gas utilities

What distinguishes Southern Company?

Electric Operating Companies

Three vertically integrated, state regulated electric utilities, serving 4.6 million customers and developing a diverse portfolio of generation resources including nuclear, renewables and natural gas – together with an emphasis on energy efficiency.

Southern Company Gas

A natural gas distribution system that includes four state-regulated local distribution companies (LDCs), serving 4.4 million customers. We have investments in four gas pipelines including Southern Natural Gas. Gas marketing services complement LDCs and pipeline investments.

Southern Power

America's premier wholesale energy partner investing in clean energy solutions for customers. Southern Power is a leading U.S. wholesale energy provider meeting the electricity needs of municipalities, electric cooperatives, investor-owned utilities and other energy customers.

PowerSecure

Provides energy technologies and services to electric utilities and their large industrial, commercial, institutional and municipal customers. Customer solutions include distributed generation systems, utility infrastructure solutions and energy efficiency products and services.

Grid Investments

Southern Company is investing in grid and energy infrastructure, expanding natural gas capabilities, battery storage and modernized, resilient systems to support a cleaner energy future. At the same time, base electric rates will remain stable for Georgia Power through 2028 and for Alabama Power through 2027.

Net Zero By 2050

We have established a greenhouse gas reduction goal of net zero by 2050. In 2025, approximately one-third of our enterprise-wide annual energy mix for the electric operations was from clean energy resources.

Research and Development

We are an industry leader in conducting robust research, development and deployment of innovative energy technologies, including low- to no-GHG technologies.

Building the future of energy
