What distinguishes Southern Company?

Electric Operating Companies

Three vertically integrated, state regulated electric utilities, serving 4.4 million customers and developing a diverse portfolio of generation resources including nuclear, renewables and natural gas - together with an emphasis on energy efficiency.

Total
Energy
Mix**

Southern Company Gas

A natural gas distribution system that includes four state-regulated local distribution companies (LDCs), serving 4.4 million customers. We have investments in five gas pipelines including Southern Natural Gas. Gas marketing services complement LDCs and pipeline investments.

Southern Power

America's premier wholesale energy partner investing in clean energy solutions for customers. Southern Power is a leading U.S. wholesale energy provider meeting the electricity needs of municipalities, electric cooperatives, investor-owned utilities and other energy customers.

PowerSecure

Provides energy technologies and services to electric utilities and their large industrial, commercial, institutional and municipal customers. Customer solutions include distributed generation systems, utility infrastructure solutions and energy efficiency products and services.

Net Zero Carbon Goal

We have set a goal to reduce greenhouse emissions by 50% from 2007 levels by 2030. 2023 emissions were 49% below 2007 levels, and we expect to consistently achieve GHG reductions of greater than 50% as early as 2025. Our target is to reach net zero operations by 2050.

Research and Development

We are an industry leader in conducting robust research, development and deployment of new, innovative energy technologies.

Greenhouse gas emissions reduction is a major focus of the company's research and development organization, which has a historic record of technology advancement that goes back to the 1960s.

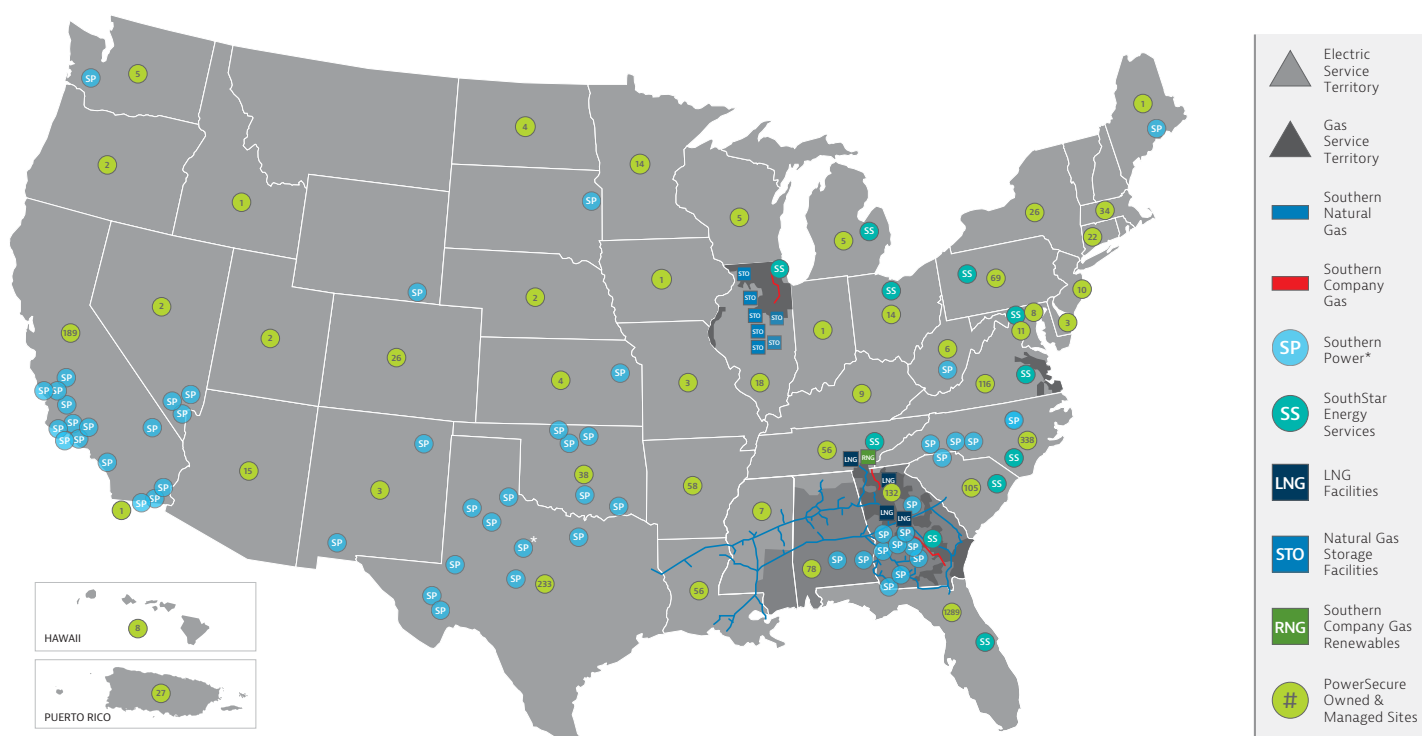

Building the future of energy
