	TC-SI-130a.3	Discussion of the integration of environmental considerations into strategic planning for data center needs	Discussion and Analysis	Our data centers are leased. As part of our process for selecting data center vendor partners, we have confirmed that our vendors have comprehensive climate risk protocols and set rigorous energy efficiency optimization targets for their hardware selection as well as infrastructure and facility construction. These best practices help minimize both overall power consumption and associated carbon emissions. Additionally, when selecting our key operational partners, we consider their efforts to increase reliance on renewable energy sources.
