completion of any potential audit or examination, or the expiration of the related statute of limitations. During the fiscal year ended December 28, 2025, the Company recognized a benefit of \$7.2 million in cost of sales on the consolidated statement of operations due to the expiration of the statute of limitations for a portion of these credits. As of December 28, 2025, the Company has approximately \$5.0 million of remaining deferred retention tax credits, of which the statute of limitations expires in 2028.

In August 2024, the Company received notice that it and certain of its affiliates are parties to two lawsuits captioned (1) *William L. Schoen, Mary J. Nesbit, Robin L. Rosewicz, George E. Poole and James E. Swartz, Jr., individually and as representatives of a class of participants and beneficiaries of the Allegheny Technologies Incorporated Pension Plan v. ATI Inc., The Allegheny Technologies Incorporated Pension Plan Administrative Committee, State Street Global Advisors Trust Co., and John Does 1-5* (Case No. 2:24-cv-01109) and (2) *John Souza and Karen Souza, individually and as representatives on behalf of a class of similarly situated persons v. ATI Inc. and State Street Global Advisors Trust Co.* (Case No. 2:24-cv-01214), both of which are filed in federal district court for the Western District of Pennsylvania. These lawsuits, which were consolidated in late 2024, assert various claims associated with the Company's October 2023 purchase of group annuity contracts to transfer a portion of its U.S. qualified defined benefit pension plan obligations to Athene Annuity and Life Company and Athene Annuity & Life Assurance of New York. We filed a Motion to Dismiss the consolidated claims in January 2025. Following an August 2025 hearing on the Motion to Dismiss, the magistrate judge covering the Motion issued a report recommending that all the plaintiffs' claims be dismissed for lack of standing. The recommendation remains subject to review and disposition by the presiding judge. We dispute and intend to vigorously defend against these claims, but given the preliminary nature of these matters, cannot predict their outcome or estimate any range of reasonably possible loss at this time.

Note 22. Subsequent Event

On February 18, 2026, ATI's Board of Directors of ATI authorized additional share repurchase of up to \$500 million, which is in addition to the existing share repurchase authorization of approximately \$120.0 million. Repurchases under the program may be made in the open market or in privately negotiated transactions, with the amount and timing of repurchases depending on market conditions and corporate needs. Open market repurchases will be structured to occur within the pricing and volume requirements of SEC Rule 10b-18. The stock repurchase program does not obligate the Company to repurchase any specific number of shares, and it may be modified, suspended, or terminated at any time by the Board of Directors without prior notice.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

Not applicable.

Item 9A. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures.

In accordance with Securities Exchange Act Rules 13-1-15(e) and 15d-15(e), our management, under the supervision of our Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this Annual Report on Form 10-K. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of December 28, 2025.

(b) Management's Report on Internal Control over Financial Reporting.

Management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company. Internal control over financial reporting is defined in Rules 13a-15(f) and 15d-15(f) promulgated under the Exchange Act of 1934, as amended (the Exchange Act), as a process designed by, or under the supervision of, the company's principal executive and principal financial officers and effected by the company's board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the company;

Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and

Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Internal control over financial reporting cannot provide absolute assurance of achieving financial reporting objectives because of its inherent limitations. Internal control over financial reporting is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. Internal control over financial reporting can also be circumvented by collusion or improper management override. Because of such limitations, there is a risk that material misstatements may not be prevented or detected on a timely basis by internal control over financial reporting. However, these inherent limitations are known features of the financial reporting process. Therefore, it is possible to design into the process safeguards to reduce, though not eliminate, this risk.

The Company's management assessed the effectiveness of the Company's internal control over financial reporting as of December 28, 2025. In making this assessment, the Company's management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (COSO) in Internal Control-Integrated Framework.

Based on that assessment, the Chief Executive Officer and Chief Financial Officer concluded as of December 28, 2025, the Company's internal control over financial reporting was effective based on those criteria.

The Company's independent registered public accounting firm that audited the consolidated financial statements included in this Annual Report issued an attestation report on effectiveness of the Company's internal control over financial reporting as of December 28, 2025.

(c) Changes to Internal Control over Financial Reporting.

There were no changes to our internal control over financial reporting that occurred during the fiscal quarter ended December 28, 2025 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Management's Certifications

The certifications of the Company's Chief Executive Officer and Chief Financial Officer required by the Sarbanes-Oxley Act are included as Exhibits 31 and 32 to this Annual Report on Form 10-K. In addition, in fiscal year 2025, the Company's Chief Executive Officer provided to the New York Stock Exchange the annual CEO certification pursuant to Section 303A regarding the Company's compliance with the New York Stock Exchange's corporate governance listing standards.

Report of Independent Registered Public Accounting Firm

To the Stockholders and the Board of Directors of ATI Inc.

Opinion on Internal Control Over Financial Reporting

We have audited ATI Inc. and Subsidiaries' internal control over financial reporting as of December 28, 2025, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, ATI Inc. and Subsidiaries (the Company) maintained, in all material respects, effective internal control over financial reporting as of December 28, 2025, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of December 28, 2025 and December 29, 2024, the related consolidated statements of operations, comprehensive income, cash flows and statements of changes in consolidated equity for each of the three years in the period ended December 28, 2025, and the related notes and our report dated February 20, 2026 expressed an unqualified opinion thereon.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Item 9B. Other Information

Rule 10b5-1 Plan Elections

During the quarterly period ended December 28, 2025, none of the Company's directors or officers, as defined in Section 16 of the Exchange Act, adopted or terminated a "Rule 10b5-1 trading arrangement" as such term is defined in Item 408(c) of the Exchange Act.

Item 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections

Not applicable.

PART III

Item 10. Directors and Executive Officers of the Registrant

The information concerning our directors required by this item is incorporated and made part hereof by reference to the material appearing under the heading "Our Corporate Governance" and "Election of Directors" and the information concerning our executive officers required by this item is incorporated and made part hereof by reference to the material appearing under the heading "Members of ATI's Executive Management," in the ATI Proxy Statement for the 2026 Annual Meeting of Stockholders (the "2026 Proxy Statement"), which will be filed with the Securities and Exchange Commission, pursuant to Regulation 14A, not later than 120 days after the end of the fiscal year. Information concerning the Audit and Risk Committee and its financial expert required by this item is incorporated and made part hereof by reference to the material appearing under the heading "Our Corporate Governance-Board Information- Board Committees" in the 2026 Proxy Statement. The information concerning our insider trading policies and procedures required by this item is incorporated and made part hereof by reference to the material appearing under the heading "Insider Trading Policies and Procedures" in the 2026 Proxy Statement.

ATI has adopted *Corporate Guidelines for Business Conduct and Ethics* that apply to all employees including its principal executive officer or principal financial and accounting officer, or persons performing similar functions. The *Corporate Guidelines for Business Conduct and Ethics* as well as the charters for the Company's Audit and Risk, Nominating and Governance, and Compensation and Leadership Development Committees, as well as periodic and current reports filed with the SEC, are available through the Company's website at <http://www.atimaterials.com> and are available in print free of charge to any shareholder upon request. To obtain a copy, contact the Corporate Secretary, ATI Inc., 2021 McKinney Avenue, Suite 1100, Dallas, Texas 75201 (telephone: 800-289-7454). The Company intends to post on its website any waiver from or amendment to the guidelines that apply to the Company's Principal Executive Officer or Principal Financial and Accounting Officer (or persons performing similar functions) that relate to elements of the code of ethics identified by the Securities and Exchange Commission in Item 406(b) of Regulation S-K. Information required by this item with respect to the delinquent filing during 2025 of reports required under Section 16 of the Securities Exchange Act of 1934 is incorporated by reference to "Delinquent Section 16 Filings" as set forth in the 2026 Proxy Statement.

Item 11. Executive Compensation

Information required by this item is incorporated by reference to "Our Corporate Governance- Director Compensation," "Executive Compensation" and "Compensation Committee Interlocks and Insider Participation" as set forth in the 2026 Proxy Statement.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Information relating to the ownership of equity securities by certain beneficial owners and management is incorporated by reference to “Stock Ownership Information” as set forth in the 2026 Proxy Statement.

Equity Compensation Plan Information

Information about our equity compensation plans at December 28, 2025 was as follows:

	(a)		
	Number of Shares to be Issued Upon Exercise of Outstanding Options, Warrants and Rights (1)	Weighted Average Exercise Price of Outstanding Options, Warrants and Rights (2)	Number of Shares Remaining Available for Future Issuance Under Equity Compensation Plans (3) (excluding securities reflected in column (a))
<i>(In thousands, except per share amounts)</i>			
Equity Compensation Plans Approved by Shareholders	\$ 2,803	\$ —	\$ 5,170
Equity Compensation Plans Not Approved by Shareholders	—	—	—
Total	2,803	\$ —	\$ 5,170

- (1) Includes stock-settled equity awards previously granted under the ATI Inc. 2022 Incentive Plan (the “2022 Incentive Plan”) and prior incentive plans. Amounts reflected for performance share unit awards represent the maximum number of shares that could be awarded at the conclusion of the applicable performance cycle.
- (2) Outstanding stock-settled awards are not included in this calculation.
- (3) Represents shares available for issuance under the 2022 Incentive Plan (which provides for the issuance of stock options, stock appreciation rights, restricted shares, restricted stock units, performance and other stock-based awards). See Note 16. Stockholders’ Equity for a discussion of the Company’s stock-based compensation plans.

Item 13. Certain Relationships and Related Transactions, and Director Independence

Information required by this item is incorporated by reference to “Related Party Transactions” and “Our Corporate Governance- Board Information- Board Composition and Independence” as set forth in the 2026 Proxy Statement.

Item 14. Principal Accountant Fees and Services

Information required by this item is incorporated by reference to “Ratification of Selection of Independent Auditors” as set forth in the 2026 Proxy Statement.

PART IV

Item 15. Exhibits, Financial Statements and Financial Statement Schedules

(a) Financial Statements, Financial Statement Schedules and Exhibits:

(1) Financial Statements

The following consolidated financial statements and report are filed as part of this report under Item 8 – “Financial Statements and Supplementary Data”:

[Report of Ernst & Young LLP, Independent Registered Public Accounting Firm](#)

[Consolidated Statements of Operations — Fiscal Years Ended December 28, 2025, December 29, 2024 and December 31, 2023](#)

[Consolidated Statements of Comprehensive Income — Fiscal Years Ended December 28, 2025, December 29, 2024 and December 31, 2023](#)

[Consolidated Balance Sheets at December 28, 2025 and December 29, 2024](#)

[Consolidated Statements of Cash Flows — Fiscal Years Ended December 28, 2025, December 29, 2024 and December 31, 2023](#)

[Statements of Changes in Consolidated Equity — Fiscal Years Ended December 28, 2025, December 29, 2024 and December 31, 2023](#)

[Notes to Consolidated Financial Statements](#)

The report of ATI's independent registered public accounting firm (PCAOB ID: 42) with respect to the above-referenced financial statements and their report on internal control over financial reporting are included in Item 8 and Item 9A of this Form 10-K. Their consent appears as Exhibit 23.1 of this Form 10-K.

(2) Financial Statement Schedules

All schedules set forth in the applicable accounting regulations of the Securities and Exchange Commission either are not required under the related instructions or are not applicable and, therefore, have been omitted.

(3) Exhibits

Exhibits required to be filed by Item 601 of Regulation S-K are listed below. Documents not designated as being incorporated herein by reference are filed herewith. The paragraph numbers correspond to the exhibit numbers designated in Item 601 of Regulation S-K.

EXHIBIT INDEX

Exhibit No.	Description
3.1	Certificate of Incorporation of Allegheny Technologies Incorporated, as amended (incorporated by reference to Exhibit 3.1 to the Registrant's Annual Report on Form 10-K for the year ended December 31, 1999 (File No. 1-12001)).
3.2	Certificate of Amendment of Certificate of Incorporation (incorporated by reference to Exhibit 3.1 to the Registrant's Current Report on Form 8-K dated June 22, 2022 (File No. 1-12001)).
3.3	Fifth Amended and Restated Bylaws of ATI Inc. (incorporated by reference to Exhibit 3.1 to the Registrant's Current Report on Form 8-K dated May 21, 2025 (File No. 1-12001)).
4.1	Indenture, dated June 1, 2009, between Allegheny Technologies Incorporated and The Bank of New York Mellon, as Trustee (incorporated by reference to Exhibit 4.1 to the Registrant's Current Report on Form 8-K dated June 3, 2009 (File No. 1-2001)).
4.2	Form of 5.875% Senior Note due 2027 (incorporated by reference to Exhibit 4.2 to the Registrant's Current Report on Form 8-K dated November 22, 2019 (File No. 1-12001)).
4.3	Sixth Supplemental Indenture, dated November 19, 2019, between Allegheny Technologies Incorporated and The Bank of New York Mellon, as Trustee (incorporated by reference to Exhibit 4.2 to the Registrant's Current Report on Form 8-K dated November 22, 2019 (File No. 1-12001)).
4.4	Indenture, dated as of September 14, 2021, by and between Allegheny Technologies Incorporated and Computershare Trust Company, N.A., as successor Trustee to Wells Fargo Bank, National Association, as trustee (incorporated by reference to Exhibit 4.1 to the Registrant's Current Report on Form 8-K dated September 14, 2021 (File No. 1-12001)).
4.5	First Supplemental Indenture, dated as of September 9, 2021, by and between Allegheny Technologies Incorporated and Wells Fargo Bank, National Association, as Trustee (incorporated by reference to Exhibit 4.2 to the Registrant's Current Report on Form 8-K dated September 14, 2021 (File No. 1-12001)).
4.6	Form of 4.875% Senior Note due 2029 (incorporated by reference to Exhibit 4.2 to the Registrant's Current Report on Form 8-K dated September 14, 2021 (File No. 1-12001)).
4.7	Form of 5.125% Senior Note due 2031 (incorporated by reference to Exhibit 4.2 to the Registrant's Current Report on Form 8-K dated September 14, 2021 (File No. 1-12001)).
4.8	Second Supplemental Indenture, dated August 11, 2023, between ATI Inc. and Computershare Trust Company, as Trustee (incorporated by reference to Exhibit 4.2 to the Registrant's Current Report on Form 8-K dated August 11, 2023) (File No. 1-12001)).
4.9	Form of 7.25% Senior Notes due 2030 (incorporated by reference to Exhibit 4.2 to the Registrant's Current Report on Form 8-K dated August 11, 2023) (File No. 1-12001)).
4.10	Description of Securities Registered Pursuant to Section 12 of the Securities Exchange Act of 1934 (incorporated by reference to Exhibit 4.13 to the Registrant's Annual Report on Form 10-K for the year ended December 31, 2020 (File No. 1-12001)).
10.1	Allegheny Technologies Incorporated Fee Continuation Plan for Non-Employee Directors, as amended (incorporated by reference to Exhibit 10.3 to the Registrant's Annual Report on Form 10-K for the year ended December 31, 2004 (File No. 1-12001)).*

Exhibit No.	Description
10.2	<u>Allegheny Technologies Incorporated Benefit Restoration Plan, as amended (incorporated by reference to Exhibit 10.8 to the Registrant's Annual Report on Form 10-K for the year ended December 31, 1999 (File No. 1-12001)).*</u>

* *Management contract or compensatory plan or arrangement required to be filed as an Exhibit to this Report.*

Certain instruments defining the rights of holders of long-term debt of the Company and its subsidiaries have been omitted from the Exhibits in accordance with Item 601(b)(4)(iii) of Regulation S-K. A copy of any omitted document will be furnished to the Commission upon request.

Item 16. Form 10-K Summary

Not applicable.

Non-GAAP Financial Measures

(Unaudited, dollars in millions, except per share amounts)

The Company reports its financial results in accordance with accounting principles generally accepted in the United States of America (“GAAP”). However, management believes that certain non-GAAP financial measures, used in managing the business, may provide users of this financial information with additional meaningful comparisons between current results and results in prior periods. Non-GAAP financial measures should be viewed in addition to, and not as an alternative for, the Company’s reported results prepared in accordance with GAAP. The following table provides the calculation of the non-GAAP financial measures discussed in this annual report.

Fiscal Year	2023	2024	2025
Net income attributable to ATI	411	368	404
Adjustments for special items, pre-tax:			
Restructuring and other charges (a)	36	22	49
Pension remeasurement loss (b)	27	14	18
Retirement benefit settlement loss (c)	41	-	-
Loss (gain) on sales of businesses, net (d)	-	(53)	3
Total pre-tax adjustments for special items	104	(17)	70
Net change in deferred taxes and valuation allowance (e)	(138)	-	-
Income tax on adjustments for special items	(4)	4	(14)
Adjusted net income attributable to ATI	\$373	\$355	\$460

Fiscal Year	2023		2024		2025	
	Reported	Adjusted	Reported	Adjusted	Reported	Adjusted
Numerator for Basic net income per common share -						
Net income attributable to ATI	\$411	\$373	\$368	\$355	\$404	\$460
Effect of dilutive securities	11	11	6	6	-	-
Numerator for Diluted net income per common share -						
Net income attributable to ATI after assumed conversions	\$422	\$384	\$374	\$361	\$404	\$460
Denominator for Basic net income per common share -						
Weighted average shares outstanding	128	128	131	131	139	139
Effect of dilutive securities	22	22	16	16	3	3
Denominator for Diluted net income per common share -						
Adjusted weighted average shares assuming conversions	150	150	147	147	142	142
Diluted net income attributable to ATI per common share	\$2.81	\$2.56	\$2.55	\$2.46	\$2.85	\$3.24

Non-GAAP Financial Measures

Earnings before interest, taxes, depreciation and amortization (EBITDA)

Fiscal Year	2023	2024	2025
Net income attributable to ATI	\$411	\$368	\$404
Net income attributable to noncontrolling interests	13	15	14
Net income	424	383	418
(+) Depreciation and Amortization	146	152	168
(+) Interest Expense	93	108	99
(+/-) Income Tax Provision (Benefit)	(128)	103	104
(+) Restructuring and other charges (a)	32	22	49
(+/-) Pension remeasurement loss (gain) (b)	27	14	18
(+) Retirement benefit settlement loss (c)	41	-	-
(+/-) Loss (gain) on sales of businesses, net (d)	-	(53)	3
Adjusted EBITDA	\$635	\$729	\$859

The following adjustments are more fully described in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, and Item 8. Financial Statements and Supplementary Data in the 2025 annual report on Form 10-K. This presentation of adjusted results per diluted share includes the effects of convertible debt, if dilutive.

- (a) Fiscal year 2025 includes pre-tax charges of \$49 million consisting of \$26 million of start-up and transaction-related costs, \$17 million of transformation-related costs, and \$8 million of losses on the sale of customer accounts receivable, partially offset by credits of \$2 million due to a reduction in severance-related reserves. Fiscal year 2024 includes pre-tax charges totaling \$22 million, which include \$11 million of start-up costs, \$5 million of charges for the European transformation, \$4 million for severance-related restructuring charges, and \$2 million of transaction costs. Fiscal year 2023 results include pre-tax charges totaling \$36 million, which include \$12 million of start-up costs, \$2 million of costs associated with an unplanned outage at our Lockport, NY, facility, \$8 million of severance-related restructuring charges primarily for the restructuring of our European operations and for reductions across ATI's domestic operations, and \$14 million for asset write-offs primarily for the restructuring of our European operations and the closure of our Robinson, PA, operations, of which \$4 million was accelerated depreciation on fixed assets and is included in depreciation and amortization in the above table.
- (b) Fiscal year 2025, 2024 and 2023 results include an \$18 million, \$14 million and \$27 million, respectively, pre-tax loss for actuarial gains and losses arising from the remeasurement of the Company's pension assets and obligations.
- (c) On October 17, 2023, the Company completed a voluntary cash-out for term vested employees and annuity buyouts related to approximately 8,200 U.S. qualified defined benefit pension plan participants. As a result, fiscal year 2023 results include a \$41 million pre-tax settlement loss.
- (d) Fiscal year 2025 also includes a \$3 million loss on the sale of certain non-core European operations from the HPMC segment. Fiscal year 2024 results include a \$53 million pre-tax gain on the sale of our precision rolled strip operations in New Bedford, MA, and Remscheid, Germany.
- (e) Fiscal year 2023 results includes a \$140 million discrete tax benefit primarily related to the reversal of a portion of deferred tax valuation allowances due to exiting the three-year cumulative loss condition for U.S. Federal and state jurisdictions at fiscal year-end 2023, partially offset by a \$2 million charge for withholding taxes associated with the restructuring of our European operations.

Ernst & Young LLP

Stock Exchange Listing

The common stock of ATI Inc. is traded on the New York Stock Exchange (symbol ATI).

Growing our capabilities

ATI brought online a state-of-the-art facility in Pageland, South Carolina, to produce titanium alloy sheet. Technically challenging to produce, this material is critical to airframe manufacturers, bringing strength and durability to aerospace components and assemblies.
