ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2023

OR

☐

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 001-40289

Coinbase Global, Inc.

(Exact name of registrant as specified in its charter)

Delaware

46-4707224

(State or other jurisdiction of incorporation or organization)

(I.R.S. Employer Identification No.)

Not Applicable⁽¹⁾

Not Applicable⁽¹⁾

(Address of principal executive offices)

(Zip Code)

Not Applicable⁽¹⁾

Registrant's telephone number, including area code

Not Applicable

(Former name, former address and former fiscal year, if changed since last report)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Class A common stock, \$0.00001 par value per share	COIN	The Nasdaq Stock Market LLC

Securities registered pursuant to Section 12(g) of the Act: **None**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports); and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>
		Emerging growth company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7 262(b)) by the registered public accounting firm that prepared or issued its audit report. ☒

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. ☐

⁽¹⁾ We are a remote-first company. Accordingly, we do not maintain a headquarters. For purposes of compliance with applicable requirements of the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended, stockholder communications required to be sent to our principal executive offices may be directed to the email address: secretary@coinbase.com, or to our agent for service of process at Corporation Service Company, 251 Little Falls Drive, Wilmington, Delaware 19808.

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b). ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes ☐ No ☒

The aggregate market value of the voting and non-voting stock held by non-affiliates of the registrant on June 30, 2023, the last business day of the registrant's most recently completed second fiscal quarter, was \$12.0 billion based on the closing sales price of the registrant's Class A common stock as reported on Nasdaq Global Select Market on that date.

As of February 8, 2024, the number of shares of the registrant's Class A common stock outstanding was 195,531,120 and the number of shares of the registrant's Class B common stock outstanding was 46,744,055.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's definitive proxy statement for its 2024 Annual Meeting of Stockholders, or Proxy Statement, to be filed within 120 days after the end of the fiscal year covered by this Annual Report on Form 10-K, are incorporated by reference in Part III. Except with respect to information specifically incorporated by reference in this Annual Report, the Proxy Statement shall not be deemed to be filed as part hereof.

Glossary to the Cryptoeconomy

Throughout this Annual Report on Form 10-K, we use a number of industry terms and concepts which are defined as follows:

- **Address:** An alphanumeric reference to where crypto assets can be sent or stored.
- **Bitcoin:** The first peer-to-peer electronic cash system of global, decentralized, scarce, digital money as initially introduced in a white paper titled Bitcoin: A Peer-to-Peer Electronic Cash System by Satoshi Nakamoto.
- **Block:** Synonymous with digital pages in a ledger. Blocks are added to an existing blockchain as transactions occur on the network. Miners are rewarded for “mining” a new block.
- **Blockchain:** A cryptographically secure digital ledger that maintains a record of all transactions that occur on the network and follows a consensus protocol for confirming new blocks to be added to the blockchain.
- **Cold storage:** The storage of private keys in any fashion that is disconnected from the internet. Common cold storage examples include offline computers, USB drives, or paper records.
- **Crypto:** A broad term for any cryptography-based market, system, application, or decentralized network.
- **Crypto asset or token:** Any digital asset built using blockchain technology, including cryptocurrencies, stablecoins, and security tokens.
- **Cryptocurrency:** Bitcoin and alternative coins, or “altcoins,” launched after the success of Bitcoin. This category of crypto asset is designed to work as a medium of exchange, store of value, or to power applications and excludes security tokens.
- **Cryptoeconomy:** A new open financial system built upon crypto.
- **Dapps:** Decentralized applications, or Dapps, are applications that run on a decentralized network, typically using blockchain technology.
- **DeFi:** Short for Decentralized Finance. Peer-to-peer software-based network of protocols that can be used to facilitate traditional financial services like borrowing, lending, trading derivatives, insurance, and more through smart contracts.
- **Ethereum:** A decentralized global computing platform that supports smart contract transactions and peer-to-peer applications, or “Ether,” the native crypto assets on the Ethereum network.
- **Fork:** A fundamental change to the software underlying a blockchain which results in two different blockchains, the original, and the new version. In some instances, the fork results in the creation of a new token.
- **Hot wallet:** A wallet that is connected to the internet, enabling it to broadcast transactions.
- **Layer 1 (L1) Blockchain:** The foundational blockchain that provides essential services like recording transactions and ensuring security.
- **Layer 2 (L2) Blockchain:** This refers to network protocols layered on top of a L1 Blockchain. L2 Blockchains utilize the infrastructure of L1 Blockchains but offer greater flexibility in scaling, transaction processing and improving overall network throughput.
- **Miner:** Individuals or entities who operate a computer or group of computers that add new transactions to blocks, and verify blocks created by other miners. Miners collect transaction fees and are rewarded with new tokens for their services.

- **Mining:** The process by which new blocks are created, and thus new transactions are added to the blockchain.
- **Network:** The collection of all nodes that use computing power to maintain the ledger and add new blocks to the blockchain. Most networks are decentralized, reducing the risk of a single point of failure.
- **Node:** A computer or group of computers that supports the operations of a blockchain network, by validating blocks, executing smart contracts, or storing copies of the blockchain available for other nodes in the network to establish consensus.
- **Non-fungible token or NFT:** A crypto asset that is unique - as opposed to “fungible” assets like Bitcoin and dollar bills.
- **Onchain:** Onchain typically refers to activities or processes that occur directly on a blockchain. It involves transactions, smart contracts, or any other operations that are recorded and executed within the blockchain network itself, as opposed to offchain activities that might occur outside the blockchain system.
- **Protocol:** A type of algorithm or software that governs how a blockchain operates.
- **Public key or private key:** Each public address has a corresponding public key and private key that are cryptographically generated. A private key allows the recipient to access any funds belonging to the address, similar to a bank account password. A public key helps validate transactions that are broadcasted to and from the address. Addresses are shortened versions of public keys, which are derived from private keys.
- **Security token:** A crypto asset that is a security under the U.S. federal securities laws. This includes digital forms of traditional equity or fixed income securities, or may be assets deemed to be a security based on their characterization as an investment contract or note.
- **Self-custodied Wallet:** A self-custodied wallet, also known as a self-hosted wallet, is a type of cryptocurrency wallet where the user holds the private keys, instead of a third-party.
- **Smart contract:** Software that digitally facilitates or enforces a rules-based agreement or terms between transacting parties.
- **Stablecoin:** Crypto assets designed to minimize price volatility. A stablecoin is designed to track the price of an underlying asset such as fiat money or an exchange-traded commodity (such as precious metals or industrial metals), while other stablecoins utilize algorithms that are designed to maintain a relative stable price of the asset. Stablecoins can be backed by fiat money, physical commodities or other crypto assets.
- **Staking:** An energy efficient equivalent of mining. Stakers use their tokens to validate transactions and create blocks. In exchange for this service, stakers earn a reward.
- **Supported crypto assets:** The crypto assets we support for trading and custody on our platform, which include crypto assets for trading and crypto assets under custody.

For additional information regarding our key business metrics, which include Monthly Transacting Users and Trading Volume as well as our use of Adjusted EBITDA, a non-GAAP financial measure, see the sections titled “*Management’s Discussion and Analysis of Financial Condition and Results of Operations—Key Business Metrics*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations—Non-GAAP Financial Measure*” in Part II, Item 7 of this Annual Report on Form 10-K.

SPECIAL NOTE ABOUT FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K contains forward-looking statements. All statements contained in this Annual Report on Form 10-K other than statements of historical fact, including statements regarding our future operating results and financial position, our business strategy and plans, market growth, and our objectives for future operations, are forward-looking statements. In some cases, forward-looking statements may be identified by words such as “believe,” “may,” “will,” “estimate,” “potential,” “continue,” “anticipate,” “intend,” “expect,” “could,” “would,” “project,” “plan,” “target,” or the negative of these terms or other similar expressions.

Forward-looking statements contained in this Annual Report on Form 10-K include, but are not limited to, statements about:

- our future financial performance, including our expectations regarding our net revenue, operating expenses, and our ability to achieve and maintain future profitability;
- our business plan and our ability to effectively manage any growth;
- anticipated trends, growth rates, and challenges in our business, the cryptoeconomy, the price and market capitalization of crypto assets and in the markets in which we operate;
- market acceptance of our products and services;
- beliefs and objectives for future operations;
- our ability to maintain, expand, and further penetrate our existing customer base;
- our ability to develop new products and services and grow our business in response to changing technologies, customer demand, and competitive pressures;
- our expectations concerning relationships with third parties;
- our ability to maintain, protect, and enhance our intellectual property;
- our ability to continue to expand internationally;
- the effects of increased competition in our markets and our ability to compete effectively;
- future acquisitions of or investments in complementary companies, products, services, or technologies and our ability to successfully integrate such companies or assets;
- our ability to stay in compliance with laws and regulations that currently apply or become applicable to our business both in the United States and internationally given the highly evolving and uncertain regulatory landscape;
- general macroeconomic conditions, including interest rates, inflation, instability in the global banking system, economic downturns, and other global events, including regional wars and conflicts and government shutdowns;
- economic and industry trends, projected growth, or trend analysis;
- trends in revenue;
- trends in operating expenses, including technology and development expenses, sales and marketing expenses, and general and administrative expenses, and expectations regarding these expenses as a percentage of revenue;
- our key business metrics used to evaluate our business, measure our performance, identify trends affecting our business, and make strategic decisions; and

- other statements regarding our future operations, financial condition, and prospects and business strategies.

We caution you that the foregoing list may not contain all of the forward-looking statements made in this Annual Report on Form 10-K.

You should not rely upon forward-looking statements as predictions of future events. We have based the forward-looking statements contained in this Annual Report on Form 10-K on our current expectations and projections about future events and trends that we believe may affect our business, financial condition, results of operations, and prospects. The outcome of the events described in these forward-looking statements is subject to risks, uncertainties, and other factors, including those described in the section titled “*Risk Factors*” in Part I, Item 1A of this Annual Report on Form 10-K and elsewhere in this Annual Report on Form 10-K. Moreover, we operate in a very competitive and rapidly changing environment. New risks and uncertainties emerge from time to time and it is not possible for us to predict all risks and uncertainties that could have an impact on any forward-looking statements contained in this Annual Report on Form 10-K. We cannot assure you that the results, events, and circumstances reflected in the forward-looking statements will be achieved or occur, and actual results, events, or circumstances could differ materially from those described in such forward-looking statements.

Neither we nor any other person assumes responsibility for the accuracy and completeness of any of these forward-looking statements. Moreover, the forward-looking statements made in this Annual Report on Form 10-K relate only to events as of the date on which the statements are made. We undertake no obligation to update any forward-looking statements made in this Annual Report on Form 10-K to reflect events or circumstances after the date of this Annual Report on Form 10-K or to reflect new information or the occurrence of unanticipated events, except as required by law. We may not actually achieve the plans, intentions or expectations disclosed in our forward-looking statements and you should not place undue reliance on our forward-looking statements. Our forward-looking statements do not reflect the potential impact of any future acquisitions, mergers, dispositions, restructurings, joint ventures, partnerships, or investments we may make.

In addition, statements that “we believe” and similar statements reflect our beliefs and opinions on the relevant subject. These statements are based upon information available to us as of the date of this Annual Report on Form 10-K, and while we believe such information forms a reasonable basis for such statements, such information may be limited or incomplete, and our statements should not be read to indicate that we have conducted an exhaustive inquiry into, or review of, all potentially available relevant information. These statements are inherently uncertain and investors are cautioned not to unduly rely upon these statements.

RISK FACTORS SUMMARY

Consistent with the foregoing, our business is subject to a number of risks and uncertainties, including those risks discussed at length below. These risks include, among others, the following, which we consider our most material risks:

- Our operating results have and will significantly fluctuate, including due to the highly volatile nature of crypto;
- Our total revenue is substantially dependent on the prices of crypto assets and volume of transactions conducted on our platform. If such price or volume declines, our business, operating results, and financial condition would be adversely affected and the price of our Class A common stock could decline;
- Our net revenue may be concentrated in a limited number of areas. Within transaction revenue and subscription and services revenue, a meaningful concentration is from transactions in Bitcoin and Ethereum and stablecoin revenue in connection with USDC, respectively. If revenue from these areas declines and is not replaced by new demand for crypto assets or other products and services, our business, operating results, and financial condition could be adversely affected;
- We have in the past, and may in the future, enter into partnerships, collaborations, joint ventures, or strategic alliances with third parties. If we are unsuccessful in establishing or maintaining strategic relationships with these third parties or if these third parties fail to deliver certain operational services, our business, operating results, and financial condition could be adversely affected;
- Interest rate fluctuations could negatively impact us;
- The future development and growth of crypto is subject to a variety of factors that are difficult to predict and evaluate. If crypto does not grow as we expect, our business, operating results, and financial condition could be adversely affected;
- Cyberattacks and security breaches of our platform, or those impacting our customers or third parties, could adversely impact our brand and reputation and our business, operating results, and financial condition;
- We are subject to an extensive, highly-evolving and uncertain regulatory landscape and any adverse changes to, or our failure to comply with, any laws and regulations could adversely affect our brand, reputation, business, operating results, and financial condition;
- We operate in a highly competitive industry and we compete against unregulated or less regulated companies and companies with greater financial and other resources, and our business, operating results, and financial condition may be adversely affected if we are unable to respond to our competitors effectively;
- We compete against a growing number of decentralized and noncustodial platforms and our business may be adversely affected if we fail to compete effectively against them;
- As we continue to expand and localize our international activities, our obligations to comply with the laws, rules, regulations, and policies of a variety of jurisdictions will increase and we may be subject to inquiries, investigations, and enforcement actions by U.S. and non-U.S. regulators and governmental authorities, including those related to sanctions, export control, and anti-money laundering;

- We are, and may continue to be, subject to material litigation, including individual and class action lawsuits, as well as investigations and enforcement actions by regulators and governmental authorities. These matters are often expensive and time consuming, and, if resolved adversely, could harm our business, financial condition, and operating results;
- If we cannot keep pace with rapid industry changes to provide new and innovative products and services, the use of our products and services, and consequently our net revenue, could decline, which could adversely impact our business, operating results, and financial condition;
- A particular crypto asset, product or service's status as a "security" in any relevant jurisdiction is subject to a high degree of uncertainty and if we are unable to properly characterize a crypto asset or product offering, we may be subject to regulatory scrutiny, inquiries, investigations, fines, and other penalties, which may adversely affect our business, operating results, and financial condition;
- We currently rely on third-party service providers for certain aspects of our operations, and any interruptions in services provided by these third parties may impair our ability to support our customers;
- Loss of a critical banking or insurance relationship could adversely impact our business, operating results, and financial condition;
- Any significant disruption in our products and services, in our information technology systems, or in any of the blockchain networks we support, could result in a loss of customers or funds and adversely impact our brand and reputation and our business, operating results, and financial condition;
- Our failure to safeguard and manage our and our customers' fiat currencies and crypto assets could adversely impact our business, operating results, and financial condition; and
- The theft, loss, or destruction of private keys required to access any crypto assets held in custody for our own account or for our customers may be irreversible. If we are unable to access our private keys or if we experience a hack or other data loss relating to our ability to access any crypto assets, it could cause regulatory scrutiny, reputational harm, and other losses.

PART I

Item 1. Business

Coinbase Overview

Our mission is to increase economic freedom in the world.

We are working to update the century-old financial system by providing a trusted platform that makes it easy for our customers to engage with crypto assets, including trading, staking, safekeeping, spending, and fast, free global transfers. We also provide critical infrastructure for onchain activities. Onchain activities are interactions with the blockchain that usually take place in a broad category of blockchain-powered technologies, including self-custody wallets, decentralized apps and services, and open community engagement platforms.

Our Business

We offer a suite of products and services that are designed to meet the distinct needs of our three customer groups:

- **Consumers** - individual retail user customers seeking to discover or trade crypto assets and engage in onchain activities.
- **Institutions** - businesses that include market makers, asset managers, hedge funds, banks, wealth platforms, registered investment advisors, payment platforms, and public and private corporations.
- **Developers** - developers, creators, merchants, crypto asset issuers, organizations and financial institutions, and other groups building decentralized protocols, applications, products, or other services onchain.

When signing up for an account on our platform, among other requirements, consumer and institutional customers must certify that they are at least eighteen (18) years of age (if a natural person), agree to a user agreement, satisfy the requirements of our robust know-your-customer (“KYC”) program, and have read our privacy policy.

Our platform serves as a trusted and compliant gateway to the onchain economy and enables our users to engage in a wide variety of activities, including discovering, trading, staking, storing, spending, earning, and using their crypto assets in both our own proprietary and third-party product experiences enabled by access to decentralized applications. Our product offerings primarily include trading products that generate transaction revenue as well as a variety of ecosystem products, many of which generate subscription and services revenue. We describe these products below. Throughout this Annual Report on Form 10-K, we will refer to our full suite of products and offerings as our platform or platforms.

Trading Products

Trading is the primary source of our transaction revenue, and is driven by consumer and institutional customers.

Consumer Trading

Our platform is designed to serve a wide variety of consumers, whether they are buying their first crypto asset or are advanced traders. We offer two trading experiences: (i) a simple trading experience for consumers of any experience level seeking ease of use and (ii) an advanced trading experience for more sophisticated traders. Simple trading refers to buying and selling crypto assets using the basic interface of our platform, and includes value-added services such as fixed price quotes and recurring trades. Our advanced trading experience offers traders access to real-time market information through interactive

charts, order books, a live trade history on the advanced trade view, and other trading tools.

We generate fees from consumers trading on our platform, including through volume-based transaction fees and a spread depending on the type of trade. We also offer a subscription product for consumers trading on our platform, which is described in more detail below.

Coinbase Prime

Through Coinbase Prime, our full-service prime brokerage platform, institutional customers can access deep pools of liquidity across trading venues and best price execution due to our ability to route trades through a network of connected trading venues. We offer volume-based pricing and charge a transaction fee for executed trades.

Markets

We provide market infrastructure in the form of trading venues for customers to trade spot and derivatives. We currently provide access to three trading venues: the Coinbase Exchange, the Coinbase International Exchange, and the Coinbase Derivatives Exchange. These markets generate revenue by charging a transaction fee for executed trades.

Coinbase continues to gain traction in regulated derivatives as we continue to expand our offerings. For example, in September 2023, we secured regulatory approval from the Bermuda Monetary Authority (the “BMA”) to enable perpetual futures for eligible non-U.S. customers through the Coinbase International Exchange.

Ecosystem Products

We also offer a suite of products and other services that are key parts of the crypto ecosystem.

Stablecoins

As part of our effort to update the financial system, we are focused on growing the stablecoin ecosystem. In August 2023, we entered into an updated arrangement with the issuer of USDC to (i) support USDC, a stablecoin redeemable on a one-to-one basis for U.S. dollars; (ii) help drive long-term success of the stablecoin ecosystem; and (iii) continue to generate revenue through means other than transaction fees.

Staking

One of the most popular services customers often engage with is earning rewards on their crypto assets. Certain blockchain protocols, such as Ethereum, rely on staking to validate blockchain transactions. Network participants can designate a certain amount of their crypto assets on the network to validate transactions and get rewarded in kind from the network. Today, staking crypto assets is a technical challenge for most customers. Staking independently requires a participant to run their own hardware and software and maintain close to 100% up-time.

We provide a true, onchain proof-of-stake service, which reduces the complexities of staking and allows our customers to maintain full ownership of their crypto assets while earning staking rewards. In return, we earn a commission on all staking rewards received. Subject to jurisdiction, we support seven staking assets through our platform for consumers as of December 31, 2023: Cardano (ADA), Cosmos (ATOM), Polkadot (DOT), Ethereum (ETH), MATIC (POL), Solana (SOL), and Tezos (XTZ). As of December 31, 2023, approximately \$9.4 billion worth of these assets were held on behalf of individual consumers staked through our platform, as adjusted to USD. We also support staking of additional assets for our institutional customers. As of December 31, 2023, over \$7.4 billion worth of assets were staked by institutional customers through Coinbase Prime, as adjusted to USD. In addition to operating our own validator nodes to provide staking services, we utilize third-party service providers to operate validator nodes on our customers' behalf.

Because staking rewards depend on the relevant protocol and network conditions, the estimated rewards rate for each asset made available for staking is displayed on our website and through our platform, and is calculated by periodically consulting onchain data to determine the total amount earned by our stakers. We only facilitate staking of a user's crypto assets in response to a direct instruction from that user, and they remain the property of the user while staked, and a user's staked crypto assets remain in our custody. According to certain protocol rules, staked crypto assets cannot be sold or transferred while they remain staked, and we do not use or allocate users' staked crypto assets for any other purpose.

Custody

We offer consumer and institutional customers a variety of custodial solutions underpinning our product offerings. For example, underpinning our Coinbase Prime product is an institutional-grade custody platform with a highly secure cold storage solution made available both within the United States and globally. We charge institutions a separate fee based on the total assets stored in custody on our platform. For example, we serve as a custodian for several Bitcoin ETF issuers. In January 2024, the Securities and Exchange Commission (the "SEC") approved 11 spot Bitcoin ETF applications, eight of which are partnered with Coinbase. We do not charge our consumers a separate fee to safely store their crypto assets on our platform. We discuss our custodial practices for both institutions and consumers in further detail below.

Coinbase One

Consumers can transact on our platform through a subscription product, Coinbase One. Consumers pay a monthly fee in lieu of a transaction fee under a certain trading threshold and access a variety of benefits, including priority support.

Financing

Increasingly important to institutions is the ability to have access to financing products. We offer integrated financing products and services to select institutions that meet our credit criteria to access liquidity for their hedging, trading, and working capital needs. Customers typically need to pre-fund their account and maintain fiat or crypto assets on our platform in order to participate in the 24/7/365 instant settlement crypto market. We offer trade financing whereby we lend funds to credit-eligible customers, removing a key point of friction by allowing customers to instantly trade on credit and settle within a few days. We also earn interest income on loans outstanding.

Coinbase Wallet

We offer a self-custody software product to consumers globally, Coinbase Wallet, which allows them to engage and transact with the full universe of Dapps and crypto use cases without the need for a centralized intermediary such as Coinbase. Customers can link their Coinbase account to their Coinbase Wallet to transfer assets between the two. A benefit of Coinbase Wallet is that consumers have sole control over their private keys and seed phrase, which are stored directly on their mobile devices or personal storage accounts and not with a centralized exchange. If a Coinbase Wallet user loses their key or seed phrase, then we are unable to assist in recovery.

Easier Onchain Access

We also offer certain features to facilitate onchain activities. For example, our consumer and institutional customers can access third-party products and interact with certain Dapps using a "web3 wallet" feature that is integrated into our platform. A benefit of this feature is that the user does not need to navigate the complexities associated with private key management on their own, and in the case of our consumers, there is no need to download a separate wallet application. Additionally, this feature utilizes multi-party computation technology, which means that the customer benefits from two-layered security and Coinbase is able to assist with recovery in cases where a user loses their portion of the private key.

However, despite those safeguards, the user can still become permanently locked out, and the user's control of the feature can still be compromised, such as if the user does not secure their Coinbase account credentials or loses their recovery passphrase.

Developer Suite

Our developer product suite includes some of our most nascent products, including Base, Coinbase Cloud, and Coinbase Pay. Base, an Ethereum Layer 2 chain, optimizes speed and efficiency while granting developers access to the Coinbase ecosystem. Coinbase Cloud offers crypto payment or trading APIs, data access, and staking infrastructure, which allow developers to build crypto products faster and to simplify how they interact with blockchains. Coinbase Pay and Coinbase Commerce allow developers and merchants to more easily integrate crypto transactions into their products and businesses.

Trusted Crypto Platform

The failure of several prominent crypto trading venues and lending platforms, such as FTX, Celsius Networks, Voyager, and Three Arrows Capital, in 2022 (the "2022 Events") has impacted and may continue to impact the broader cryptoeconomy. While the cryptoeconomy has shown signs of recovery more recently, the full extent of the 2022 Events may not yet be known. Impacts include, but are not limited to, the consequent and ongoing financial distress and bankruptcy of certain crypto market participants, loss of confidence in the broader cryptoeconomy, reputational harm to crypto asset platforms generally, increased negative publicity of the broader cryptoeconomy, heightened scrutiny by regulators and lawmakers, and calls for increased regulation of crypto assets and crypto asset platforms. We have had no material direct impact to our business, financial condition, customers, or counterparties from the 2022 Events; however, the 2022 Events caused a change to crypto market prices, crypto market volatility, and customer sentiment, and each of these drivers indirectly impacted our business and our revenue potential. We do not have any known material financial exposure to other cryptoeconomy participants that faced insolvency and liquidity issues, experienced excessive redemptions or suspended redemptions or withdrawals of crypto assets, allegedly mishandled customer funds, or experienced significant corporate compliance failures in connection with the 2022 Events.

Following the 2022 Events, one of our highest priorities continues to be restoring confidence and interest in the cryptoeconomy and increasing engagement on our platform.

We place great importance on safeguarding crypto assets, and we have policies and procedures to help ensure the proper safeguarding of the crypto assets we hold on behalf of our customers and for our own investment and operating purposes. When customers use our platform, their assets remain their assets. We hold our customer assets 1:1 at all times, which means we do not lend or rehypothecate customer assets, and do not act on customer assets or engage in fractional reserve banking with respect to customer assets without customer consent. We safeguard crypto assets using proprietary technology and operational processes. Crypto assets are not insured or guaranteed by any government or government agency, however we have worked hard to safeguard our customers' crypto assets and our own crypto assets for investment and operational purposes with legal and operational protections.

Similarly, for customers who participate in our staking program, their staked assets remain their assets. Staking does not affect ownership of staked assets, and customers have the same custody relationship with us whether or not they stake. Also, when users stake their assets through Coinbase, the rewards they earn for helping to secure the network are directly tied to the rewards returned by onchain network protocols and marketplaces, which Coinbase passes through minus a disclosed fee. Coinbase does not unilaterally determine what reward to pay or whether to pay a reward.

Further, we appropriately ledger, properly segregate, and maintain separate accounts for our corporate crypto assets and customers' crypto assets. Additionally, with respect to Coinbase entities that provide cold storage custody services, such as Coinbase Custody Trust Company, LLC, crypto assets are held separately in dedicated addresses and ledgered using a proprietary combination of hardware security modules. For Coinbase entities that provide crypto trading services, such as Coinbase, Inc.,

crypto assets are held in an omnibus manner on the blockchain and separately recorded using a ledger system. Additionally, as a U.S. public company, we are required to undergo annual audits and quarterly reviews, which, among other things, require that our independent registered public accounting firm reviews and audits our crypto reserves, internal controls, and reconciliation processes. Moreover, our various user, custody, and client agreements clarify the applicability of Uniform Commercial Code (“UCC”) Article 8 to custodied crypto assets. UCC Article 8 provides that financial assets held by Coinbase for its customers are not property of Coinbase and not subject to claims of our general creditors.

Custodial Practices

We utilize both hot wallets and cold wallets in our custodial solutions. We actively manage wallet balances and generally seek to hold no more than 2% of custodied assets in hot wallets at any given time. Cold wallet private key materials are stored and secured at facilities within the United States and Europe. We store the substantial majority of our own crypto asset holdings utilizing the same storage solutions that we provide to our customers. In limited cases, we use storage solutions not offered to our customers to store immaterial amounts of crypto held for corporate purposes outside of our core custodial product offerings. Additionally, our Coinbase Asset Management offering utilizes both Coinbase and third parties as custodians.

As part of our risk mitigation efforts, wallet private keys are not stored in plaintext format in any location and the cryptographic consensus of multiple human operators is required to decrypt a private key for both hot and cold wallets. No single individual has control of Coinbase’s wallet private keys. To the extent a customer withdrawal requires movement of assets from a cold wallet, authority to release proceeds from such wallet resides with a geographically distributed team of professionals, all of whom are subject to background checks as part of the onboarding process.

We perform internal audits of the private key management process and reconciliations between Coinbase wallets and third-party blockchain data. Coinbase, Inc. and Coinbase Custody Trust Company, the two subsidiaries that custody the majority of crypto assets on platform, are also periodically examined by a variety of regulators, including the New York State Department of Financial Services (“NYDFS”) and various states in which such entities hold money transmission licenses. In the event of an insurable loss of assets for which we file a claim, we may be expected to allow our insurance providers to inspect custodied assets in the course of their investigation of such claim.

We do not use sub-custodians in connection with the storage of digital assets. In accordance with applicable state money transmitter laws, we hold U.S. customers’ cash at FDIC-insured depository institutions and in money market funds in accounts explicitly named to further demonstrate that we are holding the funds as custodian. We believe the terms of the relevant account agreements to be comparable to those offered to similar companies.

Other Policies and Procedures

We also have policies in place to help us govern accounting controls, including customer account initiations and reconciliations, and to help prevent improper self-dealing and other conflicts of interest between us and our customers on our platform. When we make investments in crypto assets, we execute investment trades away from our platform to avoid any conflict of interest with our customers. Additionally, Coinbase is committed to providing a fair, transparent, and equitable experience across our suite of trading products. Crypto assets and use cases are rapidly expanding and Coinbase seeks to offer our customers access to all assets and use cases where it is safe and legal to do so. For example, we take a number of steps to mitigate conflicts in our digital asset listing process. We have a digital asset support committee that is composed of senior leaders from our product, legal, compliance, finance, and accounting departments. The digital asset support committee reviews the relevant aspects of any asset escalated to it in connection with a listing on our platform in accordance with our digital asset support policies and procedures that are designed to mitigate conflicts. Only the digital asset support committee decides which of these escalated assets we can and cannot list on our platform, and it does not

coordinate such decisions with anyone outside of the committee. We also have policies and procedures that require committee members to recuse themselves from asset listing decisions where a committee member may have a conflict of interest.

Further, we carefully handle and keep customer data confidential through security and encryption as well as policies, training, and monitoring. Moreover, we invest heavily in compliance tools. For example, in addition to robust know-your-customer and anti-money laundering programs, we employ an industry leading third-party trade surveillance software platform that helps us monitor and detect problematic trading activities on our platform, as further discussed below. We have also invested in a range of technologies that are designed to help identify and prevent harmful activity on our platform, including fraud or account takeovers.

As we maintain, grow, and expand our product and services offerings we also must scale and strengthen our internal controls and processes, and monitor our third-party partners' and vendors' ability to similarly scale and strengthen in order for us to remain an industry leader and a trusted platform. Additionally, we have procedures to process redemptions and withdrawals expeditiously, subject to the terms of applicable user agreements. For additional information, see *Note 10. Customer Assets and Liabilities*, of the Notes to our consolidated financial statements included in Part II, Item 8 of this Annual Report on Form 10-K and *Risk Factors—Our failure to safeguard and manage our and our customers' fiat currencies and crypto assets could adversely impact our business, operating results, and financial condition* and *Risk Factors—Depositing and withdrawing crypto assets into and from our platform involve risks, which could result in loss of customer assets, customer disputes and other liabilities, which could adversely impact our business* included in Part I, Item 1A of this Annual Report on Form 10-K.

Competition

The cryptoeconomy is highly innovative, rapidly evolving, and characterized by healthy competition, experimentation, changing customer needs, frequent introductions of new products and services, and is subject to uncertain and evolving industry and regulatory requirements. We face significant competition from a variety of companies around the world – ranging from crypto-native companies, including decentralized exchanges, to large traditional financial services incumbents and financial technology providers.

Our main competition falls into the following categories:

- traditional financial technology and brokerage firms that have entered the crypto asset market in recent years and offer overlapping features targeted at our customers;
- companies focused on the crypto asset market, some of whom adhere to local regulations and directly compete with our platform, and others who choose to operate outside of local rules and regulations or in jurisdictions with less stringent local rules and regulations and are potentially able to more quickly adapt to trends, support a greater number of crypto assets, and develop new crypto-based products and services due to a different standard of regulatory scrutiny;
- crypto-focused companies and traditional financial incumbents that offer point or siloed solutions specifically targeted at institutional customers; and
- stablecoins, other than USDC, and fiat currencies globally.

The competitive landscape varies significantly by geography. For example, the traditional financial services and financial technology companies we compete against are largely U.S. and European based and operate under the same evolving regulatory landscape that we do. However, we also face competition from companies, in particular those located outside the United States, who are subject to significantly less stringent regulatory and compliance requirements in their local jurisdictions. Their business models rely on being unregulated or only regulated in a small number of lower compliance jurisdictions, while also offering their products in highly regulated jurisdictions, including the United States,

without necessarily complying with the relevant regulatory requirements in such jurisdictions.

Across our product portfolio, we differentiate ourselves through our cohesive ecosystem of products and services that address the distinct needs of our customers, our full-stack technology platform purpose-built for the cryptoeconomy, significant investments in regulatory compliance and licensure, advanced cryptography and security expertise, and our emphasis on accessibility, trust, and ease of use. We invest in user research, design, and experience to continuously improve the ability of our products to address our users' needs.

Additionally, we have continued to invest in the trust foundations of our business. We have built and expanded the use of advanced cryptographic techniques such as multi-party computation, an innovative approach to securing user funds, within the business. In parallel, we remain highly engaged with global regulatory bodies and governmental agencies.

Our ability to quickly and continuously innovate to support additional blockchains, provide products and services to our customers that are native to the cryptoeconomy, such as staking and governance, and launch additional products and services further separates us from our competition. See the section titled "*Risk Factors*" in Part I, Item 1A of this Annual Report on Form 10-K for a more comprehensive description of risks related to competition.

Human Capital

Powering the cryptoeconomy is no small task, and requires hiring, developing, and retaining the most talented individuals who are deeply passionate about our mission to increase economic freedom and who are excited to build new products and services.

We work incredibly hard in pursuit of ambitious goals. We signal who will thrive at Coinbase by being transparent about our culture on our website. Our culture has and will continue to evolve but, at our core, we prioritize the following principles:

- Clear communication
- Efficient execution
- Act like an owner
- Top talent
- Championship team
- Continuous learning
- Customer focus
- Repeatable innovation
- Positive energy
- Mission first

We are a remote-first company. We believe that allowing our employees to work in the location that best suits them provides us access to a large talent pool and a sustained advantage in hiring and retaining employees in the United States and worldwide.

We offer competitive, transparent compensation and unique learning. We conduct an annual market review to ensure our compensation continues to be consistent with our competitive compensation philosophy. We have single, transparent pay targets for the vast majority of our roles – eliminating most compensation negotiations – and provide one-year equity grants for the vast majority of employees. We

have also made meaningful investments in learning and development, including offering an annual learning stipend and in-house crypto learning curriculum.

We continuously improve our people programs and practices. We regularly monitor engagement through quarterly pulse surveys to continuously optimize our culture, employee engagement, risk management, and productivity. We invest in these surveys and associated action planning at the executive level, as we believe our people and culture are key drivers of business success.

As of December 31, 2023, we had 3,416 employees.

Government Regulation

We operate globally in a complex and rapidly evolving regulatory environment and are subject to a wide range of laws and regulations enacted by U.S. federal, state, and local and foreign governments and regulatory authorities. The breadth of laws, rules, and regulations we are subject to include financial services and banking, consumer protection, money transmission, stored value and prepaid access, electronic payments, payment services, securities, commodities, derivatives, and unclaimed property, as well as bespoke digital asset and cryptocurrency laws that have been promulgated in some jurisdictions. These laws, rules, and regulations evolve frequently and may be modified, interpreted, and applied in an inconsistent manner from one jurisdiction to another, and may conflict with one another. Moreover, the complexity and evolving nature of our business and the significant uncertainty surrounding the regulation of the cryptoeconomy, require us to exercise our judgment as to whether certain laws, rules, and regulations apply to us, and it is possible that regulators may disagree with our conclusions. We are not supervised by any federal banking agency, such as the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation, or the Federal Reserve Board. In addition, our trading platform is not an SEC-regulated national securities exchange or alternative trading system.

Globally, we are subject to strict legal and regulatory requirements relating to the detection and prevention of countering terrorist financing, anti-money laundering, fraud, tax evasion, and other illicit activity, the regulation of competition, economic and trade sanctions, privacy, cybersecurity, information security, and data protection. These descriptions are not exhaustive, and these laws, regulations, and rules (and the interpretations thereof) frequently change and are increasing in number.

The laws and regulations to which we are subject, including those pertaining to digital assets and crypto assets, are rapidly evolving and increasing in scope. Therefore, we monitor these areas closely and invest significant resources in our legal, compliance, product, and engineering teams to ensure our business practices evolve to help us comply with the current laws, regulations, and legal standards to which we are subject, as well as to plan and prepare for changes in interpretations thereof, as well as additional laws, regulations, and legal standards that are introduced in the future.

Anti-money laundering and counter-terrorist financing

We are subject to various anti-money laundering and counter-terrorist financing laws, including the Bank Secrecy Act (the “BSA”) in the United States, and similar laws and regulations abroad. In the United States, as a money services business registered with the Financial Crimes Enforcement Network (“FinCEN”), the BSA requires us to among other things, develop, implement, and maintain a risk-based anti-money laundering program, provide an anti-money laundering-related training program, report suspicious activities and transactions to FinCEN, comply with certain reporting and recordkeeping requirements, and collect and maintain information about our customers. In addition, the BSA requires us to comply with certain customer due diligence requirements as part of our anti-money laundering obligations, including developing risk-based policies, procedures, and internal controls reasonably designed to verify a customer’s identity. Many states and other countries impose similar and, in some cases, more stringent requirements related to anti-money laundering and counter-terrorist financing. Our compliance program is designed to prevent and detect instances of money laundering, terrorist financing, and other illicit activity on our platform. It is also designed to prohibit the use of Coinbase in sanctioned jurisdictions, or by sanctioned persons or entities, as determined by the Office of Foreign Assets Control

("OFAC"), and equivalent foreign authorities. It includes policies, procedures, reporting protocols, and internal controls, and is designed to address legal and regulatory requirements as well as to assist us in managing risks associated with money laundering and terrorist financing. As part of our compliance program, we limit the use of our products and services to jurisdictions where we are legally able to offer our products and services, and customers can only use our products and services in the specific jurisdictions we have approved. We enforce such geographic restrictions through various onboarding and login controls to limit a customer from accessing products or services outside of their jurisdiction-based permissions. Additionally, we have a robust KYC program, which is a central part of our anti-money laundering program. Our KYC program is governed by our Global KYC Policy that covers customer onboarding, and includes customer due diligence; calculation and assessment of customer risk rating; application of enhanced due diligence on high risk customers; and screening customers against global sanctions lists. Following the customer onboarding process, we perform ongoing monitoring of customers and transaction activity to ensure that potentially suspicious activity is appropriately detected, and when appropriate, reported. Anti-money laundering regulations are constantly evolving and vary from jurisdiction-to-jurisdiction. We continuously monitor our compliance with anti-money laundering and counter-terrorist financing regulations and industry standards and implement policies, procedures, and controls in light of the most current legal requirements.

For a description of the risks we may face from (i) unauthorized or impermissible customer access to our products and services outside of jurisdictions where we have determined to make such products and services available or (ii) an assertion of jurisdiction over our operations or the crypto assets we offer by U.S. and foreign regulators and other government entities, see the following risk factors in the section titled "Risk Factors" in Part I, Item 1A of this Annual Report on Form 10-K: (i) *"We are subject to an extensive, highly-evolving and uncertain regulatory landscape and any adverse changes to, or our failure to comply with, any laws and regulations could adversely affect our brand, reputation, business, operating results, and financial condition";* (ii) *"As we continue to expand and localize our international activities, our obligations to comply with the laws, rules, regulations, and policies of a variety of jurisdictions will increase and we may be subject to inquiries, investigations, and enforcement actions by U.S. and non-U.S. regulators and governmental authorities, including those related to sanctions, export control, and anti-money laundering";* and (iii) *"A particular crypto asset, product or service's status as a "security" in any relevant jurisdiction is subject to a high degree of uncertainty and if we are unable to properly characterize a crypto asset or product offering, we may be subject to regulatory scrutiny, inquiries, investigations, fines, and other penalties, which may adversely affect our business, operating results, and financial condition."*

Money transmission, stored value, and virtual currency business activity

In the United States, we have obtained licenses to operate as a money transmitter or the equivalent in the states where such licenses or equivalent are required to conduct our business, as well as in the District of Columbia and Puerto Rico. In addition, we have obtained a BitLicense from NYDFS. As a licensed money transmitter and an entity subject to the BitLicense regulatory regime, we are subject to, among other things, the BSA, restrictions and requirements with respect to the investment of customer funds and use and safeguarding of customer funds and crypto assets, and bonding, minimum capital and net worth requirements, prudential compliance obligations associated with customer notice and disclosure, reporting and recordkeeping requirements applicable to the company, as well as requirements relating to the screening of control persons and inspection and examination by state regulatory agencies. These state licensing laws also cover matters such as regulatory approval of controlling stockholders, directors, and senior management of the licensed entity.

Outside the United States, we have obtained licenses to provide crypto-asset custody and trading from the German Federal Financial Supervisory Authority (BaFin). In Singapore, we hold a major payment institution license issued by the Monetary Authority of Singapore. In Australia, we are registered as a digital currency exchange provider with the Australian Transaction Reports and Analysis Centre. We are also registered as a Money Services Business with the Financial Transactions and Reports Analysis Centre of Canada. In Bermuda, we have obtained a 'Class 'F' (Full) Digital Asset Business License from

the BMA enabling us to service consumer trading in numerous approved jurisdictions. In addition, we have obtained Virtual Asset Service Provider (VASP) registrations in Ireland, Spain, France, Italy and the Netherlands, through which we offer crypto custody and trading services in these countries. Under these licenses and registrations, we are subject to a broad range of rules and regulations including in respect of anti-money laundering, safeguarding of customer assets and funds, regulatory capital requirements, fit and proper management, operational controls, corporate governance, customer disclosures, reporting, and record keeping.

New York State trust company

Our subsidiary, Coinbase Custody Trust Company, LLC, operates as a New York State-chartered limited purpose trust company, which is subject to regulation, examination, and supervision by the NYDFS. NYDFS regulations impose various compliance requirements including, without limitation, operational limitations related to the nature of crypto assets we can hold under custody, capital requirements, BSA and anti-money laundering program requirements, affiliate transaction limitations, and notice and reporting requirements.

Electronic money and payment institution

We serve our customers through Electronic Money Institutions authorized by the U.K. Financial Conduct Authority and the Central Bank of Ireland. We comply with rules and regulations applicable to the European e-money industry, including those related to funds safeguarding, corporate governance, anti-money laundering, disclosure, reporting, and inspection. We are, or may be, subject to banking-related regulations in other countries now or in the future related to our role in the financial industry.

Economic and trade sanctions

We are required to comply with economic and trade sanctions administered by the United States, the European Union ("E.U."), relevant E.U. member states, and other jurisdictions in which we operate. Economic and trade sanctions programs administered by OFAC and by certain foreign jurisdictions prohibit or restrict transactions to or from (or dealings with or involving) certain countries, regions, governments, and in certain circumstances, specified individuals and entities such as narcotics traffickers, terrorists, and terrorist organizations, as well as certain digital currency addresses.

Securities

In recent years, the SEC and U.S. state securities regulators have stated that certain digital assets or digital asset products may be classified as securities under U.S. federal and state securities laws, and in the case of the SEC, has made public statements on this topic – however, these statements are not binding or definitive guidance, and there is currently no certainty under the SEC's application of the applicable legal test as to whether particular crypto assets, products, or services would be deemed securities. Though the SEC's Strategic Hub for Innovation and Financial Technology published a framework for analyzing whether any given crypto asset is a security in April 2019, this framework is also not a rule, regulation, or statement of the SEC and is not binding on the SEC. A number of enforcement actions and regulatory proceedings have since been initiated against digital assets and digital asset products and their developers and proponents, as well as against trading platforms that support digital assets. Several foreign governments have also issued similar warnings cautioning that digital assets may be deemed to be securities under the laws of their jurisdictions.

We have established policies and practices to evaluate each crypto asset we consider for listing or for custody and are a founding member of the Crypto Rating Council, a member-owned and operated organization whose purpose is to assess whether any given crypto assets, or whether the development, issuance, and use of such assets, have characteristics that make them more or less likely to implicate U.S. federal securities laws. We also evaluate all other products and services prior to launch under U.S. federal and applicable international securities laws.

Commodities and derivatives

The Commodity Futures Trading Commission (“CFTC”) has stated, and CFTC enforcement actions have confirmed, that at least some crypto assets, including Bitcoin, fall within the definition of a “commodity” under the U.S. Commodities Exchange Act of 1936 (the “CEA”). Under the CEA, the CFTC has broad enforcement authority to police market manipulation and fraud in spot commodity markets, including the spot crypto markets. We are subject to such authority with respect to improper trading on our platform. In addition, CFTC regulations and CFTC oversight and enforcement authority apply with respect to futures, swaps, other derivative products, and certain retail leveraged commodity transactions involving crypto assets, including the markets on which these products trade. Separately, security-based swaps are subject to SEC regulation and oversight. In general, we seek to ensure that crypto asset transactions on our crypto asset trading platform do not constitute futures, swaps, security-based swaps, other derivative products, or retail leveraged commodity transactions. Given our novel business model and uncertainty regarding the application of some of these laws and regulations, we may become subject to regulatory scrutiny or legal challenge with respect to our compliance with these requirements. In August 2023, our subsidiary, Coinbase Financial Markets, Inc. secured regulatory approval from the National Futures Association to operate as a futures commission merchant (“FCM”), in September 2023, Coinbase International Exchange secured regulatory approval from the BMA to enable perpetual futures for eligible non-U.S. customers, and in February 2022, we acquired LMX Labs, LLC, a designated contract market (“DCM”) regulated by the CFTC which now operates as the Coinbase Derivatives Exchange, in connection with our acquisition of FairXchange, Inc. FCMs and DCMs are subject to the rules of the National Futures Association as well as numerous regulatory requirements, including strict capital requirements.

Prohibitions on bribery and anti-corruption

We are subject to regulations imposed by the FCPA in the United States and similar laws in other countries, such as the Bribery Act 2010 in the United Kingdom (the “Bribery Act”), which generally prohibit companies and those acting on their behalf from making improper payments to foreign government officials for the purpose of obtaining or retaining business. Some of these laws, such as the Bribery Act, also prohibit improper payments between private entities and persons.

Privacy and protection of user data

We are subject to a number of laws, rules, directives, and regulations relating to the collection, use, retention, security, processing, and transfer of personally identifiable information about our customers and employees in the countries where we operate. Our business relies on the processing of personal data in many jurisdictions and the movement of data across national borders. As a result, much of the personal data that we process, which may include certain financial information associated with individuals, is regulated by multiple privacy and data protection laws and, in some cases, the privacy and data protection laws of multiple jurisdictions. In many cases, these laws apply not only to third-party transactions, but also to transfers of information between or among us, our subsidiaries, and other parties with which we have commercial relationships.

Consumer protection

The Federal Trade Commission (“FTC”), the Consumer Financial Protection Bureau (“CFPB”), and other U.S. federal, state, and local and foreign regulatory agencies regulate financial products, including money transfer services related to remittance or peer-to-peer transfers. These agencies, as well as certain other governmental bodies, including state attorneys general, have broad consumer protection mandates and discretion in enforcing consumer protection laws, including matters related to unfair or deceptive, and, in the case of the CFPB, abusive acts or practices (“UDAAPs”), and they promulgate, interpret, and enforce rules and regulations that affect our business. For example, all persons offering or providing financial services or products to consumers in the United States, directly or indirectly, can be subject to enforcement actions related to the prohibition of UDAAPs. The CFPB has enforcement

authority to prevent an entity that offers or provides consumer financial services or products or a service provider in the United States from committing or engaging in UDAAPs or violating other federal consumer financial laws, including the ability to engage in joint investigations with other agencies, issue subpoenas and civil investigative demands, conduct hearings and adjudication proceedings, commence a civil action, grant relief (e.g., limit activities or functions; rescission of contracts), and refer matters for criminal proceedings. Recent market disruptions have led to numerous proposals among consumer protection focused agencies including by the FTC and CFPB for changes in the regulation of the crypto industry, and in November 2023, the CFPB proposed a rule to define a market for general-use digital consumer payment applications, which would give the CFPB supervisory authority to examine the larger participants of that market. New laws or regulations, or changes in enforcement of existing laws or regulations could require us to change certain business practices related to consumer disclosures, marketing and operational features related to payments and remittance regulations and other laws that may impact our business.

Escheatment and unclaimed property regulations

We are subject to unclaimed property laws in the United States and in certain other jurisdictions where we operate. These laws require us to turn over to certain government authorities the property of others held by us that has been unclaimed for a specified period of time, including airdropped tokens and forked crypto assets. These laws may also require us to liquidate that property prior to turning it over. We hold property subject to unclaimed property laws; however, there is significant regulatory uncertainty with how states and certain foreign jurisdictions treat crypto assets under unclaimed property rules.

Lending law

We originate secured commercial loans in certain states in the United States. As a result, our lending activities are subject to various state lending laws and licensure requirements with respect to lending activities within such state. These state lending laws may be enforced by state attorneys general, state financial regulators, and private litigants, among others. Given our novel business model and uncertainty regarding application of some of these laws and regulations, we may become subject to regulatory scrutiny or legal challenge with respect to our compliance with these requirements.

Interchange fees

Interchange fees associated with four-party payments systems are being reviewed or challenged in various jurisdictions. For example, in the E.U., the Multilateral Interchange Fee Regulation caps interchange fees for credit and debit card payments and provides for business rules to be complied with by any company dealing with card transactions, including us. As a result, the fees that we collect in certain jurisdictions may become the subject of regulatory challenge.

Legal requirements for prepaid cards

Prepaid card programs are subject to various federal and state laws and regulations, including consumer financial protection regulations such as the CFPB's Regulation E, which imposes requirements on issuers of prepaid cards. The laws and regulations impose compliance obligations and costs on our business, and failure to comply could result in litigation, enforcement actions, and penalties.

Card association and payment network rules

In addition to the federal and state laws and regulations governing prepaid cards, we, as well as the bank that issues our Coinbase Card, are subject to and required to comply with card association and payment network rules and guidelines which apply to prepaid cards. The card association and payment network rules govern a variety of areas, including how consumers and merchants may use their cards and data security, and may be changed periodically. Noncompliance with these rules could result in fines or penalties levied by the card association or payment network for certain acts or omissions, or the termination of our ability to offer prepaid cards.

Association and network rules

The bylaws and agreements between clearing house participants and bankcard companies impose specific responsibilities and liabilities for issuers of debit cards. As the issuer of the Coinbase Card, we are required to comply with the appropriate National Automated Clearing House Association (“NACHA”), bylaws, operating rules, and agreements, as well as card network rules and guidelines. Additional new products and services that we offer may also impose additional obligations on us to comply with NACHA and card network obligations related to preventing fraud, money laundering, and IT security breaches.

Intellectual Property

The protection of our technology and intellectual property is an important aspect of our business. We rely upon a variety of protections, including a combination of patents, trademarks, trade secrets, copyrights, confidentiality procedures, and contractual commitments. We co-founded the Crypto Open Patent Alliance, and pledged to only use our crypto technology patents defensively. We may also in the future agree to license our patents to third parties as part of various patent pools and open patent projects.

Corporate Information

We were initially incorporated in May 2012 as Coinbase, Inc., a Delaware corporation. In January 2014, Coinbase Global, Inc. was incorporated as a Delaware corporation to act as the holding company of Coinbase, Inc. and our other subsidiaries. In April 2014, we completed a corporate reorganization whereby Coinbase, Inc. became a wholly-owned subsidiary of Coinbase Global, Inc. Coinbase Global, Inc.’s principal assets are its interests in the equity of Coinbase, Inc. In addition to Coinbase, Inc., Coinbase Global, Inc. is the parent company of a number of other operating subsidiaries. We are a remote-first company, meaning the majority of our employees work remotely. Due to this, we do not have a principal executive office.

Coinbase, the Coinbase logo, and other registered or common law trade names, trademarks, or service marks of Coinbase included in this Annual Report on Form 10-K are the property of Coinbase. Other trademarks, service marks, or trade names included in this Annual Report on Form 10-K are the property of their respective owners.

Available Information

We file our annual, periodic and current reports, and other required information, electronically with the SEC and this information is available at www.sec.gov. We also make available on our website at www.coinbase.com, free of charge, copies of these reports and other information as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC.

We use our website, blog, press releases, public conference calls, public webcasts, our X feed (@coinbase), Facebook page, LinkedIn page, YouTube channel, and Brian Armstrong’s X feed (@brian_armstrong) as means of disclosing material non-public information and for complying with our disclosure obligations under Regulation FD. The information disclosed by the foregoing channels could be deemed to be material information. As such, we encourage investors, the media, and others to follow the channels listed above and to review the information disclosed through such channels. The contents of the websites referred to above are not intended to be incorporated by reference into this Annual Report on Form 10-K or in any other report or document we file with the SEC, and any references to websites are intended to be inactive textual references only.

Item 1A. Risk Factors

Investing in our Class A common stock involves a high degree of risk. You should carefully consider the risks and uncertainties described below, together with all of the other information in this Annual Report on Form 10-K, including the section titled “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and the consolidated financial statements and related notes. The risks and uncertainties described below are not the only ones we face. Additional risks and uncertainties that we are unaware of or that we deem immaterial may also become important factors that adversely affect our business. If any of the following risks occur, our business, operating results, financial condition, and future prospects could be materially and adversely affected. Many risks affect more than one category, and the risks are not in order of significance or probability of occurrence because they have been grouped by categories. The market price of our Class A common stock could decline, and you could lose part or all of your investment due to any of these risks.

Risk Factors

The Most Material Risks Related to Our Business and Financial Position

Our operating results have and will significantly fluctuate, including due to the highly volatile nature of crypto.

Our operating results are dependent on crypto assets and the broader cryptoeconomy. Due to the highly volatile nature of the cryptoeconomy and the prices of crypto assets, which have experienced and continue to experience significant volatility, our operating results have, and will continue to, fluctuate significantly from quarter to quarter in accordance with market sentiments and movements in the broader cryptoeconomy. Our operating results will continue to fluctuate significantly as a result of a variety of factors, many of which are unpredictable and in certain instances are outside of our control, including:

- our dependence on offerings that are dependent on crypto asset trading activity, including trading volume and the prevailing trading prices for crypto assets, whose trading prices and volume can be highly volatile;
- our ability to attract, maintain, and grow our customer base and engage our customers;
- changes in the legislative or regulatory environment, or actions by U.S. or foreign governments or regulators, including fines, orders, or consent decrees;
- regulatory changes or scrutiny that impact our ability to offer certain products or services;
- our ability to continue to diversify and grow our subscription and services revenue;
- our mix of revenue between transaction and subscription and services;
- pricing for or temporary suspensions of our products and services;
- investments we make in the development of products and services as well as technology offered to our developers, international expansion, and sales and marketing;
- adding crypto assets to, or removing from, our platform;
- our ability to establish and maintain partnerships, collaborations, joint ventures, or strategic alliances with third parties;
- market conditions of, and overall sentiment towards, the cryptoeconomy;
- macroeconomic conditions, including interest rates, inflation and instability in the global banking system;

- adverse legal proceedings or regulatory enforcement actions, judgments, settlements, or other legal proceeding and enforcement-related costs;
- the development and introduction of existing and new products and services by us or our competitors;
- our ability to control costs, including our operating expenses incurred to grow and expand our operations and to remain competitive;
- system failure, outages or interruptions, including with respect to our crypto platform and third-party crypto networks;
- our lack of control over decentralized or third-party blockchains and networks that may experience downtime, cyber-attacks, critical failures, errors, bugs, corrupted files, data losses, or other similar software failures, outages, breaches and losses;
- breaches of security or privacy;
- inaccessibility of our platform due to our or third-party actions;
- our ability to attract and retain talent; and
- our ability to compete with our competitors.

As a result of these factors, it is difficult for us to forecast growth trends accurately and our business and future prospects are difficult to evaluate, particularly in the short term. In particular, our subscription and services revenue has grown over time, with stablecoin revenue received in connection with USDC becoming a more meaningful revenue contributor. Therefore, our operating results could fluctuate significantly as a result of changes in the demand for our subscription and service offerings, in the demand for USDC, in the balance of USDC on our platform, in interest rates, and to our ongoing relationships with third parties, such as the issuer of USDC.

In view of the rapidly evolving nature of our business and the cryptoeconomy, period-to-period comparisons of our operating results may not be meaningful, and you should not rely upon them as an indication of future performance. Quarterly and annual expenses reflected in our financial statements may be significantly different from historical or projected rates. Our operating results in one or more future quarters may fall below the expectations of securities analysts and investors. As a result, the trading price of our Class A common stock may increase or decrease significantly.

Our total revenue is substantially dependent on the prices of crypto assets and volume of transactions conducted on our platform. If such price or volume declines, our business, operating results, and financial condition would be adversely affected and the price of our Class A common stock could decline.

We generate a large portion of our total revenue from transaction fees on our platform in connection with the purchase, sale, and trading of crypto assets by our customers. Transaction revenue is based on transaction fees that are either a flat fee or a percentage of the value of each transaction. For our consumer trading product, we also charge a spread to ensure that we are able to settle purchases and sales at the price we quote to customers. We also generate a large portion of total revenue from our subscription and services, and such revenue has grown over time, primarily due to stablecoin revenue growth in connection with USDC. Declines in the volume of crypto asset transactions, the price of crypto assets, or market liquidity for crypto assets generally may result in lower total revenue to us.

The price of crypto assets and associated demand for buying, selling, and trading crypto assets have historically been subject to significant volatility. For instance, in 2017, the value of certain crypto assets, including Bitcoin, experienced steep increases in value, and our customer base expanded worldwide. The increases in value of certain crypto assets, including Bitcoin, from 2016 to 2017, and then again in 2021,

were followed by a steep decline in 2018 and again in 2022, which adversely affected our net revenue and operating results. While the value of crypto assets, including Bitcoin, increased towards the end of 2023, if the value of crypto assets and transaction volume do not continue to recover or decline in the future, our ability to generate revenue may suffer and customer demand for our products and services may decline, which could adversely affect our business, operating results and financial condition and cause the price of our Class A common stock to decline. The price and trading volume of any crypto asset is subject to significant uncertainty and volatility, depending on a number of factors, including:

- market conditions of, and overall sentiment towards, crypto assets and the cryptoeconomy, including, but not limited to, as a result of actions taken by or developments of other companies in the cryptoeconomy;
- changes in liquidity, market-making volume, and trading activities;
- trading activities on other crypto platforms worldwide, many of which may be unregulated, and may include manipulative activities;
- investment and trading activities of highly active consumer and institutional users, speculators, miners, and investors;
- the speed and rate at which crypto is able to gain adoption as a medium of exchange, utility, store of value, consumptive asset, security instrument, or other financial assets worldwide, if at all;
- decreased user and investor confidence in crypto assets and crypto platforms;
- negative publicity and events relating to the cryptoeconomy;
- unpredictable social media coverage or “trending” of, or other rumors and market speculation regarding, crypto assets;
- the ability for crypto assets to meet user and investor demands;
- the functionality and utility of crypto assets and their associated ecosystems and networks, including crypto assets designed for use in various applications;
- consumer preferences and perceived value of crypto assets and crypto asset markets;
- increased competition from other payment services or other crypto assets that exhibit better speed, security, scalability, or other characteristics;
- adverse legal proceedings or regulatory enforcement actions, judgments, or settlements impacting cryptoeconomy participants;
- regulatory or legislative changes, scrutiny and updates affecting the cryptoeconomy;
- the characterization of crypto assets under the laws of various jurisdictions around the world;
- the adoption of unfavorable taxation policies on crypto asset investments by governmental entities;
- the maintenance, troubleshooting, and development of the blockchain networks underlying crypto assets, including by miners, validators, and developers worldwide;
- the ability for crypto networks to attract and retain miners or validators to secure and confirm transactions accurately and efficiently;

- legal and regulatory changes affecting the operations of miners and validators of blockchain networks, including limitations and prohibitions on mining activities, or new legislative or regulatory requirements as a result of growing environmental concerns around the use of energy in Bitcoin and other proof-of-work mining activities;
- ongoing technological viability and security of crypto assets and their associated smart contracts, applications and networks, including vulnerabilities against hacks and scalability;
- fees and speed associated with processing crypto asset transactions, including on the underlying blockchain networks and on crypto platforms;
- financial strength of market participants;
- the availability and cost of funding and capital;
- the liquidity and credit risk of other crypto platforms;
- interruptions or temporary suspensions or other compulsory restrictions in products or services from or failures of major crypto platforms;
- availability of an active derivatives market for various crypto assets;
- availability of banking and payment services to support crypto-related projects;
- instability in the global banking system and the level of interest rates and inflation;
- monetary policies of governments, trade restrictions, and fiat currency devaluations; and
- national and international economic and political conditions.

There is no assurance that any supported crypto asset will maintain its value or that there will be meaningful levels of trading activities. In the event that the price of crypto assets or the demand for trading crypto assets decline, our business, operating results, and financial condition would be adversely affected and the price of our Class A common stock could decline.

Our net revenue may be concentrated in a limited number of areas. Within transaction revenue and subscription and services revenue, a meaningful concentration is from transactions in Bitcoin and Ethereum and stablecoin revenue in connection with USDC, respectively. If revenue from these areas declines and is not replaced by new demand for crypto assets or other products and services, our business, operating results, and financial condition could be adversely affected.

While we support a diverse portfolio of crypto assets for trading, staking and custody, our net revenue is concentrated in a limited number of areas, such as transactions in Bitcoin and Ethereum for transaction revenue and stablecoin revenue in connection with USDC for subscription and services revenue. Since 2022, we have derived a more meaningful amount of our net revenue from subscription and services revenue, primarily due to stablecoin revenue in connection with USDC, than we have historically. For the years ended December 31, 2023 and 2022, we derived a meaningful amount of our net revenue from transaction fees generated in connection with the purchase, sale, and trading of Bitcoin and Ethereum; these trading pairs drove approximately 54% and 55% of total Trading Volume on our platform during these periods, respectively. During 2022, the value of Bitcoin and Ethereum declined steeply. While the value of Bitcoin and Ethereum moderately recovered in 2023, if the value of Bitcoin and Ethereum do not continue to recover or decline in the future, our business and operating results could be adversely affected. As such, in addition to the factors impacting the broader cryptoeconomy described in this section, our revenue may be adversely affected if the markets for Bitcoin and Ethereum deteriorate or if their prices decline, including as a result of the following factors:

- the reduction in mining rewards of Bitcoin, including block reward halving events, which are events that occur after a specific period of time and reduces the block reward earned by miners;
- public sentiment related to the actual or perceived environmental impact of Bitcoin, Ethereum, and related activities, including environmental concerns raised by private individuals and governmental actors related to the energy resources consumed in the Bitcoin mining process;
- the migration of Ethereum to a proof-of-stake model;
- disruptions, hacks, splits in the underlying networks also known as “forks”, attacks by malicious actors who control a significant portion of the networks’ hash rate such as double spend or 51% attacks, or other similar incidents affecting the Bitcoin or Ethereum blockchain networks;
- hard “forks” resulting in the creation of and divergence into multiple separate networks, such as Bitcoin Cash and Ethereum Classic;
- informal governance led by Bitcoin and Ethereum’s core developers that lead to revisions to the underlying source code or inactions that prevent network scaling, and which evolve over time largely based on self-determined participation, which may result in new changes or updates that affect their speed, security, usability, or value;
- the ability for Bitcoin and Ethereum blockchain networks to resolve significant scaling challenges and increase the volume and speed of transactions;
- the ability to attract and retain developers and customers to use Bitcoin and Ethereum for payment, store of value, unit of accounting, and other intended uses and the absence of another supported crypto asset to attract and retain developers and customers for the same;
- transaction congestion and fees associated with processing transactions on the Bitcoin and Ethereum networks and the absence of another supported crypto asset to replace these transactions;
- the identification of Satoshi Nakamoto, the pseudonymous person or persons who developed Bitcoin, or the transfer of Satoshi’s Bitcoins;
- negative perception of Bitcoin or Ethereum;
- development in mathematics, technology, including in digital computing, algebraic geometry, and quantum computing that could result in the cryptography being used by Bitcoin and Ethereum becoming insecure or ineffective;
- adverse legal proceedings or regulatory enforcement actions, judgments, or settlements impacting cryptoeconomy participants;
- regulatory, legislative or other compulsory or informal restrictions or limitations on Bitcoin or Ethereum lending, mining or staking activities;
- liquidity and credit risk issues experienced by other crypto platforms and other participants of the cryptoeconomy; and
- laws and regulations affecting the Bitcoin and Ethereum networks or access to these networks, including a determination that either Bitcoin or Ethereum constitutes a security or other regulated financial instrument under the laws of any jurisdiction.

Moreover, our subscription and services revenue has grown over time, including stablecoin revenue received in connection with USDC. Such revenue depends on a variety of factors, including demand for our subscription and services offerings, demand for USDC, the balance of USDC on our platform, interest rates, and ongoing relationships with third parties, such as the issuer of USDC. If such factors are

negatively impacted, our business, operating results and financial condition could be adversely affected.

We have in the past, and may in the future, enter into partnerships, collaborations, joint ventures, or strategic alliances with third parties. If we are unsuccessful in establishing or maintaining strategic relationships with these third parties or if these third parties fail to deliver certain operational services, our business, operating results, and financial condition could be adversely affected.

We have in the past, and may in the future, enter into partnerships, collaborations, joint ventures, or strategic alliances with third parties in connection with the development, operation and enhancements to our platform and products and the provision of our services. For example, the issuer of USDC provides us with creation and redemption services for USDC, including the operational capabilities required for our USDC customer-facing services. If the issuer of USDC fails to provide certain operational services, our ability to maintain our current level of offerings and customer experience for USDC could be harmed and interest or confidence in USDC could be impacted. Identifying strategic relationships with third parties, and negotiating and documenting relationships with them may be time-consuming and complex and may distract management. Moreover, we may be delayed, or not be successful, in achieving the objectives that we anticipate as a result of such strategic relationships. In evaluating counterparties in connection with partnerships, collaborations, joint ventures or strategic alliances, we consider a wide range of economic, legal and regulatory criteria depending on the nature of such relationship, including the counterparties' reputation, operating results and financial condition, operational ability to satisfy our and our customers' needs in a timely manner, efficiency and reliability of systems, certifications costs to us or to our customers, and licensure and compliance status. Despite this evaluation, third parties may still not meet our or our customers' needs which may adversely affect our ability to deliver products and services to customers, may adversely impact our business, operating results, and financial condition. Counterparties to any strategic relationship may have economic or business interests or goals that are, or that may become, inconsistent with our business interests or goals, and may subject us to additional risks to the extent such third party becomes the subject of negative publicity, faces its own litigation or regulatory challenges, or faces other adverse circumstances. Conflicts may arise with our strategic partners, such as the interpretation of significant terms under any agreement, which may result in litigation or arbitration which would increase our expenses and divert the attention of our management. If we are unsuccessful in establishing or maintaining strategic relationships with third parties, our ability to compete in the marketplace or to grow our revenue could be impaired and our business, operating results, and financial condition could be adversely affected.

Interest rate fluctuations could negatively impact us.

The level of prevailing short-term interest rates affects our profitability because we derive a large portion of our revenue from interest earned from funds deposited with us by our customers which we hold on their behalf in custodial accounts at banks and from stablecoin revenue, which is derived from interest earned on USDC reserve balances. Higher interest rates increase the amount of interest income and stablecoin revenue earned from these activities. When short-term interest rates decline, our revenue derived from interest correspondingly declines, which negatively impacts our profitability. Further, because stablecoin revenue from USDC has become an increased portion of our subscription and services revenue, if interest rates were to significantly decline from levels reached in the current interest rate environment, our net revenue could decline. Conversely, when interest rates increase, investors may choose to shift their asset allocations, which could negatively impact our stock price or the cryptoeconomy more generally.

The future development and growth of crypto is subject to a variety of factors that are difficult to predict and evaluate. If crypto does not grow as we expect, our business, operating results, and financial condition could be adversely affected.

Crypto assets built on blockchain technology were only introduced in 2008 and remain in the early stages of development. In addition, different crypto assets are designed for different purposes. Bitcoin, for instance, was designed to serve as a peer-to-peer electronic cash system, while Ethereum was designed to be a smart contract and decentralized application platform. Many other crypto networks-ranging from cloud computing to tokenized securities networks-have only recently been established. The further growth and development of any crypto assets and their underlying networks and other cryptographic and algorithmic protocols governing the creation, transfer, and usage of crypto assets represent a new and evolving paradigm that is subject to a variety of factors that are difficult to evaluate, including:

- many crypto networks have limited operating histories, have not been validated in production, and are still in the process of developing and making significant decisions that will affect the design, supply, issuance, functionality, and governance of their respective crypto assets and underlying blockchain networks, any of which could adversely affect their respective crypto assets;
- many crypto networks are in the process of implementing software upgrades and other changes to their protocols, which could introduce bugs, security risks, or adversely affect the respective crypto networks;
- several large networks, including Bitcoin and Ethereum, are developing new features to address fundamental speed, scalability, and energy usage issues. If these issues are not successfully addressed, or are unable to receive widespread adoption, it could adversely affect the underlying crypto assets;
- security issues, bugs, and software errors have been identified with many crypto assets and their underlying blockchain networks, some of which have been exploited by malicious actors. There are also inherent security weaknesses in some crypto assets, such as when creators of certain crypto networks use procedures that could allow hackers to counterfeit tokens. Any weaknesses identified with a crypto asset could adversely affect its price, security, liquidity, and adoption. If a malicious actor or botnet (a volunteer or hacked collection of computers controlled by networked software coordinating the actions of the computers) obtains a majority of the compute or staking power on a crypto network, as has happened in the past, it may be able to manipulate transactions, which could cause financial losses to holders, damage the network's reputation and security, and adversely affect its value;
- the development of new technologies for mining, such as improved application-specific integrated circuits (commonly referred to as ASICs), or changes in industry patterns, such as the consolidation of mining power in a small number of large mining farms, could reduce the security of blockchain networks, lead to increased liquid supply of crypto assets, and reduce a crypto's price and attractiveness;
- if rewards and transaction fees for miners or validators on any particular crypto network are not sufficiently high to attract and retain miners, a crypto network's security and speed may be adversely affected, increasing the likelihood of a malicious attack;
- many crypto assets have concentrated ownership or an "admin key", allowing a small group of holders to have significant unilateral control and influence over key decisions related to their crypto networks, such as governance decisions and protocol changes, as well as the market price of such crypto assets;

- the governance of many decentralized blockchain networks is by voluntary consensus and open competition, and many developers are not directly compensated for their contributions. As a result, there may be a lack of consensus or clarity on the governance of any particular crypto network, a lack of incentives for developers to maintain or develop the network, and other unforeseen issues, any of which could result in unexpected or undesirable errors, bugs, or changes, or stymie such network's utility and ability to respond to challenges and grow; and
- many crypto networks are in the early stages of developing partnerships and collaborations, all of which may not succeed and adversely affect the usability and adoption of the respective crypto assets.

Various other technical issues have also been uncovered from time to time that resulted in disabled functionalities, exposure of certain users' personal information, theft of users' assets, and other negative consequences, and which required resolution with the attention and efforts of their global miner, user, and development communities. If any such risks or other risks materialize, and in particular if they are not resolved, the development and growth of crypto may be significantly affected and, as a result, our business, operating results, and financial condition could be adversely affected.

Cyberattacks and security breaches of our platform, or those impacting our customers or third parties, could adversely impact our brand and reputation and our business, operating results, and financial condition.

Our business involves the collection, storage, processing, and transmission of confidential information, customer, employee, service provider, and other personal data, as well as information required to access customer assets. We have built our reputation on the premise that our platform offers customers a secure way to purchase, store, and transact in crypto assets. As a result, any actual or perceived security breach of us or our third-party partners may:

- harm our reputation and brand;
- result in our systems or services being unavailable and interrupt our operations;
- result in improper disclosure of data and violations of applicable privacy and data protection laws;
- result in significant regulatory scrutiny, investigations, fines, penalties, and other legal, regulatory, and financial exposure;
- cause us to incur significant remediation costs;
- lead to theft or irretrievable loss of our or our customers' fiat currencies or crypto assets;
- reduce customer confidence in, or decreased use of, our products and services;
- divert the attention of management from the operation of our business;
- result in significant compensation or contractual penalties from us to our customers or third parties as a result of losses to them or claims by them; and
- adversely affect our business and operating results.

For example, in 2021, third parties independently obtained login credentials and personal information for at least 6,000 customers and used those credentials to exploit a vulnerability that previously existed in the account recovery process. Coinbase reimbursed impacted customers approximately \$25.1 million.

Further, any actual or perceived breach or cybersecurity attack directed at other financial institutions or crypto companies, whether or not we are directly impacted, could lead to a general loss of customer confidence in the cryptoeconomy or in the use of technology to conduct financial transactions, which could negatively impact us, including the market perception of the effectiveness of our security measures

and technology infrastructure.

An increasing number of organizations, including large merchants, businesses, technology companies, and financial institutions, as well as government institutions, have disclosed breaches of their information security systems, some of which have involved sophisticated and highly targeted attacks, including on their websites, mobile applications, and infrastructure.

Attacks upon systems across a variety of industries, including the crypto industry, are increasing in their frequency, persistence, and sophistication, and, in many cases, are being conducted by sophisticated, well-funded, and organized groups and individuals, including state actors. The techniques used to obtain unauthorized, improper, or illegal access to systems and information (including customers' personal data and crypto assets), disable or degrade services, or sabotage systems are constantly evolving, may be difficult to detect quickly, and often are not recognized or detected until after they have been launched against a target. These attacks may occur on our systems or those of our third-party service providers or partners. Certain types of cyberattacks could harm us even if our systems are left undisturbed. For example, attacks may be designed to deceive employees and service providers into releasing control of our systems to a hacker, while others may aim to introduce computer viruses or malware into our systems with a view to stealing confidential or proprietary data. Additionally, certain threats are designed to remain dormant or undetectable until launched against a target and we may not be able to implement adequate preventative measures.

Although we have developed systems and processes designed to protect the data we manage, prevent data loss and other security breaches, effectively respond to known and potential risks, and expect to continue to expend significant resources to bolster these protections, there can be no assurance that these security measures will provide absolute security or prevent breaches or attacks. We have experienced from time to time, and may experience in the future, breaches of our security measures due to human error, malfeasance, insider threats, system errors or vulnerabilities, or other irregularities. Unauthorized parties have attempted, and we expect that they will continue to attempt, to gain access to our systems and facilities, as well as those of our customers, partners, and third-party service providers, through various means, including hacking, social engineering, phishing, and attempting to fraudulently induce individuals (including employees, service providers, and our customers) into disclosing usernames, passwords, payment card information, or other sensitive information, which may in turn be used to access our information technology systems and customers' crypto assets. Threats can come from a variety of sources, including criminal hackers, hacktivists, state-sponsored intrusions, industrial espionage, and insiders. Certain threat actors may be supported by significant financial and technological resources, making them even more sophisticated and difficult to detect. We may also acquire other companies that expose us to unexpected security risks or increase costs to improve the security posture of the acquired company. Further, there has been an increase in such threat actor activities as a result of the increased prevalence of hybrid and remote working arrangements in recent years. As a result, our costs and the resources we devote to protecting against these advanced threats and their consequences may continue to increase over time.

Although we maintain insurance coverage, it may be insufficient to protect us against all losses and costs stemming from security breaches, cyberattacks, and other types of unlawful activity, or any resulting disruptions or data theft and loss from such events. Outages and disruptions of our platform, including any caused by cyberattacks, may harm our reputation and our business, operating results, and financial condition.

We are subject to an extensive, highly-evolving and uncertain regulatory landscape and any adverse changes to, or our failure to comply with, any laws and regulations could adversely affect our brand, reputation, business, operating results, and financial condition.

Our business is subject to extensive laws, rules, regulations, policies, orders, determinations, directives, treaties, and legal and regulatory interpretations and guidance in the markets in which we operate, including those governing financial services and banking, federal government contractors, trust

companies, securities, derivative transactions and markets, broker-dealers and alternative trading systems (“ATS”), commodities, credit, crypto asset custody, exchange, and transfer, cross-border and domestic money and crypto asset transmission, commercial lending, usury, foreign currency exchange, privacy, data governance, data protection, cybersecurity, fraud detection, payment services (including payment processing and settlement services), consumer protection, escheatment, antitrust and competition, bankruptcy, tax, anti-bribery, economic and trade sanctions, anti-money laundering, and counter-terrorist financing. Many of these legal and regulatory regimes were adopted prior to the advent of the internet, mobile technologies, crypto assets, generative artificial intelligence (“AI”) and related technologies. As a result, some applicable laws and regulations do not contemplate or address unique issues associated with the cryptoeconomy, are subject to significant uncertainty, and vary widely across U.S. federal, state, and local and international jurisdictions. These legal and regulatory regimes, including the laws, rules, and regulations thereunder, evolve frequently and may be modified, interpreted, and applied in an inconsistent manner from one jurisdiction to another, and may conflict with one another. Moreover, the complexity and evolving nature of our business and the significant uncertainty surrounding the regulation of the cryptoeconomy requires us to exercise our judgment as to whether certain laws, rules, and regulations apply to us, and it is possible that governmental bodies and regulators may disagree with our conclusions. To the extent we have not complied with such laws, rules, and regulations, we could be subject to significant fines, revocation of licenses, limitations on or temporary or permanent suspensions of our products and services, reputational harm, and other regulatory consequences, each of which may be significant and could adversely affect our business, operating results, and financial condition.

Additionally, various governmental and regulatory bodies, including legislative and executive bodies, in the United States and in other countries may adopt new laws and regulations, the direction and timing of which may be influenced by changes in the governing administrations and major events in the cryptoeconomy. For example, following the failure of several prominent crypto trading venues and lending platforms, such as FTX, Celsius Networks, Voyager and Three Arrows Capital in 2022 (the “2022 Events”), the U.S. Congress expressed the need for both greater federal oversight of the cryptoeconomy and comprehensive cryptocurrency legislation.

Presently, and in the future, various governmental and regulatory bodies, including in the United States, may introduce new policies, laws, and regulations relating to crypto assets and the cryptoeconomy generally, and crypto asset platforms in particular. Other companies’ failures of risk management and other control functions that played a role in the 2022 Events could accelerate an existing regulatory trend toward stricter oversight of crypto asset platforms and the cryptoeconomy. Furthermore, new interpretations of existing laws and regulations may be issued by such bodies or the judiciary, which may adversely impact the development of the cryptoeconomy as a whole and our legal and regulatory status in particular by changing how we operate our business, how our products and services are regulated, and what products or services we and our competitors can offer, requiring changes to our compliance and risk mitigation measures, imposing new licensing requirements, or imposing a total ban on certain crypto asset transactions, as has occurred in certain jurisdictions in the past. For example, in April 2023, the SEC reopened a comment period for amendments to Rule 3b-16 under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), that could subject several cryptoeconomy participants and systems to registration or other operational compliance requirements under the Exchange Act. If the SEC’s proposed amendment is adopted in its current form, we, along with other cryptoeconomy participants, could face significant additional uncertainty and risk of increased operational costs. In September 2023, the New York Department of Financial Services (“NYDFS”) proposed new guidance regarding the policies and procedures required for virtual currency business entities licensed in New York, such as Coinbase, Inc. This guidance and other applicable state law guidance regarding virtual currency business activity could result in changes to our business in such states as well as the risk of increased operational costs and the risk of enforcement actions. If we are unable to comply with any new requirements, our ability to offer our products and services in their current form may be adversely affected. Additionally, under recommendations from the Financial Crimes Enforcement Network (“FinCEN”), and the Financial Action Task Force (“FATF”), the United States and

several foreign jurisdictions have or are likely to impose the Funds Travel Rule and the Funds Transfer Rule (commonly referred to collectively as the Travel Rule) on financial service providers in the cryptoeconomy. We may face substantial costs to operationalize and comply with the Travel Rule and may be further subject to administrative sanctions for technical violations or customer attrition if the user experience suffers as a result. In October 2023, FinCEN released a proposed rule that identifies virtual currency “mixing” as a class of transactions of primary money laundering concern and imposes heightened recordkeeping and reporting obligations for financial institutions with respect to those transactions. There are substantial uncertainties regarding the scope of these requirements in practice, and we may face substantial costs to operationalize and comply with these rules.

Moreover, we offer and may in the future offer products and services whose functionality or value depends in part on our management of token transaction smart contracts, liquid staking, asset tracking, or other applications that provide novel forms of customer engagement and interaction delivered via blockchain protocols. We may also offer products and services whose functionality or value depends on our ability to develop, integrate, or otherwise interact with such applications within the bounds of our legal and compliance obligations. The legal and regulatory landscape for such products, including the law governing the rights and obligations between and among smart contract developers and users and the extent to which such relationships entail regulated activity is uncertain and rapidly evolving. Our interaction with those applications, and the interaction of other blockchain users with any smart contracts or assets we may generate or control, could present legal, operational, reputational, and regulatory risks for our business.

We may be further subject to administrative sanctions for technical violations or customer attrition if the user experience suffers as a result. As another example, the extension of anti-money laundering requirements to certain crypto-related activities by the European Union’s Fifth Money Laundering Directive, as updated by the European Union’s Sixth Money Laundering Directive, has increased the regulatory compliance burden for our business in Europe and, as a result of the fragmented approach to the implementation of its provisions, resulted in distinct and divergent national licensing and registration regimes for us in different E.U. member states. Further E.U.-level legislation imposing additional regulatory requirements in relation to crypto-related activities is also expected in the near term, such as with the effectiveness of the Markets in Crypto-Assets Regulation (“MiCA”). Among other provisions, MiCA introduces a comprehensive authorization and compliance regime for crypto asset service providers and a disclosure regime for the issuers of certain crypto assets, which is expected to impact our operations in the European Union. For example, the requirements of privacy and data protection laws in the European Union, United States, and elsewhere are typically founded on the premise of centralized, data-controller-based data processing, and require fulfilling, among other things, individual rights to access or delete one’s data. This creates unique compliance challenges given the nature of blockchain’s peer-to-peer network architecture, lack of centralized control, immutability, and perpetual data storage.

Because we have offered and will continue to offer a variety of innovative products and services to our customers, many of our offerings are subject to significant regulatory uncertainty and we from time to time face regulatory inquiries regarding our current and planned products. For instance, we are a reseller of USDC, a stablecoin redeemable on a one-to-one basis for U.S. dollars. The regulatory treatment of fiat-backed stablecoins is highly uncertain and has drawn significant attention from legislative and regulatory bodies around the world. The issuance and resale of such stablecoins may implicate a variety of banking, deposit, money transmission, prepaid access and stored value, anti-money laundering, commodities, securities, sanctions, and other laws and regulations in the United States and in other jurisdictions. Moreover, in October 2021, the President’s Working Group on Financial Markets, the Federal Deposit Insurance Corporation (“FDIC”), and the Office of the Comptroller of the Currency, issued a joint report that recommended legislation that would subject stablecoin issuers and wallet providers to increased federal oversight. There are substantial uncertainties on how these requirements would apply in practice, and we may face substantial compliance costs to operationalize and comply with these rules. Moreover, our products and services incorporate digital engagement, including recommendations, incentives, notifications, educational content and relevant news. Legislators and regulators in jurisdictions in which

we operate have solicited comment from the public or proposed or adopted laws or regulations relating to the use of gamification, predictive analytics or other digital engagement features or practices in various products and services, including potential conflicts of interest that may arise as a result of such practices. If such laws or regulations are adopted in jurisdictions in which we operate and deemed to apply to the products and services we offer, we could be required to change the way we market our offerings and interact with existing and prospective customers or modify certain features contained within our products and services, any of which could adversely impact our business, operating results and financial condition. Certain products and services offered by us that we believe are not subject to regulatory oversight, or are only subject to certain regulatory regimes, such as Coinbase Wallet, a standalone mobile application that allows customers to manage their own private keys and store their crypto assets directly on their mobile devices, may cause us to be deemed to be engaged in a form of regulated activity for which licensure is required or cause us to become subject to new and additional forms of regulatory oversight. We also offer various staking, rewards, and lending products, all of which are subject to significant regulatory uncertainty, and could implicate a variety of laws and regulations worldwide. For example, there is regulatory uncertainty regarding the status of our staking, lending, rewards, and other yield-generating activities under the U.S. federal and state securities laws. While we have implemented policies and procedures, including geofencing for certain products and services, designed to help monitor for and ensure compliance with existing and new laws and regulations, there can be no assurance that we and our employees, contractors, and agents will not violate or otherwise fail to comply with such laws and regulations. To the extent that we or our employees, contractors, or agents are deemed or alleged to have violated or failed to comply with any laws or regulations, including related interpretations, orders, determinations, directives, or guidance, we or they could be subject to a litany of civil, criminal, and administrative fines, penalties, orders and actions, including being required to suspend or terminate the offering of certain products and services. Moreover, to the extent our customers nevertheless access our platform, products or services outside of jurisdictions where we have obtained required governmental licenses and authorization, we could similarly be subject to a variety of civil, criminal, and administrative fines, penalties, orders and actions as a result of such activity.

Due to our business activities, we are subject to ongoing examinations, oversight, and reviews and currently are, and expect in the future, to be subject to investigations and inquiries, by U.S. federal and state regulators and foreign financial service regulators, many of which have broad discretion to audit and examine our business. We are periodically subject to audits and examinations by these regulatory authorities. As a result of findings from these audits and examinations, regulators have, are, and may in the future require us to take certain actions, including amending, updating, or revising our compliance measures from time to time, limiting the kinds of customers that we provide services to, changing, terminating, or delaying our licenses and the introduction of our existing or new product and services, and undertaking further external audit or being subject to further regulatory scrutiny, including investigations and inquiries. We have received, and may in the future receive, examination reports citing violations of rules and regulations, inadequacies in existing compliance programs, and requiring us to enhance certain practices with respect to our compliance program, including due diligence, monitoring, training, reporting, and recordkeeping. Implementing appropriate measures to properly remediate these examination findings may require us to incur significant costs, and if we fail to properly remediate any of these examination findings, we could face civil litigation, significant fines, damage awards, forced removal of certain employees including members of our executive team, barring of certain employees from participating in our business in whole or in part, revocation of existing licenses, limitations on existing and new products and services, reputational harm, negative impact to our existing relationships with regulators, exposure to criminal liability, or other regulatory consequences. Further, we believe increasingly strict legal and regulatory requirements and additional regulatory investigations and enforcement, any of which could occur or intensify, may continue to result in changes to our business, as well as increased costs, and supervision and examination for ourselves, our agents, and service providers. For example, in June 2023, the SEC filed a complaint in the U.S. District Court for the Southern District of New York against us and Coinbase, Inc. alleging that (i) Coinbase, Inc. has acted as an unregistered securities exchange, broker, and clearing agency in violation of Sections 5, 15(a) and 17A(b) of the Exchange Act and that, through its staking program, Coinbase, Inc. has offered and sold securities without registering its offers and sales in

violation of Sections 5(a) and 5(c) of the Securities Act of 1933, as amended (the “Securities Act”), and (ii) we are liable for the alleged violations as an alleged control person of Coinbase, Inc. (the “June 2023 SEC Complaint”). Moreover, new laws, regulations, or interpretations may result in additional litigation, regulatory investigations, and enforcement or other actions, including preventing or delaying us from offering certain products or services offered by our competitors or could impact how we offer such products and services. Adverse changes to, or our failure to comply with, any laws and regulations have had, and may continue to have, an adverse effect on our reputation and brand and our business, operating results, and financial condition.

We operate in a highly competitive industry and we compete against unregulated or less regulated companies and companies with greater financial and other resources, and our business, operating results, and financial condition may be adversely affected if we are unable to respond to our competitors effectively.

The cryptoeconomy is highly innovative, rapidly evolving, and characterized by healthy competition, experimentation, changing customer needs, frequent introductions of new products and services, and subject to uncertain and evolving industry and regulatory requirements. We expect competition to further intensify in the future as existing and new competitors introduce new products or enhance existing products. We compete against a number of companies operating both within the United States and abroad, and both those that focus on traditional financial services and those that focus on crypto-based services. Our main competition falls into the following categories:

- traditional financial technology and brokerage firms that have entered the crypto asset market in recent years and offer overlapping features targeted at our customers;
- companies focused on the crypto asset market, some of whom adhere to local regulations and directly compete with our platform, and others who choose to operate outside of local rules and regulations or in jurisdictions with less stringent local rules and regulations and are potentially able to more quickly adapt to trends, support a greater number of crypto assets, and develop new crypto-based products and services due to a different standard of regulatory scrutiny;
- crypto-focused companies and traditional financial incumbents that offer point or siloed solutions specifically targeted at institutional customers; and
- stablecoins, other than USDC, and fiat currencies globally.

Historically, a major source of competition has been from companies, in particular those located outside the United States, who at times are and may in the future be subject to significantly less stringent regulatory and compliance requirements in their local jurisdictions. Their business models rely on being unregulated or only regulated in a small number of lower compliance jurisdictions, whilst also offering their products in highly regulated jurisdictions, including the United States, without necessarily complying with the relevant regulatory requirements in such jurisdictions.

Given the uneven enforcement by United States and foreign regulators, many of these competitors have been able to operate from offshore while offering large numbers of products and services to consumers, including in the United States, Europe, and other highly regulated jurisdictions, without complying with the relevant licensing and other requirements in these jurisdictions, and historically without penalty. Due to our regulated status in several jurisdictions and our commitment to legal and regulatory compliance, we have not been able to offer many popular products and services, including products and services that our unregulated or less regulated competitors are able to offer to a group that includes many of our customers, which may adversely impact our business, financial condition, and results of operations.

We also have expended significant managerial, operational, and compliance costs to meet the legal and regulatory requirements applicable to us in the United States and other jurisdictions in which we operate, and expect to continue to incur significant costs to comply with these requirements, which these unregulated or less regulated competitors have not had to incur.

Additionally, due to the broad nature of our products and services, we also compete with, and expect additional competition from, digital and mobile payment companies and other traditional financial services companies.

Many innovative start-up companies and larger companies have made, and continue to make, significant investments in research and development, and we expect these companies to continue to develop similar or superior products and technologies that compete with our products. Further, more traditional financial and non-financial services businesses may choose to offer crypto-based services in the future as the industry gains adoption. Our current and potential competitors may establish cooperative relationships among themselves or with third parties that may further enhance their resources.

Our existing competitors have, and our potential competitors are expected to have, various competitive advantages over us, such as:

- the ability to trade crypto assets and offer products and services that we do not support or offer on our platform (due to constraints from regulatory authorities, our banking partners, and other factors) such as tokens that constitute securities or derivative instruments under U.S. or foreign laws;
- greater name recognition, longer operating histories, larger customer bases, and larger market shares;
- larger sales and marketing budgets and organizations;
- more established marketing, banking, and compliance relationships;
- greater customer support resources;
- greater resources to make acquisitions;
- lower labor, compliance, risk mitigation, and research and development costs;
- larger and more mature intellectual property portfolios;
- greater number of applicable licenses or similar authorizations;
- established core business models outside of the trading of crypto assets, allowing them to operate on lesser margins or at a loss;
- operations in certain jurisdictions with lower compliance costs and greater flexibility to explore new product offerings; and
- substantially greater financial, technical, and other resources.

If we are unable to compete successfully, or if competing successfully requires us to take costly actions in response to the actions of our competitors, our business, operating results, and financial condition could be adversely affected.

We compete against a growing number of decentralized and noncustodial platforms and our business may be adversely affected if we fail to compete effectively against them.

We also compete against an increasing number of decentralized and noncustodial platforms. On these platforms, users can interact directly with a market-making smart contract or onchain trading mechanism to exchange one type of crypto asset for another without any centralized intermediary. These platforms are typically not as easy to use as our platform, and some lack the speed and liquidity of centralized platforms, but various innovative models and incentives have been designed to bridge the gap. In addition, such platforms have low startup and entry costs as market entrants often remain unregulated and have minimal operating and regulatory costs. A significant number of decentralized

platforms have recently been developed and released, including on Ethereum, Tron, Polkadot, and Solana, and many such platforms have experienced significant growth and adoption. For instance, we have seen increased interest in certain decentralized platforms with transaction volumes rivaling our own platform on multiple occasions, and expect interest in decentralized and noncustodial platforms to grow further as the industry develops. If the demand for decentralized platforms grows and we are unable to compete with these decentralized and noncustodial platforms, our business may be adversely affected.

As we continue to expand and localize our international activities, our obligations to comply with the laws, rules, regulations, and policies of a variety of jurisdictions will increase and we may be subject to inquiries, investigations, and enforcement actions by U.S. and non-U.S. regulators and governmental authorities, including those related to sanctions, export control, and anti-money laundering.

As we expand and localize our international activities, we have become increasingly obligated to comply with the laws, rules, regulations, policies, and legal interpretations of both the jurisdictions in which we operate and those into which we offer services on a cross-border basis. For instance, financial regulators outside the United States have increased their scrutiny of crypto asset exchanges over time, such as by requiring crypto asset exchanges operating in their local jurisdictions to be regulated and licensed under local laws. Moreover, laws regulating financial services, the internet, mobile technologies, crypto, and related technologies outside of the United States are highly evolving, extensive and often impose different, more specific, or even conflicting obligations on us, as well as broader liability. In addition, we are required to comply with laws and regulations related to economic sanctions and export controls enforced by the U.S. Department of the Treasury's Office of Foreign Assets Control ("OFAC"), the U.S. Department of Commerce's Bureau of Industry and Security, and U.S. anti-money laundering and counter-terrorist financing laws and regulations, enforced by FinCEN and certain state financial services regulators. U.S. sanctions and export control laws and regulations generally restrict dealings by persons subject to U.S. jurisdiction with certain jurisdictions that are the target of comprehensive embargoes, currently the Crimea Region, the Donetsk People's Republic, and the Luhansk People's Republic of Ukraine, Cuba, Iran, North Korea, and Syria, as well as with persons, entities, and governments identified on certain prohibited party lists. Moreover, as a result of the Russian invasion of Ukraine, the United States, the E.U., the United Kingdom, and other jurisdictions have imposed wide-ranging sanctions on Russia and Belarus and persons and entities associated with Russia and Belarus. There can be no certainty regarding whether such governments or other governments will impose additional sanctions, or other economic or military measures against Russia or Belarus. We have continued to engage in activity in Russia and Belarus and with customers associated with these countries. At the same time, we have implemented additional processes and procedures to comply with these new sanctions. However, our activity in Russia and Belarus and with these customers associated with these countries subjects us to further exposure to sanctions as they are released. We have an OFAC compliance program in place that includes monitoring of IP addresses to identify prohibited jurisdictions and of blockchain addresses that have either been identified by OFAC as prohibited or that otherwise are believed by us to be associated with prohibited persons or jurisdictions. Nonetheless, there can be no guarantee that our compliance program will prevent transactions with particular persons or addresses or prevent every potential violation of OFAC sanctions. From time to time, we have submitted voluntary disclosures to OFAC or responded to administrative subpoenas from OFAC. Certain of these voluntary self-disclosures are currently under review by OFAC. To date, none of those proceedings has resulted in a monetary penalty or finding of violation. Any present or future government inquiries relating to sanctions could result in negative consequences for us, including costs related to government investigations, financial penalties, and harm to our reputation. The impact on us related to such matters could be substantial. Although we have implemented controls, and are working to implement additional controls and screening tools designed to prevent sanctions violations, there is no guarantee that we will not inadvertently provide access to our products and services to sanctioned parties or jurisdictions in the future.

Regulators worldwide frequently study each other's approaches to the regulation of the cryptoeconomy. Consequently, developments in any jurisdiction may influence other jurisdictions. New

developments in one jurisdiction may be extended to additional services and other jurisdictions. As a result, the risks created by any new law or regulation in one jurisdiction are magnified by the potential that they may be replicated, affecting our business in another place or involving another service. Conversely, if regulations diverge worldwide, we may face difficulty adjusting our products, services, and other aspects of our business with the same effect. These risks are heightened as we face increased competitive pressure from other similarly situated businesses that engage in regulatory arbitrage to avoid the compliance costs associated with regulatory changes.

The complexity of U.S. federal and state and international regulatory and enforcement regimes, coupled with the global scope of our operations and the evolving global regulatory environment, could result in a single event prompting a large number of overlapping investigations and legal and regulatory proceedings by multiple government authorities in different jurisdictions. Any of the foregoing could, individually or in the aggregate, harm our reputation, damage our brand and business, and adversely affect our operating results and financial condition. Due to the uncertain application of existing laws and regulations, it may be that, despite our regulatory and legal analysis concluding that certain products and services are currently unregulated, such products or services may indeed be subject to financial regulation, licensing, or authorization obligations that we have not obtained or with which we have not complied. As a result, we are at a heightened risk of enforcement action, litigation, regulatory, and legal scrutiny which could lead to sanctions, cease and desist orders, or other penalties and censures which could significantly and adversely affect our continued operations and financial condition.

We are, and may continue to be, subject to material litigation, including individual and class action lawsuits, as well as investigations and enforcement actions by regulators and governmental authorities. These matters are often expensive and time consuming, and, if resolved adversely, could harm our business, financial condition, and operating results.

We have been, currently are, and may from time to time become subject to claims, arbitrations, individual and class action lawsuits with respect to a variety of matters, including employment, consumer protection, advertising, and securities. In addition, we have been, currently are, and may from time to time become subject to, government and regulatory investigations, inquiries, actions or requests, other proceedings and enforcement actions alleging violations of laws, rules, and regulations, both foreign and domestic. For example, in January 2023, we settled a NYDFS compliance investigation for a monetary penalty of \$50.0 million and a separate commitment to make \$50.0 million in compliance program investments by the end of 2024. In June 2023, the SEC filed the June 2023 SEC Complaint, in connection with which the SEC is seeking, among other relief, injunctive relief, disgorgement, and civil money penalties, and we and Coinbase, Inc. subsequently filed an answer to the June 2023 SEC Complaint. In August 2023, we and Coinbase, Inc. also filed a motion for judgment on the pleadings. In October 2023, the SEC filed its response and we and Coinbase, Inc. filed our reply. Oral argument took place on January 17, 2024. The impact of the litigation relating to the June 2023 SEC Complaint, including the costs, timing, results and other potential consequences thereof, are unknown at this time. An adverse resolution of the June 2023 SEC Complaint could have a material impact on our business, operating results and financial condition. Additionally, we are currently subject to securities class actions and shareholder derivative actions. Furthermore, in June 2023, we and Coinbase, Inc. were issued notices, show-cause orders, and cease-and-desist letters, and became the subject of various legal actions initiated by U.S. state securities regulators in the states of Alabama, California, Illinois, Kentucky, Maryland, New Jersey, South Carolina, Vermont, Washington and Wisconsin alleging violations of state securities laws with respect to staking services provided by Coinbase, Inc. (the “State Staking Actions”). In July 2023, we and Coinbase, Inc. entered into agreements with state securities regulators in California, New Jersey, South Carolina and Wisconsin, pursuant to which customers in those states will no longer be able to stake new funds, in each case pending final adjudication of the matters. In October 2023, we and Coinbase, Inc. entered into a similar agreement with the Maryland state securities regulator. For a description of certain such litigation, regulatory investigations, and other proceedings, see *Note 22. Commitments and Contingencies*, of the Notes to our consolidated financial statements included in Part II, Item 8 of this Annual Report on Form 10-K. The scope, determination, and impact of claims, lawsuits,

government and regulatory investigations, enforcement actions, disputes, and proceedings to which we are subject cannot be predicted with certainty, and may result in:

- substantial payments to satisfy judgments, fines, or penalties;
- substantial outside counsel, advisor, and consultant fees and costs;
- substantial administrative costs, including arbitration fees;
- additional compliance and licensure requirements;
- loss or non-renewal of existing licenses or authorizations, or prohibition from or delays in obtaining additional licenses or authorizations, required for our business;
- loss of productivity and high demands on employee time;
- criminal sanctions or consent decrees;
- termination of certain employees, including members of our executive team;
- barring of certain employees from participating in our business in whole or in part;
- orders that restrict our business or prevent us from offering certain products or services;
- changes to our business model and practices;
- delays to planned transactions, product launches or improvements; and
- damage to our brand and reputation.

Because of our large customer base, actions against us may claim large monetary damages, even if the alleged per-customer harm is small or non-existent. From time to time, we receive letters alleging claims on behalf of our users. Due to our large customer base, the ongoing defense and resolution or settlement of these alleged claims could be material and we may incur significant expenses associated with arbitrating or litigating the claims. Moreover, to the extent that a deterioration of the crypto asset market occurs for a prolonged period, large platforms like us may become subject to or the target of increased litigation and additional government and regulatory scrutiny. Regardless of the outcome, any such matters can have an adverse impact, which may be material, on our business, operating results, or financial condition because of legal costs, diversion of management resources, reputational damage, and other factors.

If we cannot keep pace with rapid industry changes to provide new and innovative products and services, the use of our products and services, and consequently our net revenue, could decline, which could adversely impact our business, operating results, and financial condition.

Our industry has been characterized by many rapid, significant, and disruptive products and services in recent years. These include decentralized applications, DeFi, yield farming, non-fungible tokens (“NFTs”), play-to-earn games, lending, staking, token wrapping, governance tokens, innovative programs to attract customers such as transaction fee mining programs, initiatives to attract traders such as trading competitions, airdrops and giveaways, staking reward programs, “layer 2” blockchain networks, and novel cryptocurrency fundraising and distribution schemes, such as “initial exchange offerings.” We expect new services and technologies to continue to emerge and evolve, which may be superior to, or render obsolete, the products and services that we currently provide. For example, disruptive technologies such as generative AI may fundamentally alter the use of our products or services in unpredictable ways. We cannot predict the effects of new services and technologies on our business. However, our ability to grow our customer base and net revenue will depend heavily on our ability to innovate and create successful new products and services, both independently and in conjunction with third-party developers. In particular, developing and incorporating new products and services into our business may require

substantial expenditures, take considerable time, and ultimately may not be successful. Any new products or services could fail to attract customers, generate revenue, or perform or integrate well with third-party applications and platforms. In addition, our ability to adapt and compete with new products and services may be inhibited by regulatory requirements and general uncertainty in the law, constraints by our banking partners and payment processors, third-party intellectual property rights, or other factors. Moreover, we must continue to enhance our technical infrastructure and other technology offerings to remain competitive and maintain a platform that has the required functionality, performance, capacity, security, and speed to attract and retain customers, including large, institutional, high-frequency and high-volume traders. As a result, we expect to incur significant costs and expenses to develop and upgrade our technical infrastructure to meet the evolving needs of the industry. Our success will depend on our ability to develop and incorporate new offerings and adapt to technological changes and evolving industry practices. If we are unable to do so in a timely or cost-effective manner, our business and our ability to successfully compete, to retain existing customers, and to attract new customers may be adversely affected.

A particular crypto asset, product or service’s status as a “security” in any relevant jurisdiction is subject to a high degree of uncertainty and if we are unable to properly characterize a crypto asset or product offering, we may be subject to regulatory scrutiny, inquiries, investigations, fines, and other penalties, which may adversely affect our business, operating results, and financial condition.

The SEC and its staff have taken the position that a range of crypto assets, products and services fall within the definition of a “security” under the U.S. federal securities laws. Despite the SEC being the principal federal securities law regulator in the United States, whether or not an asset, product or service is a security or constitutes a securities offering under federal securities laws is ultimately determined by a federal court. The legal test for determining whether any given crypto asset, product or service is a security was set forth in the 1946 Supreme Court case *SEC v. W.J. Howey Co.* and requires a highly complex, fact-driven analysis. Accordingly, whether any given crypto asset, product or service would be ultimately deemed to be a security is uncertain and difficult to predict notwithstanding the conclusions of the SEC or any conclusions we may draw based on our risk-based assessment regarding the likelihood that a particular crypto asset, product or service could be deemed a “security” or “securities offering” under applicable laws. The SEC generally does not provide advance guidance or confirmation on its assessment of the status of any particular crypto asset, product or service as a security. Furthermore, the SEC’s views in this area have evolved over time, and, at times, have appeared contradictory. It is also possible that a change in the governing administration or the appointment of new SEC commissioners could substantially impact the approach to enforcement by the SEC and its staff.

The SEC’s Strategic Hub for Innovation and Financial Technology published a framework for analyzing whether any given crypto asset is a security in April 2019. The SEC has also recently brought enforcement actions and entered into settlements with numerous cryptoeconomy participants alleging that certain digital assets are securities, including the June 2023 Complaint. These statements, framework and enforcement actions are not rules or regulations of the SEC and are not binding on the SEC. There is currently no certainty under the SEC’s application of the applicable legal test as to whether particular crypto assets, products or services are not securities. Moreover, the SEC and the Commodities Futures Trading Commission (the “CFTC”) and their senior officials have, at times, taken conflicting positions in speeches and enforcement actions as to whether a particular crypto asset is a security or commodity.

Several foreign jurisdictions have taken a broad-based approach to classifying crypto assets, products and services as “securities,” while other foreign jurisdictions, such as Switzerland, Malta, and Singapore, have adopted a narrower approach. As a result, certain crypto assets, products or services may be deemed to be a “security” under the laws of some jurisdictions but not others. Various foreign jurisdictions may, in the future, adopt additional laws, regulations, or directives that affect the characterization of crypto assets, products or services as “securities.”

The classification of a crypto asset, product or service as a security under applicable law has wide-ranging implications for the regulatory obligations that flow from the offer, sale, trading, and clearing, as applicable, of such assets, products or services. For example, a crypto asset, product or service that is a security in the United States may generally only be offered or sold in the United States pursuant to a registration statement filed with the SEC or in an offering that qualifies for an exemption from registration. Persons that effect transactions in crypto assets, products or services that are securities in the United States may be subject to registration with the SEC as a “broker” or “dealer.” Platforms that bring together purchasers and sellers to trade crypto assets that are securities in the United States are generally subject to registration as national securities exchanges, or must qualify for an exemption, such as by being operated by a registered broker-dealer as an ATS in compliance with rules for ATSs. Persons facilitating clearing and settlement of securities may be subject to registration with the SEC as a clearing agency. Foreign jurisdictions may have similar licensing, registration, and qualification requirements.

We have policies and procedures to analyze whether each crypto asset that we seek to facilitate trading of on Coinbase Spot Market, as well as our products and services, could be deemed to be a “security” under applicable laws. Our policies and procedures do not constitute a legal standard, but rather represent our company-developed model, which we use to make a risk-based assessment regarding the likelihood that a particular crypto asset, product or service could be deemed a “security” under applicable laws.

Because Coinbase Spot Market, Coinbase Prime and Coinbase app are not registered or licensed with the SEC or foreign authorities as a broker-dealer, national securities exchange, or ATS (or foreign equivalents), we only permit trading of those crypto assets, and offer products and services, for which we determine there are reasonably strong arguments to conclude that the crypto asset, product or service is not a security. We believe that our process reflects a comprehensive and thoughtful analysis and is reasonably designed to facilitate consistent application of available legal guidance on crypto assets, products and services and to facilitate informed risk-based business judgment. In addition, as we shared in our petition for SEC rulemaking, we remain open to registering or relying on an exemption to facilitate and offer the sale of crypto asset securities. We recognize that the application of securities laws to the specific facts and circumstances of crypto assets, products and services may be complex and subject to change, and that a listing determination does not guarantee any conclusion under the U.S. federal securities laws. Regardless of our conclusions, we have been, and could in the future be, subject to legal or regulatory action in the event the SEC or a state or foreign regulatory authority were to assert, or a court were to determine, that a supported crypto asset, product or service offered, sold, or traded on our platform or a product or service that we offer is a “security” under applicable laws. There can be no assurance that we will properly characterize over time any given crypto asset, product or service offering as a security or non-security, or that the SEC, foreign regulatory authority, or a court having final determinative authority on the topic, if the question was presented to it, would agree with our assessment. We expect our risk assessment policies and procedures to continuously evolve to take into account case law, legislative developments, facts, and developments in technology. In June 2023, the SEC filed the June 2023 SEC Complaint. We and Coinbase, Inc. subsequently filed an answer to the June 2023 SEC Complaint in June 2023. In August 2023, we and Coinbase, Inc. also filed a motion for judgment on the pleadings. In October 2023, the SEC filed its response and we and Coinbase, Inc. filed our reply. Oral argument took place on January 17, 2024. Additionally, in June 2023, we and Coinbase, Inc. became the subject of the State Staking Actions.

If an applicable regulatory authority or a court, in either case having final determinative authority on the topic, were to determine that a supported crypto asset, product or service currently offered, sold, or traded on our platform is a security, we would not be able to offer such crypto asset for trading, or product or service on our platform, until we are able to do so in a compliant manner. A determination by the SEC, a state or foreign regulatory authority, or a court that an asset that we currently support for trading on our platform, or product or service that we offer on our platform, constitutes a security may result in us removing that crypto asset from or ceasing to offer that product or service on our platform, and may also result in us determining that it is advisable to remove assets from our platform, or to cease offering

products and services on our platform, that have similar characteristics to the asset, product or service that was alleged or determined to be a security. Alternatively, we may determine not to remove a particular crypto asset from Coinbase Spot Market or to continue to offer a product or service on our platform even if the SEC or another regulator alleges that the crypto asset, product or service is a security, pending a final judicial determination as to that crypto asset, product or service's proper characterization, and the fact that we waited for a final judicial determination would generally not preclude penalties or sanctions against us for our having previously made our platform available for trading that crypto asset or offering that product or service on our platform without registering as a national securities exchange or ATS or registering tokens that we may issue, such as our cbETH token or our staking services, with the SEC. As such, we could be subject to judicial or administrative sanctions for failing to offer or sell the crypto asset, product or service in compliance with the registration requirements, or for acting as a broker, dealer, or national securities exchange without appropriate registration, including in connection with the June 2023 SEC Complaint. Such an action could result in injunctions, cease and desist orders, as well as civil monetary penalties, fines, and disgorgement, criminal liability, and reputational harm. Customers that traded such supported crypto asset on our platform and suffered trading losses could also seek to rescind a transaction that we facilitated on the basis that it was conducted in violation of applicable law, which could subject us to significant liability. We may also be required to cease facilitating transactions in the supported crypto asset other than via our licensed subsidiaries, which could negatively impact our business, operating results, and financial condition. Additionally, the SEC has brought and may in the future bring enforcement actions against other cryptoeconomy participants and their product offerings and services that may cause us to modify or discontinue a product offering or service on our platform. If we were to modify or discontinue any product offering or service or remove any assets from trading on our platform for any reason, our decision may be unpopular with users, may reduce our ability to attract and retain customers (especially if similar products, services or such assets continue to be offered or traded on unregulated exchanges, which includes many of our competitors), and may adversely affect our business, operating results, and financial condition.

Further, if Bitcoin, Ethereum, stablecoins or any other supported crypto asset is deemed to be a security under any U.S. federal, state, or foreign jurisdiction, or in a proceeding in a court of law or otherwise, it may have adverse consequences for such supported crypto asset. For instance, all transactions in such supported crypto asset would have to be registered with the SEC or other foreign authority, or conducted in accordance with an exemption from registration, which could severely limit its liquidity, usability and transactability. Moreover, the networks on which such supported crypto assets are utilized may be required to be regulated as securities intermediaries, and subject to applicable rules, which could effectively render the network impracticable for its existing purposes. Further, it could draw negative publicity and a decline in the general acceptance of the crypto asset. Also, it may make it difficult for such supported crypto asset to be traded, cleared, and custodied as compared to other crypto assets that are not considered to be securities. Specifically, even if transactions in a crypto asset were registered with the SEC or conducted in accordance with an exemption from registration, the current intermediary-based framework for securities trading, clearance and settlement is not consistent with the operations of the crypto asset market. For example, under current SEC guidance, crypto asset securities cannot be held on behalf of customers by broker-dealers that also support custody of traditional securities; and the SEC has not permitted public permissionless blockchain-based clearance and settlement systems for securities.

We currently rely on third-party service providers for certain aspects of our operations, and any interruptions in services provided by these third parties may impair our ability to support our customers.

We rely on third parties in connection with many aspects of our business, including payment processors, banks, and payment gateways to process transactions; cloud computing services and data centers that provide facilities, infrastructure, smart contract development, website functionality and access, components, and services, including databases and data center facilities and cloud computing; as well as third parties that provide outsourced customer service, compliance support and product

development functions, which are critical to our operations. Because we rely on third parties to provide these services and to facilitate certain of our business activities, we face increased operational risks. We do not directly manage the operation of any of these third parties, including their data center facilities that we use. These third parties may be subject to financial, legal, regulatory, and labor issues, cybersecurity incidents, data theft or loss, break-ins, computer viruses or vulnerabilities in their code, denial-of-service attacks, sabotage, acts of vandalism, loss, disruption, or instability of third-party banking relationships, privacy breaches, service terminations, disruptions, interruptions, and other misconduct. They are also vulnerable to damage or interruption from human error, power loss, telecommunications failures, fires, floods, earthquakes, hurricanes, tornadoes, pandemics and similar events. For example, on February 24, 2021, the U.S. Federal Reserve's payments network experienced an outage, which had the potential to result in reduced functionality for certain of our products. In addition, these third parties may breach their agreements with us, disagree with our interpretation of contract terms or applicable laws and regulations, refuse to continue or renew these agreements on commercially reasonable terms or at all, fail or refuse to process transactions or provide other services adequately, take actions that degrade the functionality of our services, impose additional costs or requirements on us or our customers, or give preferential treatment to competitors. There can be no assurance that third parties that provide services to us or to our customers on our behalf will continue to do so on acceptable terms, or at all. If any third parties do not adequately or appropriately provide their services or perform their responsibilities to us or our customers on our behalf, such as if third-party service providers to close their data center facilities without adequate notice, are unable to restore operations and data, fail to perform as expected, or experience other unanticipated problems, we may be unable to procure alternatives in a timely and efficient manner and on acceptable terms, or at all, and we may be subject to business disruptions, losses or costs to remediate any of the deficiencies, customer dissatisfaction, reputational damage, legal or regulatory proceedings, or other adverse consequences which could harm our business.

Loss of a critical banking or insurance relationship could adversely impact our business, operating results, and financial condition.

We rely on bank relationships to provide our platform and custodial services. In particular, customer cash holdings on our platform are held with one or more of our multiple banking partners. As a registered money services business with FinCEN under the Bank Secrecy Act, as amended by the USA PATRIOT Act of 2001, and its implementing regulations enforced by FinCEN, or collectively, the BSA, a licensed money transmitter in a number of U.S. states and territories, a licensee under NYDFS's Virtual Currency Business Activity regime, commonly referred to as a BitLicense, a licensed electronic money institution under both the U.K. Financial Conduct Authority and the Central Bank of Ireland, and a limited purpose trust company chartered by the NYDFS, our banking partners view us as a higher risk customer for purposes of their anti-money laundering programs. We may face difficulty establishing or maintaining banking relationships due to instability in the global banking system, increasing regulatory uncertainty and scrutiny, or our banking partners' policies and some prior bank partners have terminated their relationship with us or have limited access to bank services. The loss of these banking partners or the imposition of operational restrictions by these banking partners and the inability for us to utilize other redundant financial institutions may result in a disruption of business activity as well as regulatory risks. In addition, as a result of the myriad of regulations, the risks of crypto assets generally, the adverse reputational impact of the 2022 Events on our industry, or in the event of an adverse outcome of the June 2023 SEC Complaint, financial institutions in the United States and globally may decide to not provide, or be prohibited from providing, account, custody, or other financial services to us or the cryptoeconomy generally. Further, we have existing redundancies in U.S. and global financial institutions that work with crypto companies with which we engage.

However, if these financial institutions are subject to bank resolution or failure, or limit or end their cryptomarket activity, or if banking relationships become severely limited or unavailable to cryptomarket participants in a certain country, there could be temporary delays in or unavailability of services in such country that are critical to our or our partners' operations, developers or customers, a further limit on available vendors, reduced quality in services we, our partners, our developers or our customers are able

to obtain, and a general disruption to the cryptoeconomy, potentially leading to reduced activity on our platform which may adversely impact our business, operating results, and financial condition. For example, while our business and operations have not been materially affected by the closures of Silvergate Capital Corp. and Signature Bank and the cessation of their real-time fiat currency payment networks in March 2023, large cryptoeconomy participants, including us and our institutional customers, experienced a temporary inability to transfer fiat currencies outside of standard business hours.

We also rely on insurance carriers to insure customer losses resulting from a breach of our physical security, cyber security, or by employee or third party theft and hold surety bonds as required for compliance with certain of our licenses under applicable state laws. Our ability to maintain crime, specie, and cyber insurance, as well as surety bonds, is subject to the insurance carriers' ongoing underwriting criteria and our inability to obtain and maintain appropriate insurance coverage could cause a substantial business disruption, adverse reputational impact, inability to compete with our competitors, and regulatory scrutiny.

Any significant disruption in our products and services, in our information technology systems, or in any of the blockchain networks we support, could result in a loss of customers or funds and adversely impact our brand and reputation and our business, operating results, and financial condition.

Our reputation and ability to attract and retain customers and grow our business depends on our ability to operate our service at high levels of reliability, scalability, and performance, including the ability to process and monitor, on a daily basis, a large number of transactions that occur at high volume and frequencies across multiple systems. For example, in March 2023, there was a temporary disruption to USDC services for several days following the news of Silicon Valley Bank's closure. Our platform, the ability of our customers to trade, and our ability to operate at a high level, are dependent on our ability to access the blockchain networks underlying the supported crypto assets, for which access is dependent on our systems' ability to access the internet. Further, the successful and continued operations of such blockchain networks will depend on a network of computers, miners, or validators, and their continued operations, all of which may be impacted by service interruptions.

Our systems, the systems of our third-party service providers and partners, and certain crypto asset and blockchain networks have experienced from time to time, and may experience in the future service interruptions or degradation because of hardware and software defects or malfunctions, distributed denial-of-service and other cyberattacks, insider threats, break-ins, sabotage, human error, vandalism, earthquakes, hurricanes, floods, fires, and other natural disasters, power losses, disruptions in telecommunications services, fraud, military or political conflicts, terrorist attacks, computer viruses or other malware, or other events. In addition, extraordinary Trading Volumes or site usage could cause our computer systems to operate at an unacceptably slow speed or even fail. Some of our systems, including systems of companies we have acquired, or the systems of our third-party service providers and partners are not fully redundant, and our or their disaster recovery planning may not be sufficient for all possible outcomes or events.

If any of our systems, or those of our third-party service providers, are disrupted for any reason, our products and services may fail, resulting in unanticipated disruptions, slower response times and delays in our customers' trade execution and processing, failed settlement of trades, incomplete or inaccurate accounting, recording or processing of trades, unauthorized trades, loss of customer information, increased demand on limited customer support resources, customer claims, complaints with regulatory organizations, lawsuits, or enforcement actions. Further, when these disruptions occur, we have in the past, and may in the future, fulfill customer transactions using inventory to prevent adverse user impact and limit detrimental impact to our operating results. A prolonged interruption in the availability or reduction in the availability, speed, or functionality of our products and services could harm our business. Significant or persistent interruptions in our services could cause current or potential customers or partners to believe that our systems are unreliable, leading them to switch to our competitors or to avoid or reduce the use of our products and services, and could permanently harm our reputation and brands.

Moreover, to the extent that any system failure or similar event results in damages to our customers or their business partners, these customers or partners could seek significant compensation or contractual penalties from us for their losses, and those claims, even if unsuccessful, would likely be time-consuming and costly for us to address. Problems with the reliability or security of our systems would harm our reputation and the cost of remedying these problems could negatively affect our business, operating results, and financial condition.

Because we are a regulated financial institution in certain jurisdictions, interruptions have resulted and in the future may result in regulatory scrutiny, and significant or persistent interruptions could lead to significant fines and penalties, and mandatory and costly changes to our business practices, and ultimately could cause us to lose existing licenses or banking relationships that we need to operate or prevent or delay us from obtaining additional licenses that may be required for our business.

In addition, we are continually improving and upgrading our information systems and technologies. Implementation of new systems and technologies is complex, expensive, time-consuming, and may not be successful. If we fail to timely and successfully implement new information systems and technologies, or improvements or upgrades to existing information systems and technologies, or if such systems and technologies do not operate as intended, it could have an adverse impact on our business, internal controls (including internal controls over financial reporting), operating results, and financial condition.

Our failure to safeguard and manage our and our customers' fiat currencies and crypto assets could adversely impact our business, operating results, and financial condition.

We hold cash and safeguard crypto assets on behalf of our customers and hold fiat and crypto for corporate investment and operating purposes. In addition, following the acquisition of Coinbase Asset Management, formerly One River Digital Asset Management ("CBAM"), we additionally safeguard, as defined by SAB 121, an immaterial amount of cryptocurrencies at third-party custodians for asset management products.

Safeguarding customers' cash and crypto assets is integral to the trust we build with our customers. We believe our policies, procedures, operational controls and controls over financial reporting, protect us from material risks surrounding the safeguarding of these assets and conflicts of interest. Our controls over financial reporting include among others, controls over the segregation of corporate crypto asset balances from customer crypto asset balances, controls over the processes of customer crypto asset deposits and customer crypto asset withdrawals and corporate and customer fiat balances. Our financial statements and disclosures, as a whole, are available through periodic filings on a quarterly basis, and compliant with annual audit requirements of Article 3 of Regulation S-X.

We hold cash at financial institutions in accounts designated as for the benefit of our customers. We have also entered into partnerships or joint ventures with third parties, such as with the issuer of USDC, where we or our partners receive and hold customer funds. Our and our financial partners' abilities to manage and accurately hold customer cash and cash we hold for our own investment and operating purposes requires a high level of internal controls. We are limited in our ability to influence or manage the controls and processes of third party partners or vendors and may be dependent on our partners' and vendors' operations, liquidity and financial condition to manage these risks. As we maintain, grow and expand our product and services offerings we also must scale and strengthen our internal controls and processes, and monitor our third party partners' and vendors' ability to similarly scale and strengthen. Failure to do so could adversely impact our business, operating results, and financial condition. This is important both to the actual controls and processes and the public perception of the same.

Any inability by us to maintain our safeguarding procedures, perceived or otherwise, could harm our business, operating results, and financial condition. Accordingly, we take steps to ensure customer cash is always secure. Customer cash and crypto asset balances are maintained through our internal ledgering processes. Customer cash is maintained in segregated Company bank accounts that are held for the exclusive benefit of customers with our financial institution banking partners or in government money

market funds. We safeguard crypto assets using proprietary technology and operational processes. Crypto assets are not insured or guaranteed by any government or government agency, however we have worked hard to safeguard our customers' crypto assets and our own crypto assets for investment and operational purposes with legal and operational protections.

Any material failure by us or our partners to maintain the necessary controls, policies, procedures or to manage the crypto assets we hold for our own investment and operating purposes could also adversely impact our business, operating results, and financial condition. Further, any material failure by us or our partners to maintain the necessary controls or to manage customer crypto assets and funds appropriately and in compliance with applicable regulatory requirements could result in reputational harm, litigation, regulatory enforcement actions, significant financial losses, lead customers to discontinue or reduce their use of our and our partners' products, and result in significant penalties and fines and additional restrictions, which could adversely impact our business, operating results, and financial condition. Moreover, because custodially held crypto assets may be considered to be the property of a bankruptcy estate, in the event of a bankruptcy, the crypto assets we hold in custody on behalf of our customers could be subject to bankruptcy proceedings and such customers could be treated as our general unsecured creditors. This may result in customers finding our custodial services more risky and less attractive and any failure to increase our customer base, discontinuation or reduction in use of our platform and products by existing customers as a result could adversely impact our business, operating results, and financial condition. Additionally, following the acquisition of CBAM, some of our asset management products hold customer assets at third-party custodians with their own bankruptcy protection procedures.

We place great importance on safeguarding crypto assets we custody and keeping them bankruptcy remote from our general creditors, and in June 2022 we updated our Retail User Agreement to clarify the applicability of UCC Article 8 to custodied crypto assets – the same legal protection that our institutional custody and prime broker clients also rely upon. UCC Article 8 provides that financial assets held by Coinbase are not property of Coinbase and not subject to the claims of its general creditors. In light of UCC Article 8, we believe that a court would not treat custodied crypto assets as part of our general estate; however, due to the novelty of crypto assets, courts have not yet considered this type of treatment for custodied crypto assets.

We deposit, transfer, and custody customer cash and crypto assets in multiple jurisdictions. In each instance, we require bank-level security encryption to safeguard customers' assets for our wallet and storage systems, as well as our financial management systems related to such custodial functions. Our security technology is designed to prevent, detect, and mitigate inappropriate access to our systems, by internal or external threats. We believe we have developed and maintained administrative, technical, and physical safeguards designed to comply with applicable legal requirements and industry standards. However, it is nevertheless possible that hackers, employees or service providers acting contrary to our policies, or others could circumvent these safeguards to improperly access our systems or documents, or the systems or documents of our business partners, agents, or service providers, and improperly access, obtain, or misuse customer crypto assets and funds. The methods used to obtain unauthorized access, disable, or degrade service or sabotage systems are also constantly changing and evolving and may be difficult to anticipate or detect for long periods of time. Certain of our customer contracts do not limit our liability with respect to security breaches and other security-related matters and our insurance coverage for such impropriety is limited and may not cover the extent of loss nor the nature of such loss, in which case we may be liable for the full amount of losses suffered, which could be greater than all of our assets. Our ability to maintain insurance is also subject to the insurance carriers' ongoing underwriting criteria. Any loss of customer cash or crypto assets could result in a subsequent lapse in insurance coverage, which could cause a substantial business disruption, adverse reputational impact, inability to compete with our competitors, and regulatory investigations, inquiries, or actions. Additionally, transactions undertaken through our websites or other electronic channels may create risks of fraud, hacking, unauthorized access or acquisition, and other deceptive practices. Any security incident resulting in a compromise of customer assets could result in substantial costs to us and require us to notify impacted

individuals, and in some cases regulators, of a possible or actual incident, expose us to regulatory enforcement actions, including substantial fines, limit our ability to provide services, subject us to litigation, significant financial losses, damage our reputation, and adversely affect our business, operating results, financial condition, and cash flows.

The theft, loss, or destruction of private keys required to access any crypto assets held in custody for our own account or for our customers may be irreversible. If we are unable to access our private keys or if we experience a hack or other data loss relating to our ability to access any crypto assets, it could cause regulatory scrutiny, reputational harm, and other losses.

Crypto assets are generally controllable only by the possessor of the unique private key relating to the digital wallet in which the crypto assets are held. While blockchain protocols typically require public addresses to be published when used in a transaction, private keys must be safeguarded and kept private in order to prevent a third party from accessing the crypto assets held in such a wallet. To the extent that any of the private keys relating to our wallets containing crypto assets held for our own account or for our customers is lost, destroyed, or otherwise compromised or unavailable, and no backup of the private key is accessible, we will be unable to access the crypto assets held in the related wallet. Further, we cannot provide assurance that our wallets will not be hacked or compromised. Crypto assets and blockchain technologies have been, and may in the future be, subject to security breaches, hacking, or other malicious activities. Any loss of private keys relating to, or hack or other compromise of, digital wallets used to store our customers' crypto assets could adversely affect our customers' ability to access or sell their crypto assets, require us to reimburse our customers for their losses, and subject us to significant financial losses in addition to losing customer trust in us and our products. As such, any loss of private keys due to a hack, employee or service provider misconduct or error, or other compromise by third parties could hurt our brand and reputation, result in significant losses, and adversely impact our business. The total value of crypto assets in our possession and control is significantly greater than the total value of insurance coverage that would compensate us in the event of theft or other loss of funds, which could cause our business, operating results, and financial condition to be adversely impacted in the event of such uninsured loss.

Other Risks Related to Our Business and Financial Position

If we fail to retain existing customers or add new customers, or if our customers decrease their level of engagement with our products, services and platform, our business, operating results, and financial condition may be significantly harmed.

Our success depends on our ability to retain existing customers and attract new customers, including developers, to increase engagement with our products, services, and platform. To do so, we must continue to offer leading technologies and ensure that our products and services are secure, reliable, and engaging. We must also expand our products and services, and offer competitive prices in an increasingly crowded and price-sensitive market. There is no assurance that we will be able to continue to do so, that we will be able to retain our current customers or attract new customers, or keep our customers engaged. Any number of factors can negatively affect customer retention, growth, and engagement, including if:

- customers increasingly engage with competing products and services, including products and services that we are unable to offer due to regulatory reasons;
- we fail to introduce new and improved products and services, or if we introduce new products or services that are not favorably received;
- we fail to support new and in-demand crypto assets or if we elect to support crypto assets with negative reputations;
- there are changes in sentiment about the quality or usefulness of our products and services or concerns related to privacy, security, fiat pegging or other factors;

- there are adverse changes in our products and services that are mandated by legislation, regulatory authorities, or litigation;
- customers perceive the crypto assets on our platform to be bad investments, or experience significant losses in investments made on our platform;
- technical or other problems prevent us from delivering our products and services with the speed, functionality, security, and reliability that our customers expect;
- cybersecurity incidents, employee or service provider misconduct, or other unforeseen activities cause losses to us or our customers, including losses to assets held by us on behalf of our customers;
- modifications to our pricing model or modifications by competitors to their pricing models;
- we fail to provide adequate customer service;
- regulatory and governmental bodies in countries that we target for expansion express negative views towards crypto asset trading platforms and, more broadly, the cryptoeconomy; or
- we or other companies or high-profile figures in our industry are the subject of adverse media reports or other negative publicity.

From time to time, certain of these factors have negatively affected customer retention, growth, and engagement to varying degrees. If we are unable to maintain or increase our customer base and customer engagement, our revenue and financial results may be adversely affected. Any decrease in user retention, growth, or engagement could render our products and services less attractive to customers, which may have an adverse impact on our revenue, business, operating results, and financial condition. If our customer growth rate slows or declines, we will become increasingly dependent on our ability to maintain or increase levels of user engagement and monetization in order to drive growth of revenue.

Our operating expenses may increase in the future and we may not be able to achieve profitability or positive cash flow from operations on a consistent basis, which may cause our business, operating results, and financial condition to be adversely impacted.

Our operating expenses may increase in the future as we continue to attract and retain talent, expand our sales and marketing efforts, develop additional products and services, expand our international business, incur unforeseen regulatory or compliance expenses, and in connection with certain expenses related to operating as a public company. While we consistently evaluate opportunities to drive efficiency, we cannot guarantee that these efforts will be successful or that we will not re-accelerate operating expenditures in the future. Our operations may prove more expensive than we currently anticipate, and we may not succeed in increasing our net revenue sufficiently to offset these higher expenses. Our revenue growth may be further impacted by reduced demand for our offerings, increased competition, adverse macroeconomic conditions, a decrease in the growth or size of the cryptoeconomy, regulatory uncertainty or scrutiny, or changes that impact our ability to offer certain products or services, any failure to capitalize on growth opportunities, or failure of new products and services we develop to gain traction in the market. We cannot be certain that we will be able to achieve profitability or achieve positive operating cash flow on any quarterly or annual basis. If we are unable to effectively manage these risks and difficulties as we encounter them, our business, operating results, and financial condition may suffer.

If we do not effectively scale our business, or are unable to maintain and improve our systems and processes, our operating results could be adversely affected.

We have experienced a period of significant growth in recent years, both in terms of employee headcount and customer growth, followed by the scaling back of our business in response to changing economic conditions. As our business changes, it becomes increasingly complex. To effectively manage and capitalize on our growth periods, we need to manage headcount, capital and processes efficiently

while making investments such as expanding our information technology and financial, operating, and administrative systems and controls. Growth and scaling back initiatives could strain our existing resources, and we could experience ongoing operating difficulties in managing our business as it expands across numerous jurisdictions, including difficulties in hiring, training, managing and retaining a remote and evolving employee base. If we do not adapt or scale to meet these evolving challenges, we may experience erosion to our brand, the quality of our products and services may suffer, and our company culture may be harmed. Moreover, the failure of our systems and processes could undermine our ability to provide accurate, timely, and reliable reports on our financial and operating results, including the financial statements provided herein, and could impact the effectiveness of our internal controls over financial reporting. In addition, our systems and processes may not prevent or detect all errors, omissions, or fraud. Any of the foregoing operational failures could lead to noncompliance with laws, loss of operating licenses or other authorizations, or loss of bank relationships that could substantially impair or even suspend company operations.

Successful implementation of our growth strategy will also require significant expenditures before any substantial associated revenue is generated and we cannot guarantee that these increased investments will result in corresponding and offsetting revenue growth. Because we have a limited history operating our business at its current scale, it is difficult to evaluate our current business and future prospects, including our ability to plan for and model future growth. Our limited operating experience at this scale, combined with the rapidly evolving nature of the crypto asset market in which we operate, substantial uncertainty concerning how these markets may develop, and other economic factors beyond our control, reduces our ability to accurately forecast quarterly or annual revenue.

Additionally, from time to time, we realign our resources and talent to implement stage-appropriate business strategies, including furloughs, layoffs and reductions in force. For example, in June 2022 and in January 2023, in response to rapidly changing economic conditions and in an effort to reduce our operational costs and improve our organizational efficiency, we reduced our workforce. If there are unforeseen expenses associated with such realignments in our business strategies, and we incur unanticipated charges or liabilities, then we may not be able to effectively realize the expected cost savings or other benefits of such actions. Failure to manage any growth or any scaling back of our operations could have an adverse effect on our business, operating results, and financial condition.

Our strategy and focus on delivering high-quality, compliant, easy-to-use, and secure crypto-related financial services may not maximize short-term or medium-term financial results.

We have taken, and expect to continue to take, actions that we believe are in the best interests of our customers and the long-term interests of our business, even if those actions do not necessarily maximize short-term or medium-term results. These include expending significant managerial, technical, and legal efforts on complying with laws and regulations that are applicable to our products and services and ensuring that our products are secure. We also focus on driving long-term engagement with our customers through innovation and developing new industry-leading products and technologies. These decisions may not be consistent with the short-term and medium-term expectations of our stockholders and may not produce the long-term benefits that we expect, which could have an adverse effect on our business, operating results, and financial condition.

A significant amount of the Trading Volume on our platform is derived from a relatively small number of customers, and the loss of these customers, or a reduction in their Trading Volume, could have an adverse effect on our business, operating results, and financial condition.

A relatively small number of institutional market makers and high-transaction volume consumer customers account for a significant amount of the Trading Volume on our platform and our net revenue. We expect significant Trading Volume and net revenue attributable to these customers for the foreseeable future. As a result, a loss of these customers, or a reduction in their Trading Volume, and our inability to replace these customers with other customers, could have an adverse effect on our business, operating results, and financial condition.

Due to our limited operating history, it may be difficult to evaluate our business and future prospects, and we may not be able to achieve or maintain profitability in any given period.

We began our operations in 2012 and since then our business model has continued to evolve. Our net revenue has significantly grown since our formation, but there is no assurance that growth will continue in future periods and you should not rely on the net revenue growth of any given prior quarterly or annual period as an indication of our future performance. For example, while we generated \$7.4 billion in total net revenue for the year ended December 31, 2021, our total net revenue for the years ended December 31, 2023 and 2022 declined to \$2.9 billion and \$3.1 billion, respectively, primarily due to declining crypto prices, lower crypto asset volatility, and uncertainty in the cryptoeconomy following the 2022 Events. If our total net revenue were to further decline significantly for an extended period of time, our business, operating results and financial condition could be adversely affected. Our limited operating history and the volatile nature of our business make it difficult to evaluate our current business and our future prospects. We have encountered and will continue to encounter risks and difficulties as described in this section. If we do not manage these risks successfully, our business may be adversely impacted. If our revenue growth rate were to decline significantly or become negative, it could adversely affect our operating results and financial condition. If we are not able to achieve or maintain positive cash flow from operations, our business may be adversely impacted and we may require additional financing, which may not be available on favorable terms or at all, or which would be dilutive to our stockholders.

Because our long-term success depends, in part, on our ability to expand our sales to customers outside the United States, our business is susceptible to risks associated with international operations.

We currently have subsidiaries in the United States and abroad. We plan to enter into or increase our presence in additional markets around the world. We have a limited operating history outside the United States, and our ability to manage our business and conduct our operations internationally requires considerable management attention and resources and is subject to particular challenges of supporting a growing business in an environment of diverse cultures, languages, customs, tax laws, legal systems, alternate dispute systems, and regulatory systems. As we continue to expand our business and customer base outside the United States, we will be increasingly susceptible to risks associated with international operations. These risks and challenges include:

- difficulty establishing and managing international operations and the increased operations, travel, infrastructure, including establishment of local customer service operations, local infrastructure to manage supported cryptocurrency or other financial instruments and corresponding books and records, and legal and regulatory compliance costs associated with different jurisdictions;
- the need to vary pricing and margins to effectively compete in international markets;
- the need to adapt and localize our products and services for specific countries, including offering services and support in local languages;
- compliance with multiple, potentially conflicting and changing governmental laws and regulations across different jurisdictions;
- compliance with U.S. and foreign laws designed to combat money laundering and the financing of terrorist activities, as well as economic and trade sanctions;
- the need to comply with a greater set of law enforcement inquiries including those subject to mutual legal assistance treaties;
- compliance with the extraterritorial reach of any U.S. regulatory rules, including those imposed by the CFTC, SEC, FinCEN or other U.S. based regulators;
- difficulties obtaining and maintaining required licensing from regulators in foreign jurisdictions;

- competition with companies that have greater experience in the local markets, pre-existing relationships with customers in these markets or are subject to less regulatory requirements in local jurisdictions;
- varying levels of payments and blockchain technology adoption and infrastructure, and increased network, payment processing, banking, and other costs;
- compliance with anti-bribery laws, including compliance with the Foreign Corrupt Practices Act, the U.K. Bribery Act 2010, and other local anticorruption laws;
- difficulties collecting in foreign currencies and associated foreign currency exposure;
- difficulties holding, repatriating, and transferring funds held in offshore bank accounts;
- difficulties adapting to foreign customary commercial practices, enforcing contracts and collecting accounts receivable, longer payment cycles and other collection difficulties;
- restrictions on crypto asset trading;
- stringent local labor laws and regulations;
- potentially adverse tax developments and consequences;
- antitrust and competition regulations; and
- regional economic and political conditions.

We have limited experience with international regulatory environments and market practices and may not be able to penetrate or successfully operate in the markets we choose to enter. In addition, we may incur significant expenses as a result of our international expansion, and we may not be successful. We may face limited brand recognition in certain parts of the world that could lead to non-acceptance or delayed acceptance of our products and services by customers in new markets. We may also face challenges in complying with local laws and regulations. For example, we may be subject to regulatory frameworks that are evolving, have not undergone extensive rulemaking, and could result in uncertain outcomes for our customers and/or our ability to offer competitive products in the broader cryptoeconomy. Our failure to successfully manage these risks could harm our international operations and have an adverse effect on our business, operating results, and financial condition.

Disputes with our customers could adversely impact our brand and reputation and our business, operating results, and financial condition.

From time to time we have been, and may in the future be, subject to claims and disputes with our customers with respect to our products and services, such as regarding the execution and settlement of crypto asset trades, fraudulent or unauthorized transactions, account takeovers, deposits and withdrawals of crypto assets, failures or malfunctions of our systems and services, or other issues relating to our products services. For example, during periods of heavy Trading Volumes, we have received increased customer complaints. Additionally, the ingenuity of criminal fraudsters, combined with many consumer users' susceptibility to fraud, may cause our customers to be subject to ongoing account takeovers and identity fraud issues. While we have taken measures to detect and reduce the risk of fraud, there is no guarantee that they will be successful and, in any case, require continuous improvement and optimization for continually evolving forms of fraud to be effective. There can be no guarantee that we will be successful in detecting and resolving these disputes or defending ourselves in any of these matters, and any failure may result in impaired relationships with our customers, damage to our brand and reputation, and substantial fines and damages. In some cases, the measures we have implemented to detect and deter fraud have led to poor customer experiences, including indefinite account inaccessibility for some of our customers, which increases our customer support costs and can compound damages. We could incur significant costs in compensating our customers, such as if a transaction was unauthorized, erroneous, or

fraudulent. We could also incur significant legal expenses resolving and defending claims, even those without merit. To the extent we are found to have failed to fulfill our regulatory obligations, we could also lose our authorizations or licenses or become subject to conditions that could make future operations more costly, impair our ability to grow, and adversely impact our operating results. We currently are, and may in the future become, subject to investigation and enforcement action by state, federal, and international consumer protection agencies, including the Consumer Financial Protection Bureau (the “CFPB”), the Federal Trade Commission (the “FTC”), state attorneys general in the United States, the U.K. Financial Conduct Authority, the U.K. Financial Ombudsman Service, and the U.K. Office of Fair Trading, each of which monitors customer complaints against us and, from time to time, escalates matters for investigation and potential enforcement against us.

While certain of our customer agreements contain arbitration provisions with class action waiver provisions that may limit our exposure to consumer class action litigation, some federal, state, and foreign courts have refused or may refuse to enforce one or more of these provisions, and there can be no assurance that we will be successful in enforcing these arbitration provisions, including the class action waiver provisions, in the future or in any given case. Legislative, administrative, or regulatory developments may directly or indirectly prohibit or limit the use of pre-dispute arbitration clauses and class action waiver provisions. Any such prohibitions or limitations on or discontinuation of the use of such arbitration or class action waiver provisions could subject us to additional lawsuits, including additional consumer class action litigation, and significantly limit our ability to avoid exposure from consumer class action litigation.

We may suffer losses due to staking, delegating, and other related services we provide to our customers.

Certain supported crypto assets enable holders to earn rewards by participating in decentralized governance, bookkeeping and transaction confirmation activities on their underlying blockchain networks, such as through staking activities, including staking through validation, delegating, and baking. We currently provide and expect to continue to provide such services for certain supported crypto assets to our customers in order to enable them to earn rewards based on crypto assets that we hold on their behalf. For instance, as a service to customers, we operate staking nodes on certain blockchain networks utilizing customers’ crypto assets and pass through the rewards received to those customers, less a service fee. In other cases, upon customers’ instructions, we may delegate our customers’ assets to third-party service providers that are unaffiliated with us. Some networks may further require customer assets to be transferred into smart contracts on the underlying blockchain networks not under our or anyone’s control. If our validator, any third-party service providers, or smart contracts fail to behave as expected, suffer cybersecurity attacks, experience security issues, or encounter other problems, our customers’ assets may be irretrievably lost. In addition, certain blockchain networks dictate requirements for participation in the relevant decentralized governance activity, and may impose penalties, or “slashing,” if the relevant activities are not performed correctly, such as if the staker, delegator, or baker acts maliciously on the network, “double signs” any transactions, or experience extended downtimes. If we or any of our service providers are slashed by the underlying blockchain network, our customers’ assets may be confiscated, withdrawn, or burnt by the network, resulting in losses for which we may be responsible. Furthermore, certain types of staking require the payment of transaction fees on the underlying blockchain network and such fees can become significant as the amount and complexity of the transaction grows, depending on the degree of network congestion and the price of the network token. If we experience a high volume of such staking requests from our customers on an ongoing basis, we could incur significant costs. Any penalties or slashing events could damage our brand and reputation, cause us to suffer financial losses, discourage existing and future customers from utilizing our products and services, and adversely impact our business.

We may not be able to generate sufficient cash to service our debt and other obligations, including our obligations under the 2026 Convertible Notes and Senior Notes.

Our ability to make payments on our indebtedness, including the 2026 Convertible Notes and Senior Notes, and our other obligations will depend on our financial and operating performance, which is subject to prevailing economic and competitive conditions and to certain financial, business and other factors beyond our control. We may be unable to attain a level of cash flows from operating activities sufficient to permit us to pay the principal, premium, if any, and interest on our indebtedness, including each series of the 2026 Convertible Notes and Senior Notes, and other obligations.

If we are unable to service our debt and other obligations from cash flows, we may need to refinance or restructure all or a portion of our debt obligations prior to maturity. Our ability to refinance or restructure our debt and other obligations will depend upon the condition of the capital markets and our financial condition at such time. Any refinancing or restructuring could be at higher interest rates and may require us to comply with more onerous covenants, which could further restrict our business operations. If our cash flows are insufficient to service our debt and other obligations, we may not be able to refinance or restructure any of these obligations on commercially reasonable terms or at all and any refinancing or restructuring could have a material adverse effect on our business, operating results, or financial condition. Statutory, contractual or other restrictions may also limit our subsidiaries' ability to pay dividends or make distributions, loans or advances to us. For these reasons, we may not have access to any assets or cash flows of our subsidiaries to make interest and principal payments on each series of the 2026 Convertible Notes and Senior Notes.

If our cash flows are insufficient to fund our debt and other obligations and we are unable to refinance or restructure these obligations, we could face substantial liquidity problems and may be forced to reduce or delay investments and capital expenditures, or to sell material assets or operations to meet our debt and other obligations. We cannot assure you that we would be able to implement any of these alternative measures on satisfactory terms or at all or that the proceeds from such alternatives would be adequate to meet any debt or other obligations when due. If it becomes necessary to implement any of these alternative measures, our business, operating results, or financial condition could be materially and adversely affected.

We have a substantial amount of indebtedness and other obligations, which could adversely affect our financial position and prevent us from fulfilling our obligations under the 2026 Convertible Notes and Senior Notes.

We have a substantial amount of indebtedness and other obligations. As of December 31, 2023, we had approximately \$3.01 billion in aggregate principal amount of outstanding long-term indebtedness (excluding crypto asset borrowings), which includes \$1.7 billion of our Senior Notes and \$1.27 billion of our 2026 Convertible Notes.

Our substantial indebtedness and other obligations may:

- make it difficult for us to satisfy our financial obligations, including making scheduled principal and interest payments on our 2026 Convertible Notes, Senior Notes, and our other obligations;
- limit our ability to use our cash flow for working capital, capital expenditures, acquisitions or other general business purposes;
- increase our cost of borrowing;
- require us to use a substantial portion of our cash flow from operations to make debt service payments and pay our other obligations when due;
- limit our flexibility to plan for, or react to, changes in our business and industry;
- place us at a competitive disadvantage compared to our less leveraged competitors; and

- increase our vulnerability to the impact of adverse economic and industry conditions, including changes in interest rates and foreign exchange rates.

We provide secured loans to our customers, which exposes us to credit risks and may cause us to incur financial or reputational harm.

We provide commercial loans to qualified customers secured by their crypto or fiat asset holdings on our platform, which exposes us to the risk of our borrowers' inability to repay such loans. In addition, such activity results in us being subject to certain lending laws and regulations in the applicable jurisdiction and as a result we may be subject to additional regulatory scrutiny. In the future we may enter into credit arrangements with financial institutions to obtain more capital. Any termination or interruption in the financial institutions' ability to lend to us could interrupt our ability to provide capital to qualified customers to the extent we rely on such credit lines to continue to offer or to grow such products. Further, our credit approval process, pricing, loss forecasting, and scoring models may contain errors or may not adequately assess creditworthiness of our borrowers, or may be otherwise ineffective, resulting in incorrect approvals or denials of loans. It is also possible that loan applicants could provide false or incorrect information. While we have procedures in place to manage our credit risk, such as conducting due diligence on our customers and running stress test simulations to monitor and manage exposures, including any exposures resulting from loans collateralized with crypto assets, we remain subject to risks associated with our borrowers' creditworthiness and our approval process. Such risks are heightened following the 2022 Events.

Borrower loan loss rates may be significantly affected by economic downturns or general economic conditions beyond our control and beyond the control of individual borrowers. In particular, loss rates on loans may increase due to factors such as prevailing market conditions in the cryptoeconomy, the price of Bitcoin and other crypto assets, which have experienced significant fluctuations, the amount of liquidity in the markets, and other factors. Borrowers may seek protection under federal bankruptcy law or similar laws. If a borrower of a loan files for bankruptcy (or becomes the subject of an involuntary petition), a stay may go into effect that will automatically put any pending collection actions on the loan on hold and prevent further collection action absent bankruptcy court approval. The efficacy of our security interest in customer collateral is not guaranteed under applicable state law or the Uniform Commercial Code and therefore we may be exposed to loss in the event of a customer default, even if we appear to be secured against such default. While we have not incurred any material losses to date, if any of the foregoing events were to occur, our reputation and relationships with borrowers, and our financial results, could be harmed. We intend to continue to explore other products, models, and structures for offering commercial financing, and other forms of credit and loan products. Some of those models or structures may require, or be deemed to require, additional data, procedures, partnerships, licenses, regulatory approvals, or capabilities that we have not yet obtained or developed.

We are exposed to transaction losses due to chargebacks, refunds or returns as a result of fraud or uncollectability that may adversely impact our business, operating results, and financial condition.

Certain of our products and services are paid for by electronic transfers from bank accounts, which exposes us to risks associated with returns and insufficient funds. Furthermore, some of our products and services are paid for by credit and debit cards through payment processors, which exposes us to risks associated with chargebacks and refunds. These risks could arise from fraud, misuse, unintentional use, settlement delay, insufficiency of funds, or other activities. Also, criminals are using increasingly sophisticated methods to engage in illegal activities, such as counterfeiting and fraud. If we are unable to collect such amounts from the customer, or if the customer refuses or is unable, due to bankruptcy or other reasons, to reimburse us, we bear the loss for the amount of the chargeback, refund, or return.

While we have policies and procedures to manage and mitigate these risks, we cannot be certain that such processes will be effective. Our failure to limit chargebacks and fraudulent transactions could increase the number of returns, refunds and chargebacks that we have to process. In addition, if the

number of returns, refunds and chargebacks increases, card networks or our banking partners could require us to increase reserves, impose penalties on us, charge additional or higher fees, or terminate their relationships with us. Failure to effectively manage risk and prevent fraud could increase our chargeback, refund, and return losses or cause us to incur other liabilities. Increases in chargebacks, refunds, returns, or other liabilities could have an adverse effect on our operating results, financial condition, and cash flows.

We route orders through third-party trading venues in connection with our Coinbase Prime trading service. The loss or failure of any such trading venues may adversely affect our business.

In connection with our Prime trading service, we routinely route customer orders to third-party exchanges or other trading venues. In connection with these activities, we generally hold cash and other crypto assets with such third-party exchanges or other trading venues in order to effect customer orders. If we were to experience a disruption in our access to these third-party exchanges and trading venues, our Prime trading service could be adversely affected to the extent that we are limited in our ability to execute order flow for our Prime customers. In addition, while we have policies and procedures to help mitigate our risks related to routing orders through third-party trading venues, if any of these third-party trading venues experience any technical, legal, regulatory or other adverse events, such as shutdowns, delays, system failures, suspension of withdrawals, illiquidity, insolvency, or loss of customer assets, we might not be able to fully recover the cash and other crypto assets that we have deposited with these third parties, and these risks may be heightened following the 2022 Events. For example, in connection with the 2022 Events, we were not able to recover an immaterial amount of cash deposited at FTX. As a result, our business, operating results and financial condition could be adversely affected.

We have historically had a highly active acquisition and investment strategy and, while we have been less active in acquisitions and investments due to current market conditions, we may from time to time make acquisitions and investments, which could require significant management attention, disrupt our business, result in dilution to our stockholders, and adversely affect our financial results.

As part of our business strategy, we have historically been highly active in acquiring and investing in order to, among other things, add specialized employees, complementary companies, products, services, licenses, or technologies. While in 2022 and 2023, we reduced our activity with respect to acquisitions and investments due to market conditions, we may still from time to time make further acquisitions and investments. As part of our business strategy, we continue to routinely conduct discussions and evaluate opportunities for possible acquisitions, strategic investments, entries into new businesses, joint ventures, and other transactions. In the future, the pace and scale of our acquisitions may increase and may include larger acquisitions than we have done historically. We also invest in companies and technologies, many of which are private companies and technologies that are highly speculative in nature. In the future, we may not be able to find other suitable acquisition and investment candidates, and we may not be able to complete acquisitions or make investments on favorable terms, if at all. In some cases, the costs of such acquisitions may be substantial, and there is no assurance that we will receive a favorable return on investment for our acquisitions. We may in the future be required to write off acquisitions or investments. For example, we recorded gross impairment charges on our strategic investments in various companies and technologies for the year ended December 31, 2022, primarily as a result of adverse economic conditions and disruption in the crypto asset markets. To the extent the adverse economic conditions continue for a prolonged period or there continue to be disruptions in the crypto asset markets, our strategic investments could be further impaired. Moreover, our previous and future acquisitions may not achieve our goals, and any future acquisitions we complete could be viewed negatively by customers, developers, advertisers, or investors. For example, in February 2019, we announced the acquisition of Neutrino S.r.l., a blockchain intelligence platform, whose founders were directly affiliated with the software firm the Hacking Team, which purportedly sold software with surveillance capabilities to governments with authoritarian regimes, resulting in reputational harm to our business, a loss of customers, and increased cost. In addition, if we fail to successfully close or integrate any acquisitions, or integrate the products or technologies associated with such acquisitions into our company, our net revenue and operating results

could be adversely affected. Our ability to acquire and integrate companies, products, services, licenses, employees, or technologies in a successful manner is unproven. Any integration process may require significant time and resources, and we may not be able to manage the process successfully, including successfully securing regulatory approvals which may be required to close the transaction and to continue to operate the target firm's business or products in a manner that is useful to us. We may not successfully evaluate or utilize the acquired products, services, technology, or personnel, or accurately forecast the financial impact of an acquisition transaction, including accounting charges. We may have to pay cash, incur debt, or issue equity securities to pay for any such acquisition, any of which could adversely affect our financial results. The sale of equity or issuance of debt to finance any such acquisitions could result in dilution to our stockholders, which, depending on the size of the acquisition, may be significant. The incurrence of indebtedness would result in increased fixed obligations and could also include covenants or other restrictions that would impede our ability to manage our operations.

If we fail to develop, maintain, and enhance our brand and reputation, our business, operating results, and financial condition may be adversely affected.

Our brand and reputation are key assets and a competitive advantage. Maintaining, protecting, and enhancing our brand depends largely on the success of our marketing efforts, ability to provide consistent, high-quality, and secure products, services, features, and support, and our ability to successfully secure, maintain, and defend our rights to use the "Coinbase" mark and other trademarks important to our brand. We believe that the importance of our brand will increase as competition further intensifies. Our brand and reputation could be harmed if we fail to achieve these objectives or if our public image were to be tarnished by negative publicity, unexpected events, or actions by third parties. Unfavorable publicity about us, including our products, services, technology, customer service, personnel, and crypto asset or crypto asset platforms generally could diminish confidence in, and the use of, our products and services. Moreover, to the extent that we acquire a company and maintain that acquired company's separate brand, we could experience brand dilution or fail to retain positive impressions of our own brand to the extent such impressions are instead attributed to the acquired company's brand. In addition, because we are a founder-led company, actions by, or unfavorable publicity about, Brian Armstrong, our co-founder and Chief Executive Officer, may adversely impact our brand and reputation. Such negative publicity also could have an adverse effect on the size and engagement of our customers and could result in decreased revenue, which could have an adverse effect on our business, operating results, and financial condition.

Key business metrics and other estimates are subject to inherent challenges in measurement and to change as our business evolves, and our business, operating results, and financial condition could be adversely affected by real or perceived inaccuracies in those metrics or any changes in metrics we disclose.

We regularly review key business metrics, including the number of our MTUs, our Trading Volume, and other measures to evaluate growth trends, measure our performance, and make strategic decisions. These key metrics are calculated using internal company data and have not been validated by an independent third-party. While these numbers are based on what we believe to be reasonable estimates for the applicable period of measurement at the time of reporting, there are inherent challenges in such measurements. If we fail to maintain an effective analytics platform, our key metrics calculations may be inaccurate, and we may not be able to identify those inaccuracies. Additionally, we have in the past and may in the future, calculate key business metrics using third-party data. While we believe the third-party data we have used in the past or may use in the future is reliable, we have not independently verified and may not in the future independently verify the accuracy or completeness of the data contained in such sources and there can be no assurance that such data is free of error. Any inaccuracy in the third-party data we use could cause us to overstate or understate our key metrics. We regularly review our processes for calculating these metrics, and from time to time we make adjustments to improve their accuracy. Additionally, our MTUs metric is measured at a point in time and as our products and internal processes for calculating these metrics evolve over time, a previously reported number could fluctuate. We generally will not update previously disclosed key business metrics for any such inaccuracies or

adjustments that are immaterial.

Our key business metrics may also be impacted by compliance or fraud-related bans, technical incidents, or false or spam accounts in existence on our platform. We regularly deactivate fraudulent and spam accounts that violate our terms of service, and exclude these users from the calculation of our key business metrics; however, we may not succeed in identifying and removing all such accounts from our platform. Additionally, users are not prohibited from having more than one account and our MTUs metric may overstate the number of unique customers who have registered an account on our platform as one customer may register for, and use, multiple accounts with different email addresses, phone numbers, or usernames. Furthermore, MTUs may overstate the number of unique consumers due to differences in product architecture or user behavior, which may cause MTUs to fluctuate. For example, a user may currently have a Coinbase Wallet account that is unlinked to their registered account on our platform, but then choose to link these accounts in the future as our product offerings evolve. To the extent that the user had activity in both their Wallet and their registered account in the measurement period, what was previously captured as two unique MTUs would now be counted as a single MTU. If MTUs or our other key business metrics provide us with incorrect or incomplete information about users and their behavior, we may make inaccurate conclusions about our business.

We may change our key business metrics from time to time, which may be perceived negatively. Given the rapid evolution of the crypto markets and our revenue sources, we regularly evaluate whether our key business metrics remain meaningful indicators of the performance of our business. As a result of these evaluations, in the past we have decided to make changes, and in the future may make additional changes, to our key business metrics, including eliminating or replacing existing metrics. Further if investors or the media perceive any changes to our key business metrics disclosures negatively, our business could be adversely affected.

Unfavorable media coverage could negatively affect our business.

We receive a high degree of media coverage in the cryptoeconomy and around the world. Unfavorable publicity regarding, for example, our product changes, product quality, litigation or regulatory activity, privacy practices, terms of service, employment matters, the use of our products, services, or supported crypto assets for illicit or objectionable ends, the actions of our customers, or the actions of other companies that provide similar services to ours, has in the past, and could in the future, adversely affect our reputation. Further, we have in the past, and may in the future, be the target of social media campaigns criticizing actual or perceived actions or inactions that are disfavored by our customers, employees, or society at-large, which campaigns could materially impact our customers' decisions to trade on our platform. Any such negative publicity could have an adverse effect on the size, activity, and loyalty of our customers and result in a decrease in net revenue, which could adversely affect our business, operating results, and financial condition.

Our platform may be exploited to facilitate illegal activity such as fraud, money laundering, gambling, tax evasion, and scams. If any of our customers use our platform to further such illegal activities, our business could be adversely affected.

Our platform may be exploited to facilitate illegal activity including fraud, money laundering, gambling, tax evasion, and scams. We or our partners may be specifically targeted by individuals seeking to conduct fraudulent transfers, and it may be difficult or impossible for us to detect and avoid such transactions in certain circumstances. The use of our platform for illegal or improper purposes could subject us to claims, individual and class action lawsuits, and government and regulatory investigations, prosecutions, enforcement actions, inquiries, or requests that could result in liability and reputational harm for us. Moreover, certain activities that may be legal in one jurisdiction may be illegal in another jurisdiction, and certain activities that are at one time legal may in the future be deemed illegal in the same jurisdiction. As a result, there is significant uncertainty and cost associated with detecting and monitoring transactions for compliance with local laws. In the event that a customer is found responsible for intentionally or inadvertently violating the laws in any jurisdiction, we may be subject to governmental

inquiries, enforcement actions, prosecuted, or otherwise held secondarily liable for aiding or facilitating such activities. Changes in law have also increased the penalties for money transmitters for certain illegal activities, and government authorities may consider increased or additional penalties from time to time. Owners of intellectual property rights or government authorities may seek to bring legal action against money transmitters, including us, for involvement in the sale of infringing or allegedly infringing items. Any threatened or resulting claims could result in reputational harm, and any resulting liabilities, loss of transaction volume, or increased costs could harm our business.

Moreover, while fiat currencies can be used to facilitate illegal activities, crypto assets are relatively new and, in many jurisdictions, may be lightly regulated or largely unregulated. Many types of crypto assets have characteristics, such as the speed with which digital currency transactions can be conducted, the ability to conduct transactions without the involvement of regulated intermediaries, the ability to engage in transactions across multiple jurisdictions, the irreversible nature of certain crypto asset transactions, and encryption technology that anonymizes these transactions, that make crypto assets susceptible to use in illegal activity. U.S. federal and state and foreign regulatory authorities and law enforcement agencies, such as the Department of Justice (“DOJ”), SEC, CFTC, FTC, or the Internal Revenue Service (“IRS”), and various state securities and financial regulators have taken and continue to take legal action against persons and entities alleged to be engaged in fraudulent schemes or other illicit activity involving crypto assets. We also support crypto assets that incorporate privacy-enhancing features, and may from time to time support additional crypto assets with similar functionalities. These privacy-enhancing crypto assets obscure the identities of sender and receiver, and may prevent law enforcement officials from tracing the source of funds on the blockchain. Facilitating transactions in these crypto assets may cause us to be at increased risk of liability arising out of anti-money laundering and economic sanctions laws and regulations.

While we believe that our risk management and compliance framework is designed to detect significant illicit activities conducted by our potential or existing customers, we cannot ensure that we will be able to detect all illegal activity on our platform. Base, an open source permissionless L2 protocol built on the Ethereum blockchain developed by us, has been in the past, and may in the future, be a target for scam tokens or other illegal activity. For example, in August 2023, a number of fraudulent tokens were identified and traded on Base blockchain. As we continue to develop Base, and in light of this fraudulent activity, we continue to invest in improving our security processes, including through our in-house blockchain monitoring capabilities, third-party tools for identifying malicious and out of pattern events, and the monitoring of contract source code and bytecode on Base against a database of known scam code patterns. While to date, such illegal or fraudulent activity on Base has not had a material impact on our business, operating results, financial condition, or cash flows, future illegal activity may have an adverse impact on our business, operating results, financial condition or cash flows and our efforts to identify and remedy such illegal or fraudulent activity may not be successful. If any of our customers use our platform to further such illegal activities, our business could be adversely affected.

Our compliance and risk management methods might not be effective and may result in outcomes that could adversely affect our reputation, operating results, and financial condition.

Our ability to comply with applicable complex and evolving laws, regulations, and rules is largely dependent on the establishment, maintenance, and scaling of our compliance, internal audit, and reporting systems to continuously keep pace with our customer activity and transaction volume, as well as our ability to attract and retain qualified compliance and other risk management personnel. While we have devoted significant resources to develop policies and procedures to identify, monitor, and manage our risks, and expect to continue to do so in the future, we cannot assure you that our policies and procedures are and will always be effective or that we have been and will always be successful in monitoring or evaluating the risks to which we are or may be exposed in all market environments or against all types of risks, including unidentified or unanticipated risks. Our risk management policies and procedures rely on a combination of technical and human controls and supervision that are subject to error and failure. Some of our methods for managing risk are discretionary by nature and are based on internally developed controls and observed historical market behavior, and also involve reliance on

standard industry practices. These methods may not adequately prevent losses, particularly as they relate to extreme market movements, which may be significantly greater than historical fluctuations in the market. Further, as a result of the 2022 Events or similar market disruptions in the future, we may reevaluate our risk management policies and procedures. Accordingly, in the future, we may identify gaps in such policies and procedures or existing gaps may become higher risk, and may require significant resources and management attention. Our risk management policies and procedures also may not adequately prevent losses due to technical errors if our testing and quality control practices are not effective in preventing failures. In addition, we may elect to adjust our risk management policies and procedures to allow for an increase in risk tolerance, which could expose us to the risk of greater losses.

Regulators periodically review our compliance with our own policies and procedures and with a variety of laws and regulations. We have received in the past and may from time to time receive additional examination reports citing violations of rules and regulations and inadequacies in existing compliance programs, and requiring us to enhance certain practices with respect to our compliance program, including due diligence, training, monitoring, reporting, and recordkeeping. If we fail to comply with these, or do not adequately remediate certain findings, regulators could take a variety of actions that could impair our ability to conduct our business, including, but not limited to, delaying, denying, withdrawing, or conditioning approval of certain products and services. In addition, regulators have broad enforcement powers to censure, fine, issue cease and desist orders, prohibit us from engaging in some of our business activities, or revoke our licenses. We face significant intervention by regulatory authorities, including extensive examination and surveillance activities, and will continue to face the risk of significant intervention by regulatory authorities in the future. In the case of non-compliance or alleged non-compliance, we could be subject to investigations and proceedings that may result in substantial penalties or civil lawsuits, including by customers, for damages which can be significant. Any of these outcomes would adversely affect our reputation and brand and our business, operating results, and financial condition. Some of these outcomes could adversely affect our ability to conduct our business.

We hold certain investments in DeFi protocols and may suffer losses if they do not function as expected.

We hold investments in various DeFi protocols. These protocols achieve their investment purposes through self-executing smart contracts that allow users to invest crypto assets in a pool from which other users can borrow without requiring an intermediate party to facilitate these transactions. These investments earn interest to the investor based on the rates at which borrowers repay the loan, and can generally be withdrawn with no restrictions. However, these DeFi protocols are subject to various risks, including uncertain regulatory and compliance conditions in large markets such as the United States, the risk that the underlying smart contract is insecure, the risk that borrowers may default and the investor will not be able to recover its investment, the risk that any underlying collateral may experience significant volatility, and the risk of certain core developers with protocol administration rights can make unauthorized or harmful changes to the underlying smart contract. If any of these risks materialize, our investments in these DeFi protocols may be adversely impacted.

We may suffer losses due to abrupt and erratic market movements.

The crypto asset market has been characterized by significant volatility and unexpected price movements, and experienced significant declines in 2022. Certain crypto assets may become more volatile and less liquid in a very short period of time, which was the case following the 2022 Events, resulting in market prices being subject to erratic and abrupt market movement, which could harm our business. For instance, abrupt changes in volatility or market movement can lead to extreme pressures on our platform and infrastructure that can lead to inadvertent suspension of services across parts of the platform or the entire platform. As a result, from time to time we experience outages. For example, in 2023, we experienced approximately 16 outages, with an average outage duration of 57.4 minutes. Outages can lead to increased customer service expense, can cause customer loss and reputational damage, result in inquiries and actions by regulators, and can lead to other damages for which we may be responsible.

Risks Related to Crypto Assets

Due to unfamiliarity and some negative publicity associated with crypto asset platforms, confidence or interest in crypto asset platforms may decline.

Crypto asset platforms are relatively new. Many of our competitors are unlicensed, unregulated, operate without supervision by any governmental authorities, and do not provide the public with significant information regarding their ownership structure, management team, corporate practices, cybersecurity, and regulatory compliance. As a result, customers and the general public may lose confidence or interest in crypto asset platforms, including regulated platforms like ours.

Since the inception of the cryptoeconomy, numerous crypto asset platforms have been sued, investigated, or shut down due to fraud, manipulative practices, business failure, and security breaches. In many of these instances, customers of these platforms were not compensated or made whole for their losses. Larger platforms like us are more appealing targets for hackers and malware, and may also be more likely to be targets of regulatory enforcement actions. For example, in February 2014, Mt. Gox, the then largest crypto asset platform worldwide, filed for bankruptcy protection in Japan after an estimated 700,000 Bitcoins were stolen from its wallets. In May 2019, Binance, one of the world's largest platforms, was hacked, resulting in losses of approximately \$40 million, and in February 2021, Bitfinex settled a long-running legal dispute with the State of New York related to Bitfinex's alleged misuse of over \$800 million of customer assets. The 2022 Events resulted in a loss of confidence in the broader cryptoeconomy, adverse reputational impact to crypto asset platforms, increased negative publicity surrounding crypto more broadly, heightened scrutiny by regulators and lawmakers and a call for increased regulations of crypto assets and crypto asset platforms.

In addition, there have been reports that a significant amount of crypto asset trading volume on crypto asset platforms is fabricated and false in nature, with a specific focus on unregulated platforms located outside the United States. Such reports may indicate that the market for crypto asset platform activities is significantly smaller than otherwise understood.

Negative perception, a lack of stability and standardized regulation in the cryptoeconomy, and the closure or temporary shutdown of crypto asset platforms due to fraud, business failure, hackers or malware, or government mandated regulation, and associated losses suffered by customers may continue to reduce confidence or interest in the cryptoeconomy and result in greater volatility of the prices of assets, including significant depreciation in value. Any of these events could have an adverse impact on our business and our customers' perception of us, including decreased use of our platform and loss of customer demand for our products and services.

Depositing and withdrawing crypto assets into and from our platform involve risks, which could result in loss of customer assets, customer disputes and other liabilities, which could adversely impact our business.

In order to own, transfer and use a crypto asset on its underlying blockchain network, a person must have a private and public key pair associated with a network address, commonly referred to as a "wallet." Each wallet is associated with a unique "public key" and "private key" pair, each of which is a string of alphanumerical characters. To deposit crypto assets held by a customer onto our platform or custody platform, a customer must "sign" a transaction that consists of the private key of the wallet from where the customer is transferring crypto assets, the public key of a wallet that we control which we provide to the customer, and broadcast the deposit transaction onto the underlying blockchain network. Similarly, to withdraw crypto assets from our platform or custody platform, the customer must provide us with the public key of the wallet that the crypto assets are to be transferred to, and we would be required to "sign" a transaction authorizing the transfer. In addition, some crypto networks require additional information to be provided in connection with any transfer of crypto assets to or from our platforms. A number of errors can occur in the process of depositing or withdrawing crypto assets into or from our platform, such as typos, mistakes, or the failure to include the information required by the blockchain network. For instance,

a user may incorrectly enter our wallet's public key or the desired recipient's public key when depositing and withdrawing from our platforms, respectively. Alternatively, a user may transfer crypto assets to a wallet address that the user does not own, control or hold the private keys to. In addition, each wallet address is only compatible with the underlying blockchain network on which it is created. For instance, a Bitcoin wallet address can only be used to send and receive Bitcoins. If any Ethereum or other crypto assets are sent to a Bitcoin wallet address, or if any of the foregoing errors occur, all of the customer's sent crypto assets will be permanently and irretrievably lost with no means of recovery. We have encountered and expect to continue to encounter similar incidents with our customers. Such incidents could result in customer disputes, damage to our brand and reputation, legal claims against us, and financial liabilities, any of which could adversely affect our business.

Moreover, we hold customer assets one-to-one at all times and we have procedures to process redemptions and withdrawals expeditiously, following the terms of the applicable user agreements. We have not experienced excessive redemptions or withdrawals, or prolonged suspended redemptions or withdrawals, of crypto assets to date. However, similar to traditional financial institutions, we may experience temporary process-related withdrawal delays. For example, we, and traditional financial institutions, may experience such delays if there is a significant volume of withdrawal requests that is vastly beyond anticipated levels. This does not mean we cannot or will not satisfy withdrawals, but this may mean a temporary delay in satisfying withdrawal requests, which we still expect to be satisfied within the withdrawal timelines set forth in the applicable user agreements or otherwise communicated by us. To the extent we have process-related delays, even if brief or due to blockchain network congestion or heightened redemption activity, and within the terms of an applicable user agreement or otherwise communicated by us, we may experience increased customer complaints and damage to our brand and reputation and face additional regulatory scrutiny, any of which could adversely affect our business.

A temporary or permanent blockchain “fork” to any supported crypto asset could adversely affect our business.

Blockchain protocols, including Bitcoin and Ethereum, are open source. Any user can download the software, modify it, and then propose that Bitcoin, Ethereum, or other blockchain protocols users and miners adopt the modification. When a modification is introduced and a substantial majority of users and miners consent to the modification, the change is implemented and the Bitcoin, Ethereum or other blockchain protocol networks, as applicable, remain uninterrupted. However, if less than a substantial majority of users and miners consent to the proposed modification, and the modification is not compatible with the software prior to its modification, the consequence would be what is known as a “fork” (i.e., “split”) of the impacted blockchain protocol network and respective blockchain, with one prong running the pre-modified software and the other running the modified software. The effect of such a fork would be the existence of two parallel versions of the Bitcoin, Ethereum, or other blockchain protocol network, as applicable, running simultaneously, but with each split network's crypto asset lacking interchangeability.

Both Bitcoin and Ethereum protocols have been subject to “forks” that resulted in the creation of new networks, including Bitcoin Cash ABC, Bitcoin Cash SV, Bitcoin Diamond, Bitcoin Gold, Ethereum Classic, EthereumPOW, and others. Some of these forks have caused fragmentation among platforms as to the correct naming convention for forked crypto assets. Due to the lack of a central registry or rulemaking body, no single entity has the ability to dictate the nomenclature of forked crypto assets, causing disagreements and a lack of uniformity among platforms on the nomenclature of forked crypto assets, and which results in further confusion to customers as to the nature of assets they hold on platforms. In addition, several of these forks were contentious and as a result, participants in certain communities may harbor ill will towards other communities. As a result, certain community members may take actions that adversely impact the use, adoption, and price of Bitcoin, Ethereum, or any of their forked alternatives.

Furthermore, hard forks can lead to new security concerns. For instance, when the Ethereum and Ethereum Classic networks split in July 2016, replay attacks, in which transactions from one network were rebroadcast on the other network to achieve “double-spending,” plagued platforms that traded Ethereum through at least October 2016, resulting in significant losses to some crypto asset platforms. Similar

replay attacks occurred in connection with the Bitcoin Cash and Bitcoin Cash SV network split in November 2018. Another possible result of a hard fork is an inherent decrease in the level of security due to the splitting of some mining power across networks, making it easier for a malicious actor to exceed 50% of the mining power of that network, thereby making crypto assets that rely on proof-of-work more susceptible to attack, as has occurred with Ethereum Classic.

We do not believe that we are required to support any fork or airdrop or provide the benefit of any forked or airdropped crypto asset to our customers. However, we have in the past and may in the future continue to be subject to claims by customers arguing that they are entitled to receive certain forked or airdropped crypto assets by virtue of crypto assets that they hold with us. If any customers succeed on a claim that they are entitled to receive the benefits of a forked or airdropped crypto asset that we do not or are unable to support, we may be required to pay significant damages, fines or other fees to compensate customers for their losses.

Future forks may occur at any time. A fork can lead to a disruption of networks and our information technology systems, cybersecurity attacks, replay attacks, or security weaknesses, any of which can further lead to temporary or even permanent loss of our and our customers' assets. Such disruption and loss could cause us to be exposed to liability, even in circumstances where we have no intention of supporting an asset compromised by a fork.

We currently support, and expect to continue to support, certain smart contract-based crypto assets. If the underlying smart contracts for these crypto assets do not operate as expected, they could lose value and our business could be adversely affected.

We currently support, and expect to continue to support, various crypto assets that represent units of value on smart contracts deployed on a third-party blockchain. Smart contracts are programs that store and transfer value and execute automatically when certain conditions are met. Since smart contracts typically cannot be stopped or reversed, vulnerabilities in their programming and design can have damaging effects. For instance, in April 2018, a batch overflow bug was found in many Ethereum-based ERC20-compatible smart contract tokens that allowed hackers to create a large number of smart contract tokens, causing multiple crypto asset platforms worldwide to shut down ERC20-compatible token trading. Similarly, in March 2020, a design flaw in the MakerDAO smart contract caused forced liquidations of crypto assets at significantly discounted prices, resulting in millions of dollars of losses to users who had deposited crypto assets into the smart contract. If any such vulnerabilities or flaws come to fruition, smart contract-based crypto assets, including those held by our customers on our platforms, may suffer negative publicity, be exposed to security vulnerabilities, decline significantly in value, and lose liquidity over a short period of time.

In some cases, smart contracts can be controlled by one or more "admin keys" or users with special privileges, or "super users." These users have the ability to unilaterally make changes to the smart contract, enable or disable features on the smart contract, change how the smart contract receives external inputs and data, and make other changes to the smart contract. For smart contracts that hold a pool of reserves, these users may also be able to extract funds from the pool, liquidate assets held in the pool, or take other actions that decrease the value of the assets held by the smart contract in reserves. Even for crypto assets that have adopted a decentralized governance mechanism, such as smart contracts that are governed by the holders of a governance token, such governance tokens can be concentrated in the hands of a small group of core community members, who would be able to make similar changes unilaterally to the smart contract. If any such super user or group of core members unilaterally make adverse changes to a smart contract, the design, functionality, features and value of the smart contract, its related crypto assets may be harmed. In addition, assets held by the smart contract in reserves may be stolen, misused, burnt, locked up or otherwise become unusable and irrecoverable. These super users can also become targets of hackers and malicious attackers. If an attacker is able to access or obtain the super user privileges of a smart contract, or if a smart contract's super users or core community members take actions that adversely affect the smart contract, our customers who hold and transact in the affected crypto assets may experience decreased functionality and value of the applicable

crypto assets, up to and including a total loss of the value of such crypto assets. Although we do not control these smart contracts, any such events could cause customers to seek damages against us for their losses, result in reputational damage to us, or in other ways adversely impact our business.

From time to time, we may encounter technical issues in connection with the integration of supported crypto assets and changes and upgrades to their underlying networks, which could adversely affect our business.

In order to support any supported crypto asset, a variety of front and back-end technical and development work is required to implement our wallet, custody, trading, staking and other solutions for our customers, and to integrate such supported crypto asset with our existing technical infrastructure. For certain crypto assets, a significant amount of development work is required and there is no guarantee that we will be able to integrate successfully with any existing or future crypto asset. In addition, such integration may introduce software errors or weaknesses into our platform, including our existing infrastructure. Even if such integration is initially successful, any number of technical changes, software upgrades, soft or hard forks, cybersecurity incidents, or other changes to the underlying blockchain network may occur from time to time, causing incompatibility, technical issues, disruptions, or security weaknesses to our platform. If we are unable to identify, troubleshoot and resolve any such issues successfully, we may no longer be able to support such crypto asset, our customers' assets may be frozen or lost, the security of our hot, warm, or cold wallets may be compromised, and our platform and technical infrastructure may be affected, all of which could adversely impact our business.

If miners or validators of any supported crypto asset demand high transaction fees, our operating results may be adversely affected.

We charge miner fees when a customer sends certain crypto assets from their Coinbase account to a non-Coinbase account. We estimate the miner fee based on the cost that we will incur to process the withdrawal transaction on the underlying blockchain network. In addition, we also pay miner fees when we move crypto assets for various operational purposes, such as when we transfer crypto assets between our hot and cold wallets, for which we do not charge our customers. However, miner fees have been and may continue to be unpredictable. If the block rewards for miners on any blockchain network are not sufficiently high to incentivize miners, miners may demand higher transaction fees, or collude to reject low transaction fees and force users to pay higher fees. Although we generally attempt to pass miner fees relating to customer withdrawals through to our customers, we have in the past incurred, and expect to incur from time to time, losses associated with the payment of miner fees in excess of what we charge our customers, resulting in adverse impacts on our operating results.

Future developments regarding the treatment of crypto assets for U.S. and foreign tax purposes could adversely impact our business.

Due to the new and evolving nature of crypto assets and the absence of comprehensive legal and tax guidance with respect to crypto asset products and transactions, many significant aspects of the U.S. and foreign tax treatment of transactions involving crypto assets, such as the purchase and sale of crypto assets on our platform, as well as the provision of staking rewards and other crypto asset incentives and rewards products, are uncertain, and it is unclear whether, when and what guidance may be issued in the future on the treatment of crypto asset transactions for U.S. and foreign tax purposes.

In 2014, the IRS released Notice 2014-21, discussing certain aspects of "virtual currency" for U.S. federal income tax purposes and, in particular, stating that such virtual currency (i) is "property," (ii) is not "currency" for purposes of the rules relating to foreign currency gain or loss, and (iii) may be held as a capital asset. From time to time, the IRS has released other notices and rulings relating to the tax treatment of virtual currency or crypto assets reflecting the IRS's position on certain issues. The IRS has not addressed many other significant aspects of the U.S. federal income tax treatment of crypto assets and related transactions.

There continues to be uncertainty with respect to the timing, character and amount of income inclusions for various crypto asset transactions including, but not limited to lending and borrowing crypto assets, staking and other crypto asset incentives and products that we offer. Although we believe our treatment of crypto asset transactions for federal income tax purposes is consistent with existing positions from the IRS and/or existing U.S. federal income tax principles, because of the rapidly evolving nature of crypto asset innovations and the increasing variety and complexity of crypto asset transactions and products, it is possible the IRS and various U.S. states may disagree with our treatment of certain crypto asset offerings for U.S. tax purposes, which could adversely affect our customers and the vitality of our business. Similar uncertainties exist in the foreign markets in which we operate with respect to direct and indirect taxes, and these uncertainties and potential adverse interpretations of tax law could impact the amount of tax we and our non-U.S. customers are required to pay, and the vitality of our platforms outside of the United States.

There can be no assurance that the IRS, the U.S. state revenue agencies or other foreign tax authorities, will not alter their respective positions with respect to crypto assets in the future or that a court would uphold the treatment set forth in existing positions. It also is unclear what additional tax authority positions, regulations, or legislation may be issued in the future on the treatment of existing crypto asset transactions and future crypto asset innovations under U.S. federal, U.S. state or foreign tax law. Any such developments could result in adverse tax consequences for holders of crypto assets and could have an adverse effect on the value of crypto assets and the broader crypto assets markets. Future technological and operational developments that may arise with respect to crypto assets may increase the uncertainty with respect to the treatment of crypto assets for U.S. and foreign tax purposes. The uncertainty regarding tax treatment of crypto asset transactions impacts our customers, and could impact our business, both domestically and abroad.

Our tax information reporting obligations with respect to crypto transactions are subject to change.

Although we believe we are compliant with U.S. tax reporting and withholding requirements with respect to our customers' crypto asset transactions, the exact scope and application of such requirements, including but not limited to U.S. onboarding requirements through Forms W9 and W8, backup withholding, non-resident alien withholding, and Form 1099 and Form 1042-S reporting obligations, is not entirely clear for all of the crypto asset transactions that we facilitate. In November 2021, the U.S. Congress passed the Infrastructure Investment and Jobs Act (the "IIJA"), providing that brokers (which appear to include exchanges such as Coinbase) would be responsible for reporting to the IRS the transactions of their customers in digital assets, including transfers to other exchanges or non-exchanges. In August 2023, the U.S. Treasury Department and the IRS released proposed regulations on tax information reporting in connection with the IIJA (the "Proposed Regulations") for reporting transactions with respect to digital assets. The Proposed Regulations introduce new rules related to our tax reporting and withholding obligations on our customer transactions in ways that differ from our existing compliance protocols and there is risk that we will not have proper records to ensure compliance for certain legacy customers or transactions. If the IRS determines that we are not in compliance with our tax reporting or withholding requirements with respect to customer crypto asset transactions, we may be exposed to significant taxes and penalties, which could adversely affect our financial position. The Proposed Regulations will require us to invest substantially in new compliance measures and that may require significant retroactive compliance efforts, which also could adversely affect our financial position. Further, final regulations may differ materially from the Proposed Regulations, which could cause additional compliance efforts, and which could adversely affect our financial position.

Similarly, it is likely that new rules for reporting crypto assets under the global "common reporting standard" as well as the "crypto-asset reporting framework" will be implemented on our international operations, creating new obligations and a need to invest in new onboarding and reporting infrastructure. Such rules are under discussion today by the member and observer states of the "Organization for Economic Cooperation and Development" and by the European Commission on behalf of the member states of the European Union. These new rules may give rise to potential liabilities or disclosure

requirements for prior customer arrangements and new rules that affect how we onboard our customers and report their transactions to taxing authorities. Additionally, the European Union has issued directives, commonly referred to as “CESOP” (the Central Electronic System of Payment information), requiring payment service providers in the European Union to report cross-border fiat transactions to taxing authorities on a quarterly basis beginning in January 2024. Any actual or perceived failure by us to comply with the above or any other emerging tax regulations that apply to our operations could harm our business.

The nature of our business requires the application of complex financial accounting rules, and there is limited guidance from accounting standard setting bodies on certain topics. If financial accounting standards undergo significant changes, our operating results could be adversely affected.

The accounting rules and regulations that we must comply with are complex and subject to interpretation by the Financial Accounting Standards Board (the “FASB”), the SEC, and various other bodies formed to promulgate and interpret appropriate accounting principles. Recent actions and public comments from the FASB and the SEC have focused on the integrity of financial reporting and internal controls and many companies’ accounting policies are being subjected to heightened scrutiny by regulators and the public. Further, there has been limited precedent for the financial accounting of crypto assets and related valuation and revenue recognition. Moreover, a change in these principles or interpretations could have a significant effect on our reported financial results, and may even affect the reporting of transactions completed before the announcement or effectiveness of a change. For example, on March 31, 2022, the staff of the SEC issued Staff Accounting Bulletin No. 121 (“SAB 121”), which represented a significant change regarding how a company safeguarding crypto assets held for its platform users reports such crypto assets on its balance sheet and required retrospective application as of January 1, 2022. While the legal status of SAB 121 is currently uncertain following a U.S. Government Accountability Office decision concluding that the SEC failed to follow proper administrative procedures in its issuance of SAB 121, SAB 121 remains applicable at this time.

Additionally, historically, including for the reporting periods included in this Annual Report on Form 10-K, we have accounted for the crypto assets we hold for investment and operating purposes as intangible assets with indefinite useful lives, which requires us to measure these crypto assets at cost less impairment. As a result of the high volatility in the cryptoeconomy and of crypto asset prices, we have recorded impairment charges on the crypto assets we hold. For example, for the years ended December 31, 2023 and 2022, we recorded gross impairment charges of \$96.8 million and \$757.3 million, respectively, due to the observed market price of crypto assets decreasing below the carrying value during these periods.

However, in December 2023, the FASB issued Accounting Standards Update No. 2023-08, Intangibles—Goodwill and Other—Crypto Assets (ASU 2023-08): Accounting for and Disclosure of Crypto Assets (“ASU 2023-08”), which represents a significant change in how entities that hold crypto assets will account for certain of those holdings. ASU 2023-08 will require us to measure crypto assets that meet the scope criteria at fair value and to reflect changes in fair value in net income each reporting period. The amendments in ASU 2023-08 will also require us to present crypto assets measured at fair value separately from other intangible assets on the balance sheet and changes in the fair value measurement of crypto assets separately from changes in the carrying amounts of other intangible assets on the income statement. The amendments in ASU 2023-08 are effective for fiscal years beginning after December 15, 2024, with early adoption permitted before then. We have elected to early adopt the updated standard effective as of January 1, 2024.

Uncertainties in or changes to regulatory or financial accounting standards could result in the need to change our accounting methods and restate our financial statements and impair our ability to provide timely and accurate financial information, which could adversely affect our financial statements, result in a loss of investor confidence, and more generally impact our business, operating results, and financial condition.

Risks Related to Government Regulation and Privacy Matters

The cryptoeconomy is novel. As a result, policymakers are just beginning to consider what a regulatory regime for crypto would look like and the elements that would serve as the foundation for such a regime. This less developed consideration of crypto may harm our ability to effectively react to proposed legislation and regulation of crypto assets or crypto asset platforms adverse to our business.

As crypto assets have grown in both popularity and market size, various U.S. federal, state, and local and foreign governmental organizations, consumer agencies and public advocacy groups have been examining the operations of crypto networks, users and platforms, with a focus on how crypto assets can be used to launder the proceeds of illegal activities, fund criminal or terrorist enterprises, and the safety and soundness of platforms and other service providers that hold crypto assets for users. Many of these entities have called for heightened regulatory oversight, and have issued consumer advisories describing the risks posed by crypto assets to users and investors. For instance, in September 2022, the White House published a fact sheet described as the first-ever “Comprehensive Framework for Responsible Development of Digital Assets,” which encouraged “agencies to issue guidance and rules to address current and emergent risks in the digital asset ecosystem.”

Competitors, including traditional financial services, have spent years cultivating professional relationships with relevant policymakers on behalf of their industry so that those policymakers may understand that industry, the current legal landscape affecting that industry, and the specific policy proposals that could be implemented in order to responsibly develop that industry. The lobbyists working for these competitors have similarly spent years developing and working to implement strategies to advance these industries. Members of the cryptoeconomy have started to engage policymakers directly and with the help of external advisors and lobbyists. For example, in order to advance our mission, in February 2022 we launched our Coinbase Innovation Political Action Committee to support crypto-forward political candidates and initiatives. Further, in December 2023, we together with a number of other crypto and blockchain market participants supported the launch of the Fairshake Political Action Committee to support political candidates in the 2024 U.S. presidential election who support crypto and blockchain innovation and responsible regulation. However, this work is in a relatively nascent stage. As a result, new laws and regulations may be proposed and adopted in the United States and internationally, or existing laws and regulations may be interpreted in new ways, that harm the cryptoeconomy or crypto asset platforms, which could adversely impact our business. Additionally, our political activities to further our mission may be perceived unfavorably by investors and the public and have an adverse impact on our brand and reputation.

Our consolidated balance sheets may not contain sufficient amounts or types of regulatory capital to meet the changing requirements of our various regulators worldwide, which could adversely affect our business, operating results, and financial condition.

We are required to possess sufficient financial soundness and strength to adequately support our regulated subsidiaries. We may from time to time incur indebtedness and other obligations which could make it more difficult to meet these capitalization requirements or any additional regulatory requirements. In addition, although we are not a bank holding company for purposes of United States law or the law of any other jurisdiction, as a global provider of financial services and in light of the changing regulatory environment in various jurisdictions, we could become subject to new capital requirements introduced or imposed by the United States and international regulators. Any change or increase in these regulatory requirements could have an adverse effect on our business, operating results, and financial condition.

As a financial institution licensed to, among other things, engage in money transmission in the United States, to conduct virtual currency business activity in New York, and issue electronic money in Europe, we are subject to strict rules governing how we manage and hold customer fiat currency and crypto assets. We maintain complex treasury operations to manage and move customer fiat currency and crypto assets across our platforms and to comply with regulatory requirements. However, it is possible we may experience errors in fiat currency and crypto asset handling, accounting, and regulatory reporting that

lead us to be out of compliance with these requirements. In addition, regulators may increase the amount of fiat currency reserves that we are required to maintain for our operations, as has happened in the past. For instance, in 2017, the Hawaii Division of Financial Institutions imposed a new policy whereby digital currency businesses are required to maintain cash reserves in an amount equal to the aggregate face value of digital currency funds held on behalf of customers, making our operations in Hawaii impracticable and forcing us to shut down operations in the state at the time. Any similar events can lead to sanctions, penalties, changes to our business operations, or the revocation of licenses. Frequent launch of new products and services, including Learning Rewards campaigns, margin trading, lending functions, and the addition of new payment rails increase these risks.

Many of the crypto assets in which we facilitate trading are subject to regulatory authority by the CFTC. Any fraudulent or manipulative activity in a crypto asset occurring on our platform could subject us to increased regulatory scrutiny, regulatory enforcement, and litigation.

The CFTC has stated and judicial decisions involving CFTC enforcement actions have confirmed that at least some crypto assets, including Bitcoin, ether, litecoin, and stablecoins, such as USDC, USDT and BUSD, fall within the definition of a “commodity” under the CEA. As a result, the CFTC has general enforcement authority to police against manipulation and fraud in at least some spot crypto asset markets. From time to time, manipulation, fraud, and other forms of improper trading by market participants have resulted in, and may in the future result in, CFTC investigations, inquiries, enforcement action, and similar actions by other regulators, government agencies, and civil litigation. Such investigations, inquiries, enforcement actions, and litigation may cause us to incur substantial costs and could result in negative publicity.

Certain transactions in crypto assets may constitute “retail commodity transactions” subject to regulation by the CFTC as futures contracts. If crypto asset transactions we facilitate are deemed to be such retail commodity transactions, we would be subject to additional regulatory requirements, licenses and approvals, and potentially face regulatory enforcement, civil liability, and significant increased compliance and operational costs.

Any transaction in a commodity, including a crypto asset, entered into with or offered to retail investors using leverage, margin, or other financing arrangements (a “retail commodity transaction”) is subject to CFTC regulation as a futures contract unless such transaction results in actual delivery within 28 days. The meaning of “actual delivery” has been the subject of commentary and litigation, and in 2020, the CFTC adopted interpretive guidance addressing the “actual delivery” of a crypto asset. To the extent that crypto asset transactions that we facilitate or facilitated are deemed retail commodity transactions, including pursuant to current or subsequent rulemaking or guidance by the CFTC, we may be subject to additional regulatory requirements and oversight, and we could be subject to judicial or administrative sanctions if we do not or did not at a relevant time possess appropriate registrations. The CFTC has previously brought enforcement actions against entities engaged in retail commodity transactions without appropriate registrations, as well as recent enforcement settled orders against developers of decentralized platforms.

Particular crypto assets or transactions therein could be deemed “commodity interests” (e.g., futures, options, swaps) or security-based swaps subject to regulation by the CFTC or SEC, respectively. If a crypto asset that we facilitate trading in is deemed a commodity interest or a security-based swap, we would be subject to additional regulatory requirements, registrations and approvals, and potentially face regulatory enforcement, civil liability, and significant increased compliance and operational costs.

Commodity interests, as such term is defined by the CEA and CFTC rules and regulations, are subject to more extensive supervisory oversight by the CFTC, including registrations of entities engaged in, and platforms offering, commodity interest transactions. This CFTC authority extends to crypto asset futures contracts and swaps, including transactions that are based on current and future prices of crypto assets and indices of crypto assets. To the extent that a crypto asset in which we facilitate or facilitated

trading or transactions in a crypto asset which we facilitate or facilitated are deemed to fall within the definition of a commodity interest, including pursuant to subsequent rulemaking or guidance by the CFTC, we may be subject to additional regulatory requirements and oversight and could be subject to judicial or administrative sanctions if we do not or did not at a relevant time possess appropriate registrations as an exchange (for example, as a designated contract market for trading futures or options on futures, or as a swaps execution facility for trading swaps) or as a registered intermediary (for example, as a futures commission merchant or introducing broker). Such actions could result in injunctions, cease and desist orders, as well as civil monetary penalties, fines, and disgorgement, as well as reputational harm. The CFTC has previously brought enforcement actions against entities engaged in crypto asset activities for failure to obtain appropriate exchange, execution facility and intermediary registrations.

Furthermore, the CFTC and the SEC have jointly adopted regulations defining “security-based swaps,” which include swaps based on single securities and narrow-based indices of securities. If a crypto asset is deemed to be a security, certain transactions referencing that crypto asset could constitute a security-based swap. A crypto asset or transaction therein that is based on or references a security or index of securities, whether or not such securities are themselves crypto assets, could also constitute a security-based swap. To the extent that a crypto asset in which we facilitate or have facilitated trading or transactions in a crypto asset which we facilitate or have facilitated are deemed to fall within the definition of a security-based swap, including pursuant to subsequent rulemaking or guidance by the CFTC or SEC, we may be subject to additional regulatory requirements and oversight by the SEC and could be subject to judicial or administrative sanctions if we do not or did not at a relevant time possess appropriate registrations as an exchange (for example, as a security-based swaps execution facility) or as a registered intermediary (for example, as a security-based swap dealer or broker-dealer). This could result in injunctions, cease and desist orders, as well as civil monetary penalties, fines, and disgorgement, as well as reputational harm.

We obtain and process a large amount of sensitive customer data. Any real or perceived improper use of, disclosure of, or access to such data could harm our reputation, as well as have an adverse effect on our business.

We obtain and process large amounts of sensitive data, including personal data related to our customers and their transactions, such as their names, addresses, social security numbers, visa information, copies of government-issued identification, facial recognition data (from scanning of photographs for identity verification), trading data, tax identification, and bank account information. We face risks, including to our reputation, in the handling and protection of this data, and these risks will increase as our business continues to expand, including through our acquisition of, and investment in, other companies and technologies. Federal, state, and international laws and regulations governing privacy, data protection, and e-commerce transactions require us to safeguard our customers’, employees’, and service providers’ personal data.

We have administrative, technical, and physical security measures and controls in place and maintain a robust information security program. However, our security measures, or the security measures of companies we acquire, may be inadequate or breached as a result of third-party action, employee or service provider error, malfeasance, malware, phishing, hacking attacks, system error, trickery, advances in computer capabilities, new discoveries in the field of cryptography, inadequate facility security or otherwise, and, as a result, someone may be able to obtain unauthorized access to sensitive information, including personal data, on our systems. We could be the target of a cybersecurity incident, which could result in harm to our reputation and financial losses. Additionally, our customers have been and could be targeted in cybersecurity incidents like an account takeover, which could result in harm to our reputation and financial losses. For example, in 2021, third parties independently obtained login credentials and personal information for at least 6,000 customers and used those credentials to exploit a vulnerability that previously existed in the account recovery process. Coinbase reimbursed impacted customers approximately \$25.1 million. Additionally, privacy and data protection laws are evolving, and these laws may be interpreted and applied in a manner that is inconsistent with our data handling safeguards and practices that could result in fines, lawsuits, and other penalties, and significant changes to our or our

third-party partners' business practices and products and service offerings.

Our future success depends on the reliability and security of our platform. To the extent that the measures we, any companies we acquire, or our third-party business partners have taken prove to be insufficient or inadequate, or to the extent we discover a security breach suffered by a company we acquire following the closing of such acquisition, we may become subject to litigation, breach notification obligations, or regulatory or administrative sanctions, which could result in significant fines, penalties, damages, harm to our reputation, or loss of customers. If our own confidential business information or sensitive customer information were improperly disclosed, our business could be adversely affected. Additionally, a party who circumvents our security measures could, among other effects, appropriate customer information or other proprietary data, cause interruptions in our operations, or expose customers to hacks, viruses, and other disruptions.

Depending on the nature of the information compromised, in the event of a data breach or other unauthorized access to our customer data, we may also have obligations to notify customers and regulators about the incident, and we may need to provide some form of remedy, such as a subscription to credit monitoring services, pay significant fines to one or more regulators, or pay compensation in connection with a class-action settlement (including under the private right of action under the California Consumer Privacy Act of 2018 (the "CCPA"), which is expected to increase security breach litigation). Such breach notification laws continue to evolve and may be inconsistent from one jurisdiction to another. In the United States, the SEC has adopted rules for mandatory disclosure of cybersecurity incidents suffered by public companies, as well as cybersecurity governance and risk management. Complying with these obligations could cause us to incur substantial costs and could increase negative publicity surrounding any incident that compromises customer data. Any failure or perceived failure by us to comply with these laws may also subject us to enforcement action or litigation, any of which could harm our business. Additionally, the financial exposure from the events referenced above could either not be insured against or not be fully covered through any insurance that we may maintain, and there can be no assurance that the limitations of liability in any of our contracts would be enforceable or adequate or would otherwise protect us from liabilities or damages as a result of the events referenced above. Any of the foregoing could have an adverse effect on our business, reputation, operating results, and financial condition.

Furthermore, we may be required to disclose personal data pursuant to demands from individuals, regulators, government agencies, and law enforcement agencies in various jurisdictions with conflicting privacy and security laws, which could result in a breach of privacy and data protection policies, notices, laws, rules, court orders, and regulations. Additionally, changes in the laws and regulations that govern our collection, use, and disclosure of customer data could impose additional requirements with respect to the retention and security of customer data, could limit our marketing activities, and have an adverse effect on our business, operating results, and financial condition.

We are subject to laws, regulations, and industry requirements related to data privacy, data protection and information security, and user protection across different markets where we conduct our business, including in the United States, European Economic Area (the "EEA") and Asia-Pacific region and industry requirements and such laws, regulations, and industry requirements are constantly evolving and changing. Any actual or perceived failure to comply with such laws, regulations, and industry requirements, or our privacy policies, could harm our business.

Various local, state, federal, and international laws, directives, and regulations apply to our collection, use, retention, protection, disclosure, transfer, and processing of personal data. These data protection and privacy laws and regulations are subject to uncertainty and continue to evolve in ways that could adversely impact our business. These laws have a substantial impact on our operations both outside and in the United States, either directly or as a data processor and handler for various offshore entities.

In the United States, state and federal lawmakers and regulatory authorities have increased their attention on the collection and use of user data. In the United States, non-sensitive user data generally may be used under current rules and regulations, subject to certain restrictions, so long as the person does not affirmatively “opt-out” of the collection or use of such data. If an “opt-in” model or additional required “opt-outs” were to be adopted in the United States, less data may be available, and the cost of data likely would increase. For example, California enacted the CCPA (effective January 2020) and the California Privacy Rights Act (the “CPRA”) (effective January 2023), which expands upon and amends the CCPA.

The CCPA and the CPRA require covered companies to, among other things, provide new disclosures to California users, and affords such users new privacy rights such as the ability to opt-out of certain sales of personal information and expanded rights to access and require deletion of their personal information, opt out of certain personal information sharing, and receive detailed information about how their personal information is collected, used, and shared. The CCPA provides for civil penalties for violations, as well as a private right of action for security breaches that may increase security breach litigation.

Other states have followed California’s lead. For example, in 2021, Virginia passed the Consumer Data Protection Act (the “CDPA”) (effective January 2023) and Colorado passed the Colorado Privacy Act (the “CPA”) (effective July 2023) to provide comparable consumer privacy rights to the CCPA/CPRA. We cannot fully predict the impact of the CCPA, CPRA, CDPA, CPA, or other similar laws or regulations on our business or operations, but compliance may require us to modify our data processing practices and policies incurring costs and expense. Further, to the extent multiple state-level laws are introduced with inconsistent or conflicting standards, it may require costly and difficult efforts to achieve compliance with such laws. Our failure or perceived failure to comply with the CCPA, CPRA, CDPA, CPA, or other similar laws or regulations passed in the future could have a material adverse effect on our business, including how we use personal information, our business, operating results, and financial condition. Further, in October 2022, the CFPB re-opened the public comment period in connection with an inquiry that it launched in October 2021 into the data use and protection business practices of several large payments companies. The impact of this inquiry is uncertain and could result in stringent restrictions on the use of customer data.

Additionally, many foreign countries and governmental bodies, including Australia, Brazil, Kenya, the European Union, India, Japan, Philippines, Indonesia, Singapore, United Kingdom, Switzerland, and numerous other jurisdictions in which we operate or conduct our business, have laws and regulations concerning the collection, use, processing, storage, and deletion of personal information obtained from their residents or by businesses operating within their jurisdiction. These laws and regulations often are more restrictive than those in the United States. Such laws and regulations may require companies to implement new privacy and security policies, permit individuals to access, correct, and delete personal information stored or maintained by such companies, inform individuals of security breaches that affect their personal information, require that certain types of data be retained on local servers within these jurisdictions, and, in some cases, obtain individuals’ affirmative opt-in consent to collect and use personal information for certain purposes.

In Europe, the General Data Protection Regulation (the “GDPR”) took effect on May 25, 2018. As a result of our presence in Europe and our service offering in the European Union, we are subject to the GDPR, which imposes stringent E.U. data protection requirements, and could increase the risk of non-compliance and the costs of providing our products and services in a compliant manner. A breach of the GDPR could result in regulatory investigations, reputational damage, fines and sanctions, orders to cease or change our processing of our data, enforcement notices, or assessment notices (for a compulsory audit). We may also face civil claims including representative actions and other class action type litigation (where individuals have suffered harm), potentially amounting to significant compensation or damages liabilities, as well as associated costs, diversion of internal resources, and reputational harm.

Administrative fines under the GDPR can amount up to 20 million Euros or four percent of the group's annual global turnover, whichever is highest. Additionally, the United Kingdom (the "U.K.") implemented its own Data Protection Act, effective in May 2018 and statutorily amended in 2019, which is further supplemented by the U.K. GDPR, which came into effect on January 1, 2021. The U.K. GDPR is based on the E.U. GDPR which applied in the U.K. before that date, with some changes to make it work more effectively in a U.K. context, including its own derogations, for how GDPR is applied in the U.K. From the beginning of 2021 (when the transitional period following Brexit expired), we have to continue to comply with the E.U. GDPR as well as the U.K.'s Data Protection Act and U.K. GDPR, with each regime having the ability to result in fines up to the greater of €20 million (£17.5 million) or 4% of global turnover.

Both the E.U. GDPR (covering the EEA) as well as U.K. and Swiss data protection laws impose strict rules on the transfer of personal data out of the E.U., U.K., or Switzerland to a "third country," including the United States. On June 4, 2021 the European Commission finalized new versions of the Standard Contractual Clauses, with the Implementing Decision now in effect. The U.K. Information Commissioner's Office of the Data Protection Authority published the U.K. version of the Standard Contractual Clauses (the "SCCS"), and by March 2024, we will be required to use and honor these clauses for transfers of U.K. residents' personal data to a foreign country that does not have adequate data protection. Effective July 10, 2023, the new E.U.-U.S. Data Privacy Framework ("DPF") has been recognized as adequate under E.U. law to allow transfers of personal data from the E.U. to certified companies in the U.S. However, the DPF is subject to further legal challenge which could cause the legal requirements for personal data transfers from the E.U. to the U.S. to become uncertain once again. E.U. data protection authorities have and may again block the use of certain U.S.-based services that involve the transfer of personal data to the U.S. In the E.U. and other markets, potential new rules and restrictions on the flow of data across borders could increase the cost and complexity of doing business in those regions.

While we maintain a DPF certification, we still rely on the standard contractual clauses for intercompany data transfers from the European Union to the United States. As supervisory authorities continue to issue further guidance on personal data, we could suffer additional costs, complaints, or regulatory investigations or fines, and if we are otherwise unable to transfer personal data between and among countries and regions in which we operate, it could affect the manner in which we provide our services, the geographical location or segregation of our relevant systems and operations and could adversely affect our financial results.

We are also subject to evolving E.U. privacy laws on cookies and e-marketing. In the European Union, regulators are increasingly focusing on compliance with requirements in the online behavioral advertising ecosystem, and an E.U. regulation known as the ePrivacy Regulation will significantly increase fines for non-compliance once in effect. In the European Union, informed consent, including a prohibition on pre-checked consents and a requirement to ensure separate consents for each cookie, is required for the placement of a cookie or similar technologies on a user's device and for direct electronic marketing. As regulators start to enforce the strict approach in recent guidance, this could lead to substantial costs, require significant systems changes, limit the effectiveness of our marketing activities, divert the attention of our technology personnel, negatively impact our efforts to understand users, adversely affect our margins, increase costs, and subject us to additional liabilities.

There is a risk that as we expand, we may assume liabilities for breaches experienced by the companies we acquire. Additionally, there are potentially inconsistent world-wide government regulations pertaining to data protection and privacy. Despite our efforts to comply with applicable laws, regulations and other obligations relating to privacy, data protection, and information security, it is possible that our practices, offerings, or platform could fail, or be alleged to fail to meet applicable requirements. For instance, the overall regulatory framework governing the application of privacy laws to blockchain technology is still highly undeveloped and likely to evolve. Further there are also changes in the regulatory landscape relating to new and evolving technologies, such as generative AI, which we have and continue to find new ways to leverage in our products and internal operations. Our failure, or the failure by our third-party providers or partners, to comply with applicable laws or regulations and to prevent unauthorized access to, or use or release of personal data, or the perception that any of the

foregoing types of failure has occurred, even if unfounded, could subject us to audits, inquiries, whistleblower complaints, adverse media coverage, investigations, severe criminal, or civil sanctions, damage our reputation, or result in fines or proceedings by governmental agencies and private claims and litigation, any of which could adversely affect our business, operating results, and financial condition.

Risks Related to Third Parties

Our current and future services are dependent on payment networks and acquiring processors, and any changes to their rules or practices could adversely impact our business.

We rely on banks and other payment processors to process customers' payments in connection with the purchase of crypto assets on our platform and we pay these providers fees for their services. From time to time, payment networks have increased, and may increase in the future, the interchange fees and assessments that they charge for transactions that use their networks. Payment networks have imposed, and may impose in the future, special fees on the purchase of crypto assets, including on our platform, which could negatively impact us and significantly increase our costs. Our payment card processors may have the right to pass any increases in interchange fees and assessments on to us, and may impose additional use charges which would increase our operating costs and reduce our operating income. We could attempt to pass these increases along to our customers, but this strategy might result in the loss of customers to our competitors that may not pass along the increases, thereby reducing our revenue and earnings. If competitive practices prevent us from passing along the higher fees to our customers in the future, we may have to absorb all or a portion of such increases, thereby increasing our operating costs and reducing our earnings.

We may also be directly or indirectly liable to the payment networks for rule violations. Payment networks set and interpret their network operating rules and have alleged from time to time that various aspects of our business model violate these operating rules. If such allegations are not resolved favorably, they may result in significant fines and penalties or require changes in our business practices that may be costly and adversely affect our business. The payment networks could adopt new operating rules or interpret or reinterpret existing rules that we or our processors might find difficult or even impossible to follow, or costly to implement. As a result, we could lose our ability to give customers the option of using cards to fund their purchases or the choice of currency in which they would like their card to be charged. If we are unable to accept cards or are limited in our ability to do so, our business would be adversely affected.

We depend on major mobile operating systems and third-party platforms for the distribution of certain products. If Google Play, the Apple App Store, or other platforms prevent customers from downloading our apps, our ability to grow may be adversely affected.

We rely upon third-party platforms for the distribution of certain products and services. Our Coinbase and Coinbase Wallet apps are provided as free applications through both the Apple App Store and the Google Play Store, and are also accessible via mobile and traditional websites. The Google Play Store and Apple App Store are global application distribution platforms and the main distribution channels for our apps. As such, the promotion, distribution, and operation of our apps are subject to the respective platforms' terms and policies for application developers, which are very broad and subject to frequent changes and re-interpretation. Further, these distribution platforms often contain restrictions related to crypto assets that are uncertain, broadly construed, and can limit the nature and scope of services that can be offered. For example, Apple App Store's restrictions related to crypto assets have disrupted the proposed launch of many features within the Coinbase and Coinbase Wallet apps, including our Learning Rewards and NFT transfer services and access to decentralized applications. If our products are found to be in violation of any such terms and conditions, we may no longer be able to offer our products through such third-party platforms. There can be no guarantee that third-party platforms will continue to support our product offerings, or that customers will be able to continue to use our products. For example, in November 2013, our iOS app was temporarily removed by Apple from the Apple App Store. In December 2019, we were similarly instructed by Apple to remove certain features relating to decentralized

applications from our application to comply with the Apple App Store's policies. Any changes, bugs, technical or regulatory issues with third-party platforms, our relationships with mobile manufacturers and carriers, or changes to their terms of service or policies could degrade our products' functionalities, reduce or eliminate our ability to distribute our products, give preferential treatment to competitive products, limit our ability to deliver high quality offerings, or impose fees or other charges, any of which could affect our product usage and harm our business.

Risks Related to Intellectual Property

Our intellectual property rights are valuable, and any inability to protect them could adversely impact our business, operating results, and financial condition.

Our business depends in large part on our proprietary technology and our brand. We rely on, and expect to continue to rely on, a combination of trademark, trade dress, domain name, copyright, and trade secrets, as well as confidentiality and license agreements with our employees, contractors, consultants, and third parties with whom we have relationships, to establish and protect our brand and other intellectual property rights. However, our efforts to protect our intellectual property rights may not be sufficient or effective. Our proprietary technology and trade secrets could be lost through misappropriation or breach of our confidentiality and license agreements, and any of our intellectual property rights may be challenged, which could result in them being narrowed in scope or declared invalid or unenforceable. There can be no assurance that our intellectual property rights will be sufficient to protect against others offering products, services, or technologies that are substantially similar to ours and that compete with our business.

We do not intend to monetize our patents or attempt to block third parties from competing with us by asserting our patents offensively, but our ability to successfully defend intellectual property challenges from competitors and other parties may depend, in part, on our ability to counter-assert our patents defensively. Effective protection of our intellectual property may be expensive and difficult to maintain, both in terms of application and registration costs as well as the costs of defending and enforcing those rights. As we have grown, we have sought to obtain and protect our intellectual property rights in an increasing number of countries, a process that can be expensive and may not always be successful. In some instances, patent applications or patents may be abandoned or allowed to lapse, resulting in partial or complete loss of patent rights in a relevant jurisdiction. Further, intellectual property protection may not be available to us in every country in which our products and services are available. For example, some foreign countries have compulsory licensing laws under which a patent owner must grant licenses to third parties. In addition, many countries limit the enforceability of patents against certain third parties, including government agencies or government contractors. In these countries, patents may provide limited or no benefit. We may also agree to license our patents to third parties as part of various patent pools and open patent projects. Those licenses may diminish our ability, though, to counter-assert our patents against certain parties that may bring claims against us.

We have been, and in the future may be, sued by third parties for alleged infringement of their proprietary rights.

In recent years, there has been considerable patent, copyright, trademark, domain name, trade secret and other intellectual property development activity in the cryptoeconomy, as well as litigation, based on allegations of infringement or other violations of intellectual property, including by large financial institutions. Furthermore, individuals and groups can purchase patents and other intellectual property assets for the purpose of making claims of infringement to extract settlements from companies like ours. Our use of third-party intellectual property rights also may be subject to claims of infringement or misappropriation. We cannot guarantee that our internally developed or acquired technologies and content do not or will not infringe the intellectual property rights of others. From time to time, our competitors or other third parties may claim that we are infringing upon or misappropriating their intellectual property rights, and we may be found to be infringing upon such rights. Any claims or litigation could cause us to incur significant expenses and, if successfully asserted against us, could require that

we pay substantial damages or ongoing royalty payments, prevent us from offering our products or services or using certain technologies, force us to implement expensive work-arounds, or impose other unfavorable terms. We expect that the occurrence of infringement claims is likely to grow as the crypto assets market grows and matures. Accordingly, our exposure to damages resulting from infringement claims could increase and this could further exhaust our financial and management resources. Further, during the course of any litigation, we may make announcements regarding the results of hearings and motions, and other interim developments. If securities analysts and investors regard these announcements as negative, the market price of our Class A common stock may decline. Even if intellectual property claims do not result in litigation or are resolved in our favor, these claims, and the time and resources necessary to resolve them, could divert the resources of our management and require significant expenditures. Any of the foregoing could prevent us from competing effectively and could have an adverse effect on our business, operating results, and financial condition.

Our platform contains third-party open source software components, and failure to comply with the terms of the underlying open source software licenses could harm our business.

Our platform contains software modules licensed to us by third-party authors under “open source” licenses. We also make certain of our own software available to users for free under various open source licenses. Use and distribution of open source software may entail greater risks than use of third-party commercial software, as open source licensors generally do not provide support, warranties, indemnification or other contractual protections regarding infringement claims or the quality of the code. In addition, the public availability of such software may make it easier for others to compromise our platform.

Some open source licenses contain requirements that we make available source code for modifications or derivative works we create based upon the type of open source software we use, or grant other licenses to our intellectual property. If we combine our proprietary software with open source software in a certain manner, we could, under certain open source licenses, be required to release the source code of our proprietary software to the public. This would allow our competitors to create similar offerings with lower development effort and time and ultimately could result in a loss of our competitive advantages. Alternatively, to avoid the public release of the affected portions of our source code, we could be required to expend substantial time and resources to re-engineer some or all of our software.

We have not recently conducted an extensive audit of our use of open source software and, as a result, we cannot assure you that our processes for controlling our use of open source software in our platform are, or will be, effective. If we are held to have breached or failed to fully comply with all the terms and conditions of an open source software license, we could face litigation, infringement or other liability, or be required to seek costly licenses from third parties to continue providing our offerings on terms that are not economically feasible, to re-engineer our platform, to discontinue or delay the provision of our offerings if re-engineering could not be accomplished on a timely basis or to make generally available, in source code form, our proprietary code, any of which could adversely affect our business, operating results, and financial condition. Moreover, the terms of many open source licenses have not been interpreted by U.S. or foreign courts. As a result, there is a risk that these licenses could be construed in a way that could impose unanticipated conditions or restrictions on our ability to provide or distribute our platform. From time to time, there have been claims challenging the ownership of open source software against companies that incorporate open source software into their solutions. As a result, we could be subject to lawsuits by parties claiming ownership of what we believe to be open source software.

Risks Related to Our Employees and Other Service Providers

The loss of one or more of our key personnel, or our failure to attract and retain other highly qualified personnel in the future, could adversely impact our business, operating results, and financial condition.

We operate in a relatively new industry that is not widely understood and requires highly skilled and

technical personnel. We believe that our future success is highly dependent on the talents and contributions of our senior management team, including Mr. Armstrong, our co-founder and Chief Executive Officer, members of our executive team, and other key employees across product, engineering, risk management, finance, compliance and legal, and marketing. Our future success depends on our ability to attract, develop, motivate, and retain highly qualified and skilled employees. Due to the nascent nature of the cryptoeconomy, the pool of qualified talent is extremely limited, particularly with respect to executive talent, engineering, risk management, and financial regulatory expertise. We face intense competition for qualified individuals from numerous software and other technology companies. To attract and retain key personnel, we incur significant costs, including salaries and benefits and equity incentives. Even so, these measures may not be enough to attract and retain the personnel we require to operate our business effectively. The loss of even a few key employees or senior leaders, or an inability to attract, retain and motivate additional highly skilled employees required for the planned expansion of our business could adversely impact our operating results and impair our ability to grow.

Our culture emphasizes innovation, and if we cannot maintain this culture, our business and operating results could be adversely impacted.

We believe that our entrepreneurial and innovative corporate culture has been a key contributor to our success. We encourage and empower our employees to develop and launch new and innovative products and services, which we believe is essential to attracting high quality talent, partners, and developers, as well as serving the best, long-term interests of our company. If we cannot maintain this culture, we could lose the innovation, creativity and teamwork that has been integral to our business. Additionally, from time to time, we realign our resources and talent to implement stage-appropriate business strategies, including furloughs, layoffs, or reductions in force. In such cases, we may find it difficult to prevent a negative effect on employee morale or attrition beyond our planned reduction, in which case our products and services may suffer and our business, operating results, and financial condition could be adversely impacted.

In the event of employee or service provider misconduct or error, our business may be adversely impacted.

Employee or service provider misconduct or error could subject us to legal liability, financial losses, and regulatory sanctions and could seriously harm our reputation and negatively affect our business. Such misconduct could include engaging in improper or unauthorized transactions or activities, misappropriation of customer funds, insider trading and misappropriation of information, failing to supervise other employees or service providers, improperly using confidential information, as well as improper trading activity such as spoofing, layering, wash trading, manipulation and front-running. Employee or service provider errors, including mistakes in executing, recording, or processing transactions for customers, could expose us to the risk of material losses even if the errors are detected. Although we have implemented processes and procedures and provide trainings to our employees and service providers to reduce the likelihood of misconduct and error, these efforts may not be successful. Moreover, the risk of employee or service provider error or misconduct may be even greater for novel products and services and is compounded by the fact that many of our employees and service providers are accustomed to working at tech companies which generally do not maintain the same compliance customs and rules as financial services firms. This can lead to high risk of confusion among employees and service providers with respect to compliance obligations, particularly including confidentiality, data access, trading, and conflicts. It is not always possible to deter misconduct, and the precautions we take to prevent and detect this activity may not be effective in all cases. If we were found to have not met our regulatory oversight and compliance and other obligations, we could be subject to regulatory sanctions, financial penalties, restrictions on our activities for failure to properly identify, monitor and respond to potentially problematic activity and seriously damage our reputation. Our employees, contractors, and agents could also commit errors that subject us to financial claims for negligence, as well as regulatory actions, or result in financial liability. Further, allegations by regulatory or criminal authorities of improper trading activities could affect our brand and reputation.

Our officers, directors, employees, and large stockholders may encounter potential conflicts of interests with respect to their positions or interests in certain crypto assets, entities, and other initiatives, which could adversely affect our business and reputation.

We frequently engage in a wide variety of transactions and maintain relationships with a significant number of crypto projects, their developers, members of their ecosystem, and investors. These transactions and relationships could create potential conflicts of interests in management decisions that we make. For instance, certain of our officers, directors, and employees are active investors in crypto projects themselves, and may make investment decisions that favor projects that they have personally invested in. Many of our large stockholders also make investments in these crypto projects. In addition, our co-founder and Chief Executive Officer, Mr. Armstrong, is involved in a number of initiatives related to the cryptoeconomy and more broadly. For example, Mr. Armstrong currently serves as the chief executive officer of ResearchHub Technologies, Inc., a scientific research development platform. This and other initiatives he is involved in could divert Mr. Armstrong's time and attention from overseeing our business operations which could have a negative impact on our business. Moreover, we may in the future be subject to litigation as a result of his involvement with these other initiatives.

Similarly, certain of our directors, officers, employees, and large stockholders may hold crypto assets that we are considering supporting for trading on our platform, and may be more supportive of such listing notwithstanding legal, regulatory, and other issues associated with such crypto assets. While we have instituted policies and procedures to limit and mitigate such risks, there is no assurance that such policies and procedures will be effective, or that we will be able to manage such conflicts of interests adequately. If we fail to manage these conflicts of interests, or we receive unfavorable media coverage with respect to actual or perceived conflicts of interest, our business may be harmed and the brand, reputation and credibility of our company may be adversely affected.

General Risk Factors

Adverse economic conditions may adversely affect our business.

Our performance is subject to general economic conditions, and their impact on the crypto asset markets and our customers. The United States and other key international economies have experienced cyclical downturns from time to time in which economic activity declined resulting in lower consumption rates, restricted credit, reduced profitability, weaknesses in financial markets, bankruptcies, and overall uncertainty with respect to the economy. Adverse general economic conditions have impacted the cryptoeconomy, although the extent of which remains uncertain and dependent on a variety of factors, including market adoption of crypto assets, global trends in the cryptoeconomy, central bank monetary policies, instability in the global banking system and other events beyond our control. Geopolitical developments, such as trade wars and foreign exchange limitations can also increase the severity and levels of unpredictability globally and increase the volatility of global financial and crypto asset markets. For example, the capital and credit markets have experienced extreme volatility and disruptions, resulting in steep declines in the value of crypto assets. To the extent general economic conditions and crypto assets markets materially deteriorate or the current decline continues for a prolonged period, our ability to generate revenue and to attract and retain customers could suffer and our business, operating results and financial condition could be adversely affected. Moreover, even if general economic conditions improve, there is no guarantee that the cryptoeconomy will similarly improve.

Further, in 2022, a number of blockchain protocols and crypto financial firms, and in particular protocols and firms involving high levels of financial leverage such as high-yield lending products or derivatives trading, suffered from insolvency and liquidity crises leading to the 2022 Events. Some of the 2022 Events are alleged or have been held to be the result of fraudulent activity by insiders, including misappropriation of customer funds and other illicit activity and internal controls failures. In connection with the 2022 Events, concerns were raised about the potential for a market condition where the failure of one company leads to the financial distress of other companies, which has the potential to depress the prices of assets used as collateral by other firms. If such a market condition were to become widespread

in the cryptoeconomy, we could suffer from increased counterparty risk, including defaults or bankruptcies of major customers or counterparties, which could lead to significantly reduced activity on our platform and fewer available crypto market opportunities in general. Further, forced selling of crypto assets by distressed companies could lead to lower crypto asset prices and may lead to a reduction in our revenue. To the extent that conditions in the general economic and crypto asset markets were to materially deteriorate, our ability to attract and retain customers may suffer.

Actual events involving limited liquidity, defaults, non-performance or other adverse developments that affect financial institutions, transactional counterparties or other companies in the financial services industry, or the financial services industry generally, or concerns or rumors about any such events or other similar risks, have in the past and may in the future lead to market-wide liquidity problems. For example, in March 2023, Silvergate Capital Corp. announced it would wind down operations and liquidate Silvergate Bank. Soon after, the FDIC was appointed receiver of Silicon Valley Bank and Signature Bank. In connection with these issues and issues with other financial institutions, the prices of fiat-backed stablecoins, including USDC, were temporarily impacted and may be similarly impacted again in the future. Further, if the instability in the global banking system continues or worsens, there could be additional negative ramifications, such as additional all market-wide liquidity problems or impacted access to deposits and investments for customers of affected banks and certain banking partners, and our business, operating results and financial condition could be adversely affected.

We are a remote-first company which subjects us to heightened operational risks.

Our employees and service providers work from home and we are a remote-first company. This subjects us to heightened operational risks. For example, technologies in our employees' and service providers' homes may not be as robust as in our offices and could cause the networks, information systems, applications, and other tools available to employees and service providers to be more limited or less reliable than in our offices. Further, the security systems in place at our employees' and service providers' homes may be less secure than those used in our offices, and while we have implemented technical and administrative safeguards to help protect our systems as our employees and service providers work from home, we may be subject to increased cybersecurity risk, which could expose us to risks of data or financial loss, and could disrupt our business operations. There is no guarantee that the data security and privacy safeguards we have put in place will be completely effective or that we will not encounter risks associated with employees and service providers accessing company data and systems remotely. We also face challenges due to the need to operate with the remote workforce and are addressing those challenges to minimize the impact on our ability to operate.

Being a remote-first company may make it more difficult for us to preserve our corporate culture and our employees may have decreased opportunities to collaborate in meaningful ways. Further, we cannot guarantee that being a remote-first company will not have a negative impact on employee morale and productivity. Any failure to preserve our corporate culture and foster collaboration could harm our future success, including our ability to retain and recruit personnel, innovate and operate effectively, and execute on our business strategy.

Environmental, social and governance factors may impose additional costs and expose us to new risks.

There is an increasing focus from certain investors, regulators, employees, users and other stakeholders concerning corporate responsibility, specifically related to environmental, social and governance matters ("ESG"). Some investors may use these non-financial performance factors to guide their investment strategies and, in some cases, may choose not to invest in us if they believe our policies and actions relating to corporate responsibility are inadequate. The growing investor demand for measurement of non-financial performance is addressed by third-party providers of sustainability assessment and ratings on companies. The criteria by which our corporate responsibility practices are assessed may change due to the constant evolution of the sustainability landscape, which could result in greater expectations of us and cause us to undertake costly initiatives to satisfy such new criteria. If we

elect not to or are unable to satisfy such new criteria, investors may conclude that our policies and actions with respect to corporate social responsibility are inadequate. We may face reputational damage in the event that we do not meet the ESG standards set by various constituencies.

Furthermore, if our competitors' corporate social responsibility performance is perceived to be better than ours, potential or current investors may elect to invest with our competitors instead. In addition, in the event that we communicate certain initiatives and goals regarding environmental, social and governance matters, we could fail, or be perceived to fail, in our achievement of such initiatives or goals, or we could be criticized for the scope of such initiatives or goals. If we fail to satisfy the expectations of investors, employees and other stakeholders or our initiatives are not executed as planned, our reputation and business, operating results and financial condition could be adversely impacted.

Changes in U.S. and foreign tax laws, as well as the application of such laws, could adversely impact our financial position and operating results.

We are subject to complex tax laws and regulations in the United States and a variety of foreign jurisdictions. All of these jurisdictions have in the past and may in the future make changes to their corporate income tax rates and other income tax laws which could increase our future income tax provision. For example, our future income tax obligations could be adversely affected by earnings that are lower than anticipated in jurisdictions where we have lower statutory rates and by earnings that are higher than anticipated in jurisdictions where we have higher statutory rates, by changes in the valuation of our deferred tax assets and liabilities, by changes in the amount of unrecognized tax benefits, or by changes in tax laws, regulations, accounting principles, or interpretations thereof, including changes with possible retroactive application or effect.

Our determination of our tax liability is subject to review and may be challenged by applicable U.S. and foreign tax authorities. Any adverse outcome of such a challenge could harm our operating results and financial condition. The determination of our worldwide provision for income taxes and other tax liabilities requires significant judgment and, in the ordinary course of business, there are many transactions and calculations where the ultimate tax determination is complex and uncertain. Moreover, as a multinational business, we have subsidiaries that engage in many intercompany transactions in a variety of tax jurisdictions where the ultimate tax determination is complex and uncertain. Our existing corporate structure and intercompany arrangements have been implemented in a manner we believe is in compliance with current prevailing tax laws. Furthermore, as we operate in multiple taxing jurisdictions, the application of tax laws can be subject to diverging and sometimes conflicting interpretations by tax authorities of these jurisdictions. It is not uncommon for taxing authorities in different countries to have conflicting views with respect to, among other things, the characterization and source of income or other tax items, the manner in which the arm's-length standard is applied for transfer pricing purposes, or with respect to the valuation of intellectual property. The taxing authorities of the jurisdictions in which we operate may challenge our tax treatment of certain items or the methodologies we use for valuing developed technology or intercompany arrangements, which could impact our worldwide effective tax rate and harm our financial position and operating results.

Further, any changes in the tax laws governing our activities may increase our tax expense, the amount of taxes we pay, or both. For example, the Tax Cuts and Jobs Act (the "TCJA"), enacted on December 22, 2017, significantly reformed the U.S. federal tax code, reducing the U.S. federal corporate income tax rate, making sweeping changes to the rules governing international business operations, and imposing new limitations on a number of tax benefits, including deductions for business interest and the use of net operating loss carryforwards. Effective beginning in 2022, the TCJA also eliminated the option to immediately deduct research and development expenditures and required taxpayers to amortize domestic expenditures over five years and foreign expenditures over fifteen years. The Inflation Reduction Act of 2022 (the "Inflation Reduction Act"), enacted on August 16, 2022, further amended the U.S. federal tax code, imposing a 15% minimum tax on "adjusted financial statement income" of certain corporations as well as an excise tax on the repurchase or redemption of stock by certain corporations, beginning in the 2023 tax year. In addition, over the last several years, the Organization for Economic

Cooperation and Development has been working on a Base Erosion and Profit Shifting Project that, if implemented, would change various aspects of the existing framework under which our tax obligations are determined in many of the countries in which we do business. As of July 2023, nearly 140 countries have approved a framework that imposes a minimum tax rate of 15%, among other provisions. As this framework is subject to further negotiation and implementation by each member country, the timing and ultimate impact of any such changes on our tax obligations are uncertain. There can be no assurance that future tax law changes will not increase the rate of the corporate income tax, impose new limitations on deductions, credits or other tax benefits, or make other changes that may adversely affect our business, cash flows or financial performance.

In addition, the IRS has yet to issue guidance on a number of important issues regarding the tax treatment of cryptocurrency and the products we provide to our customers and from which we derive our income. In the absence of such guidance, we will take positions with respect to any such unsettled issues. There is no assurance that the IRS or a court will agree with the positions taken by us, in which case tax penalties and interest may be imposed that could adversely affect our business, cash flows or financial performance.

We also are subject to non-income taxes, such as payroll, sales, use, value-added, digital services, net worth, property, and goods and services taxes in the United States and various foreign jurisdictions. Specifically, we may be subject to new allocations of tax as a result of increasing efforts by certain jurisdictions to tax activities that may not have been subject to tax under existing tax principles. Companies such as ours may be adversely impacted by such taxes. Tax authorities may disagree with certain positions we have taken. As a result, we may have exposure to additional tax liabilities that could have an adverse effect on our operating results and financial condition.

As a result of these and other factors, the ultimate amount of tax obligations owed may differ from the amounts recorded in our financial statements and any such difference may harm our operating results in future periods in which we change our estimates of our tax obligations or in which the ultimate tax outcome is determined.

Our ability to use our deferred tax assets may be subject to certain limitations under U.S. or foreign law.

Realization of our deferred tax assets, in the form of future domestic or foreign tax deductions, credits or other tax benefits, will depend on future taxable income, and there is a risk that some or all of such tax assets could be subject to limitation or otherwise unavailable to offset future income tax liabilities, all of which could adversely affect our operating results. For example, future changes in our stock ownership, the causes of which may be outside of our control, could result in an ownership change under Section 382 of the Internal Revenue Code of 1986, as amended (the “Code”), which could limit our use of such tax assets in certain circumstances. Similarly, additional changes may be made to U.S. (federal and state) and foreign tax laws which could further limit our ability to fully utilize these tax assets against future taxable income.

Under the Inflation Reduction Act, our ability to utilize tax deductions or losses from prior years may be limited by the imposition of the 15% minimum tax if, in future years, such minimum tax applies to us. Therefore, we may be required to pay additional U.S. federal income taxes in future years despite any available future tax deductions, U.S. federal net operating loss (“NOL”) carryforwards, credits or other tax benefits that we accumulate.

Fluctuations in currency exchange rates could harm our operating results and financial condition.

Revenue generated and expenses incurred from our international operations are often denominated in the currencies of the local countries. Accordingly, changes in the value of foreign currencies relative to the U.S. dollar can affect our revenue and operating results reflected in our U.S. dollar-denominated financial statements. Our financial results are also subject to changes in exchange rates that impact the settlement of transactions in non-functional currencies. As a result, it could be more difficult to detect

underlying trends in our business and operating results. To the extent that fluctuations in currency exchange rates cause our operating results to differ from expectations of investors, the market price of our Class A common stock could be adversely impacted. From time to time, we may engage in currency hedging activities to limit the risk of foreign currency exchange rate fluctuations. To the extent we use hedging instruments to hedge exposure to fluctuations in foreign currency exchange rates, the use of such hedging instruments may not offset any or more than a portion of the adverse financial effects of unfavorable movements in foreign exchange rates over the limited time the hedges are in place, and may introduce additional risks if we are unable to structure effective hedges with such instruments.

If our estimates or judgment relating to our critical accounting estimates prove to be incorrect, our operating results could be adversely affected.

The preparation of financial statements in conformity with generally accepted accounting principles (“GAAP”) requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, as provided in the section titled “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Estimates” in Part II, Item 7 of this Annual Report on Form 10-K. The results of these estimates form the basis for making judgments about the carrying values of assets, liabilities, and equity, and the amount of revenue and expenses that are not readily apparent from other sources. Significant estimates and judgments that comprise our critical accounting estimates involve the valuation of assets acquired and liabilities assumed in business combinations, valuation of strategic investments, evaluation of tax positions, and evaluation of legal and other contingencies. Our operating results may be adversely affected if our assumptions change or if actual circumstances differ from those in our assumptions, which could cause our operating results to fall below the expectations of analysts and investors, resulting in a decline in the trading price of our Class A common stock.

We may be adversely affected by natural disasters, pandemics, and other catastrophic events, and by man-made problems such as terrorism, that could disrupt our business operations, and our business continuity and disaster recovery plans may not adequately protect us from a serious disaster.

Natural disasters or other catastrophic events may also cause damage or disruption to our operations, international commerce, and the global economy, and could have an adverse effect on our business, operating results, and financial condition. Our business operations are subject to interruption by natural disasters, fire, power shortages, and other events beyond our control. In addition, our global operations expose us to risks associated with public health crises, such as pandemics and epidemics, which could harm our business and cause our operating results to suffer. For example, the COVID-19 pandemic and the related precautionary measures that we adopted have in the past resulted, and could in the future result, in difficulties or changes to our customer support, or create operational or other challenges, any of which could adversely impact our business and operating results. Further, acts of terrorism, labor activism or unrest, and other geopolitical unrest, including ongoing regional conflicts around the world, could cause disruptions in our business or the businesses of our partners or the economy as a whole. In the event of a natural disaster, including a major earthquake, blizzard, or hurricane, or a catastrophic event such as a fire, power loss, or telecommunications failure, we may be unable to continue our operations and may endure system interruptions, reputational harm, delays in development of our platform, lengthy interruptions in service, breaches of data security, and loss of critical data, all of which could have an adverse effect on our future operating results. We do not maintain insurance sufficient to compensate us for the potentially significant losses that could result from disruptions to our services. Additionally, all the aforementioned risks may be further increased if we do not implement a disaster recovery plan or our partners’ disaster recovery plans prove to be inadequate. To the extent natural disasters or other catastrophic events concurrently impact data centers we rely on in connection with private key restoration, customers will experience significant delays in withdrawing funds, or in the extreme we may suffer loss of customer funds.

The requirements of being a public company, including maintaining adequate internal control over our financial and management systems, may strain our resources, divert management's attention, and affect our ability to attract and retain executive management and qualified board members.

As a public company we incur significant legal, accounting, and other expenses. We are subject to reporting requirements of the Exchange Act, the Sarbanes-Oxley Act of 2002, the rules subsequently implemented by the SEC, the rules and regulations of the listing standards of The Nasdaq Stock Market LLC ("Nasdaq") and other applicable securities rules and regulations. Stockholder activism, the current political and social environment and the current high level of government intervention and regulatory reform may lead to substantial new regulations and disclosure obligations, which will likely result in additional compliance costs and could impact the manner in which we operate our business in ways we cannot currently anticipate. Compliance with these rules and regulations may strain our financial and management systems, internal controls, and employees. The Exchange Act requires, among other things, that we file annual, quarterly, and current reports with respect to our business and operating results. Moreover, the Sarbanes-Oxley Act of 2002 requires, among other things, that we maintain effective disclosure controls and procedures, and internal control over financial reporting. In order to maintain and, if required, improve our disclosure controls and procedures, and internal control over financial reporting to meet this standard, significant resources and management oversight may be required. If we encounter material weaknesses or deficiencies in our internal control over financial reporting, we may not detect errors on a timely basis and our consolidated financial statements may be materially misstated. Effective internal control is necessary for us to produce reliable financial reports and is important to prevent fraud.

We have incurred and expect to continue to incur significant expenses and devote substantial management effort toward ensuring compliance with the annual auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act of 2002. As a result of the complexity involved in complying with the rules and regulations applicable to public companies, our management's attention may be diverted from other business concerns, which could harm our business, operating results, and financial condition. Although we have already hired additional employees to assist us in complying with these requirements, our finance team is small and we may need to hire more employees in the future, or engage outside consultants, which will increase our operating expenses.

We might require additional capital to support business growth, and this capital might not be available.

We have funded our operations since inception primarily through debt, equity financings and revenue generated by our products and services. We cannot be certain when or if our operations will generate sufficient cash to fully fund our ongoing operations or the growth of our business. We intend to continue to make investments in our business, including developing new products and services, enhancing our operating infrastructure, expanding our international operations, and acquiring complementary businesses and technologies, all of which may require us to secure additional funds. Additional financing may not be available on terms favorable to us, if at all, including due to general macroeconomic conditions, crypto market conditions and any disruptions in the crypto market, instability in the global banking system, increasing regulatory uncertainty and scrutiny or other unforeseen factors. In the event of a downgrade of our credit rating, our ability to raise additional financing may be adversely affected and any future debt offerings or credit arrangements we propose to enter into may be on less favorable terms or terms that may not be acceptable to us. In addition, even if debt financing is available, the cost of additional financing may be significantly higher than our current debt. If we incur additional debt, the debt holders would have rights senior to holders of our common stock to make claims on our assets, and the terms of any debt could restrict our operations, including our ability to pay dividends on our common stock. Furthermore, we have authorized the issuance of "blank check" preferred stock and common stock that our board of directors could use to, among other things, issue shares of our capital stock in the form of blockchain tokens, implement a stockholder rights plan, or issue other shares of preferred stock or common stock. We may issue shares of capital stock, including in the form of blockchain tokens, to our customers in connection with customer reward or loyalty programs. If we issue additional equity securities, including in the form of blockchain tokens, stockholders will experience dilution, and the new

equity securities could have rights senior to those of our currently authorized and issued common stock. The trading prices for our common stock may be highly volatile, which may reduce our ability to access capital on favorable terms or at all. In addition, a slowdown or other sustained adverse downturn in the general economic or crypto asset markets could adversely affect our business and the value of our Class A common stock. Because our decision to raise capital in the future will depend on numerous considerations, including factors beyond our control, we cannot predict or estimate the amount, timing, or nature of any future issuances of securities. As a result, our stockholders bear the risk of future issuances of debt or equity securities reducing the value of our Class A common stock and diluting their interests. Our inability to obtain adequate financing or financing on terms satisfactory to us, when we require it, could significantly limit our ability to continue supporting our business growth and responding to business challenges.

Risks Related to Ownership of Our Class A Common Stock

The market price of our Class A common stock may be volatile, and could decline significantly and rapidly. Market volatility may affect the value of an investment in our Class A common stock and could subject us to litigation.

Prior to the listing of our Class A common stock on Nasdaq, there was no public market for shares of our Class A common stock. Technology stocks have historically experienced high levels of volatility. The market price of our Class A common stock also could be subject to wide fluctuations in response to the risk factors described in this Annual Report on Form 10-K and others beyond our control, including:

- the number of shares of our Class A common stock publicly owned and available for trading;
- overall performance of the equity markets or publicly-listed financial services and technology companies;
- our actual or anticipated operating performance and the operating performance of our competitors;
- changes in the projected operational and financial results we provide to the public or our failure to meet those projections;
- failure of securities analysts to initiate or maintain coverage of us, changes in financial estimates by any securities analysts who follow our company, or our failure to meet the estimates or the expectations of investors;
- any major change in our board of directors, management, or key personnel;
- if we issue additional shares of capital stock, including in the form of blockchain tokens, in connection with customer reward or loyalty programs;
- issuance of shares of our Class A common stock, whether in connection with an acquisition or upon conversion of some or all of our outstanding 2026 Convertible Notes;
- the highly volatile nature of the cryptoeconomy and the prices of crypto assets;
- rumors and market speculation involving the cryptoeconomy or us or other companies in our industry;
- announcements by us or our competitors of significant innovations, new products, services, features, integrations or capabilities, acquisitions, strategic investments, partnerships, joint ventures, or capital commitments; and

- other events or factors, including those resulting from political instability and acts of war or terrorism, regional conflicts around the world, government shutdowns, bank failures or responses to these events.

Furthermore, the stock market has recently experienced extreme price and volume fluctuations that have affected and continue to affect the market prices of equity securities of many companies and financial services and technology companies in particular. These fluctuations often have been unrelated or disproportionate to the operating performance of those companies. These broad market and industry fluctuations, as well as general macroeconomic, political and market conditions such as recessions, interest rate changes, or international currency fluctuations, may negatively impact the market price of our Class A common stock. In the past, companies that have experienced volatility in the market price of their stock have been subject to securities class action litigation. We are currently subject to stockholder litigation and in June 2023 the SEC filed the June 2023 SEC Complaint, as described in the section titled “Legal Proceedings” in Part I, Item 3 of this Annual Report on Form 10-K, and may continue to be the target of these types of actions or additional regulatory uncertainty and scrutiny in the future. Securities or regulatory actions against us could result in substantial costs and divert our management’s attention from other business concerns, which could harm our business.

The dual class structure of our common stock has the effect of concentrating voting control with those stockholders, including our directors, executive officers, and 5% stockholders, and their respective affiliates. As a result of this structure, our Chief Executive Officer has control over key decision making as a result of his control of a majority of our voting stock. This ownership will limit or preclude your ability to influence corporate matters, including the election of directors, amendments of our organizational documents, and any merger, consolidation, sale of all or substantially all of our assets, or other major corporate transaction requiring stockholder approval.

Our Class B common stock has twenty votes per share, and our Class A common stock has one vote per share. Mr. Armstrong is currently able to exercise voting rights with respect to a majority of the voting power of our outstanding capital stock and, along with our directors, other executive officers, and 5% stockholders, and their affiliates, these stockholders hold in the aggregate a substantial majority of the voting power of our capital stock. Because of the twenty-to-one voting ratio between our Class B common stock and our Class A common stock, the holders of our Class B common stock, including Mr. Armstrong, collectively are expected to continue to control a significant percentage of the combined voting power of our common stock and therefore be able to control all matters submitted to our stockholders for approval until the earliest to occur of (i) the date fixed by the board of directors that is no less than 61 days and no more than 180 days after the date that the aggregate number of shares of Class B common stock held by Brian Armstrong and his affiliates is less than 25% of the aggregate number of shares of Class B common stock held by Mr. Armstrong and his affiliates on April 1, 2021, the date of effectiveness of the registration statement on Form S-1 for the listing of our Class A common stock on Nasdaq; (ii) the date and time specified by affirmative vote of the holders of at least 66-2/3% of the outstanding shares of Class B common stock, voting as a single class, and the affirmative vote of at least 66-2/3% of the then serving members of our board of directors, which must include the affirmative vote of Mr. Armstrong, if either (A) Mr. Armstrong is serving on our board of directors and has not been terminated for cause or resigned except for good reason (as each term is defined in our restated certificate of incorporation) from his position as our Chief Executive Officer or (B) Mr. Armstrong has not been removed for cause or resigned from the position of Chairman of the board of directors; and (iii) the death or disability (as defined in our restated certificate of incorporation) of Mr. Armstrong, when all outstanding shares of Class B common stock will convert automatically into shares of Class A common stock. Holders of our Class A common stock are not entitled to vote separately as a single class except under certain limited circumstances. This concentrated control may limit or preclude your ability to influence corporate matters for the foreseeable future, including the election of directors, amendments of our organizational documents, and any merger, consolidation, sale of all or substantially all of our assets, or other major corporate transaction requiring stockholder approval. In addition, this may prevent or discourage unsolicited acquisition proposals or

offers for our capital stock that you may believe are in your best interest as one of our stockholders. In addition, Mr. Armstrong has the ability to control the management and major strategic investments of our company as a result of his position as our Chief Executive Officer and his ability to control the election or replacement of our directors. As a board member and officer, Mr. Armstrong owes a fiduciary duty to our stockholders and must act in good faith in a manner he reasonably believes to be in the best interests of our stockholders. As a stockholder, even a controlling stockholder, Mr. Armstrong is entitled to vote his shares, and shares over which he has voting control, in his own interests, which may not always be in the interests of our stockholders generally.

Future transfers by holders of Class B common stock will generally result in those shares converting to Class A common stock, subject to limited exceptions, such as certain transfers effected for estate planning purposes. The conversion of Class B common stock to Class A common stock will have the effect, over time, of increasing the relative voting power of those holders of Class B common stock, including Mr. Armstrong, who retain their shares in the long term. Moreover, it is possible that one or more of the persons or entities holding our Class B common stock could gain significant voting control as other holders of Class B common stock sell or otherwise convert their shares into Class A common stock.

The dual class structure of our common stock may adversely affect the trading market for our Class A common stock.

Certain stock index providers exclude companies with multiple classes of shares of common stock from being added to certain stock indices. In addition, several stockholder advisory firms and large institutional investors oppose the use of multiple class structures. As a result, the dual class structure of our common stock may prevent the inclusion of our Class A common stock in such indices, may cause stockholder advisory firms to publish negative commentary about our corporate governance practices or otherwise seek to cause us to change our capital structure, and may result in large institutional investors not purchasing shares of our Class A common stock. Any exclusion from stock indices could result in less demand for our Class A common stock. Any actions or publications by stockholder advisory firms or institutional investors critical of our corporate governance practices or capital structure could also adversely affect the value of our Class A common stock.

Sales or distribution of substantial amounts of our Class A common stock, or the perception that such sales or distributions might occur, could cause the market price of our Class A common stock to decline.

The sale or distribution of a substantial number of shares of our Class A common stock, particularly sales by us or our directors, executive officers, and principal stockholders, or the perception that these sales or distributions might occur in large quantities, could cause the market price of our Class A common stock to decline.

In addition, we have filed a registration statement to register shares reserved for future issuance under our equity compensation plans. All of the shares of Class A common stock and Class B common stock issuable upon the exercise of stock options or vesting and settlement of restricted stock units and performance restricted stock units will be able to be freely sold in the public market upon issuance, subject to applicable vesting requirements and compliance by affiliates with Rule 144 under the Securities Act.

Further, certain holders of shares of our common stock will have rights, subject to some conditions, to require us to file registration statements for the public resale of shares of Class A common stock or to include such shares in registration statements that we may file for us or other stockholders. Any registration statement we file to register additional shares, whether as a result of registration rights or otherwise, could cause the market price of our Class A common stock to decline or be volatile.

We also may issue our capital stock or securities convertible into our capital stock, including in the form of blockchain tokens, from time to time in connection with a financing, an acquisition, investments, pursuant to customer rewards, loyalty programs, and other incentive plans, or otherwise. Any such

issuance could result in substantial dilution to our existing stockholders and cause the market price of our Class A common stock to decline.

If securities or industry analysts do not publish or cease publishing research, or publish inaccurate or unfavorable research, about our business, the price of our Class A common stock and its liquidity could decline.

The trading market for our Class A common stock may be influenced by the research and reports that securities or industry analysts publish about us or our business, our market, and our competitors. We do not have any control over these analysts. If securities and industry analysts cease coverage of us altogether, the market price for our Class A common stock may be negatively affected. If one or more of the analysts who cover us downgrade our Class A common stock, or publish inaccurate or unfavorable research about our business, the price of our Class A common stock may decline. If one or more of these analysts cease coverage of us or fail to publish reports on us regularly, demand for our Class A common stock could decrease, which might cause our Class A common stock price and trading volume to decline. In light of the unpredictability inherent in our business, our financial outlook commentary may differ from analysts' expectations, which could cause volatility to the price of our Class A common stock.

We are not obligated to, and do not intend to pay dividends on any class of our common stock for the foreseeable future.

We have never declared or paid any cash dividends on any class of our common stock, are not obligated to pay, and do not intend to pay any cash dividends in the foreseeable future. We anticipate that for the foreseeable future we will retain all of our future earnings for use in the development of our business and for general corporate purposes. Any determination to pay dividends in the future will be at the discretion of our board of directors.

Our payment of any dividends will be subject to contractual and legal restrictions and other factors that our board of directors deems relevant. Moreover, agreements governing any future indebtedness of ours may further limit our ability to pay dividends. In addition, our ability to pay dividends is limited by law. There is no assurance that we will be able or that our board of directors will decide to declare any dividends on any class of our common stock.

Accordingly, investors may have to rely on sales of their Class A common stock after price appreciation, which may never occur, as the only way to realize any future gains on their investment.

Provisions in our charter documents and under Delaware law, and certain rules imposed by regulatory authorities, could make an acquisition of us, which may be beneficial to our stockholders, more difficult, limit attempts by our stockholders to replace or remove our current management, limit our stockholders' ability to obtain a favorable judicial forum for disputes with us or our directors, officers, or employees, and limit the price of our Class A common stock.

Provisions in our restated certificate of incorporation and restated bylaws may have the effect of delaying or preventing a merger, acquisition, or other change of control of our company that the stockholders may consider favorable. In addition, because our board of directors is responsible for appointing the members of our management team, these provisions may frustrate or prevent any attempts by our stockholders to replace or remove our current management by making it more difficult for stockholders to replace members of our board of directors. Our restated certificate of incorporation and restated bylaws include provisions that:

- permit our board of directors to establish the number of directors and fill any vacancies and newly-created directorships;
- require super-majority voting to amend some provisions in our restated certificate of incorporation and restated bylaws;

- authorize the issuance of “blank check” preferred stock and common stock that our board of directors could use to implement a stockholder rights plan or issue other shares of preferred stock or common stock, including blockchain tokens;
- provide that only our Chief Executive Officer, the chairperson of our board of directors, or a majority of our board of directors will be authorized to call a special meeting of stockholders;
- eliminate the ability of our stockholders to call special meetings of stockholders;
- prohibit cumulative voting;
- provide for a dual class common stock structure in which holders of our Class B common stock have the ability to control the outcome of matters requiring stockholder approval, even if they own significantly less than a majority of the outstanding shares of our Class A common stock and Class B common stock, including the election of directors and significant corporate transactions, such as a merger or other sale of our company or its assets;
- provide that the board of directors is expressly authorized to make, alter, or repeal our restated bylaws; and
- provide for advance notice requirements for nominations for election to our board of directors or for proposing matters that can be acted upon by stockholders at annual stockholder meetings.

Moreover, Section 203 of the Delaware General Corporation Law (the “DGCL”) may discourage, delay, or prevent a change of control of our company. Section 203 imposes certain restrictions on mergers, business combinations, and other transactions between holders of 15% or more of our common stock and us.

In addition, a third party attempting to acquire us or a substantial position in our common stock may be delayed or ultimately prevented from doing so by change in ownership or control regulations to which our regulated broker-dealer subsidiaries are subject. FINRA Rule 1017 generally provides that FINRA approval must be obtained in connection with any transaction resulting in a single person or entity owning, directly or indirectly, 25% or more of a member firm’s equity and would include a change of control of a parent company.

Our restated certificate of incorporation contains an exclusive forum provision for certain claims, which could limit our stockholders’ ability to obtain a favorable judicial forum for disputes with us or our directors, officers, or employees.

Our restated certificate of incorporation, to the fullest extent permitted by law, provides that the Court of Chancery of the State of Delaware is the exclusive forum for any derivative action or proceeding brought on our behalf; any action asserting a claim that is based upon a breach of fiduciary duty; any action asserting a claim against us or any current or former director, officer, stockholder, employee or agent of ours, arising pursuant to the DGCL, our restated certificate of incorporation, or our restated bylaws; any action asserting a claim against us that is governed by the internal affairs doctrine; or any action asserting an “internal corporate claim” as defined in Section 115 of the DGCL.

Moreover, Section 22 of the Securities Act creates concurrent jurisdiction for federal and state courts over all claims brought to enforce any duty or liability created by the Securities Act or the rules and regulations thereunder and our restated certificate of incorporation provides that the federal district courts of the United States of America are, to the fullest extent permitted by law, the exclusive forum for resolving any complaint asserting a cause of action arising under the Securities Act, or a Federal Forum Provision, unless we consent in writing to the selection of an alternative forum. Our decision to adopt a Federal Forum Provision followed a decision by the Supreme Court of the State of Delaware holding that such provisions are facially valid under Delaware law. While there can be no assurance that federal or state courts will follow the holding of the Delaware Supreme Court or determine that the Federal Forum

Provision should be enforced in a particular case, application of the Federal Forum Provision means that suits brought by our stockholders to enforce any duty or liability created by the Securities Act must be brought in federal court and cannot be brought in state court. Section 27 of the Exchange Act creates exclusive federal jurisdiction over all claims brought to enforce any duty or liability created by the Exchange Act or the rules and regulations thereunder. The Federal Forum Provision applies to suits brought to enforce any duty or liability created by the Exchange Act to the fullest extent permitted by law. Accordingly, actions by our stockholders to enforce any duty or liability created by the Exchange Act or the rules and regulations thereunder must be brought in federal court. Our stockholders will not be deemed to have waived our compliance with the federal securities laws and the regulations promulgated thereunder.

Any person or entity purchasing or otherwise acquiring or holding any interest in any of our securities will be deemed to have notice of and consented to our exclusive forum provisions, including the Federal Forum Provision. These provisions may limit our stockholders' ability to bring a claim in a judicial forum they find favorable for disputes with us or our directors, officers, or other employees, which may discourage lawsuits against us and our directors, officers, and other employees. Alternatively, if a court were to find the choice of forum provision contained in our restated certificate of incorporation to be inapplicable or unenforceable in an action, we may incur additional costs associated with resolving such action in other jurisdictions, which could harm our business, operating results, and financial condition.

Item 1B. Unresolved Staff Comments

Not applicable.

Item 1C. Cybersecurity

Cybersecurity Risk Management and Strategy

We have developed and implemented cybersecurity risk management processes intended to protect the confidentiality, integrity, and availability of our critical systems and information. While everyone at our company plays a part in managing cybersecurity risks, primary cybersecurity oversight responsibility is shared by our board of directors, our audit and compliance committee ("Audit Committee"), and senior management. Our cybersecurity risk management program is integrated into our overall enterprise risk management program.

Our cybersecurity risk management program includes:

- physical, technological, and administrative controls intended to support our cybersecurity and data governance framework, including protections designed to protect the confidentiality, integrity, and availability of our key information systems and customer, employee, partner, and other third-party information stored on those systems, such as access controls, encryption, data handling requirements, and other cybersecurity safeguards, and internal policies that govern our cybersecurity risk management and data protection practices;
- a defined procedure for timely incident detection, containment, response, and remediation, including a written security incident response plan that includes procedures for responding to cybersecurity incidents;
- cybersecurity risk assessment processes designed to help identify material cybersecurity risks to our critical systems, information, products, services, and broader enterprise IT environment;
- a security team responsible for managing our cybersecurity risk assessment processes and security controls;
- the use of external consultants or other third-party experts and service providers, where considered appropriate, to assess, test, or otherwise assist with aspects of our cybersecurity controls;

- annual cybersecurity and privacy training of employees, including incident response personnel and senior management, and specialized training for certain teams depending on their role and/or access to certain types of information, such as consumer information; and
- a third-party risk management process that includes internal vetting of certain third-party vendors and service providers with whom we may share data.

Over the past fiscal year, we have not identified risks from known cybersecurity threats, including as a result of any prior cybersecurity incidents we have experienced from time to time, that have materially affected or are reasonably likely to materially affect us, including our operations, business strategy, operating results, or financial condition. We will continue to monitor and assess our cybersecurity risk management program as well as invest in and seek to improve such systems and processes as appropriate. If we were to experience a material cybersecurity incident in the future, such incident may have a material effect, including on our operations, business strategy, operating results, or financial condition. For more information regarding cybersecurity risks that we face and potential impacts on our business related thereto, see the section titled “*Risk Factors*” in Part I, Item 1A of this Annual Report on Form 10-K.

Cybersecurity Governance

With oversight from our board of directors, the Audit Committee is primarily responsible for assisting our board of directors in fulfilling its ultimate oversight responsibilities relating to risk assessment and management, including relating to cybersecurity and other information technology risks. The Audit Committee oversees management’s implementation of our cybersecurity risk management program, including processes and policies for determining risk tolerance, and reviews management’s strategies for adequately mitigating and managing identified risks, including risks relating to cybersecurity threats.

The Audit Committee has established the Enterprise Risk Management Working Group (“ERMWG”), comprising members of our senior management team and other senior leaders, to provide executive oversight of our enterprise risk management program. Our Chief Security Officer (“CSO”) is a member of the ERMWG, and together with our Chief Information Security Officer (“CISO”) leads an ERMWG sub-working group related to cybersecurity, which meets periodically to review and discuss emerging and key risks relating to cybersecurity at the company, and to provide regular updates to the ERMWG.

The Audit Committee receives updates from the ERMWG and from members of management, including our CSO and CISO, on our cybersecurity risks at its quarterly meetings, and reviews metrics about cyber threat response preparedness, program maturity milestones, risk mitigation status, and the current and emerging threat landscape. In addition, management updates the Audit Committee, as necessary, regarding any material cybersecurity threats or incidents, as well as any incidents with lesser impact potential.

The Audit Committee reports to our board of directors regarding its activities, including those related to key cybersecurity risks, mitigation strategies, and ongoing developments, on a quarterly basis or more frequently as needed. The board of directors also receives updates from our CSO and CISO on our cyber risk management program and other matters relating to our data privacy and cybersecurity approach, including risk mitigations to bolster and enhance our data protection and data governance framework. Members of our board of directors receive presentations that include cybersecurity topics and the management of key cybersecurity risks from our CSO and CISO as part of the continuing education of our board of directors on topics that impact public companies. Finally, our board of directors annually reviews and is required to approve our Global Information Security Program Policy and any changes recommended by our CSO.

Our management team, including our CSO and CISO, is responsible for assessing and managing our material risks from cybersecurity threats and for our overall cybersecurity risk management program on a day-to-day basis, and supervises both our internal cybersecurity personnel and the relationship with our retained external cybersecurity consultants. Our CSO's and CISO's experience includes years of working in the cybersecurity field in various industries, including the financial services industry.

Our management team supervises efforts to prevent, detect, mitigate, and remediate cybersecurity risks and incidents through various means, including through periodic ERMWG sub-working group meetings; briefings from internal security personnel; threat intelligence and other information obtained from governmental, public or private sources, including external consultants engaged by us; and alerts and reports produced by security tools deployed in the IT environment.

Item 2. Properties

We are a remote-first company, meaning that for the vast majority of roles, our employees have the option to work remotely. Substantially all of our executive team meetings are held virtually, with meetings occasionally held in-person at locations that are either not in our offices or in various of our offices distributed around the world. We hold all of our stockholder meetings virtually. As a result of this strategy, we do not maintain a corporate headquarters or principal executive offices, but do maintain physical offices in select major cities around the world for purposes of collaboration and team building. We currently lease facilities in various locations in the United States and other countries around the world.

We believe that our facilities are adequate to meet our needs for the immediate future, and that, should we need additional physical office space, suitable additional space will be available in the future.

Item 3. Legal Proceedings

For a description of material legal proceedings in which we are involved, see *Note 22. Commitments and Contingencies*, of the Notes to our consolidated financial statements included in Part II, Item 8 of this Annual Report on Form 10-K, which is incorporated herein by reference.

We are not presently a party to any other legal or regulatory proceedings that in the opinion of our management, if determined adversely to us, would individually or taken together have a material adverse effect on our business, operating results, financial condition, or cash flows. However, we are subject to regulatory oversight by numerous state, federal, and foreign regulators and we are and we may become subject to various legal proceedings, inquiries, investigations, and demand letters that arise in the course of our business. For example, we have received investigative subpoenas and other inquiries from various state agencies and attorneys general for documents and information pertaining to our business practices and policies, customer complaints, asset launches, certain ongoing litigation, and certain transfers of crypto assets. In addition, we have received investigative subpoenas from the SEC and similar subpoenas and demand letters from various state regulators for documents and information about certain of our customer programs, operations, and intended future products, including our staking, stablecoin and yield-generating products. We intend to cooperate fully with such investigations. These examples are not exhaustive.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information for Common Stock

Our Class A common stock began trading on the Nasdaq Global Select Market under the symbol "COIN" on April 14, 2021. Prior to that date, there was no public trading market for our Class A common stock.

Our Class B common stock is not listed or traded on any stock exchange.

Holders of Record

As of the close of business on February 8, 2024, there were 279 registered holders of record of our Class A common stock and 8 registered holders of record of our Class B common stock. Since many of our shares of Class A common stock are held by brokers and other institutions on behalf of stockholders, we are unable to estimate the total number of stockholders represented by these record holders.

Dividend Policy

We have never declared or paid cash dividends on our capital stock. We are not obligated to pay any dividends on the Class A common stock or Class B common stock, and we currently do not anticipate paying any dividends on our capital stock in the foreseeable future. Any future determination to declare dividends will be made at the discretion of our board of directors and will depend on our financial condition, operating results, capital requirements, general business conditions, and other factors that our board of directors may deem relevant.

Stock Performance Graph

The following performance graph shall not be deemed "soliciting material" or to be "filed" with the SEC for purposes of Section 18 of the Exchange Act, or otherwise subject to the liabilities under that Section, and shall not be deemed to be incorporated by reference into any of our filings under the Exchange Act or Securities Act.

The graph below compares the cumulative total return to stockholders of our Class A common stock between April 14, 2021 (the date our Class A common stock commenced trading on the Nasdaq Global Select Market) and December 31, 2023 relative to the Nasdaq Composite Index, the Nasdaq U.S. Benchmark Financial Services Index, the S&P North American Technology Index, and the price of Bitcoin. This graph assumes the investment of \$100 in our Class A common stock at the closing sale price of \$328.28 per share on April 14, 2021, and for each index and assumes the reinvestment of dividends, if any.

The comparisons shown in the graph below are based upon historical data and should not be considered an indication of potential future stock price performance. Historical Bitcoin prices are primarily based on data obtained from our platform. Where such data is not available (e.g., during a platform outage), such data may sometimes be sourced from other third-party exchanges or data providers.

Comparison of 33 Months Cumulative Total Return

Assumes Initial Investment of \$100 December 2023

Recent Sales of Unregistered Securities

None.

Issuer Purchases of Equity Securities

The following table contains information relating to the repurchases of our Class A common stock made by us in the three months ended December 31, 2023:

Period	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid per Share
October 1 – October 31, 2023	—	\$ —
November 1 – November 30, 2023	—	—
December 1 – December 31, 2023	4	18.13
	<u>4</u>	<u>\$ 18.13</u>

(1) Represents shares of unvested Class A common stock that were repurchased by us from former employees upon termination of employment in accordance with the terms of the employees' stock option agreements. We repurchased the shares from the former employees at the respective original exercise prices.

Item 6. [Reserved]

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our consolidated financial statements and the accompanying notes thereto included elsewhere in this Annual Report on Form 10-K. The following discussion and analysis contain forward-looking statements that involve risks and uncertainties, as well as assumptions that, if they never materialize or prove incorrect, could cause our results to differ materially from those expressed or implied by such forward-looking statements. Factors that could cause or contribute to these differences include, but are not limited to, those identified below and those discussed in the section titled Risk Factors in Part I, Item 1A of this Annual Report on Form 10-K. Unless otherwise expressly stated or the context otherwise requires, references to "we," "our," "us," "the Company," and "Coinbase" refer to Coinbase Global, Inc. and its consolidated subsidiaries.

Executive Overview

This executive overview of Management's Discussion and Analysis of Financial Condition and Results of Operations highlights selected information and does not contain all of the information that is important to readers of this Annual Report on Form 10-K.

In 2023, we paired operational excellence with product innovation to deliver a strong year of execution against our product roadmap.

For the year ended December 31, 2023, our net revenue was \$2.9 billion, including \$1.5 billion in transaction revenue and \$1.4 billion in subscription and services revenue. For the year ended December 31, 2022, our net revenue was \$3.1 billion, including \$2.4 billion in transaction revenue and \$0.8 billion in subscription and services revenue.

For the year ended December 31, 2023, our net income was \$0.1 billion and Adjusted EBITDA was \$1.0 billion. For the year ended December 31, 2022, our net loss was \$2.6 billion and Adjusted EBITDA was negative \$0.4 billion.

Beyond the numbers, we accelerated product velocity and improved our existing product suite, while laying important foundations for future growth. We acquired key licenses, registrations and launched operations into six new markets.

In 2024 Coinbase will focus on three main priorities. First, driving revenue through improving our core trading and USDC. Second, driving utility in crypto with experiments in payments using USDC and Base. Lastly, we will continue to drive regulatory clarity for the industry. All told, Coinbase is a fundamentally stronger company today than a year ago, and we are in a strong financial position to capitalize on the opportunities ahead.

Key Business Metrics

In addition to the measures presented in our consolidated financial statements, we use the key business metrics listed below to evaluate our business, measure our performance, identify trends affecting our business, and make strategic decisions:

	Year Ended December 31,			% Change	
	2023	2022	2021	2023	2022
MTUs (<i>in millions</i>)	7.0	8.3	11.2	(16)	(26)
Trading Volume (<i>in billions</i>)	\$ 468	\$ 830	\$ 1,671	(44)	(50)
Net income (loss) (<i>in millions</i>)	\$ 95	\$ (2,625)	\$ 3,624	104	(172)
Adjusted EBITDA ⁽¹⁾ (<i>in millions</i>)	\$ 964	\$ (371)	\$ 4,090	360	(109)

(1) See the section titled “Non-GAAP Financial Measure” below for a reconciliation of net income (loss) to Adjusted EBITDA and an explanation for why we consider Adjusted EBITDA to be a helpful metric for investors.

Monthly Transacting Users

We define a Monthly Transacting User (“MTU”) as a consumer who actively or passively transacts in one or more products on our platform at least once during the rolling 28-day period ending on the date of measurement. MTUs presented for the end of a quarter are the average of each month’s MTUs in each respective quarter. MTUs presented as of the end of a year represent the MTUs for the last quarter of that year. The annual average MTUs for the years ended December 31, 2023, 2022, and 2021, were 7.4 million, 8.8 million and 8.4 million, respectively. MTUs engage in transactions that generate both transaction revenue and subscription and services revenue. Revenue-generating transactions include active transactions such as buying or selling crypto assets or passive transactions such as earning a staking reward. MTUs also engage in transactions that are non-revenue generating such as send and receive. MTUs may overstate the number of unique consumers due to differences in product architecture or user behavior.

MTUs declined for the year ended December 31, 2023 as compared to 2022 due to a 0.8 million decrease in staking users driven by updates to our staking service, which required users to manually opt-in to certain networks within a notice period and a 0.4 million decrease in trading users in line with lower Trading Volume. MTUs declined for the year ended December 31, 2022 as compared to 2021 driven primarily by a decline of 6.9 million in users engaging in trades on our platform in line with lower Trading Volume, partially offset by a 4.0 million increase in staking users due to the addition of new staking assets in 2022.

Trading Volume

We define “Trading Volume” as the total U.S. dollar equivalent value of spot matched trades transacted between a buyer and seller through our platform during the period of measurement. Trading Volume represents the product of the quantity of assets transacted and the trade price at the time the transaction was executed. As trading activity directly impacts transaction revenue, we believe this measure is a reflection of liquidity on our order books, trading health, and the underlying growth of the cryptoeconomy.

Generally, Trading Volume on our platform is primarily influenced by the price of crypto assets, crypto asset volatility, and macroeconomic conditions. In periods of high crypto asset prices and crypto asset volatility, we have experienced correspondingly high levels of Trading Volume on our platform.

Our Trading Volume in future periods will depend on the relative availability and adoption of Bitcoin, Ethereum, and other crypto assets.

	Year Ended December 31,			% Change	
	2023	2022	2021	2023	2022
Trading Volume (in billions):

nm - not meaningful

(1) USDT is a stablecoin issued by Tether Operations Limited.

(2) Figures presented above may not sum precisely due to rounding.

For the year ended December 31, 2023 as compared to 2022, Trading Volume declined primarily due to a reduction in Crypto Asset Volatility¹ of 43%, while crypto market capitalization remained resilient during the year ended December 31, 2023. The decline in volatility was a result of overall degraded crypto market sentiment, regulatory uncertainty, bank failures, and market shock events like the temporary de-pegging of USDC in March 2023, as well as an overall reduction in liquidity. Increases in the prices of various crypto assets during the fourth quarter of 2023 also impacted crypto asset volatility, overall industry trading volume, and more specifically our Trading Volume and transaction revenues. Partially offsetting these volume declines, USDT volume was elevated, largely due to de-pegging events which drove higher activity in secondary markets such as our trading platform.

For the year ended December 31, 2022 as compared to 2021, Trading Volume declined primarily due to decreased crypto market capitalization, reflecting decreased average crypto asset prices in general. The year 2022 and late 2021 saw trends of both lower crypto asset prices and a decrease of 32% in Crypto Asset Volatility for the year ended December 31, 2022 compared to 2021 driven by weaker macroeconomic conditions. Weakening market conditions were further exacerbated by two events in 2022. The first was the de-pegging of \$LUNA which contributed to an approximately 60% crypto market capitalization decline in the second quarter of 2022 and ultimately drove the credit related bankruptcies of Three Arrows Capital, Voyager, and Celsius. The second event was the collapse of FTX in the fourth quarter of 2022, which drove additional credit related bankruptcies. These events contributed to an overall crypto market capitalization decline of 64% or approximately \$1.5 trillion of value lost in 2022 which in turn

¹ Crypto Asset Volatility represents our internal measure of crypto asset volatility in the market relative to prior periods. The volatility is based on intraday returns of a volume-weighted basket of all assets listed on our trading platform. These returns are used to compute the basket's intraday volatility which is then scaled to a daily window. These daily volatility values are then averaged over the applicable time period as needed.

impacted overall industry trading volume and more specifically our Trading Volume and transaction revenues.

During the year ended December 31, 2023, no asset other than Bitcoin, Ethereum, and USDT individually represented more than 10% of our Trading Volume and no asset other than Bitcoin and Ethereum individually represented more than 10% of our transaction revenue. During the year ended December 31, 2022, no asset other than Bitcoin or Ethereum individually represented more than 10% of either our Trading Volume or transaction revenue.

Components of Results of Operations

Revenue

We generate revenue from transactions, subscription and services, and other activities. The vast majority of our total revenue is generated in the United States, based on the domicile of the customers. No other country accounted for more than 10% of our total revenue during the periods presented.

Net revenue

Transaction revenue

We provide a trade matching service for users to buy, sell, or convert crypto assets through our platform. This trading activity is the primary source of our transaction revenue and core to the service we offer. Transaction revenue is generated primarily from transaction fees applied to spot trades that are executed by both consumer and institutional customers on our platform. The transaction fee earned is based on the price and quantity of the crypto asset that is bought, sold, or converted. Transaction revenue is recognized at the time the transaction is processed. Transaction revenue is directly correlated with Trading Volume, which is driven by the number of spot trade transactions processed on our platform. Institutional customers incur lower fees per transaction than consumer customers and, as a result, the impact of changes in consumer Trading Volume on transaction revenue is more pronounced than changes in institutional Trading Volume. In addition, changes in our pricing and mix between types of transactions will affect transaction revenue. See the section titled “—Key Business Metrics—Trading Volume” above for more information on our Trading Volume metric.

Subscription and services revenue

Subscription and services revenue primarily consists of:

- **Stablecoin revenue:** As a platform that facilitates crypto asset transactions, we derive stablecoin revenue from our arrangement with the issuer of USDC. We earn a pro rata portion of income earned on USDC reserves based on the amount of USDC held on each respective party's platform, and from the distribution and usage of USDC after certain expenses. Income derived by us from this arrangement is dependent on various factors including the balance of USDC on our platform, the total market capitalization of USDC, and the prevailing interest rate environment.
- **Blockchain rewards:** We operate a proof-of-stake service that enables customers to stake eligible crypto assets and validate transactions on certain blockchain networks. This allows customers to earn rewards from the networks while maintaining ownership of their assets. We earn commission revenue from staking rewards received by customers that is calculated as a percentage of the amounts distributed.
- **Interest income:** We hold customer custodial funds and cash and cash equivalents at certain third-party banks which earn interest. Customers custodial funds balances vary depending on Trading Volume. As consumer Trading Volume increases, we generally see an increase in customer custodial funds on our platform. This revenue is also dependent on the prevailing interest rate environment. Additionally, we earn interest income on loans issued to our consumer and institutional customers. This interest income is dependent on total loans issued to customers

and the prevailing interest rate environment. Interest earned on customer custodial funds and loans is included in interest income within subscription and services revenue, while interest earned on our corporate cash and cash equivalents is included in corporate interest and other income, within other revenue.

- Custodial fee revenue: We derive custodial fee revenue based on a percentage of the daily value of customer crypto assets that we hold under custody in our dedicated cold storage solution. The value of crypto assets held under custody is driven by the quantity, price, and type of crypto asset. Our custodial fee revenue is further dependent on the fee rates we charge to our customers.
- Other: Other subscription and services revenue primarily comprises revenue from: Coinbase One; Coinbase Cloud, which includes staking application, delegation, and infrastructure services; Prime Financing; and revenue from other subscription licenses.

Other revenue

Other revenue includes interest income earned on our corporate cash and cash equivalents. Interest income is calculated using the interest method and depends on the balance of cash and cash equivalents as well as the prevailing interest rate environment. Other revenue also includes the sale of crypto assets when we are the principal in the transaction, which occur primarily as a result of unanticipated system disruptions.

Operating expenses

Operating expenses consist of transaction expense, technology and development, sales and marketing, general and administrative, restructuring, crypto asset impairment, net, and other operating expense, net. Personnel-related expense in all of these categories includes employee cash and stock-based compensation expense.

Transaction expense

Transaction expense includes costs directly associated with revenues. For transaction revenues, these expenses include costs to operate our platform, process crypto asset trades, and perform wallet services. For subscription and services revenues, the primary expenses are the rewards distributed to users for staking their assets. Fixed-fee costs are expensed over the term of the contract and transaction-level costs are expensed as incurred.

Our transaction expenses as a percentage of revenue will vary depending on the composition of our revenue. For example, if interest income and stablecoin revenue increase as a percentage of net revenue, transaction expenses as a percentage of net revenue will decrease as there are no transaction expenses directly attributed to these revenues. Conversely, if blockchain rewards increase as a percentage of net revenue, transaction expenses as a percentage of net revenue will increase since the majority of blockchain rewards revenue is distributed to the customer. Additionally, transaction expenses can be impacted by the commission or fee we charge for staking our customers' assets, as well as by transaction reversal losses.

Technology and development

Technology and development expenses comprise mainly personnel-related expenses incurred in operating, maintaining, and enhancing our platform and in developing new products and services. These costs also include website hosting and infrastructure expenses, and the amortization of internally developed and acquired developed technology. Certain costs of developing new products and services are capitalized to property and equipment, net.

Sales and marketing

Sales and marketing expenses primarily include personnel-related expenses, marketing programs costs, and costs related to customer acquisition. Sales and marketing costs are expensed as incurred.

General and administrative

General and administrative expenses include personnel-related expenses incurred to support our business, including executive, customer support, compliance, finance, human resources, legal, and other support operations. These expenses also include costs of professional services and software subscriptions for support services.

Crypto asset impairment, net

Crypto asset impairment, net represents gross impairments recorded on crypto assets held, net of subsequent realized gains on the sale and disposal of previously impaired crypto assets held.

Restructuring

Restructuring expenses comprise separation pay, stock-based compensation, and other personnel costs related to reductions in our headcount. For more information, see *Note 3. Restructuring* of the Notes to our consolidated financial statements included in Part II, Item 8 of this Annual Report on Form 10-K.

Other operating expense, net

Other operating expense, net includes fair value gains and losses related to derivatives and derivatives designated in qualifying fair value hedge accounting relationships, as well as platform-related incidents and losses. Because these components fluctuate with market conditions, other operating expense, net can vary widely between periods. From time to time we may make political contributions, which also get captured within other operating expense, net.

Interest expense

Interest expense on debt includes coupon interest expense, as well as amortization of debt discounts and debt issuance costs.

Other (income) expense, net

Other (income) expense, net includes the following items:

- net gains on the repurchase of certain of our long-term debt;
- realized foreign exchange impacts resulting from the settlement of our foreign currency assets and liabilities, and unrealized foreign exchange impacts resulting from remeasurement of transactions and monetary assets and liabilities denominated in non-functional currencies;
- impairment recognized on certain strategic equity investments in privately held companies without readily determinable fair values and gains and losses on investments, net, which consists primarily of realized and unrealized gains and losses from fair value adjustments; and
- unrealized gains and losses from fair value adjustments on certain financial instruments.

Because the majority of these components are generally variable based on changes in market conditions, they can vary widely from period to period.

Benefit from income taxes

Benefit from income taxes includes income taxes related to foreign jurisdictions and U.S. federal and state income taxes.

Results of Operations

The following table summarizes the historical consolidated statements of operations data (in thousands) and each component as a percentage of total revenue:

	Year Ended December 31,					
	2023		2022		2021	
	\$	% ⁽¹⁾	\$	% ⁽¹⁾	\$	% ⁽¹⁾
Revenue:

Total transaction revenue	<u>\$ 1,519,654</u>	<u>\$ 2,356,244</u>	<u>\$ 6,837,266</u>	<u>\$ (836,590)</u>	<u>(36)</u>	<u>\$ (4,481,022)</u>	<u>(66)</u>

Transaction revenue declined for the year ended December 31, 2023 as compared to 2022, primarily due to:

- a \$1.2 billion reduction in consumer transaction revenue attributed to a corresponding 55% decrease in consumer Trading Volume. This decrease was offset in part by an increase of \$418.8 million attributed to changes in customer mix towards trades which have higher fees and pricing changes as we increased the spread on certain types of consumer trades in 2023, which led to an overall increase in average blended fee rate of 41%.

Transaction revenue declined for the year ended December 31, 2022 as compared to 2021, primarily due to:

- a \$4.5 billion reduction in consumer transaction revenue attributed to a corresponding 69% decrease in consumer Trading Volume. This decrease was offset in part by an increase of \$222.9 million attributed to changes in customer mix towards trades which have higher fees and pricing changes as we increased the spread on certain types of consumer trades in 2022, which led to an overall increase in average blended fee rate of 11%; and
- a decrease of \$144.0 million in institutional transaction revenue attributed to a decline in institutional Trading Volume of 42%, as well as a decrease of \$82.9 million driven by lower fees associated with our market maker program, which led to an overall decrease in average blended fee rate of 41%.

Subscription and services revenue

	Year Ended December 31,			Change			
				2023		2022	
	2023	2022	2021	\$	%	\$	%
	(in thousands)			(in thousands)		(in thousands)	
Stablecoin revenue	\$ 694,247	\$ 245,710	\$ 9,882	\$ 448,537	183	\$ 235,828	nm
Blockchain rewards	330,885	275,507	223,055	55,378	20	52,452	24
Interest income	173,914	81,246	15,953	92,668	114	65,293	409
Custodial fee revenue	69,501	79,847	136,293	(10,346)	(13)	(56,446)	(41)
Other subscription and services revenue	138,339	110,261	132,304	28,078	25	(22,043)	(17)
Total subscription and services revenue	<u>\$ 1,406,886</u>	<u>\$ 792,571</u>	<u>\$ 517,487</u>	<u>\$ 614,315</u>	<u>78</u>	<u>\$ 275,084</u>	<u>53</u>

nm - not meaningful

Subscription and services revenue increased for the year ended December 31, 2023 as compared to 2022, primarily due to:

- higher stablecoin revenue attributable to higher average earned interest rates on USDC reserves, which rose 325 basis points or 217.5%;
- an increase in blockchain rewards from higher staked balances for certain assets resulting primarily from increased user participation in reward generating activities;
- an increase of \$229.6 million in interest income generated on customer custodial cash, reflecting higher average earned interest rates, which were up 295 basis points or 343%. This was offset in part by a \$133.7 million decline due to lower average balances of customer custodial cash. These balances decreased 45% attributable to crypto market sentiment discussed in the section titled “—Key Business Metrics” above; and
- a decrease in custodial fee revenue, primarily due to a decline in average assets under custody of \$3.6 billion, as price effects drove down the value of assets under custody.

There were no material changes to note within other subscription and services revenue.

Subscription and services revenue increased for the year ended December 31, 2022 as compared to 2021, primarily due to:

- higher stablecoin revenue attributable to higher average earned interest rates on USDC reserves, which rose 136 basis points or 969%;
- an increase in blockchain rewards due to the addition of new assets available for staking; and
- an increase in interest income generated on customer custodial cash attributable to higher average earned interest rates, which were up 78 basis points or 975%; offset in part by
- a decrease in custodial fee revenue, primarily due to a decrease in average assets under custody of \$48.3 billion, as price effects drove down the value of assets under custody.

There were no material changes to note within other subscription and services revenue.

Other revenue

	Year Ended December 31,			Change

Restructuring	142,594	40,703	—	101,891	250	40,703	—
Other operating expense, net...	43,260	74,593	477,148	(31,333)	(42)	(402,555)	(84)
Total operating expenses	<u>\$ 3,270,045</u>	<u>\$ 5,904,416</u>	<u>\$ 4,762,874</u>	<u>\$ (2,634,371)</u>	<u>(45)</u>	<u>\$ 1,141,542</u>	<u>24</u>

There were material trends of decreased operating expenses for the year ended December 31, 2023 as compared to 2022 following increased operating expenses for the year ended December 31, 2022 as compared to 2021. In early 2023, we set a financial objective to generate positive Adjusted EBITDA in all crypto market conditions. This goal led us to materially reduce our operating expenses in 2023 as compared to 2022. We plan to be nimble and dynamically increase or decrease our expense base in accordance with overall macro market conditions and revenue opportunities to achieve our goal of positive Adjusted EBITDA. In the first quarter of 2024, we expect modest growth in technology and development and general and administrative as compared to the fourth quarter of 2023. In addition, we also expect a modest decline in sales and marketing expenses compared to the fourth quarter of 2023.

Transaction expense

	Year Ended December 31,			Change			
				2023		2022	
	2023	2022	2021	\$	%	\$	%
	(in thousands)			(in thousands)		(in thousands)	
Blockchain rewards fees	\$ 229,851	\$ 202,480	\$ 146,769	\$ 27,371	14	\$ 55,711	38
Payment processing and account verification	73,816	194,044	341,013	(120,228)	(62)	(146,969)	(43)
Transaction reversal losses	51,501	93,886	233,832	(42,385)	(45)	(139,946)	(60)
Miner fees	49,789	131,714	542,889	(81,925)	(62)	(411,175)	(76)
Other	15,748	7,756	3,421	7,992	103	4,335	127
Total transaction expense	<u>\$ 420,705</u>	<u>\$ 629,880</u>	<u>\$ 1,267,924</u>	<u>\$ (209,175)</u>	<u>(33)</u>	<u>\$ (638,044)</u>	<u>(50)</u>

Transaction expense decreased for the year ended December 31, 2023 as compared to 2022, primarily due to:

- an increase in blockchain rewards largely due to higher staked balances; offset by
- a decrease in payment processing and account verification expenses, mainly due to a decline in Trading Volume of 44%;
- a decrease in transaction reversal losses as a result of the lower Trading Volumes noted above, combined with our efforts to reduce reversals through optimization of our fraud monitoring processes; and
- a decrease in miner fees as a result of optimizations in onchain activity.

Transaction expense decreased for the year ended December 31, 2022 as compared to 2021, primarily due to:

- an increase in blockchain rewards as a result of the addition of new assets available for staking; offset by
- a decrease in payment processing and account verification expenses, driven primarily by a decline in Trading Volume of 50%;
- a decrease in transaction reversal losses as a result of the lower Trading Volumes noted above, combined with our efforts to reduce reversals through optimization of our fraud monitoring processes; and
- a decrease in miner fees driven by a decrease in blockchain transmission volume.

Technology and development expense

	Year Ended December 31,			Change			
				2023		2022	
	2023	2022	2021	\$	%	\$	%
	<i>(in thousands)</i>			<i>(in thousands)</i>		<i>(in thousands)</i>	
Personnel-related	\$ 936,881	\$ 1,638,685	\$ 958,387	\$ (701,804)	(43)	\$ 680,298	71
Website hosting and infrastructure expenses	192,009	439,798	241,740	(247,789)	(56)	198,058	82
Amortization expense	111,336	121,534	38,112	(10,198)	(8)	83,422	219
Other	84,315	126,337	53,322	(42,022)	(33)	73,015	137
Total technology and development expenses	<u>\$ 1,324,541</u>	<u>\$ 2,326,354</u>	<u>\$ 1,291,561</u>	<u>\$ (1,001,813)</u>	<u>(43)</u>	<u>\$ 1,034,793</u>	<u>80</u>

Technology and development expenses decreased for the year ended December 31, 2023, as compared to 2022, primarily due to:

- lower personnel-related expenses, driven by a 24% decrease in average headcount following our workforce reduction in January 2023. This decrease in headcount reduced personnel-related expenses by \$454.2 million, and included the impact of stock-based compensation. Further, stock-based compensation decreased by an additional \$247.6 million due to the roll-off of non-recurring multi-year stock-based compensation awards; and
- a decrease in website hosting and infrastructure expenses due to our investments in more efficient and modern infrastructure and architecture, both in our customer-facing products and internal tooling.

There were no material changes to note within amortization expense or other.

Technology and development expenses increased for the year ended December 31, 2022 as compared to 2021, primarily due to:

- higher personnel-related expenses, including a \$518.9 million increase in stock-based compensation expense, reflecting an 87% increase in average headcount and the full-year impact of equity instruments issued in conjunction with business combinations that occurred throughout 2021 and early in 2022;
- a \$143.0 million increase in website hosting costs as we continued to invest in our products and platform, and a \$55.1 million increase in software licenses driven by the increase in average headcount; and

- an increase in amortization expense, related to amortization of capitalized software and assembled workforce.

There were no material changes to note within other.

Sales and marketing expense

	Year Ended December 31,			Change			
	2023	2022	2021	2023		2022	
				\$	%	\$	%
	<i>(in thousands)</i>			<i>(in thousands)</i>		<i>(in thousands)</i>	
Personnel-related	\$ 143,762	\$ 146,157	\$ 86,555	\$ (2,395)	(2)	\$ 59,602	69
Marketing programs	119,494	292,770	474,773	(173,276)	(59)	(182,003)	(38)
Other	69,056	71,162	102,361	(2,106)	(3)	(31,199)	(30)
Total sales and marketing expenses	<u>\$ 332,312</u>	<u>\$ 510,089</u>	<u>\$ 663,689</u>	<u>\$ (177,777)</u>	<u>(35)</u>	<u>\$ (153,600)</u>	<u>(23)</u>

Sales and marketing expenses decreased for the year ended December 31, 2023, as compared to 2022, primarily due to:

- reduced media and brand spend as we actively lowered our investment given the decline in year-over-year revenue.

There were no material changes to note within personnel-related expenses and other.

Sales and marketing expenses decreased for the year ended December 31, 2022 as compared to 2021, primarily due to:

- higher personnel-related expenses, including a \$41.2 million increase in stock-based compensation expense, due to a 109% increase in average headcount; offset by
- a decrease in marketing programs, primarily due to a \$316.5 million reduction in digital advertising spend due to lower investment in paid media, offset in part by \$128.7 million higher offline and brand spend; and
- a decrease of \$32.4 million in referral and promotion fees related to marketing initiatives such as sweepstakes and incentivized campaigns, included within other.

General and administrative expense

	Year Ended December 31,			Change			
	2023	2022	2021	2023		2022	
				\$	%	\$	%
	<i>(in thousands)</i>			<i>(in thousands)</i>		<i>(in thousands)</i>	
Personnel-related (excluding customer support)	\$ 498,626	\$ 614,661	\$ 384,065	\$ (116,035)	(19)	\$ 230,596	60
Customer support	133,726	476,351	186,285	(342,625)	(72)	290,066	156
Professional services	168,731	150,695	79,659	18,036	12	71,036	89
Other	240,225	358,879	259,383	(118,654)	(33)	99,496	38
Total general and administrative expenses	<u>\$1,041,308</u>	<u>\$1,600,586</u>	<u>\$ 909,392</u>	<u>\$ (559,278)</u>	<u>(35)</u>	<u>\$ 691,194</u>	<u>76</u>

General and administrative expenses decreased for the year ended December 31, 2023, as compared to 2022, primarily due to:

- a decrease in personnel-related expenses (excluding customer support), driven primarily by a 17% decrease in average headcount, as a result of the workforce reduction in January 2023;
- a decrease in customer support costs, reflecting \$242.7 million of reductions in costs of managed services to support compliance operations and customer experience, driven by automation and an overall reduction in capacity needs that we built in 2022, and a decrease of \$99.9 million in customer support personnel-related expenses resulting from the workforce reduction discussed above; and
- a decrease in other general and administrative expenses, largely driven by \$37.2 million in lower taxes, licenses, and fees, as the prior year included incremental costs related to the application of certain indirect tax rules, as well as a \$50.0 million one-time cost accrual related to the settlement with NYDFS in 2022.

General and administrative expenses increased for the year ended December 31, 2022, as compared to 2021, primarily due to:

- an increase in personnel-related expenses excluding customer support, driven primarily by a 92% increase in average headcount;
- an increase in customer support costs, reflecting a \$198.8 million increase in costs of managed services to support compliance operations and customer experience, as a result of increased capacity needs to address backlogs from 2021, and an increase of \$91.3 million in customer support personnel-related expenses;
- an increase in professional services, reflecting \$32.9 million in higher legal fees related to litigation, regulatory, and compliance and an increase of \$30.2 million in business consulting; and
- an increase in other general and administrative expenses, largely driven by \$75.1 million in higher settlement costs, which included a \$50.0 million accrual related to the settlement with NYDFS, and \$22.1 million in incremental software license costs to support business, security, and risk applications, partially offset by a decrease of \$39.2 million in costs associated with our Direct Listing in 2021.

Crypto asset impairment, net

	Year Ended December 31,			Change			
				2023		2022	
	2023	2022	2021	\$	%	\$	%
	(in thousands)			(in thousands)		(in thousands)	
Gross crypto asset impairment expense.....	\$ 96,783	\$ 757,257	\$ 329,152	\$ (660,474)	(87)	\$ 428,105	130
Recoveries.....	(131,458)	(35,046)	(175,992)	(96,412)	275	140,946	(80)
Total crypto asset impairment, net.....	<u>\$ (34,675)</u>	<u>\$ 722,211</u>	<u>\$ 153,160</u>	<u>\$ (756,886)</u>	<u>(105)</u>	<u>\$ 569,051</u>	<u>372</u>

Crypto asset impairment expense, net decreased during the year ended December 31, 2023 as compared to 2022, driven by gross crypto asset impairments in the prior year from the challenging crypto market conditions discussed in the section titled “—Key Business Metrics” above, which resulted in lower carrying values of crypto assets held in the current year. These impairments were offset in part by higher expense recoveries as we sold previously impaired assets at recovered prices.

Crypto asset impairment, net increased during the year ended December 31, 2022 as compared to 2021, as higher impairment expense was recognized in 2022 as a result of the challenging crypto market conditions discussed in the section titled “—Key Business Metrics” above. Additionally, lower subsequent crypto asset sales and disposals of previously impaired assets led to decreased impairment recoveries recognized in 2022.

Effective January 1, 2024 we adopted Accounting Standard Update 2023-08, Accounting for and Disclosure of Crypto Assets (“ASU 2023-08”) which will change how we value crypto assets held, as we will be required to recognize such assets at fair value with changes recognized in net income each reporting period.

Restructuring expense

Restructuring expense was \$142.6 million for the year ended December 31, 2023 and was driven by separation pay, stock-based compensation expense relating to the acceleration of the vesting of outstanding equity awards in accordance with the terms of such awards, and other personnel costs related to the workforce reduction in January 2023.

Restructuring expense was \$40.7 million for the year ended December 31, 2022 and was driven by separation pay and other personnel costs related to the workforce reduction in June 2022 and the subsequent release of accruals of certain costs related thereto that were not utilized.

There was no restructuring expense for the year ended December 31, 2021.

Other operating expense, net

	Year Ended December 31,			Change			
	2023		2022	2023		2022	
	\$		\$	\$	%	\$	%
	(in thousands)			(in thousands)		(in thousands)	
Platform-related incidents and losses	\$ 15,717	\$ 80,916	\$ 61,732	\$ (65,199)	(81)	\$ 19,184	31

Total other operating expense, net	<u>\$ 43,260</u>	<u>\$ 74,593</u>	<u>\$ 477,148</u>	<u>\$ (31,333)</u>	<u>(42)</u>	<u>\$ (402,555)</u>	<u>(84)</u>

Changes in other operating expense, net for the year ended December 31, 2023 as compared to 2022 primarily reflect:

- lower platform-related incidents and losses as a result of implementing stronger monitoring processes and controls to mitigate incidents on our platform; and
- an increase of \$33.0 million related to political contributions included within other.

There were no material changes to note within gains on derivatives and customer accommodation transaction costs.

Changes in other operating expense, net for the year ended December 31, 2022 as compared to 2021 primarily reflect:

- lower customer accommodation transactions costs, as 2021 included incremental crypto assets sold as a result of unanticipated system disruptions.

There were no material changes to note within platform-related incidents and losses, gains on derivatives, and other.

Interest expense

	Year Ended December 31,			Change			
				2023		2022	
	2023	2022	2021	\$	%	\$	%
	(in thousands)			(in thousands)		(in thousands)	
Interest expense	\$ 82,766	\$ 88,901	\$ 29,160	\$ (6,135)	(7)	\$ 59,741	205

There were no material changes in interest expense for the year ended December 31, 2023 as compared to 2022. The increase in interest expense for the year ended December 31, 2022 as compared to 2021 was primarily due to a full-year impact of interest expense recognized on our 2026 Convertible Notes that were issued in May 2021 and our Senior Notes that were issued in September 2021.

Other (income) expense, net

nm - not meaningful

Other (income) expense, net changed for the year ended December 31, 2023, as compared to 2022, primarily due to:

- a decrease in net foreign exchange losses due to improvement in foreign exchange risk management;
- net gains on strategic investments driven by a gain of \$49.9 million resulting from an equity investment transaction with Circle US Holdings, Inc. in 2023 and a decrease in the amount of impairment expense recognized on certain strategic equity investments;
- a gain on the repurchase of certain of our 2026 Convertible Notes and Senior Notes during 2023. See *Note 14. Indebtedness* of the Notes to our consolidated financial statements included in Part II, Item 8 of this Annual Report on Form 10-K for further information; and
- a decrease in other driven by the inclusion of a \$26.9 million unrealized gain in 2023 related to fair value adjustments on certain financial instruments.

Other (income) expense, net changed for the year ended December 31, 2022, as compared to 2021, primarily due to:

- an increase in net foreign exchange losses due to the timing of Euro denominated intercompany settlements and an 11% and 10% depreciation of the average exchange rates for the Euro and the British Pound, respectively, against the U.S. dollar in 2022, and realized losses on foreign exchange forward derivative contracts of \$59.1 million; and
- an increase in the amount of impairment expense recognized on certain strategic equity investments.

There were no material changes to note within other.

Benefit from income taxes

	Year Ended December 31,			Change			
				2023		2022	
	2023	2022	2021	\$	%	\$	%
	<i>(in thousands)</i>			<i>(in thousands)</i>		<i>(in thousands)</i>	
Benefit from income taxes	\$ (171,716)	\$ (439,633)	\$ (597,173)	\$ 267,917	(61)	\$ 157,540	(26)

The benefit from income taxes decreased for the year ended December 31, 2023 as compared to 2022 primarily due to lower tax benefits from a reduction of pretax loss, partially offset by a reduction in the valuation allowance recorded on impairment charges and additional tax benefits for stock-based compensation.

The benefit from income taxes decreased for the year ended December 31, 2022 as compared to 2021 primarily due to a reduction in tax benefits relating to stock-based compensation and research and development credits, and a valuation allowance recorded on impairment charges, offset by an increase in tax benefit on pretax loss.

Non-GAAP Financial Measure

In addition to our results determined in accordance with GAAP, we believe Adjusted EBITDA, a non-GAAP financial measure, is useful in evaluating our operating performance. We use Adjusted EBITDA to evaluate our ongoing operations and for internal planning and forecasting purposes. We believe that Adjusted EBITDA may be helpful to investors because it provides consistency and comparability with past financial performance. However, Adjusted EBITDA is presented for supplemental informational purposes only, has limitations as an analytical tool, and should not be considered in isolation or as a substitute for financial information presented in accordance with GAAP. There are a number of limitations related to Adjusted EBITDA rather than net income (loss), which is the nearest GAAP equivalent of Adjusted EBITDA. Some of these limitations are Adjusted EBITDA excludes:

- benefit from income taxes;
- interest expense, or the cash requirements necessary to service interest or principal payments on our debt, which reduces cash available to us;
- depreciation and intangible assets amortization expense and, although these are non-cash expenses, the assets being depreciated and amortized may have to be replaced in the future;
- stock-based compensation expense, which has been, and will continue to be for the foreseeable future, a significant recurring expense for our business and an important part of our compensation strategy;
- other impairment expense, which represents impairment on property and equipment and intangible assets and is infrequent in nature and is a non-cash adjustment;

- non-recurring accrued legal contingencies, settlements, and related costs, which reduces cash available to us;
- non-recurring expenses related to our Direct Listing in April 2021;
- impairment on crypto assets still held, net, represents impairment on crypto assets still held and is a non-cash expense, which has been recurring, and may in the future recur, although the crypto assets impaired may be sold in the future at a price at or higher than the price the assets have been impaired to;
- the impact of restructuring, which is infrequent and not related to normal operations but impacted our results in 2022 and 2023;
- the impact of fair value gain or loss on derivatives, a non-cash expense, which has been recurring, and may in the future recur;
- the impact of crypto asset borrowing costs, a non-cash expense, which is similar in nature to interest expense on our crypto asset borrowings, which has been recurring, and may in the future recur;
- gain on extinguishment of long-term debt due to repurchases prior to maturity, a non-cash adjustment, which has been recurring, and may in the future recur;
- gain or loss on investments, which represents net gains on investments and impairment on investments, net, a non-cash expense, which has been recurring, and may in the future recur, although the impaired investments may be sold in the future at a price lower, at or higher than the price the assets have been impaired to;
- the impact of unrealized foreign exchange gains or losses and fair value adjustments on foreign exchange derivatives for hedging activities, non-cash adjustments, which have been recurring, and may in the future recur; and
- a non-recurring fee and write-off related to an early lease termination, a non-recurring accrual for value-added tax related to our Irish operations, and non-cash unrealized gains or losses on contingent consideration, which we have consolidated into the line item “other adjustments, net” because they are not material individually.

In addition, other companies, including companies in our industry, may calculate Adjusted EBITDA differently or may use other measures to evaluate their performance, all of which could reduce the usefulness of our disclosure of Adjusted EBITDA as a tool for comparison. A reconciliation is provided below for Adjusted EBITDA to net income (loss), the most directly comparable financial measure stated, in accordance with GAAP. Investors are encouraged to review the related GAAP financial measure and the reconciliation of Adjusted EBITDA to net income (loss), and not to rely on any single financial measure to evaluate our business.

We calculate Adjusted EBITDA as net loss or income, adjusted to exclude provision for or benefit from income taxes, interest expense, depreciation and amortization, stock-based compensation expense, other impairment expense, non-recurring accrued legal contingencies, settlements, and related costs, non-recurring Direct Listing expenses, impairment on crypto assets still held, net, restructuring, fair value gain or loss on derivatives, crypto asset borrowing costs, gain on extinguishment of long-term debt, net, loss or gain on investments, net, unrealized foreign exchange gain or loss, and other adjustments, net.

The following table provides a reconciliation of net income (loss) to Adjusted EBITDA:

	Year Ended December 31,		
	2023	2022	2021
	(in thousands)		
Net income (loss)	\$ 94,871	\$ (2,624,949)	\$ 3,624,120

Adjusted EBITDA	<u>\$ 963,654</u>	<u>\$ (371,398)</u>	<u>\$ 4,090,071</u>

Liquidity and Capital Resources

We believe our existing cash and cash equivalents and USDC will be sufficient in both the short and long term to meet our requirements and plans for cash, including meeting our working capital and capital expenditure requirements. Our ability to meet our requirements and plans for cash, including meeting our working capital and capital expenditure requirements, will depend on many factors, including market acceptance of crypto assets and blockchain technology, our growth, our ability to attract and retain customers on our platform, the continuing market acceptance of our products and services, the introduction of new subscription products and services on our platform, expansion of sales and marketing activities, and overall economic conditions. We anticipate satisfying our short-term cash requirements with our existing cash and cash equivalents and USDC and may satisfy our long-term cash requirements with cash and cash equivalents and USDC on hand or with proceeds from a future equity or debt financing.

To the extent that current and anticipated future sources of liquidity are insufficient to fund our future business activities and cash and other requirements, we may be required to seek additional equity or debt financing. The sale of additional equity would result in additional dilution to our stockholders. The incurrence of additional debt financing would result in debt service obligations and the instruments governing such debt could provide for operating and financing covenants that would restrict our operations. As a result of our credit rating downgrade, our ability to raise additional financing from external sources in the future may be adversely affected and we may not be able to raise capital on terms acceptable to us or at all. In addition, even if debt financing is available, the cost of additional financing may be significantly higher than our current debt.

Cash and cash equivalents, restricted cash, and USDC

As of December 31, 2023 and 2022, our cash and cash equivalents, restricted cash, and USDC balances consisted of the following (in thousands):

	December 31, 2023	December 31, 2022
Cash and cash equivalents:		
Cash equivalents ⁽¹⁾	\$ 3,682,917	\$ 2,250,065
Cash held at banks	1,367,643	2,031,749
Cash held at venues ⁽²⁾	88,791	143,207
Total cash and cash equivalents	\$ 5,139,351	\$ 4,425,021
Restricted cash⁽³⁾	\$ 22,992	\$ 25,873
USDC⁽⁴⁾	576,028	861,149

(1) Cash equivalents consists of money market funds denominated in U.S. dollars.

(2) Venues include other crypto asset trading platforms that hold money transmitter licenses and payment processors. This amount excludes \$4.7 million and \$1.6 million of cash that is subject to restrictions on withdrawal as of December 31, 2023 and 2022, respectively.

(3) Restricted cash consists primarily of amounts held in restricted bank accounts at certain third-party banks as security deposits.

(4) USDC is a stablecoin redeemable on a one-to-one basis for U.S. dollars. While not accounted for as cash or cash equivalents, we treat our USDC holdings as a liquidity resource.

Debt

In September 2021, we issued \$2.0 billion in Senior Notes consisting of \$1.0 billion of 2028 Senior Notes due on October 1, 2028 and \$1.0 billion of 2031 Senior Notes due on October 1, 2031. In May 2021, we issued an aggregate of \$1.4 billion of 2026 Convertible Notes that mature on June 1, 2026, unless converted, redeemed or repurchased on an earlier date. We periodically issue short-term debt to support certain business operations.

As market conditions warrant, we may, from time to time, repurchase our outstanding debt securities in the open market, in privately negotiated transactions, by exchange transaction or otherwise. Such repurchases, if any, will depend on prevailing market conditions, our liquidity and other factors and may be commenced or suspended at any time. The amounts involved and total consideration paid may be material. In 2023, we repurchased \$427.0 million in aggregate principal amount of our outstanding debt securities for cash payments aggregating \$303.5 million. Following the close of these transactions, the remaining outstanding principal balance of the 2026 Convertible Notes, 2028 Senior Notes, and 2031 Senior Notes was approximately \$1.3 billion, \$1.0 billion, and \$0.7 billion, respectively, for a total remaining outstanding principal balance of \$3.0 billion as of December 31, 2023.

See *Notes 12. Accrued Expenses and Other Current Liabilities* and *14. Indebtedness* of the Notes to our consolidated financial statements included in Part II, Item 8 of this Annual Report on Form 10-K for further information regarding our short and long-term borrowings, respectively.

In January 2023, S&P Global Ratings announced a downgrade of our issuer credit rating and senior unsecured debt from BB to BB-, and Moody's Investors Service ("Moody's") announced a downgrade of our Corporate Family Rating ("CFR") to B2 from Ba3 and downgraded our guaranteed senior unsecured notes to B1 from Ba2. As of December 31, 2023, our credit ratings with S&P Global Ratings and Moody's remain unchanged from these downgraded levels.

Crypto assets

We hold crypto assets for investment, operating and borrowing purposes. Our future earnings and cash flows will be impacted when we choose to monetize our crypto assets and the variability of our earnings on these transactions will be dependent on the future fair value of such crypto assets. We have limited ability to predict whether the sale of crypto assets received from airdrops or forks will be material to our future earnings, which is dependent on the future market liquidity, viability and fair value of such crypto assets. Our current policy is not to monetize unsupported forks or airdrops held on our platform. Crypto assets received through airdrops and forks, at the time of the airdrop or fork and at the end of the periods presented, are not material to our financial statements.

As of December 31, 2023 and 2022, the carrying value and fair values of our crypto assets held were as follows (in thousands):

	December 31, 2023			December 31, 2022		
	Carrying Value			Carrying Value		
	Recorded at Cost ⁽¹⁾	Recorded at Fair Value	Fair Value ⁽²⁾	Recorded at Cost ⁽¹⁾	Recorded at Fair Value	Fair Value ⁽²⁾
Crypto assets held as investments:						
Bitcoin ⁽³⁾	\$ 126,614	\$ —	\$ 388,326	\$ 21,837	\$ 89,716	\$ 151,792
Ethereum ⁽³⁾	129,131	—	272,411	47,531	43,700	138,714

Other	—	1,608	1,608	—	—	—
Total borrowed	—	45,212	45,212	—	68,149	68,149
Total crypto assets held	<u>\$ 404,713</u>	<u>\$ 45,212</u>	<u>\$ 1,185,599</u>	<u>\$ 222,828</u>	<u>\$ 201,565</u>	<u>\$ 585,174</u>

(1) Cost amounts shown are net of impairment recognized.

(2) The fair value of crypto assets held is the fair value of assets recorded at cost plus assets recorded at fair value and is based on quoted market prices for one unit of each crypto asset reported on our platform at 11:59 pm Coordinated Universal Time (UTC) on the last day of the respective period multiplied by the quantity of each crypto asset held.

(3) During the fourth quarter of 2022, we entered into futures contracts to hedge our price exposure on crypto assets held as investments. These contracts were closed out during the first quarter of 2023. As of December 31, 2022, the cost and fair value amounts for Bitcoin were \$89.9 million and \$85.8 million, respectively, and the cost and fair value amounts for Ethereum were \$43.7 million and \$50.8 million, respectively.

Crypto assets held as investments

We view our crypto asset investments as long term holdings and we do not plan to engage in regular trading of crypto assets. From time to time, we may enter into derivatives or other financial instruments in an attempt to hedge our price exposure on our crypto assets held as investments. During times of instability in the market of crypto assets, we may not be able to sell our crypto assets at reasonable prices or at all. As a result, our crypto assets are less liquid than our cash and cash equivalents and may not be able to serve as a source of liquidity for us to the same extent as cash and cash equivalents. Customer accommodations and corporate expenses denominated in crypto assets are fulfilled with crypto assets held for operational purposes. We recognized \$34.0 million and \$501.0 million of gross impairment expense on our crypto asset investment portfolio for the years ended December 31, 2023 and 2022, respectively.

Crypto assets held for operating purposes

We use crypto assets to fulfill corporate expenses denominated in crypto assets, including miner fees, staking rewards, promotional and marketing expenses, and other various expenses totaling \$298.3 million and \$383.2 million for the years ended December 31, 2023 and 2022, respectively. We recognized \$62.8 million and \$256.2 million of gross impairment expense on our crypto asset operating portfolio for the years ended December 31, 2023 and 2022, respectively.

Crypto assets borrowed and related collateral

We borrow fiat and crypto assets from eligible institutional customers. These borrowings are generally open-term or have a term of less than one year. Such activities are not material to our business. We are required to maintain a collateral to loan ratio per our borrowing agreements. Any significant change in crypto asset prices could impact the value of the crypto asset borrowed or the value of crypto asset collateral. Recent downward trends in crypto asset prices have not had a material impact on the value of our corporate collateral. If crypto asset prices rise, we will post additional collateral to maintain required collateral loan ratios. We were in compliance with all collateral requirements as of December 31, 2023.

As of December 31, 2023 and 2022, the balance of our assets that we have pledged as collateral on our borrowings consisted of the following (in thousands, except units):

	December 31, 2023		December 31, 2022	
	Units	Fair Value	Units	Fair Value
Asset				
USDC	51,879,705	\$ 51,880	47,633,897	\$ 47,634
Bitcoin	—	—	650	10,743
Fiat	N/A	1,191	N/A	41,630
Total		<u>\$ 53,071</u>		<u>\$ 100,007</u>

Our business model does not expose us to liquidity risk if we have excessive redemptions or withdrawals from customers. We do not use customer crypto assets as collateral for any loan, margin, rehypothecation, or other similar activities without their consent to which we or our affiliates are a party, and we did not have any such arrangements as of December 31, 2023. As of December 31, 2023, we have not experienced excessive redemptions or withdrawals, or prolonged suspended redemptions or withdrawals, of crypto assets to date. See *Risk Factors—Depositing and withdrawing crypto assets into and from our platform involves risks, which could result in loss of customer assets, customer disputes and other liabilities, which could adversely impact our business* included in Part I, Item 1A of this Annual Report on Form 10-K for further information.

Cash requirements and contractual obligations

Certain jurisdictions where we operate require us to hold eligible liquid assets, as defined by applicable regulatory requirements and commercial law in these jurisdictions, equal to at least 100% of the aggregate amount of all customer custodial cash liabilities. Depending on the jurisdiction, eligible liquid assets can include cash and cash equivalents, customer custodial cash, and in-transit customer receivables. As of December 31, 2023 and 2022, our eligible liquid assets were greater than the aggregate amount of customer custodial cash liabilities. We are also required to hold corporate liquid assets at our subsidiaries to meet capital requirements established by our regulators based on the value of crypto assets held in custody. As of December 31, 2023, we were in compliance with these capital requirements.

As of December 31, 2023, our material cash requirements and contractual obligations arising in the normal course of business due within the next 12 months and in total consisted of the following (in thousands):

	Amounts Due	
	Next 12 Months	Total
Operating leases ⁽¹⁾	\$ 11,235	\$ 15,151
Non-cancelable purchase obligations ⁽²⁾	245,011	479,226
2026 Convertible Notes ⁽³⁾		
Interest	6,365	15,930
Principal	—	1,273,013
2028 Senior Notes ⁽⁴⁾		
Interest	33,750	168,750
Principal	—	1,000,000
2031 Senior Notes ⁽⁴⁾		
Interest	26,733	213,863
Principal	—	737,457
Other ⁽⁵⁾	10,573	10,573
Total	\$ 333,667	\$ 3,913,963

(1) Lease payments due for corporate offices.

(2) Committed spend for non-cancellable purchase obligations greater than \$1.0 million per obligation, primarily relating to technology and advertising.

(3) Assumes the 2026 Convertible Notes are not converted into our Class A common stock, repurchased or redeemed prior to maturity.

(4) Assumes the 2028 and 2031 Senior Notes are not repurchased or redeemed prior to maturity.

(5) Remaining amounts committed under a consent order with NYDFS. In January 2023, the NYDFS announced a consent order focused on historical shortcomings in Coinbase, Inc.'s compliance program. Pursuant to the consent order, Coinbase, Inc. paid a \$50.0 million penalty in January 2023 and agreed to invest an additional \$50.0 million in its compliance function by the end of 2024.

See *Notes 12. Accrued Expenses and Other Current Liabilities, 14. Indebtedness, 20. Income Taxes and 22. Commitments and Contingencies* of the Notes to our consolidated financial statements included in Part II, Item 8 of this Annual Report on Form 10-K, for further information relating to our short and long term material cash requirements and contractual obligations as of December 31, 2023.

Cash flows

The following table summarizes our consolidated statements of cash flows (in thousands):

	Year Ended December 31,		
	2023	2022	2021
Net cash provided by (used in) operating activities	\$ 922,951	\$ (1,585,419)	\$ 4,038,172
Net cash provided by (used in) investing activities	5,392	(663,822)	(1,124,740)
Net cash (used in) provided by financing activities	(811,332)	(5,838,518)	9,976,084
Net increase (decrease) in cash, cash equivalents, and restricted cash	\$ 117,011	\$ (8,087,759)	\$ 12,889,516
Effect of exchange rates on cash, cash equivalents, and restricted cash	\$ 8,772	\$ (163,257)	\$ (64,883)
Change in customer custodial cash	\$ (585,666)	\$ (5,547,481)	\$ 6,762,841

Operating activities

Our largest source of cash provided by operations are revenues generated from transaction fees and stablecoin revenue. Our primary uses of cash from operating activities include payments to employees for compensation, payments for website hosting and infrastructure services, professional services, outsourced customer support costs, and other general corporate expenditures.

Net cash provided by operating activities increased by \$2.5 billion for the year ended December 31, 2023 as compared to 2022 primarily due to:

- a \$1.1 billion increase in cash provided by USDC conversions primarily to optimize our corporate balance; and
- a decrease in cash expenditures as a result of our cost management efforts.

Net cash used in operating activities increased by \$5.6 billion for the year ended December 31, 2022 as compared to 2021 primarily due to:

- a \$4.6 billion decrease in total revenues; and
- a \$770.7 million increase in cash used to purchase USDC to increase our corporate balances.

Investing activities

Net cash provided by investing activities increased by \$669.2 million for the year ended December 31, 2023 as compared to 2022 primarily due to:

- a \$614.8 million decrease in cash used to purchase crypto assets for our corporate investment portfolio and a decrease in crypto asset purchases and disposals due to our investments in database and network infrastructure to support heightened trading volumes on our platform in order to reduce unanticipated system disruptions; and
- a \$155.4 million decrease in cash used related to fewer business combinations completed in 2023 due to reduced acquisition activity year-over-year as a result of market conditions and a refresh of our strategic priorities in light of these market conditions; offset in part by
- a \$193.2 million increase in cash used for net loans originated and repaid related to an increase in consumer demand for these loans due to stabilizing interest rates and increasing crypto asset prices which are used for collateral against these loans thereby increasing borrowing power.

Net cash used in investing activities decreased by \$460.9 million for the year ended December 31, 2022 as compared to 2021 primarily due to:

- a decrease in strategic equity investments. In 2021, our overall discretionary investing activity grew significantly as we saw rapid acceleration in the pace of innovation in our industry. This drove higher investment volume and spend as: (i) we saw growth in new company formation and invested broadly across the ecosystem through our venture investing program and (ii) we made select larger corporate investments in companies that provided us with exposure to new or complementary areas of crypto (e.g., geographic regions where we did not operate). Our investing activity significantly declined year-over-year in 2022 as macroeconomic conditions shifted and led to tightening in the broader capital markets. We also significantly reduced corporate investing activity due to a refresh of our strategic priorities in light of market changes. While our strategic investing activity declined in 2022 relative to 2021, with cash outflows of \$326.5 million for the year ended December 31, 2021 compared to \$63.0 million for the year ended December 31, 2022, we continued to invest at a higher rate than in 2020, both in terms of deal volume and spend;
- a \$331.9 million decrease in net loans originated and repaid as we have seen a decline in consumer demand for these loans due to increasing interest rates and declining crypto assets prices which are used for collateral against these loans thereby decreasing borrowing power; offset in part by
- a \$115.2 million increase in cash used for business combinations completed in 2022 due to changes in market conditions; and
- a \$39.0 million increase in our capitalized software costs as we focused efforts on optimizing our platform through investments in database and network infrastructure launching new products, adding payment rails and expanding internationally.

Financing activities

Net cash used in financing activities decreased by \$5.0 billion for the year ended December 31, 2023 as compared to 2022 primarily due to:

- a \$5.3 billion decrease of customer custodial cash liabilities as a result of a decline in fiat balances held on our platform due to a decrease in market sentiment, as discussed in the section titled “—Key Business Metrics” above, and customers seeking higher yields on cash holdings in banks and USDC holdings on our platform; and
- a \$74.1 million decrease in taxes paid related to net share settlements of equity awards due the overall decrease in headcount and the decline in our stock price on the vesting dates, the taxable event. Our choice to net settle employee awards and pay taxes is routinely evaluated by management and may change in the future; offset in part by
- an increase of \$303.5 million in cash used for long-term debt repurchases that began in June 2023.

Net cash used in financing activities increased by \$15.8 billion for the year ended December 31, 2022 as compared to 2021 primarily due to:

- a decrease in customer custodial cash liabilities of \$5.6 billion as we saw an overall decline in fiat balances held on our platform due to lower customer trading activity as compared to an inflow of \$6.7 billion in the prior year;
- a decrease of net \$3.4 billion related to the issuance of our Senior Notes and 2026 Convertible Notes, which did not recur in 2022; and

- a \$165.6 million decrease in proceeds from the issuance of Class A and Class B common stock upon the exercise of stock options as our stock price was at an all-time high in 2021 as compared to 2022, coupled with our first year as a public company and the associated liquidity event this provided for holders of our stock options.

Critical Accounting Estimates

Our consolidated financial statements and the related notes included elsewhere in this Annual Report on Form 10-K are prepared in accordance with GAAP. The preparation of consolidated financial statements also requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, costs, and expenses and related disclosures. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances. Actual results could differ significantly from our estimates. To the extent that there are differences between our estimates and actual results, our future financial statement presentation, financial condition, operating results, and cash flows will be affected.

See *Note 2. Summary of Significant Accounting Policies* of the Notes to our consolidated financial statements included in Part II, Item 8 of this Annual Report on Form 10-K for a summary of significant accounting policies and significant estimates and assumptions and their effects on our financial statements. Below are the significant estimates and assumptions that we consider critical because they involve a significant amount of estimation uncertainty and have had or are reasonably likely to have a material impact on our financial condition or results of operations.

Business combinations, goodwill, and intangible assets

We determined that business combinations, goodwill, and intangible assets represent critical accounting estimates, as they involve significant judgment, estimates, and assumptions and to the extent that our estimates and assumptions materially change or if actual circumstances differ from those in the assumptions, our financial statements could be materially impacted.

We account for our business combinations using the acquisition method of accounting, which requires, among other things, allocation of the fair value of purchase consideration to the tangible and intangible assets acquired and liabilities assumed at their estimated fair values on the acquisition date. When determining the fair value of assets acquired and liabilities assumed, we make significant estimates and assumptions, especially with respect to non-crypto intangible assets. These intangible assets do not have observable prices and have primarily consisted of customer relationships, developed technology, licenses, trademarks and trade names, and non-compete agreements, which are recorded at acquisition date fair value, less accumulated amortization. These estimates and assumptions can include, but are not limited to, the cash flows that an asset is expected to generate in the future, the appropriate weighted-average cost of capital, the number of working hours required to recreate the intangible asset (if following the cost approach), and the estimated useful lives. Changes in these assumptions could affect the carrying value of these assets. Our estimates of fair value are based upon assumptions believed to be reasonable, but which are inherently uncertain and, as a result, actual results may differ from estimates.

Goodwill

We perform an impairment test annually in the fourth quarter or whenever events or changes in circumstances indicate that the carrying value of goodwill might not be fully recoverable. In accordance with applicable accounting guidance, a company can assess qualitative factors to determine whether it is necessary to perform a goodwill impairment test. Alternatively, a company may elect to proceed directly to a quantitative goodwill impairment test. We do the former and assess qualitative factors to determine whether it is necessary to perform a goodwill impairment test. We review factors including changes in our stock price, macroeconomic conditions, industry and market conditions, cost factors, overall financial performance, changes in any key personnel, and any changes in the composition of the carrying amount of our assets. There were no changes to the qualitative factors considered indicating an impairment of goodwill for the reporting periods presented. In the future, if there are material changes in the underlying

estimates and assumptions pertaining to the impairment assessment, our financial statements could be materially impacted. For the reporting periods presented, we determined that it was more likely than not that the fair value of our reporting unit was more than the respective related carrying amounts, including goodwill, and therefore we did not record any goodwill impairment. Management also concluded that the Company's reporting unit was not at risk of failing this test as of December 31, 2023.

Intangible assets

Intangible assets are initially valued at fair value using generally accepted valuation methods appropriate for the type of intangible asset. Intangible assets with definite lives are amortized over their estimated useful lives and are reviewed for impairment if indicators of impairment arise. Intangible assets assessed as having indefinite lives are not amortized, but are assessed for indicators that the useful life is no longer indefinite or for indicators of impairment each period. Indicators we review, as applicable, include whether there has been a significant adverse change in the extent or manner in which our assets are being used, a significant adverse change in legal factors affecting our assets, customer attrition, and/or a cash flow loss. Due to the dynamic nature of our business and the regulatory environment in which we operate, it is not practicable to model sensitivity of the valuation of these assets to these factors. Each reporting period, we evaluate the estimated remaining useful life of our intangible assets and whether events or changes in circumstances warrant a revision to the remaining period of amortization. We did not identify indicators of impairment of our intangible assets during the reporting periods presented. In the future, if there are material changes in the underlying estimates and assumptions pertaining to the impairment assessment, our financial statements could be materially impacted.

Strategic investments

We hold strategic investments in privately held companies in the form of equity securities without readily determinable fair values in which we do not have a controlling interest or significant influence. The vast majority of these investments are accounted for under the measurement alternative method ("the measurement alternative") and are measured at cost, less impairment, subject to upward and downward adjustments resulting from observable price changes for identical or similar investments of the same issuer ("pricing adjustments"). We determined that valuation of privately-held strategic investments represents a critical accounting estimate because impairment evaluations and pricing adjustments involve significant judgment, estimates, and assumptions, and to the extent that these estimates and assumptions change materially or if actual circumstances differ from those in the assumptions, our financial statements could be materially impacted.

Pricing adjustments

Pricing adjustments require quantitative assessments of the fair value of our strategic investments, which may require the use of unobservable inputs. Pricing adjustments are determined by using various valuation methodologies and involve the use of estimates using the best information available, which may include cash flow projections or other available market data.

Impairment

Privately-held strategic investments are evaluated quarterly for impairment. Our qualitative analysis includes a review of indicators such as: operating results when available, business prospects of the investees, changes in the regulatory and macroeconomic environment, observable price changes in similar transactions, and general market conditions of the geographical area or industry in which our investees operate. If indicators of impairment exist, we prepare quantitative measurements of the fair value of our equity investments using an Option-Pricing Model that uses publicly available market data of comparable companies and other unobservable inputs including expected volatility, expected time to liquidity, adjustments for other company-specific developments, and the rights and obligations of the securities we hold. When the quantitative remeasurements of fair value indicate an impairment exists, we write down the investment to its current fair value.

We anticipate volatility to our net income (loss) in future periods due to changes in the fair values associated with these investments and changes in observable prices and similar transactions that could impact our fair value assessments. Based on future market conditions, these changes could be material to our financial statements. For more information regarding these market conditions and related sensitivity, see the section titled “*Item 7A. Quantitative and Qualitative Disclosures about Market Risk – Equity investment risk*. See *Note 11. Prepaid expenses and other current and non-current assets* of the Notes to our consolidated financial statements included in Part II, Item 8 of this Annual Report on Form 10-K for details of changes, which were material, in our strategic investments for the years ended December 31, 2023 and 2022.

Income taxes

We determined that income taxes involve critical accounting estimates because management makes significant estimates, assumptions, and judgments to determine our provision for income taxes, deferred tax assets and liabilities, and any valuation allowance recorded against deferred tax assets, and to the extent that our estimates and assumptions materially change, or if actual circumstances differ materially from those in the assumptions, our financial statements could be materially impacted.

We utilize the asset and liability method for computing our income tax provision. Deferred tax assets and liabilities reflect the expected future consequences of temporary differences between the financial reporting and tax bases of assets and liabilities as well as operating loss, capital loss, and tax credit carryforwards, using enacted tax rates. We assess the likelihood that our deferred tax assets will be recovered from future taxable income and, to the extent we believe that recovery is not likely, we establish a valuation allowance. Assessing the need for a valuation allowance requires a great deal of judgement and we consider all available evidence, both positive and negative, to determine whether it is more likely than not that our deferred tax assets are recoverable. We evaluate all available evidence including, but not limited to, history of earnings and losses, forecasts of future taxable income, and the weight of evidence that can be objectively verified. See *Note 20. Income taxes* of the Notes to our consolidated financial statements included in Part II, Item 8 of this Annual Report on Form 10-K for details of changes in our valuation allowance for the years ended December 31, 2023, 2022, and 2021.

We recognize the tax benefit from an uncertain tax position only if it is more likely than not the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized from such positions are then measured based on the largest benefit that has a greater than 50% likelihood of being realized upon settlement. Interest and penalties related to unrecognized tax benefits are recognized within provision for income taxes. See *Note 20. Income taxes* of the Notes to our consolidated financial statements included in Part II, Item 8 of this Annual Report on Form 10-K for details of changes in unrecognized tax benefits for the years ended December 31, 2023, 2022, and 2021.

For U.S. federal tax purposes, crypto asset transactions are treated on the same tax principles as property transactions. We recognize a gain or loss when crypto assets are exchanged for other property, in the amount of the difference between the fair market value of the property received and the tax basis of the exchanged crypto assets. Receipts of crypto assets in exchange for goods or services are included in taxable income at the fair market value on the date of receipt.

Legal and other contingencies

We are subject to various legal proceedings and claims that arise in the ordinary course of business, the outcomes of which are inherently uncertain, and such uncertainty may be enhanced due to the industry in which we operate. We record a liability when it is probable that a loss has been incurred and the amount is reasonably estimable, the determination of which requires significant judgment. In addition, we record recoveries of these losses when it is probable that they will be collected. These estimates are highly sensitive to change and involve variables that are not completely within our control nor practicable to model, including decisions made by regulators and settlement negotiations. Resolution of legal and

other contingencies in a manner inconsistent with management's expectations could have a material impact on our financial condition and results of operations. See the section titled "*—Results of operations—Comparison of the years ended December 31, 2023, 2022, and 2021—Operating expenses—General and administrative expenses*" above for discussion of material changes in legal and other contingencies during the years ended December 31, 2023, 2022, and 2021.

Recent Accounting Pronouncements

See *Note 2. Summary of Significant Accounting Policies* of the Notes to our consolidated financial statements included in Part II, Item 8 of this Annual Report on Form 10-K for a discussion of new accounting pronouncements adopted and not yet adopted as of the date of this Annual Report on Form 10-K.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

Market risk is the risk to our financial statements associated with the effect of changes in market factors, including risks associated with interest rates, foreign currency, derivatives, equity investments, and crypto assets. These assets and equities are held for purposes other than trading.

Interest rate risk

Our exposure to changes in interest rates primarily relates to interest earned on our cash and cash equivalents, customer custodial cash and from our arrangement with the issuer of USDC.

Our investment policy and strategy related to our cash and cash equivalents and customer custodial cash funds is to preserve capital and meet liquidity requirements without increasing risk. Our cash and cash equivalents consist of money market funds denominated in U.S. dollars and cash deposits, and therefore the fair value of our cash, cash equivalents, and customer custodial funds would not be significantly affected by either an increase or a decrease in interest rates. However, the amount of interest we earn on these balances may be significantly impacted. The Federal Reserve has increased the Federal Funds Rate over 500 basis points since December 31, 2021 to control current levels of inflation and as of December 31, 2023, the Federal Funds Rate was 5.33%. As a result of these significant recent increases in interest rates, a decrease in interest rates is possible. A hypothetical 500 basis points increase or decrease in average interest rates applied to our average month end balances for the years ended December 31, 2023 and 2022, which corresponds closely to the increase of the Federal Funds Rate since early 2022, would have resulted in a \$307.3 million and \$270.6 million increase or decrease, respectively, in interest earned on cash, cash equivalents, and customer custodial funds.

We also earn stablecoin revenue from an arrangement with the issuer of USDC. Interest income is earned on USDC reserve balances. The issuer of USDC reported that, as of December 31, 2023, underlying reserves were held in cash, short-duration U.S. Treasuries, and overnight U.S. Treasury repurchase agreements within segregated accounts for the benefit of USDC holders, and therefore the fair value of these balances would not be significantly affected by either an increase or a decrease in interest rates. However, the related amount of stablecoin revenue we earn may be significantly impacted. A hypothetical 500 basis points increase or decrease in average interest rates applied to daily USDC reserve balances held would have resulted in a \$735.5 million increase or decrease in stablecoin revenue for the year ended December 31, 2023 and a \$685.7 million increase or decrease in stablecoin revenue for the year ended December 31, 2022.

Foreign currency risk

Foreign currency transaction risk

Revenues, expenses, and financial results of our foreign subsidiaries are recorded in the functional currency of these subsidiaries. Our foreign currency exposure is primarily related to transactions denominated in Euros and British Pounds attributable to cash and cash equivalents, customer custodial

funds and customer custodial cash liabilities and intercompany transactions where the transaction currency is different from a subsidiary's functional currency. Changes in foreign exchange rates, and in particular a weakening of foreign currencies relative to the U.S. dollar may negatively affect our results of operations as expressed in U.S. dollars. We have experienced and will continue to experience fluctuations in our results of operations as a result of gains or losses on the settlement and the remeasurement of monetary assets and liabilities denominated in foreign currencies that are not the functional currency of the respective entity.

See the section titled “*Management’s Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations—Comparison of the years ended December 31, 2023, 2022, and 2021—Other (income) expense, net*” in Part II, Item 7 of this Annual Report on Form 10-K for a discussion of foreign exchange losses during the years ended December 31, 2023, 2022, and 2021. If an adverse 10% foreign currency exchange rate change was applied to the largest foreign currency exposure (e.g. Euro) or to all foreign currency exposures in aggregate, of monetary assets, liabilities, and commitments denominated in currencies other than its functional currency as of December 31, 2023 and 2022, it would not have a material impact on our financial results.

From time to time, we may enter into derivatives or other financial instruments in an attempt to hedge our exposure to foreign currency exchange risk. It is difficult to predict the impact hedging activities would have on our results of operations. Additionally, the volatility of exchange rates depends on many factors that we cannot forecast with reliable accuracy. Our international operations increase our exposure to exchange rate fluctuations and, as a result, such fluctuations could have a material impact on our future results of operations and cash flows.

Foreign currency translation risk

Fluctuations in functional currencies from our net investment in international subsidiaries expose us to foreign currency translation risk, where changes in foreign currency exchange rates may adversely affect our results of operations upon translation into U.S. dollars. See the consolidated statements of comprehensive income (loss) in Part II, Item 8 of this Annual Report on Form 10-K for translation adjustments for the years ended December 31, 2023, 2022, and 2021. As of December 31, 2023 and 2022, a 10% increase or decrease in foreign currency exchange rates used in translating the financial statements of subsidiaries with functional currencies other than our reporting currency would not have a material impact on our financial results.

Market volatility and other risks associated with derivatives

We have exposure to derivatives and related hedges measured at fair value. Market risk on derivatives is the exposure created by potential fluctuations in market prices and other factors and is a function of the type of derivative product, the volume of transactions, the tenor and terms of the agreement and the underlying volatility.

As of December 31, 2023, we had embedded derivative assets and embedded derivative liabilities as a result of entering into transactions to borrow crypto assets, which are recorded on the consolidated balance sheets. We also had embedded derivative assets and embedded derivative liabilities for accounts and loans receivable and other payables denominated in crypto assets. These embedded derivative assets and liabilities are recorded on the consolidated balance sheets in accrued expenses and other current liabilities and accounts and loans receivable, net of allowance, respectively. See the section titled “*Management’s Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations—Comparison of the years ended December 31, 2023, 2022, and 2021—Operating expenses—Other operating expense, net*” in Part II, Item 7 of this Annual Report on Form 10-K for a discussion of material gains and losses on derivatives during the years ended December 31, 2023, 2022, and 2021. As of December 31, 2023 and 2022, a 10% increase or decrease in the fair value of any of our derivative positions, individually or in the aggregate, would not have a material impact on our financial results. For more information on our derivatives and related hedges measured at fair value, see *Notes 2*.

Summary of Significant Accounting Policies, 6. *Accounts and Loans Receivable, Net of Allowance*, 11. *Prepaid Expenses and Other Current and Non-Current Assets*, 12. *Accrued Expenses and Other Current Liabilities*, and 15. *Derivatives*, of the Notes to our consolidated financial statements included in Part II, Item 8 of this Annual Report on Form 10-K.

Equity investment risk

We hold strategic investments in privately held companies in the form of equity securities without readily determinable fair values in which we do not have a controlling interest or significant influence. These investments are subject to a wide variety of market and price-related risks due to the lack of readily available market data, which requires us to make significant estimates and assumptions that could substantially impact the carrying value of the investments. We perform a qualitative assessment of our portfolio of strategic equity investments on a quarterly basis for indicators of impairment. Our analysis includes a review of indicators such as: operating results when available; business prospects of the investees; changes in the regulatory and macroeconomic environment; observable price changes in similar transactions; and general market conditions of the geographical area or industry in which our investees operate. If indicators of impairment exist and the estimated fair value of an investment is below the carrying amount, we will write down the investment to fair value.

As of December 31, 2023 and 2022, our strategic equity investments in privately held companies were \$343.0 million and \$326.7 million, respectively. We record all adjustments to the fair value of our investments through our consolidated statements of operations under other (income) expense, net. During the years ended December 31, 2023 and 2022, we recognized impairment expense of \$29.4 million and \$101.4 million related to our strategic investments in privately held companies, respectively. We anticipate volatility to our net income (loss) in future periods due to changes in the fair values associated with these investments and observable price changes in similar transactions that could impact our fair value assessments. Based on future market conditions, these changes could be material to our financial results. For more information, see *Notes 2. Summary of Significant Accounting Policies* and 11. *Prepaid Expenses and Other Current and Non-Current Assets* of the Notes to our consolidated financial statements included in Part II, Item 8 of this Annual Report on Form 10-K.

Market price risk of crypto assets

We generate a large portion of our total revenue from transaction fees on our platform in connection with the purchase, sale, and trading of crypto assets by our customers. Transaction revenue is based on transaction fees that are either a flat fee or a percentage of the value of each transaction and may vary depending on payment type and the value of the transaction. We also generate a large portion of our total revenue from non-transaction-based services, such as staking and custody, and such revenue has grown over time. Accordingly, crypto asset price risk could adversely affect our operating results. In particular, our future profitability may depend upon the market price of Bitcoin and Ethereum, as well as other crypto assets. Crypto asset prices, along with our operating results, have fluctuated significantly. There is no assurance that crypto asset prices will reflect historical trends. A decline in the market price of Bitcoin, Ethereum and other crypto assets has had and could in the future have an adverse effect on our earnings, the carrying value of our crypto assets, and our future cash flows. This may also affect our liquidity and our ability to meet our ongoing obligations.

We record impairment charges on our crypto assets held when crypto asset prices decrease below the carrying value of these crypto assets. As of December 31, 2023 and 2022, a 10% decrease in crypto asset prices would not have a material impact on our financial results. Effective January 1, 2024 we adopted Accounting Standard Update 2023-08, Accounting for and Disclosure of Crypto Assets ("ASU 2023-08") which will change how we value crypto assets held, as we will be required to recognize such assets at fair value with changes recognized in net income each reporting period. For more information, see *Notes 2. Summary of Significant Accounting Policies* and 9. *Goodwill, Intangible Assets, Net, and Crypto Assets Held* of the Notes to our consolidated financial statements included in Part II, Item 8 of this Annual Report on Form 10-K.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the shareholders and the Board of Directors of Coinbase Global, Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Coinbase Global, Inc. (the "Company") as of December 31, 2023 and 2022, the related consolidated statements of operations, comprehensive income (loss), changes in preferred stock and stockholders' equity, and cash flows, for each of the three years in the period ended December 31, 2023, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2023 and 2022, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2023, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2023, based on criteria established in Internal Control — Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 15, 2024, expressed an unqualified opinion on the Company's internal control over financial reporting.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current-period audit of the financial statements that were communicated or required to be communicated to the audit committee and that (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matter or on the accounts or disclosures to which they relate.

Customer Crypto Assets, Crypto Assets Held, and USDC- Crypto Assets in Cold Storage — Refer to Notes 2, 9, and 10 to the financial statements

Critical Audit Matter Description

Crypto assets are generally accessible only by the possessor of the unique private key relating to the digital wallet in which the crypto assets are held. Accordingly, private keys must be safeguarded and secured in order to prevent an unauthorized party from accessing the crypto assets within a digital wallet. The Company primarily holds crypto assets for its own use, and on behalf of customers, in wallets within its cold storage environment. The loss, theft, or otherwise compromise of access to the private keys required to access the crypto assets in cold storage could adversely affect the Company's ability to access the crypto assets within its environment. This could result in loss of corporate crypto assets held or loss of crypto assets safeguarded on behalf of customers.

We identified crypto assets in cold storage as a critical audit matter due to the nature and extent of audit effort required to obtain sufficient appropriate audit evidence to address the risks of material misstatement related to the existence and rights & obligations of crypto assets in cold storage. The nature and extent of audit effort required to address the matter includes significant involvement of more experienced engagement team members and discussions and consultations with subject matter experts related to the matter.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to crypto assets in cold storage included the following, among others:

- We consulted with subject matter experts regarding our planned audit response to address risks of material misstatement of crypto assets in cold storage.
- We tested the effectiveness of controls within the Company's private key management process including controls related to physical access, key generation, and segregation of duties across the processes.
- We tested the effectiveness of management's reconciliation control of internal books and records to external blockchains.
- We tested the effectiveness of management's control to segregate corporate crypto asset balances from customer crypto asset balances.
- We tested the effectiveness of controls within the processes of customer crypto asset deposits and customer crypto asset withdrawals.
- We obtained evidence to evaluate crypto asset balances for appropriate segregation between corporate crypto assets and customer crypto assets.
- We utilized our proprietary audit tool to independently obtain evidence from public blockchains to test the existence of crypto asset balances.
- We obtained evidence that management has control of the private keys required to access crypto assets in cold storage through a combination of decoding cryptographic messages signed using selected private keys or through observing the movement of selected crypto assets.
- We evaluated the reliability of audit evidence obtained from public blockchains.

Commitments and Contingencies - SEC complaint and legal actions by U.S. state securities regulators — Refer to Note 22 to the financial statements

Critical Audit Matter Description

The Securities and Exchange Commission (“SEC”) filed a complaint against the Company in 2023 alleging that the Company has acted as an unregistered securities exchange, broker, and clearing agency and has, through its staking program, offered and sold securities without registering its offers and sales. Additionally, the Company is the subject of various legal actions initiated by U.S. state securities regulators. The Company reviews its lawsuits, regulatory investigations, and other legal proceedings on an ongoing basis and provides disclosure and records loss contingencies in accordance with the loss contingencies accounting guidance. In accordance with such guidance, the Company establishes accruals for such matters when potential losses become probable and can be reasonably estimated. If the Company determines that a loss is reasonably possible and the loss or range of loss can be estimated, the Company discloses the possible loss in the financial statements. Because the outcome of these matters remains uncertain, the Company has not recorded or disclosed a loss contingency as of December 31, 2023. An adverse resolution of the SEC’s complaint or legal actions initiated by U.S. state securities regulators could have a material impact on the Company’s business and financial statements.

We identified the evaluation of potential loss contingencies, and related disclosures, related to the SEC complaint and legal actions initiated by U.S. state securities regulators as a critical audit matter because auditing management’s judgment in determining the probability and estimate of loss required significant auditor judgment.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to the potential loss contingencies involving the SEC complaint and legal actions initiated by the U.S. state securities regulators included the following, among others:

- We tested the effectiveness of internal controls related to management’s review of loss contingencies and approval of the accounting treatment and related disclosures.
- We inquired of the Company’s internal and external legal counsel to understand the legal merits and the basis for the Company’s conclusion specific to the likelihood of loss and the estimate of potential loss or range of loss, as applicable.
- We obtained and evaluated management’s evaluation of the probability of loss and estimation of loss through inquiries, reading the court rulings and briefs prepared by management, and obtaining written responses from internal and external legal counsels.
- We evaluated events subsequent to December 31, 2023 that might impact our evaluation of the probability of loss, including any related accrual or disclosure.
- We obtained written representations from executives of the Company.
- We evaluated whether the Company’s disclosures were consistent with our testing.

/s/ Deloitte & Touche LLP

San Francisco, California
February 15, 2024

We have served as the Company’s auditor since 2020.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the shareholders and the Board of Directors of Coinbase Global, Inc.

Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of Coinbase Global, Inc. (the “Company”) as of December 31, 2023, based on criteria established in Internal Control — Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2023, based on criteria established in Internal Control — Integrated Framework (2013) issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated financial statements as of and for the year ended December 31, 2023 of the Company and our report dated February 15, 2024, expressed an unqualified opinion.

Basis for Opinion

The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The accompanying notes are an integral part of these consolidated financial statements.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

1. NATURE OF OPERATIONS

Coinbase, Inc. was founded in 2012. In April 2014, in connection with a corporate reorganization, Coinbase, Inc. became a wholly-owned subsidiary of Coinbase Global, Inc. (together with its consolidated subsidiaries, the “Company”). On April 14, 2021, the Company completed the direct listing of its Class A common stock on the Nasdaq Global Select Market (the “Direct Listing”).

The Company provides a trusted platform that serves as a compliant gateway to the onchain economy and enables customers to engage in a wide variety of activities, including discovering, trading, staking, storing, spending, earning, and using their crypto assets in both proprietary and third-party product experiences enabled by access to decentralized applications. The Company offers (i) consumers their primary financial account for the cryptoeconomy, (ii) institutions a full-service prime brokerage platform with access to deep pools of liquidity across the crypto marketplace, and (iii) developers a suite of products granting access to the Company’s ecosystem.

The Company is a remote-first company. Accordingly, the Company does not maintain a headquarters or principal executive offices. Substantially all of the Company’s executive team meetings are held virtually, with meetings occasionally held in-person at locations that are either not in the Company’s offices or in various of the Company’s offices distributed around the world. The Company holds all of its stockholder meetings virtually.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation and principles of consolidation

The accompanying consolidated financial statements have been prepared in accordance with United States generally accepted accounting principles (“GAAP”), and include the accounts of the Company and its subsidiaries. The Company’s subsidiaries are entities in which the Company holds, directly or indirectly, more than 50% of the voting rights, or where it exercises control. Certain subsidiaries of the Company have a basis of presentation different from GAAP. For the purposes of these consolidated financial statements, the basis of presentation of such subsidiaries is converted to GAAP. All intercompany accounts and transactions have been eliminated in consolidation.

Reclassifications

Certain prior period amounts have been reclassified in order to conform with the current period presentation. These reclassifications have no impact on the Company’s previously reported consolidated results.

Use of estimates

The preparation of the consolidated financial statements in accordance with GAAP requires management to make estimates and assumptions in the consolidated financial statements and notes thereto.

Significant estimates and assumptions include the determination of the recognition, measurement, and valuation of current and deferred income taxes; the fair value of performance stock-based awards issued; the useful lives of long-lived assets; the impairment of long-lived assets; the valuation of privately-held strategic investments, including impairments; the fair value of safeguarding customer crypto assets and liabilities; the identification and valuation of assets acquired and liabilities assumed in business combinations; the fair value of derivatives and related hedges; loss contingency identification and valuation, including assessing the likelihood of adverse outcomes from positions, claims, and disputes, recoveries of losses recorded, and associated timing.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

Actual results and outcomes may differ from management's estimates and assumptions due to risks and uncertainties. To the extent that there are material differences between these estimates and actual results, the consolidated financial statements will be affected. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable, the result of which forms the basis for making judgments about the carrying values of assets and liabilities.

Foreign currency transactions

The Company's functional currency is the U.S. dollar. The Company has exposure to foreign currency translation gains and losses arising from the Company's net investment in foreign subsidiaries. The revenues, expenses, and financial results of these foreign subsidiaries are recorded in their respective functional currencies. The financial statements of these subsidiaries are translated into U.S. dollars using a current rate of exchange, with gains or losses, net of tax as applicable, included in accumulated other comprehensive income (loss) ("AOCI") within the consolidated statements of changes in preferred stock and stockholders' equity. Cumulative translation adjustments are released from AOCI and recorded in the consolidated statements of operations when the Company disposes or loses control of a consolidated subsidiary. Gains and losses resulting from remeasurement are recorded in other expense (income), net within the consolidated statements of operations.

Realized gains and losses on foreign exchange resulting from the settlement of the Company's foreign currency assets and liabilities and unrealized impacts on foreign exchange resulting from remeasurement of transactions and monetary assets and liabilities denominated in non-functional currencies are recognized as a component of other (income) expense, net on the consolidated statements of operations.

Fair value measurements

The Company measures certain assets and liabilities at fair value. The Company defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is estimated by applying the following hierarchy, which prioritizes the inputs used to measure fair value into three levels and bases the categorization within the hierarchy upon the lowest level of input that is available and significant to the fair value measurement:

- **Level 1:** Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.
- **Level 2:** Observable inputs other than quoted prices in active markets for identical assets and liabilities, quoted prices for identical or similar assets or liabilities in inactive markets, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.
- **Level 3:** Inputs that are generally unobservable and typically reflect management's estimate of assumptions that market participants would use in pricing the asset or liability.

Cash and cash equivalents

Cash and cash equivalents include cash and interest-bearing highly liquid investments held at financial institutions, cash on hand that is not restricted as to withdrawal or use with an initial maturity of three months or less, and cash held in accounts at venues. Venues include other crypto asset trading platforms that hold money transmitter licenses and payment processors. Cash and cash equivalents excludes customer legal tender, which is reported separately as customer custodial funds on the accompanying consolidated balance sheets. Refer to Customer custodial funds and customer custodial cash liabilities below for further details.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

Restricted cash

The Company has restricted cash deposits at financial institutions related to operational restricted deposits.

Customer custodial funds and customer custodial cash liabilities

Customer custodial funds represent restricted cash and cash equivalents maintained in segregated Company bank accounts that are held for the exclusive benefit of customers and deposits in transit from payment processors and financial institutions. Under GAAP, the balance in these accounts that exceeds customer custodial cash liabilities is presented within cash and cash equivalents. Customer custodial cash liabilities represent the obligation to return cash deposits held by customers in their fiat wallets and unsettled fiat deposits and withdrawals. Deposits in transit represent settlements from third-party payment processors and banks for customer transactions. Deposits in transit are typically received within five business days of the transaction date. The Company establishes withdrawal-based limits in order to mitigate potential losses by preventing customers from withdrawing the crypto asset to an external blockchain address until the deposit settles. In certain jurisdictions, deposits in transit qualify as eligible liquid assets to meet regulatory requirements to fulfill the Company's direct obligations under customer custodial cash liabilities. The Company restricts the use of the assets underlying the customer custodial funds to meet regulatory requirements and classifies the assets as current based on their purpose and availability to fulfill the Company's direct obligation under customer custodial cash liabilities.

Certain jurisdictions where the Company operates require the Company to hold eligible liquid assets, as defined by applicable regulatory requirements and commercial law in these jurisdictions, equal to at least 100% of the aggregate amount of all customer custodial cash liabilities. Depending on the jurisdiction, eligible liquid assets can include cash and cash equivalents, customer custodial funds, and certain other customer receivables. As of December 31, 2023 and 2022, the Company's eligible liquid assets were greater than the aggregate amount of customer custodial cash liabilities.

Safeguarding customer crypto assets and liabilities

The Company safeguards crypto assets for customers in digital wallets and portions of cryptographic keys necessary to access crypto assets on the Company's platform. The Company safeguards these assets and/or keys and is obligated to safeguard them from loss, theft, or other misuse. The Company records safeguarding customer crypto assets and liabilities, in accordance with Staff Accounting Bulletin 121 ("SAB 121"). The Company maintains a record of all crypto assets in digital wallets held on the Company's platform as well as the full or a portion of private keys including backup keys, which are maintained on behalf of customers. For crypto assets where the customer can transact without the involvement of the Company or crypto assets where the Company does not maintain a private key or the ability to recover a customer's private key or their crypto assets, these balances are not recorded, as there is no related safeguarding obligation in accordance with SAB 121. The Company records the safeguarding customer crypto assets and liabilities, on the initial recognition and at each reporting date, at the fair value of the crypto assets which it safeguards for its customers.

The Company is committed to securely storing all customer crypto assets and cryptographic keys (or portions thereof) held on behalf of customers. The value of these safeguarded assets is recorded as safeguarding customer crypto liabilities and corresponding safeguarding customer crypto assets. As such, the Company may be liable to its customers for losses arising from theft or loss of private keys. The Company has no reason to believe it will incur any expense associated with such potential liability because (i) it has no known or historical experience of claims to use as a basis of measurement, (ii) it accounts for and continually verifies the amount of crypto assets on its platform, and (iii) it has established security around private key management to minimize the risk of theft or loss. The Company has adopted a number of measures to safeguard crypto assets it secures including, but not limited to, holding customer crypto assets on a 1:1 basis and strategically storing custodied assets offline using the Company's cold storage process. The Company also does not reuse or rehypothecate customer crypto

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

assets nor grant security interests in customer crypto assets, in each case unless required by law or expressly agreed to by the institutional customer. Any loss or theft would impact the measurement of the customer crypto assets.

USDC

USDC is a stablecoin redeemable on a one-to-one basis for U.S. dollars. USDC is accounted for as a financial instrument on the consolidated balance sheets.

Accounts and loans receivable and allowance for doubtful accounts

Accounts and loans receivable are contractual rights to receive cash or crypto assets either on demand or on fixed or determinable dates, and are recognized as an asset on the consolidated balance sheets. Accounts receivable consists of stablecoin revenue receivable, customer fee revenue receivable, and other receivables. Loans receivable consists of fiat loans receivable and crypto asset loans receivable.

Stablecoin revenue receivable represents the pro rata portion of income earned and receivable on USDC reserves through the Company's arrangement with the issuer of USDC. Revenue derived by the Company from this arrangement is dependent on various factors including the balance of USDC on the Company's platform, the total market capitalization of USDC, and the prevailing interest rate environment.

Customer fee accounts receivable primarily comprise receivables from custodial fee revenue and other subscription and services revenue, which includes fees earned from providing services such as dedicated secure cold storage, staking, delegation, infrastructure, financing, and software licenses. Receivables are recorded at the transaction price, representing consideration to which the Company expects to be entitled to in exchange for satisfying performance obligations. For obligations satisfied over time, receivables are recognized as revenue is earned, typically monthly. For obligations satisfied at a point in time, receivables are recognized when the obligation is complete.

Fiat loans receivable represents cash loans made to institutions, and prior to November 20, 2023, to consumers. These loans are collateralized with USDC or certain crypto assets held by those users on the Company's platform. The Company generally does not have the right to use such collateral unless the borrower defaults on the loans. See *Collateral* below for additional details regarding the Company's obligation to return collateral. Fiat loans receivable are measured at amortized cost. The carrying value of the loans approximates their fair value due to their short-term duration of less than 12 months.

Crypto asset loans receivable represents crypto asset loans made to institutions. These loans are collateralized with fiat, USDC, or certain crypto assets held by those users on the Company's platform. Crypto asset loans receivable are initially and subsequently measured at the fair value of the underlying crypto asset lent and adjusted for expected credit losses.

The Company also loans USDC. When USDC is loaned, it is not derecognized from the consolidated balance sheets as the Company maintains effective control over the transferred USDC. Therefore, there are no USDC loans receivable recorded, and the loaned USDC remains presented in USDC in the consolidated balance sheets.

The Company recognizes an allowance for doubtful accounts for receivables based on expected credit losses. In determining expected credit losses, the Company considers historical loss experience, the aging of its receivable balance, and the fair value of any collateral held. For fiat loans receivable and crypto asset loans receivable, the Company applies the collateral maintenance provision practical expedient. Due to the collateral requirements the Company applies to such loans, the Company's process for collateral maintenance, and collateral held on the Company's platform, the Company's credit exposure is significantly limited and no allowance, write-offs or recoveries were recorded against fiat loans receivable or crypto asset loans receivable for the periods presented. The Company would recognize credit losses on these loans if there is a collateral shortfall and it is not reasonably expected that the

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

borrower will replenish such a shortfall. Due to the nature of the collateral the Company requires to be pledged, the Company is readily able to liquidate in the case of the borrower's default.

Collateral*Company assets pledged as collateral*

The Company enters into fiat, USDC, and crypto asset borrowing arrangements with certain institutional customers that require the Company to pledge collateral in the form of fiat, USDC, or crypto assets in which the lender may have the right to sell, repledge, or rehypothecate such collateral without the Company's consent. The Company also enters into certain derivative contracts which require the Company to pledge collateral in the form of fiat. The Company is required to maintain a collateral to loan ratio per the borrowing arrangements.

If the lender has the right to use the collateral or if the collateral is fiat, the Company presents the collateral pledged as a right to receive the collateral within prepaid expenses and other current assets in the consolidated balance sheets. The lender is not obligated to return collateral equal to the fair value of the borrowings if the Company defaults on its borrowings. As of December 31, 2023, the Company has not defaulted on any of its borrowings.

Borrower assets pledged as collateral

For loans receivable, the Company requires borrowers to pledge collateral, for which it may then be required to record a corresponding obligation to return the collateral to the borrower. As of December 31, 2023, the collateral requirements ranged from 115% to 250% of the fair value of the loan, and the borrower is required to pledge additional assets to maintain their required collateral percentage. The Company may have the right to use collateral pledged by the borrower. If the Company has the right to use collateral denominated in USDC, crypto assets, or fiat, the Company records the collateral as an asset within USDC, crypto assets held, or cash and cash equivalents, respectively, with a corresponding obligation to return collateral within accrued expenses and other current liabilities, in the consolidated balance sheets. For collateral denominated in USDC or crypto assets that is pledged against fiat loans receivable, the Company will only record the collateral if it has also been subsequently sold. The Company is not obligated to return collateral equal to the fair value of the borrowings if the borrower defaults. Due to the nature of the collateral the Company requires to be pledged by borrowers, the Company is readily able to liquidate in the case of the borrower's default.

Off-balance sheet collateral arrangements

The Company may pledge USDC collateral to lenders which are not recognized as assets pledged as collateral as they do not meet the derecognition criteria. This collateral continues to be shown within USDC on the consolidated balance sheets.

The Company may receive collateral denominated in USDC or crypto assets pledged by borrowers where the Company does not have a right to use the collateral and does not recognize it on the consolidated balance sheets since the collateral does not meet the recognition criteria.

Concentration of credit risk

The Company's cash and cash equivalents, restricted cash, customer custodial funds, and accounts and loans receivable are potentially subject to concentration of credit risk. Cash and cash equivalents, restricted cash, and customer custodial funds are primarily placed with financial institutions which are of high credit quality. The Company invests cash and cash equivalents and customer custodial funds primarily in highly liquid, highly rated instruments which are uninsured. The Company may also have corporate deposit balances with financial institutions which exceed the Federal Deposit Insurance Corporation insurance limit of \$250,000. The Company has not experienced losses on these accounts and does not believe it is exposed to any significant credit risk with respect to these accounts. The

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

Company also holds cash and crypto at crypto asset trading venues and payment processors and performs a regular assessment of these venues as part of its risk management process.

The issuer of USDC reported that, as of December 31, 2023, underlying reserves were held in cash, short-duration U.S. Treasuries, and overnight U.S. Treasury repurchase agreements within segregated accounts for the benefit of USDC holders.

As of December 31, 2023 and 2022, the Company had four and one counterparties, respectively, who accounted for more than 10% of the Company's accounts and loans receivable, net. See *Note 13. Collateral* for details on collateralization of loans receivable.

During the years ended December 31, 2023 and 2022, no counterparty accounted for more than 10% of total revenue, respectively.

Crypto assets held

The crypto assets held by the Company, with no qualifying fair value hedge, are accounted for as intangible assets with indefinite useful lives, and are initially measured at cost. Crypto assets accounted for as intangible assets are subject to impairment losses if the fair value of crypto assets decreases below the carrying value at any time during the period. The fair value is measured using the quoted price of the crypto asset at the time its fair value is being measured in the Company's principal market. Gross impairments, net of subsequent realized gains on the sale and disposal of previously impaired crypto assets held are reflected in crypto asset impairment, net in the consolidated statements of operations. The Company assigns costs to crypto assets on a first-in, first-out basis.

Crypto assets held as the hedged item in qualifying fair value hedges are initially measured at cost. Subsequent changes in fair value attributable to the hedged risk are adjusted to the carrying amount of these crypto assets, with changes in fair value recorded in other operating expense, net in the consolidated statements of operations.

The Company recognizes crypto assets received through airdrops or forks if the crypto asset is expected to generate probable future benefit and if the Company is able to support the trading, custody, or withdrawal of these assets. The Company records the crypto assets received through airdrops or forks at their cost.

Leases

The Company determines if an arrangement is a lease at inception. Operating leases are included in lease right-of-use ("ROU") assets and lease liabilities on the consolidated balance sheets. ROU assets represent the Company's right to use an underlying asset for the lease term and lease liabilities represent the Company's obligation to make lease payments arising from the lease. Operating lease ROU assets and liabilities are recognized at commencement date based on the present value of future minimum lease payments over the lease term. Most leases do not provide an implicit rate, so the Company uses its incremental borrowing rate. The operating lease ROU assets also include any lease payments made before commencement and exclude lease incentives.

The Company's lease terms may include options to extend or terminate the lease when it is reasonably certain that those options will be exercised. Lease expense for lease payments is recognized on a straight-line basis over the lease term. The Company has made the policy election to account for short-term leases by recognizing the lease payments in profit or loss on a straight-line basis over the lease term and not recognizing these leases on the consolidated balance sheets. Variable lease payments are recognized in profit or loss in the period in which the obligation for those payments is incurred. The Company has real estate lease agreements with lease and non-lease components for which the Company has made the accounting policy election to account for these agreements as a single lease component.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

Property and equipment

Property and equipment is stated at cost less accumulated depreciation. Depreciation is computed using the straight-line method over the lesser of the estimated useful life of the asset or the remaining lease term. The estimated useful lives of the Company's property, equipment, and software are generally as follows:

Property and Equipment	Useful Life
Furniture and fixtures	Three to five years
Computer equipment	Two to five years
Leasehold improvements	Lesser of useful life or remaining lease term
Capitalized software	One to three years

Capitalized software consists of costs incurred during the application development stage of internal-use software or implementation of a hosting arrangement that is a service contract. Capitalized costs consist of salaries and other compensation costs for employees, fees paid to third-party consultants who are directly involved in development efforts, and costs incurred for upgrades and enhancements to add functionality of the software. Other costs that do not meet the capitalization criteria are expensed as incurred.

The Company evaluates impairments of its property and equipment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. If the asset is not recoverable, measurement of an impairment loss is based on the fair value of the asset. When an impairment loss is recognized, the carrying amount of the asset is reduced to its estimated fair value.

Business combinations, goodwill, and acquired intangible assets

The results of businesses acquired in a business combination are included in the consolidated financial statements from the date of the acquisition. The Company accounts for its business combinations using the acquisition method of accounting, which requires, among other things, allocation of the fair value of purchase consideration to the tangible and intangible assets acquired and liabilities assumed at their estimated fair values on the acquisition date. Any excess consideration over the fair value of assets acquired and liabilities assumed is recognized as goodwill. Acquisition-related costs incurred by the Company are recognized as an expense in general and administrative expenses within the consolidated statements of operations.

The Company uses its best estimates and assumptions to assign fair value to the tangible and intangible assets acquired and liabilities assumed at the acquisition date. The Company's estimates are inherently uncertain and subject to refinement.

During the measurement period, which may be up to one year from the acquisition date, and to the extent that the value was not previously finalized, the Company may record adjustments to the fair value of these tangible and intangible assets acquired and liabilities assumed, with the corresponding offset to goodwill. In addition, uncertain tax positions and tax-related valuation allowances are initially recorded in connection with a business combination as of the acquisition date. The Company continues to collect information about facts and circumstances that existed at the date of acquisition, reevaluates these estimates and assumptions quarterly, and records any adjustments to the Company's preliminary estimates to goodwill, provided that the Company is within the measurement period. Upon the conclusion of the measurement period or final determination of the fair value of assets acquired or liabilities assumed, whichever comes first, any subsequent adjustments are recorded to the consolidated statements of operations.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

Goodwill is tested for impairment at the reporting unit level on an annual basis (October 1 for the Company) and between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value. For the periods presented, the Company did not have any goodwill impairment charges.

Acquired intangible assets with a definite useful life are amortized over their estimated useful lives on a straight-line basis. Each period, the Company evaluates the estimated remaining useful life of its intangible assets and whether events or changes in circumstances warrant a revision to the remaining period of amortization. Intangible assets assessed as having indefinite lives are not amortized, but are assessed for indicators that the useful life is no longer indefinite or for indicators of impairment each period.

The Company evaluates the recoverability of acquired intangible assets on an annual basis, or more frequently whenever circumstances indicate an intangible asset may be impaired. When indicators of impairment exist, the Company estimates future undiscounted cash flows attributable to such assets. In the event future undiscounted cash flows do not exceed the carrying amount of the assets, the asset would be considered impaired. The impairment loss is measured based upon the difference between the carrying amount and the fair value of the assets.

Investments

The Company holds strategic investments, which are included in other non-current assets on the consolidated balance sheets. The Company's strategic investments primarily include equity investments in privately held companies without readily determinable fair values where the Company (1) holds less than 20% ownership in the entity, and (2) does not exercise significant influence. These investments are recorded at cost and adjusted for observable transactions for same or similar investments of the same issuer (referred to as the measurement alternative) or impairment.

Crypto asset borrowings

The Company borrows USDC and crypto assets from third parties on a secured and unsecured basis. When USDC is borrowed, it is not recorded on the consolidated balance sheets as the transfer criteria in ASC Topic 860, *Transfers and Servicing*, have not been met. Crypto assets borrowed by the Company are reported in crypto assets held on the consolidated balance sheets.

Crypto asset borrowings are accounted for as hybrid instruments, with a liability host contract that contains an embedded derivative based on the changes in the fair value of the underlying crypto asset. The host contract is not accounted for as a debt instrument because it is not a financial liability, is carried at the initial fair value of the assets acquired and reported in crypto asset borrowings on the consolidated balance sheets. The embedded derivative is accounted for at fair value, with changes in fair value recognized in other operating expense, net in the consolidated statements of operations. The embedded derivatives are included in crypto asset borrowings on the consolidated balance sheets.

The term of these borrowings either can be for a fixed term of less than one year or open-ended and repayable at the option of the Company or the lender. These borrowings bear a fee payable by the Company to the lender, which is based on a percentage of the amount borrowed and is denominated in the related crypto asset borrowed. The borrowing fee is recognized on an accrual basis and is included in other operating expense, net in the consolidated statements of operations.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

Derivative contracts

Derivative contracts derive their value from underlying asset prices, other inputs, or a combination of these factors. Derivative contracts are recognized as either assets or liabilities on the consolidated balance sheets at fair value, with changes in fair value recognized in other operating expense, net. Cash flows from derivative contracts are recognized as investing activities and adjustments to reconcile net income (loss) to net cash provided by (used in) operating activities in the consolidated statements of cash flows.

The Company enters into arrangements that result in obtaining the right to receive or obligation to deliver a fixed amount of crypto assets in the future. These are hybrid instruments, consisting of a receivable or debt host contract that is initially measured at the fair value of the underlying crypto assets and is subsequently carried at amortized cost, and an embedded forward feature based on the changes in the fair value of the underlying crypto asset. The embedded forward is bifurcated from the host contract, and is subsequently measured at fair value.

Derivatives designated as hedges

The Company applies hedge accounting to certain derivatives executed for risk management purposes. To qualify for hedge accounting, a derivative must be highly effective at reducing the risk associated with the exposure being hedged. The Company uses fair value hedges primarily to hedge the fair value exposure of crypto asset prices. Derivative amounts affecting earnings are recognized in the same line item as the earnings effect of the hedged item.

Long-term debt and interest expense

Long-term debt is carried at amortized cost. The Company accounted for the 2026 Convertible Notes wholly as debt because (1) the conversion features do not require bifurcation as a derivative under ASC Topic 815, *Derivatives and Hedging*, and (2) the 2026 Convertible Notes were not issued at a substantial discount.

The Company recognizes gains and losses on extinguishment of long-term debt as the difference between the reacquisition price and the net carrying amount of the debt, and these gains and losses are recognized in current-period earnings in other expense (income), net in the consolidated statements of operations.

Debt discounts and debt issuance costs are amortized to interest expense using the effective interest method over the contractual term of the respective note.

The Capped Calls meet the criteria for classification in equity, are not remeasured each reporting period and are included as a reduction to additional paid-in capital within stockholders' equity.

Revenue recognition

The Company determines revenue recognition from contracts with customers through the following steps:

- identification of the contract, or contracts, with the customer;
- identification of the performance obligations in the contract;
- determination of the transaction price;
- allocation of the transaction price to the performance obligations in the contract; and
- recognition of the revenue when, or as, the Company satisfies a performance obligation.

Revenue is recognized when control of the promised goods or services is transferred to the customers, in an amount that reflects the consideration the Company expects to be entitled to in exchange for those goods or services.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

Transaction revenue

Consumer transaction revenue represents transaction fees earned from customers that are primarily individuals, while institutional transaction revenue represents transaction fees earned from institutional customers, such as hedge funds, family offices, principal trading firms, and financial institutions.

The Company's service comprises a single performance obligation to provide a crypto asset matching service when customers buy, sell or convert crypto assets, or trade derivatives. That is, the Company is an agent in transactions between customers and presents revenue for the fees earned on a net basis.

Judgment is required in determining whether the Company is the principal or the agent in transactions between customers. The Company evaluates the presentation of revenue on a gross or net basis based on whether it controls the crypto asset provided before it is transferred to the customer (gross) or whether it acts as an agent by arranging for other customers to provide the crypto asset to the customer (net). The Company does not control the crypto asset being provided before it is transferred to the buyer, does not have inventory risk related to the crypto asset, and is not responsible for the fulfillment of the crypto asset. The Company also does not set the price for the crypto asset as the price is a market rate established by users of the platform. As a result, the Company acts as an agent in facilitating the ability for a customer to purchase crypto assets from another customer.

The Company considers its performance obligation satisfied, and recognizes revenue, at the point in time the transaction is processed. Contracts with customers are usually open-ended and can be terminated by either party without a termination penalty. Therefore, contracts are defined at the transaction level and do not extend beyond the service already provided.

The Company charges a fee at the transaction level. The transaction price, represented by the transaction fee, is calculated based on volume and varies depending on payment type and the value of the transaction. Crypto asset purchase or sale transactions executed by a customer on the Company's platform is based on tiered pricing that is driven primarily by transaction volume processed for a specific historical period. The Company has concluded that this volume-based pricing approach does not constitute a future material right since the discount is within a range typically offered to a class of customers with similar volume. The transaction fee is collected from the customer at the time the transaction is executed. In certain instances, the transaction fee can be collected in crypto assets, with revenue measured based on the amount of crypto assets received and the fair value of the crypto assets at the time of the transaction.

The transaction price includes estimates for reductions in revenue from transaction fee reversals that may not be recovered from customers. Such reversals occur when the customer disputes a transaction processed on their credit card or their bank account for a variety of reasons and seeks to have the charge reversed after the Company has processed the transaction. These amounts are estimated based upon the most likely amount of consideration to which the Company will be entitled. All estimates are based on historical experience and the Company's best judgment at the time to the extent it is probable that a significant reversal of revenue recognized will not occur. All estimates of variable consideration are reassessed periodically. The total transaction price is allocated to the single performance obligation. While the Company recognizes transaction fee reversals as a reduction of net revenue, crypto asset losses related to those same transaction reversals are included in transaction expense.

Stablecoin revenue

Since 2018, the Company has earned income on fiat funds under an arrangement with the issuer of USDC which was included in interest income within subscriptions and services revenue. On August 18, 2023, the Company entered into an updated arrangement with the same counterparty. Pursuant to the arrangement, the Company earns a pro rata portion of income earned on USDC reserves based on the amount of USDC held on each respective party's platform, and from the distribution and usage of USDC after certain expenses. Revenue derived by the Company from this arrangement is dependent on various factors including the balance of USDC on the Company's platform, the total market capitalization of

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

USDC, and the prevailing interest rate environment. The arrangement is treated as an executory contract accounted for on an accrual basis. Prior period revenue recognized under the previous arrangement was reclassified to the stablecoin revenue line within subscription and services revenue, to conform to current period presentation.

Blockchain rewards

Blockchain rewards primarily comprises staking revenue, in which the Company participates in networks with proof-of-stake consensus algorithms through creating or validating blocks on the network using the staking validators that it controls. Blockchain protocols, or the participants that form the protocol networks, reward users for performing various activities on the blockchain. The most common form today is participating in proof-of-stake networks, however, there are other consensus algorithms. The Company considers itself the principal in transactions with the blockchain networks, and therefore presents such blockchain rewards earned on a gross basis. In exchange for participating in the consensus mechanism of these networks, the Company recognizes revenue in the form of the native token of the network. Each block creation or validation is a performance obligation. Revenue is recognized at the point when the block creation or validation is complete and the rewards are transferred into a digital wallet that the Company controls. Revenue is measured based on the number of tokens received and the fair value of the token at contract inception.

Interest income and corporate interest income

The Company holds customer custodial funds and cash and cash equivalents at certain third-party banks which earn interest. Interest income earned from customer custodial funds, cash and cash equivalents and loans is calculated using the interest method and is not within the scope of Topic 606 – Revenue from Contracts with Customers. Interest earned on customer custodial funds and loans is included in interest income within subscription and services revenue. Interest earned on the Company's corporate cash and cash equivalents is included in corporate interest and other income within other revenue.

Custodial fee revenue

The Company provides a dedicated secure cold storage solution to customers and earns a fee, which is based on a contractual percentage of the daily value of assets under custody. The fee is collected on a monthly basis. These contracts typically have one performance obligation which is provided and satisfied over the term of the contracts as customers simultaneously receive and consume the benefits of the services. The contract may be terminated by a customer at any time, without incurring a penalty. Customers are billed on the last day of the month during which services were provided, with the amounts generally being due within thirty days of receipt of the invoice.

Other subscription and services revenue

Other subscription and services revenue primarily comprises revenue from Coinbase One, Coinbase Cloud, which includes staking application, delegation, and infrastructure services, Prime Financing, and revenue from other subscription licenses. Generally, revenue from other subscription and services contains one performance obligation, may have variable and non-cash consideration, and is recognized at a point in time or over the period that services are provided.

Transaction expense

Transaction expense includes costs incurred to operate the Company's platform, process crypto asset trades, and perform wallet services. These costs include blockchain rewards distributed to customers for their participation in blockchain activities such as staking, account verification fees, and fees paid to payment processors and other financial institutions for customer transaction activity, contract acquisition costs, crypto asset losses due to transaction reversals, and miner fees to process transactions on blockchain networks. Transaction expense also includes rewards paid to users for staking activities

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

conducted by the Company. Fixed-fee costs are expensed over the term of the contract and transaction-level costs are expensed as incurred. The Company has elected to apply the practical expedient to recognize the incremental costs of obtaining a contract as an expense when incurred if the amortization period of the asset that would otherwise have been recognized is one year or less.

Stock-based compensation

The Company recognizes stock-based compensation expense using a fair-value based method for costs related to all equity awards granted under its equity incentive plans to employees, directors, and non-employees of the Company including restricted stock, RSUs, stock options, and purchase rights granted under the ESPP.

Valuation

The fair value of restricted stock and RSUs is estimated based on the fair value of the Company's common stock on the date of grant.

The Company estimates the fair value of stock options with only service-based conditions and purchase rights under the ESPP on the date of grant using the Black-Scholes-Merton Option-Pricing Model. The model requires management to make a number of assumptions, including the fair value and expected volatility of the Company's underlying common stock price, expected life of the option, risk-free interest rate, and expected dividend yield, which are calculated as follows:

- The fair value of the underlying stock is the fair value of the Company's common stock on the date of grant. Prior to the Direct Listing, this fair value was determined using the probability weighted expected return method, with a discounted cash flow model or a market multiples method used for each expected outcome. Following the Direct Listing, this fair value is the closing price of the Company's Class A common stock as reported on the Nasdaq Global Select Market on the grant date.
- The expected stock price volatility assumption for the Company's stock is determined by using a weighted average of the historical stock price volatility of comparable companies from a representative peer group, as sufficient trading history for the Company's common stock is not available.
- The Company uses historical exercise information and contractual terms of options to estimate the expected term.
- The risk-free interest rate for periods within the expected life of the option is based on the U.S. Treasury zero coupon bonds with terms consistent with the expected term of the award at the time of grant.
- The expected dividend yield assumption is based on the Company's history and expectation of no dividend payouts.

The Company has two types of performance awards outstanding: performance stock options subject to a market condition and performance RSUs subject to both a market condition and a financial performance condition. The Company determines the fair value of performance awards subject to a market condition using a Monte Carlo Simulation Model (a binomial lattice-based valuation model). The Monte Carlo Simulation Model uses multiple input variables to determine the probability of satisfying the market condition requirements. The fair values of the awards are not subject to change based on future market conditions. The fair value of performance RSUs, or tranches thereof, subject to a financial performance condition is estimated based on the fair value of the Company's Class A common stock on the date of grant.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

Expense attribution

Stock-based compensation expense for RSUs and stock options with only service-based conditions, and purchase rights under the ESPP, is recorded on a straight-line basis over the requisite service period. The Company has elected to account for forfeitures of awards as they occur, with previously recognized compensation reversed in the period that the awards are forfeited.

The Company uses the accelerated attribution method to recognize expense over the requisite service period for performance awards, or tranches thereof, subject to a market condition. Once the associated performance condition, if any, becomes probable of being achieved, regardless of whether or not the market condition is ultimately satisfied, stock-based compensation expense is recognized according to the market-based fair value measured on the grant date and subject to continued service over the period.

For performance awards, or tranches thereof, subject to financial performance conditions, the Company evaluates the cumulative revenue and the cumulative adjusted EBITDA results at each reporting date to determine which performance condition and level of achievement becomes most probable of being achieved for the assessment period. Once a threshold of achievement is reached, stock-based compensation expense is recognized over the requisite service period based on the result that is probable of occurring at each reporting date until the final vesting date, subject to continued service over the period.

Early exercise option

Certain stock options granted provide employee option holders the right to exercise unvested options for restricted common stock, which is subject to a repurchase right held by the Company at the original purchase price in the event the optionee's employment is terminated either voluntarily or involuntarily prior to vesting of the exercised stock. Early exercises of options are not deemed to be substantive exercises for accounting purposes and accordingly, amounts received for early exercises are recorded as a liability. These repurchase terms are considered to be a forfeiture provision and do not result in variable accounting. These amounts are reclassified to common stock and additional paid in capital as the underlying shares vest.

Technology and development

Technology and development expenses include personnel-related expenses incurred in operating, maintaining, and enhancing the Company's platform and in developing new products and services. These costs also include website hosting and infrastructure expenses, and the amortization of internally developed and acquired developed technology. Certain costs of developing new products and services are capitalized to property and equipment, net.

Sales and marketing

Sales and marketing expenses primarily include personnel-related expenses, marketing programs costs, and costs related to customer acquisition. Sales and marketing costs are expensed as incurred.

General and administrative

General and administrative expenses include personnel-related expenses incurred to support the Company's business, including executive, customer support, compliance, finance, human resources, legal, and other support operations. These costs also include software subscriptions for support services, facilities and equipment costs, depreciation, amortization of acquired customer relationship intangible assets, gains and losses on disposal of fixed assets, indirect taxes, accrued legal contingencies and settlements, and other general overhead. General and administrative costs are expensed as incurred.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

Other operating expense, net

Other operating expense, net includes realized gains and losses resulting from the settlement of derivative instruments and fair value gains and losses related to derivatives and derivatives designated in qualifying fair value hedge accounting relationships.

Other operating expense, net also includes the cost of the Company's crypto assets used to fulfill customer accommodation transactions. Periodically, as an accommodation to customers, the Company may fulfill customer transactions using its own crypto assets. The Company has custody and control of the crypto assets prior to the sale to the customer. Accordingly, the Company records the total value of the sale in other revenue and the cost of the crypto asset in other operating expense, net. Contributions towards political action committees are also included in other operating expense, net.

Other (income) expense, net

Other (income) expense, net includes net gains on the repurchase of certain of the Company's long-term debt, realized foreign exchange gains and losses resulting from the settlement of the Company's foreign currency assets and liabilities, and unrealized foreign exchange impacts resulting from remeasurement of transactions and monetary assets and liabilities denominated in non-functional currencies, and impairment recognized on certain strategic equity investments in privately held companies without readily determinable fair values and gains and losses on investments, net, which consists primarily of realized and unrealized gains and losses from fair value adjustments. Unrealized gains and losses from fair value adjustments on certain financial instruments are also included in other (income) expense, net.

Income taxes

The Company accounts for income taxes using the asset and liability method whereby deferred tax asset and liability account balances are determined based on temporary differences between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to affect taxable income. A valuation allowance is established when management estimates that it is more likely than not that deferred tax assets will not be realized. Realization of deferred tax assets is dependent upon future pre-tax earnings, the reversal of temporary differences between book and tax income, and the expected tax rates in future periods.

The Company is required to evaluate the tax positions taken in the course of preparing its tax returns to determine whether tax positions are more likely than not of being sustained by the applicable tax authority. Tax benefits of positions not deemed to meet the "more-likely-than-not" threshold would be recorded as a tax expense in the current year. The amount recognized is subject to estimate and management judgment with respect to the likely outcome of each uncertain tax position. The amount that is ultimately sustained for an individual uncertain tax position or for all uncertain tax positions in the aggregate could differ from the amount that is initially recognized. It is the Company's practice to recognize interest and penalties related to income tax matters in income tax expense.

For U.S. federal tax purposes, crypto asset transactions are treated on the same tax principles as property transactions. The Company recognizes a gain or loss when crypto assets are exchanged for other property, in the amount of the difference between the fair market value of the property received and the tax basis of the exchanged crypto assets. Receipts of crypto assets in exchange for goods or services are included in taxable income at the fair market value on the date of receipt.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

Net income (loss) per share

The Company computes net income (loss) per share using the two-class method required for participating securities. The two-class method requires income available to common stockholders for the period to be allocated between common stock and participating securities based upon their respective rights to receive dividends as if all income for the period had been distributed. The Company's preferred stock and certain of its restricted common stock were deemed participating securities. These participating securities do not contractually require the holders of such shares to participate in the Company's losses.

Basic net income (loss) per share is computed using the weighted-average number of outstanding shares of common stock during the period. Diluted net income (loss) per share is computed using the weighted-average number of outstanding shares of common stock and, when dilutive, potential shares of common stock outstanding during the period. Potential shares of common stock consist of incremental shares issuable upon the assumed exercise of stock options and warrants, vesting of RSUs, vesting of restricted common stock, conversion of the Company's preferred stock and convertible notes, and settlement of contingent consideration.

Segment reporting

Operating segments are defined as components of an entity for which separate financial information is available and that is regularly reviewed by the Chief Operating Decision Maker (the "CODM") in deciding how to allocate resources to an individual segment and in assessing performance. The Company's Chief Executive Officer is the Company's CODM. The CODM reviews financial information presented on a global consolidated basis for purposes of making operating decisions, allocating resources, and evaluating financial performance. As such, the Company has determined that it operates as one operating segment and one reportable segment.

Recent accounting pronouncements*Accounting pronouncements pending adoption*

On December 14, 2023, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update No. 2023-09, Income Taxes (Topic 740): Improvements to Income Tax Disclosures ("ASU 2023-09"). ASU 2023-09 requires that entities disclose specific categories in their rate reconciliation and provide additional information for reconciling items that meet a quantitative threshold. The new standard is effective for the Company beginning December 15, 2024, with early adoption permitted effective for fiscal years beginning January 1, 2024. The Company is currently evaluating the impact of adopting the standard.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

On December 14, 2023, FASB issued Accounting Standards Update No. 2023-08, Accounting for and Disclosure of Crypto Assets (“ASU 2023-08”), which requires entities that hold crypto assets to subsequently measure such assets at fair value with changes recognized in net income each reporting period. The guidance also requires crypto assets measured at fair value to be presented separately from other intangible assets on the balance sheet and changes in the fair value measurement of crypto assets to be presented separately on the income statement from changes in the carrying amounts of other intangible assets. The new standard is effective for the Company beginning December 15, 2024, with early adoption permitted. The Company adopted ASU 2023-08 on January 1, 2024 and will apply the modified retrospective transition approach. While the Company is in the process of finalizing implementation, based on a preliminary assessment, the Company anticipates it will recognize an incremental \$720 million to \$760 million increase in fair value on crypto assets held with the corresponding cumulative-effect adjustment amount recorded to the opening balance of retained earnings.

On November 27, 2023, FASB issued Accounting Standards Update No. 2023-07, Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures (“ASU 2023-07”), which requires that an entity disclose significant segment expenses impacting profit and loss that are regularly provided to the chief operating decision maker. The update is required to be applied retrospectively to prior periods presented, based on the significant segment expense categories identified and disclosed in the period of adoption. The amendments in ASU 2023-07 are required to be adopted for fiscal years beginning after December 15, 2023, and interim periods within fiscal years beginning after December 15, 2024, with early adoption permitted. The Company is currently evaluating the impact of adopting the standard.

3. RESTRUCTURING

2023 Restructuring

In January 2023, the Company announced and completed a restructuring impacting approximately 21% of the Company’s headcount as of December 31, 2022 (the “2023 Restructuring”). The 2023 Restructuring was intended to manage the Company’s operating expenses in response to the ongoing market conditions impacting the cryptoeconomy and ongoing business prioritization efforts. As a result, approximately 950 employees in various departments and locations were terminated. As part of their termination, they were given separation pay and other personnel benefits.

The Company does not expect to incur any additional charges in connection with the 2023 Restructuring and the cash payments associated with the restructuring were completed during the third quarter of 2023. The following expenses were recognized within restructuring expenses in the consolidated statements of operations during the year ended December 31, 2023 (in thousands):

	Year Ended December 31, 2023
Separation pay	\$ 56,733
Stock-based compensation ⁽¹⁾	84,042
Other personnel costs	1,819
Total	<u>\$ 142,594</u>

(1) Represents stock-based compensation expenditures for the year ended December 31, 2023 relating to the acceleration of the vesting of outstanding equity awards in accordance with the terms of such awards.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

The following table summarizes the balance of the 2023 Restructuring reserve and the changes in the reserve as of and for the year ended December 31, 2023 (in thousands):

	Expenses Incurred ⁽¹⁾	Payments	Adjustments ⁽²⁾	Accrued Balance as of December 31, 2023
Separation pay	\$ 57,745	\$ (56,733)	\$ (1,012)	\$ —
Other personnel costs	2,702	(1,819)	(883)	—
Total	<u>\$ 60,447</u>	<u>\$ (58,552)</u>	<u>\$ (1,895)</u>	<u>\$ —</u>

(1) Excludes stock-based compensation as it was not reflected in the Company's restructuring reserve on the consolidated balance sheets.

(2) Reductions of \$1.0 million and \$0.9 million during the year ended December 31, 2023 were due to the release of accruals for certain separation pay expenses and other personnel costs, respectively, recorded as of March 31, 2023, which were not utilized.

2022 Restructuring

In June 2022, the Company announced and completed a restructuring impacting approximately 18% of the Company's headcount as of June 10, 2022 (the "2022 Restructuring"). This strategic reduction of the existing global workforce was intended to manage the Company's operating expenses in response to market conditions and ongoing business prioritization efforts. As a result, approximately 1,100 employees in various departments and locations were terminated. As part of their termination, they were given separation pay and other personnel benefits. The Company did not incur any additional charges related to the 2022 Restructuring. The cash payments associated with the 2022 Restructuring were substantially completed during the third quarter of 2022 and the remaining balance was fully paid out during the year ended December 31, 2022.

The following expenses were recognized within restructuring expenses in the consolidated statements of operations for the year ended December 31, 2022 (in thousands):

	Year Ended December 31, 2022
Separation pay	\$ 38,741
Other personnel costs	1,962
Total	<u>\$ 40,703</u>

The following table summarizes the balance of the 2022 Restructuring reserve and the changes in the reserve as of and for the year ended December 31, 2022 (in thousands):

	Expenses Incurred	Payments	Adjustments	Accrued Balance as of December 31, 2022
Separation pay	\$ 39,259	\$ (38,741)	\$ (518)	\$ —
Other personnel costs	3,194	(1,962)	(1,232)	—
Total	<u>\$ 42,453</u>	<u>\$ (40,703)</u>	<u>\$ (1,750)</u>	<u>\$ —</u>

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

4. ACQUISITIONS

Information on acquisitions completed during the periods presented is set forth below. The impact of these acquisitions was not considered significant to the consolidated financial statements for the periods presented, and pro forma financial information has not been provided.

2023 acquisitions

One River Digital Asset Management, LLC

On March 3, 2023, the Company completed the acquisition of One River Digital Asset Management, LLC ("ORDAM") by acquiring all issued and outstanding membership units of ORDAM. ORDAM is an institutional digital asset manager which is registered as an investment adviser with the SEC. The Company believes the acquisition aligns with the Company's long-term strategy to unlock further opportunities for institutions to participate in the cryptoeconomy.

Prior to the acquisition, the Company held a minority ownership stake in ORDAM, which was accounted for as a cost method investment. In accordance with ASC Topic 805, *Business Combinations*, the acquisition was accounted for as a business combination achieved in stages under the acquisition method. Accordingly, the cost method investment was remeasured to fair value as of the acquisition date. As the fair value of the cost method investment was equal to its carrying value, no gain or loss on remeasurement was recorded on the acquisition date.

The purchase consideration was allocated to the tangible and intangible assets acquired and liabilities assumed based on their estimated fair values as of the acquisition date with the excess recorded as goodwill. The goodwill balance is primarily attributed to the assembled workforce, market presence, synergies, and time-to-market advantages. The final allocation of purchase consideration to assets and liabilities remains in process as the Company continues to evaluate certain balances, estimates, and assumptions during the measurement period (up to one year from the acquisition date). Any changes in the fair value of the assets acquired and liabilities assumed during the measurement period may result in adjustments to goodwill.

The total consideration transferred in the acquisition was \$96.8 million, consisting of the following (in thousands):

Cash	\$ 30,830
Cash payable	1,005
Previously-held interest on acquisition date	20,000
Class A common stock of the Company	44,995
Total purchase consideration	<u>\$ 96,830</u>

Included in the purchase consideration are \$6.0 million in cash and 119,991 shares of the Company's Class A common stock that are subject to an indemnity holdback. The cash and shares subject to the indemnity holdback will be released 18 months after the closing date of the transaction.

The results of operations and the provisional fair values of the assets acquired and liabilities assumed have been included in the consolidated financial statements as of the date of acquisition. The following table summarizes the preliminary fair values of assets acquired and liabilities assumed as of the date of acquisition (in thousands):

Goodwill	\$ 65,764
Intangible assets, net	21,100
Other assets and liabilities, net	9,966
Net assets acquired	<u>\$ 96,830</u>

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

The following table sets forth the components of identifiable intangible assets acquired and their estimated useful lives as of the date of acquisition (in thousands, except for years data):

	Fair Value	Useful Life at Acquisition (in years)
Licenses	\$ 1,100	Indefinite
Customer relationships	17,100	6
In-process research and development ("IPR&D")	2,900	N/A

Customer relationships will be amortized on a straight-line basis over their respective useful lives to general and administrative expense. The licenses have an indefinite useful life and will not be amortized. Management applied significant judgment in determining the fair value of intangible assets, which involved the use of estimates and assumptions with respect to forecasted revenues and expenses, and costs to recreate the IPR&D and obtain the licenses.

Total acquisition costs of \$2.6 million were incurred related to the acquisition, which were recognized as an expense and included in general and administrative expenses in the consolidated statements of operations.

2022 acquisitions

Unbound Security, Inc.

On January 4, 2022, the Company completed the acquisition of Unbound Security, Inc. ("Unbound") by acquiring all issued and outstanding shares of capital stock and stock options of Unbound. Unbound is a pioneer in a number of cryptographic security technologies, which the Company believes will play a key role in the Company's product and security roadmap.

In accordance with ASC Topic 805, *Business Combinations*, the acquisition was accounted for as a business combination under the acquisition method. The purchase consideration was allocated to the tangible and intangible assets acquired and liabilities assumed based on their estimated fair values as of the acquisition date with the excess recorded as goodwill, none of which is expected to be deductible for tax purposes. The goodwill balance is primarily attributed to the assembled workforce, synergies, and the use of purchased technology to develop future products and technologies. During the year ended December 31, 2022, a measurement period adjustment associated with deferred tax assets was recorded, resulting in an increase in other non-current assets of \$4.1 million and a corresponding reduction in goodwill.

The total consideration transferred in the acquisition was \$258.0 million, consisting of the following (in thousands):

Cash	\$ 151,424
Cash payable	126
Class A common stock of the Company	103,977
RSUs for shares of the Company's Class A common stock	2,457
Total purchase consideration	<u>\$ 257,984</u>

Included in the purchase consideration are \$21.7 million in cash and 85,324 shares of the Company's Class A common stock that were subject to an indemnity holdback. The cash and shares subject to the indemnity holdback were released within 18 months from the closing date of the transaction.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

The results of operations and the fair values of the assets acquired and liabilities assumed have been included in the consolidated financial statements from the date of acquisition. The following table summarizes the preliminary fair values of assets acquired and liabilities assumed as of the date of acquisition (in thousands):

Goodwill	\$ 222,732
Intangible assets	28,500
Other assets and liabilities, net	6,752
Net assets acquired	<u>\$ 257,984</u>

The following table sets forth the components of identifiable intangible assets acquired and their estimated useful lives as of the date of acquisition (in thousands, except for years data):

	Fair Value	Useful Life at Acquisition (in Years)
Developed technology	\$ 15,700	1 - 5
IPR&D	2,500	N/A
Customer relationships	10,300	2

The intangible assets will be amortized on a straight-line basis over their respective useful lives to technology and development expenses for developed technology and general and administrative expenses for customer relationships. Amortization of the IPR&D will be recognized in technology and development expenses once the research and development is placed into service as internally developed software. Management applied significant judgment in determining the fair value of intangible assets, which involved the use of estimates and assumptions with respect to development costs and profit, costs to recreate customer relationships, market participation profit, and opportunity cost.

Total acquisition costs of \$3.0 million were incurred in relation to the acquisition, which were recognized as an expense and included in general and administrative expenses in the consolidated statements of operations.

FairXchange, Inc.

On February 1, 2022, the Company completed the acquisition of FairXchange, Inc. ("FairX") by acquiring all issued and outstanding shares of capital stock, stock options and warrants of FairX. FairX is a derivatives exchange which is registered with the U.S. Commodity Futures Trading Commission as a designated contract market ("DCM") and the Company believes it has been a key stepping stone on the Company's path to offer crypto derivatives to consumers and institutional customers in the United States.

In accordance with ASC Topic 805, *Business Combinations*, the acquisition was accounted for as a business combination under the acquisition method. The purchase consideration was allocated to the tangible and intangible assets acquired and liabilities assumed based on their estimated fair values as of the acquisition date with the excess recorded as goodwill, none of which is expected to be deductible for tax purposes. The goodwill balance is primarily attributed to the assembled workforce, market presence, synergies, and the use of purchased technology to develop future products and technologies. During the year ended December 31, 2022, a measurement period adjustment associated with deferred tax assets was recorded, resulting in an increase in other non-current assets of \$0.3 million and a corresponding reduction in goodwill.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

The total consideration transferred in the acquisition was \$275.1 million, consisting of the following (in thousands):

Cash	\$ 56,726
Cash payable	10,442
Class A common stock of the Company - issued	174,229
Class A common stock of the Company - to be issued	33,693
Total purchase consideration	<u>\$ 275,090</u>

The aggregate purchase consideration includes 170,397 shares of the Company's Class A common stock to be issued after the acquisition date. The fair value of these shares on the acquisition date is included in additional paid-in capital. Additionally, included in the purchase consideration are \$4.7 million in cash and 83,035 shares of the Company's Class A common stock that are subject to an indemnity holdback. The cash and shares remain subject to an indemnity holdback.

The results of operations and the fair values of the assets acquired and liabilities assumed have been included in the consolidated financial statements from the date of acquisition. The following table summarizes the preliminary fair values of assets acquired and liabilities assumed as of the date of acquisition (in thousands):

Goodwill	\$ 231,685
Intangible assets	41,000
Other assets and liabilities, net	2,405
Net assets acquired	<u>\$ 275,090</u>

The following table sets forth the components of identifiable intangible assets acquired and their estimated useful lives as of the date of acquisition (in thousands, except for years data):

	Fair Value	Useful Life at Acquisition (in Years)
DCM License	\$ 26,900	Indefinite
Developed technology	10,700	5
Trading relationships	3,400	3

The developed technology and trading relationships will be amortized on a straight-line basis over their respective useful lives to technology and development expenses for developed technology and general and administrative for trading relationships. The DCM license has an indefinite useful life and will not be amortized. Management applied significant judgment in determining the fair value of intangible assets, which involved the use of estimates and assumptions with respect to forecasted revenues and expenses, development costs and profit, costs to recreate trading relationships, market participation profit, and opportunity cost.

Total acquisition costs of \$1.1 million were incurred related to the acquisition, which were recognized as an expense and included in general and administrative expenses in the consolidated statements of operations.

Notes to Consolidated Financial Statements

2021 acquisitions

Bison Trails

On February 8, 2021, the Company completed the acquisition of Bison Trails Co. (“Bison Trails”) by acquiring all issued and outstanding common stock and stock options of Bison Trails. Bison Trails is a platform-as-a-service company that provides a suite of easy-to-use blockchain infrastructure products and services on multiple networks to custodians, exchanges and funds.

Prior to the acquisition, the Company held a minority ownership stake in Bison Trails, which was accounted for as a cost method investment. In accordance with ASC Topic 805, *Business Combinations*, the acquisition was accounted for as a business combination achieved in stages under the acquisition method. Accordingly, the cost method investment was remeasured to fair value as of the acquisition date. The Company considered multiple factors in determining the fair value of the previously held cost method investment, including the price negotiated with the selling shareholders and current trading multiples for comparable companies. Based on this analysis, the Company recognized an \$8.8 million gain on remeasurement, which was recorded in other expense (income), net in the consolidated statements of operations on the acquisition date.

The purchase consideration was allocated to the tangible and intangible assets acquired and liabilities assumed based on their estimated fair values as of the acquisition date with the excess recorded as goodwill, none of which is expected to be deductible for tax purposes. The goodwill balance is primarily attributed to the assembled workforce, market presence, synergies, and the use of purchased technology to develop future products and technologies.

The total consideration transferred in the acquisition was \$457.3 million, consisting of the following (in thousands):

Class A common stock of the Company	\$ 389,314
Previously held interest on acquisition date	10,863
Cash	28,726
Replacement of Bison Trails options	28,365
Total purchase consideration	<u>\$ 457,268</u>

Included in the purchase consideration are 496,434 shares of the Company’s Class A common stock that are subject to an indemnity holdback. The shares subject to the indemnity holdback were released 18 months after the closing date of the transaction.

The results of operations and the fair values of the assets acquired and liabilities assumed have been included in the consolidated financial statements from the date of acquisition. The following table summarizes the estimated fair values of assets acquired and liabilities assumed using a cost-based approach (in thousands):

Goodwill	\$ 404,167
Intangible assets	39,100
Other assets and liabilities, net	14,001
Net assets acquired	<u>\$ 457,268</u>

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

The following table sets forth the components of identifiable intangible assets acquired and their estimated useful lives as of the date of acquisition (in thousands, except for years data):

	Fair Value	Useful Life at Acquisition (in Years)
Developed technology	\$ 36,000	3
IPR&D	1,200	N/A
User base	1,900	3

The intangible assets will be amortized on a straight-line basis over their respective useful lives to technology and development expenses for developed technology and general and administrative expenses for user base. Amortization of the IPR&D will be recognized in technology and development expenses once the research and development is placed into service as internally developed software. Management applied significant judgement in determining the fair value of intangible assets, which involved the use of estimates and assumptions with respect to development costs and profit, costs to recreate customer relationships, market participation profit, and opportunity cost.

Total acquisition costs of \$3.7 million were incurred related to the acquisition, which were recognized as an expense and included in general and administrative expenses in the consolidated statements of operations.

Other acquisitions

During the year ended December 31, 2021, the Company also completed five other acquisitions that were not material individually, but were material when aggregated. In each of these acquisitions the Company acquired all issued and outstanding common stock and stock options of the acquiree.

The total purchase consideration in each acquisition was allocated to the tangible and intangible assets acquired and liabilities assumed based on their estimated fair values as of the acquisition dates, with the excess recorded as goodwill. During the year ended December 31, 2022, measurement period adjustments associated with deferred tax assets were recorded, resulting in an increase in other non-current assets of \$1.9 million and a corresponding reduction in goodwill.

The total consideration transferred in these acquisitions was \$211.0 million, consisting of the following (in thousands):

Class A common stock of the Company - issued	\$ 65,717
Class A common stock of the Company - to be issued	58,173
RSUs	3,019
Cash	62,425
Cash payable	5,918
Contingent consideration arrangement	15,752
Total purchase consideration	<u>\$ 211,004</u>

The aggregate purchase consideration included 160,840 shares of the Company's Class A common stock which was issued six months after the respective acquisition dates. The fair value of these shares on the respective acquisition dates was included in additional paid-in capital. Additionally, 51,619 shares of the Company's Class A common stock included in the aggregate purchase consideration that are to be issued, are subject to an indemnity holdback. The shares subject to the indemnity holdback were released between 15 and 18 months after the closing date of each transaction.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

Also included in the aggregate purchase consideration was the original estimated fair value of the contingent consideration arrangement agreed to in one of the acquisitions. The contingent consideration consists of two separate tranches. The first tranche will be settled one year after the closing date of the transaction and may result in delivery of up to 75,534 shares of the Company's Class A common stock if specified revenue targets are met during the first year after the closing date. The second tranche will be settled two years after the closing date of the transaction and may result in delivery of up to another 75,534 shares of the Company's Class A common stock, if specified revenue targets are met during the second year after the closing date. For each tranche, the revenue targets are adjusted for changes in the combined Bitcoin and Ethereum market capitalization since the closing date. The total number of the Company's Class A common stock issued to settle the contingent consideration arrangement will be adjusted downward in proportion to recognized revenues that do not meet the specified revenue targets.

In September 2022 and October 2023, upon resolution of the contingencies and determination of the number of shares of the Company's Class A common stock to be issued under the first and second tranche of the contingent consideration arrangement, respectively, the Company reclassified the value of the first and second tranches from other non-current liabilities into additional paid-in capital on the consolidated balance sheets.

The results of operations and the fair values of the assets acquired and liabilities assumed have been included in the consolidated financial statements from the respective dates of acquisition. The following table summarizes the aggregate estimated fair values of assets acquired and liabilities assumed using a cost-based approach (in thousands):

Goodwill	\$ 144,379
Intangible assets	62,100
Other assets and liabilities, net	4,525
Net assets acquired	<u>\$ 211,004</u>

The excess of aggregate purchase consideration over the fair value of net tangible and identifiable intangible assets acquired was recorded as goodwill of \$144.4 million, of which \$77.1 million is expected to be deductible for U.S. tax purposes. The goodwill balance is primarily attributed to the assembled workforce, market presence, synergies, and the use of purchased technology to develop future products and technologies.

The following table sets forth the components of identifiable intangible assets acquired and their estimated useful lives as of the dates of acquisition (in thousands, except for years data):

	Fair Value	Useful Life at Acquisition (in Years)
Developed technology	\$ 45,900	2.5
User base	1,000	2.5
IPR&D	2,300	N/A
Customer relationships	12,900	4.3

The intangible assets will be amortized on a straight-line basis over their respective useful lives to technology and development expenses for developed technology and general and administrative expenses for customer relationships and user base. Amortization of the IPR&D will be recognized in technology and development expenses once the research and development is placed into service as internally developed software. Management applied significant judgement in determining the fair value of intangible assets, which involved the use of estimates and assumptions with respect to development costs and profit, costs to recreate customer relationships, market participation profit, and opportunity cost. These valuations incorporate significant unobservable inputs classified as Level 3.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

Total acquisition costs of \$4.3 million were incurred related to these other acquisitions, which were recognized as expenses and included in general and administrative expenses in the consolidated statements of operations. The Company also entered into employment agreements with key employees of the acquirees, which included stock-based compensation arrangements. In conjunction with these agreements, the Company recognized \$5.5 million of compensation expenses on the acquisition dates included in technology and development expenses. Stock-based compensation arrangements offered to these key employees with vesting conditions will be recognized as compensation expense in future periods. See *Note 18. Stock-Based Compensation*, for additional details regarding stock-based compensation issued to employees.

5. REVENUE

The following table presents revenue of the Company disaggregated by revenue source (in thousands):

	Year Ended December 31,		
	2023	2022	2021
Net revenue			
Transaction revenue			
Consumer, net	\$ 1,429,490	\$ 2,236,900	\$ 6,490,992
Institutional, net	90,164	119,344	346,274
Total transaction revenue	1,519,654	2,356,244	6,837,266
Subscription and services revenue			
Stablecoin revenue	694,247	245,710	9,882
Blockchain rewards	330,885	275,507	223,055
Interest income	173,914	81,246	15,953
Custodial fee revenue	69,501	79,847	136,293
Other subscription and services revenue	138,339	110,261	132,304
Total subscription and services revenue	1,406,886	792,571	517,487
Total net revenue	2,926,540	3,148,815	7,354,753
Other revenue			
Corporate interest and other income	181,827	44,768	2,141
Crypto asset sales revenue	16	625	482,550
Total other revenue	181,843	45,393	484,691
Total revenue	\$ 3,108,383	\$ 3,194,208	\$ 7,839,444

Revenue by geographic location

In the table below are the revenues disaggregated by geography, based on domicile of the customers, as applicable (in thousands):

	Year Ended December 31,		
	2023	2022	2021
United States	\$ 2,725,620	\$ 2,684,425	\$ 6,339,270
Rest of the World ⁽¹⁾	382,763	509,783	1,500,174
Total revenue	\$ 3,108,383	\$ 3,194,208	\$ 7,839,444

(1) No other individual country accounted for more than 10% of total revenue.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

6. ACCOUNTS AND LOANS RECEIVABLE, NET OF ALLOWANCE

Accounts and loans receivable, net of allowance consisted of the following (in thousands):

	December 31, 2023	December 31, 2022
Accounts receivable		
Stablecoin revenue receivable	\$ 57,885	\$ 179,996
Customer fee revenue receivable ⁽¹⁾	23,603	23,014
Other accounts receivable ⁽¹⁾	109,361	28,837
Gross accounts receivable	190,849	231,847
Allowance for doubtful accounts receivable	(22,559)	(11,500)
Net accounts receivable	168,290	220,347
Loans receivable⁽²⁾		
Fiat loans receivable ⁽³⁾	171,196	98,203
Crypto asset loans receivable	22,229	85,826
Total loans receivable	193,425	184,029
Total accounts and loans receivable, net of allowance	\$ 361,715	\$ 404,376

(1) Includes accounts receivable denominated in crypto assets. See *Note 15. Derivatives* for additional details.

(2) As of December 31, 2023 and 2022, loans receivable did not include \$205.6 million and \$2.8 million of USDC loaned, respectively, as these loaned assets did not meet the criteria for derecognition.

(3) As of December 31, 2023, the entire balance comprised institutional fiat loans, while as of December 31, 2022, the entire balance comprised consumer fiat loans. Consumer fiat loans were discontinued in November 2023.

As of December 31, 2023 and 2022, there were no loans receivable past due.

7. LEASES

The Company has operating leases for corporate offices. The leases have remaining lease terms of less than one year to three years. The leases generally contain options to extend or terminate the lease. However, these were not included in determining the lease terms as the Company is not reasonably certain to exercise those options.

The components of lease cost were as follows (in thousands):

	Year Ended December 31,		
	2023	2022	2021
Operating lease cost	\$ 40,429	\$ 36,724	\$ 34,074
Short-term lease cost	4,304	707	374
Total lease cost	\$ 44,733	\$ 37,431	\$ 34,448

Other information related to leases was as follows as of:

	December 31,	
	2023	2022
Weighted-average remaining lease term (in years)	1.5	1.2
Weighted-average discount rate	4.05%	3.01%

The interest rate used to determine the present value of the future lease payments is the Company's incremental borrowing rate because the interest rate implicit in the leases is not readily determinable. The Company's incremental borrowing rate is estimated to approximate the interest rate on a collateralized basis with similar terms and payments, and in economic environments where the leased asset is located.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

Maturities of lease liabilities were as follows (in thousands):

2024	\$ 11,235
2025	3,124
2026	792
Total lease payments	15,151
Less imputed interest	(428)
Total	<u>\$ 14,723</u>

430 California office space

In February 2023, the Company entered into an early termination agreement for its remaining office space lease in San Francisco, California, which terminated on March 31, 2023. The Company paid a termination fee of \$25.0 million and committed to spend \$2.0 million at the lessor's other properties by March 31, 2025. These expenses were recognized within the general and administration expenses in the consolidated statements of operations during the year ended December 31, 2023.

8. PROPERTY AND EQUIPMENT, NET

Property and equipment consisted of the following (in thousands):

	December 31,	
	2023	2022
Capitalized software	\$ 293,467	\$ 198,537
Leasehold improvements	17,131	45,262
Furniture and fixtures	125	7,217
Computers and equipment	2,554	5,852
Total property and equipment, gross	313,277	256,868
Accumulated depreciation and amortization	(120,727)	(85,015)
Total property and equipment, net	<u>\$ 192,550</u>	<u>\$ 171,853</u>

Depreciation and amortization expense was \$70.0 million, \$48.0 million, and \$18.4 million for the years ended December 31, 2023, 2022 and 2021, respectively. Total additions to capitalized software were \$112.0 million, \$178.6 million and \$22.2 million for the years ended December 31, 2023, 2022 and 2021, respectively. During the years ended December 31, 2023, 2022 and 2021, the Company recorded impairment charges of \$18.3 million, \$21.8 million, and \$0, respectively, related to its property and equipment. Impairment expense is included in other operating expense, net in the consolidated statements of operations.

Long-lived assets, which consisted of property and equipment, net and operating lease ROU assets, by geography were as follows (in thousands):

	December 31,	
	2023	2022
United States	\$ 198,810	\$ 229,737
Rest of the World ⁽¹⁾	6,477	11,473
Total long-lived assets	<u>\$ 205,287</u>	<u>\$ 241,210</u>

(1) No other individual country accounted for more than 10% of total long-lived assets.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

9. GOODWILL, INTANGIBLE ASSETS, NET, AND CRYPTO ASSETS HELD

Goodwill

The following table reflects the changes in the carrying amount of goodwill (in thousands):

	Year Ended December 31,	
	2023	2022
Balance, beginning of period	\$ 1,073,906	\$ 625,758
Additions due to business combinations	65,764	454,417
Measurement period adjustments ⁽¹⁾	—	(6,269)
Balance, end of period	\$ 1,139,670	\$ 1,073,906

(1) The measurement period adjustments during the year ended December 31, 2022 consisted of \$4.1 million, \$0.3 million and \$1.9 million related to the Unbound acquisition, the FairX acquisition, and certain other acquisitions that were material when aggregated, respectively, and which were associated with the changes in deferred tax assets as a result of changes in estimates. There were no measurement period adjustments during the year ended December 31, 2023.

There was no impairment recognized against goodwill at the beginning or end of the periods presented.

Intangible assets, net

Intangible assets, net and their associated weighted average remaining useful lives (“Life”) consisted of the following (in thousands, except years data):

	December 31, 2023				December 31, 2022			
	Gross Carrying Amount	Accumulated Amortization	Intangible Assets, Net	Life	Gross Carrying Amount	Accumulated Amortization	Intangible Assets, Net	Life
Amortizing intangible assets								
Acquired developed technology	\$ 124,291	\$ (105,139)	\$ 19,152	2.5	\$ 126,692	\$ (81,172)	\$ 45,520	2.3
Customer relationships	103,791	(66,279)	37,512	3.1	86,691	(45,717)	40,974	2.6
Assembled workforce	60,800	(60,800)	—	0	60,800	(44,857)	15,943	0.4
Other	5,802	(4,294)	1,508	1.0	10,676	(4,834)	5,842	1.7
Indefinite-lived intangible assets								
Licenses	28,000	—	28,000	N/A	26,900	—	26,900	N/A
Other	250	—	250	N/A	250	—	250	N/A
Total	\$ 322,934	\$ (236,512)	\$ 86,422		\$ 312,009	\$ (176,580)	\$ 135,429	

Amortization expense of intangible assets was \$69.6 million, \$106.1 million and \$45.3 million for the years ended December 31, 2023, 2022 and 2021, respectively. The Company estimates that there is no significant residual value related to its amortizing intangible assets.

The Company recorded no material intangible asset impairment charges during the years ended December 31, 2023, 2022 and 2021. Impairment expense is included in technology and development expense in the consolidated statements of operations.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

The expected future amortization expense for amortizing intangible assets as of December 31, 2023 is as follows (in thousands):

2024.....	25,649
2025.....	17,400
2026.....	8,782
2027.....	3,026
2028.....	2,855
Thereafter.....	460
Total expected future amortization expense.....	<u>\$ 58,172</u>

Crypto assets held

Crypto assets held consisted of the following (in thousands):

	December 31, 2023	December 31, 2022
Recorded at impaired cost		
Crypto assets held as investments.....	\$ 330,610	\$ 155,251
Crypto assets held for operating purposes.....	74,103	67,577
Total crypto assets held recorded at impaired cost.....	404,713	222,828
Recorded at fair value⁽¹⁾		
Crypto assets held as investments.....	—	133,416
Crypto assets borrowed.....	45,212	68,149
Total crypto assets held recorded at fair value.....	45,212	201,565
Total crypto assets held.....	<u>\$ 449,925</u>	<u>\$ 424,393</u>

(1) Recorded at fair value as these crypto assets are held as the hedged item in qualifying fair value hedges.

Crypto asset impairment, net comprised the following (in thousands):

	Year Ended December 31,		
	2023	2022	2021
Gross crypto asset impairment expense.....	\$ 96,783	\$ 757,257	\$ 329,152
Recoveries.....	(131,458)	(35,046)	(175,992)
Crypto asset impairment, net.....	<u>\$ (34,675)</u>	<u>\$ 722,211</u>	<u>\$ 153,160</u>

The Company records gross impairment charges when the observed market price of crypto assets held decreases below the carrying value. The Company may later recover impairments through subsequent crypto asset sales and disposals. Collectively, these activities are shown as crypto asset impairment, net in the consolidated statements of operations.

See *Note 15. Derivatives*, for additional details regarding crypto assets held designated as hedged items in fair value hedges. See *Note 16. Fair Value Measurements*, for additional details regarding the carrying value of the Company's crypto assets held that are recorded at fair value.

When the Company borrows crypto assets, it may be required to pledge collateral to maintain a required collateral percentage. See *Note 13. Collateral*, for additional details regarding assets pledged as collateral.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

10. CUSTOMER ASSETS AND LIABILITIES

The following table presents customers' cash and safeguarded crypto positions (in thousands):

	December 31, 2023	December 31, 2022
Customer custodial funds	\$ 4,570,845	\$ 5,041,119
Safeguarding customer crypto assets	192,583,060	75,413,188
Total customer assets	\$ 197,153,905	\$ 80,454,307
Customer custodial cash liabilities	\$ 4,570,845	\$ 4,829,587
Safeguarding customer crypto liabilities	192,583,060	75,413,188
Total customer liabilities	\$ 197,153,905	\$ 80,242,775

During the years ended December 31, 2023 and 2022, no losses were incurred in connection with safeguarding customer crypto assets.

The following table sets forth the fair values of safeguarding customer crypto assets that were greater than 5% of the total safeguarding customer crypto assets recorded, as shown on the consolidated balance sheets (in thousands, except percentages):

	December 31, 2023		December 31, 2022	
	Fair Value	Percentage of Total ⁽¹⁾	Fair Value	Percentage of Total ⁽¹⁾
Bitcoin	\$ 89,864,637	47%	\$ 32,468,926	43%
Ethereum ⁽²⁾	40,200,059	21%	20,858,121	28%
Solana	12,906,278	6%	1,233,451	1%
Other crypto assets	49,612,086	26%	20,852,690	28%
Total safeguarding customer crypto assets	\$ 192,583,060	100%	\$ 75,413,188	100%

(1) As of December 31, 2023 and 2022, no assets other than Bitcoin, Ethereum, and Solana individually represented more than 5% of total safeguarding customer crypto assets.

(2) As of December 31, 2023 and 2022, Ethereum included \$10.1 billion and \$3.0 billion, respectively, of staked Ethereum.

See *Note 16. Fair Value Measurements*, for additional details regarding the safeguarding customer crypto assets and safeguarding customer crypto liabilities.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

11. PREPAID EXPENSES AND OTHER CURRENT AND NON-CURRENT ASSETS

Prepaid expenses and other current assets and other non-current assets consisted of the following (in thousands):

	December 31, 2023	December 31, 2022
Prepaid expenses and other current assets		
Prepaid expenses	\$ 79,552	\$ 98,204
Assets pledged as collateral ⁽¹⁾	53,071	100,007
Other	16,191	18,837
Total prepaid expenses and other current assets	<u>\$ 148,814</u>	<u>\$ 217,048</u>
Other non-current assets		
Strategic investments ⁽²⁾	\$ 343,045	\$ 326,683
Deposits	16,250	10,989
Other	3,590	17,257
Total other non-current assets	<u>\$ 362,885</u>	<u>\$ 354,929</u>

(1) Includes \$51.9 million and \$58.4 million as of December 31, 2023 and 2022, respectively, of the right to receive a fixed amount of USDC and BTC pledged as collateral. See *Note 13. Collateral*, for additional details on assets pledged as collateral.

(2) Includes \$12.7 million and \$11.4 million as of December 31, 2023 and 2022, respectively, of strategic investments in tokens and debt securities that are recorded at their impaired cost basis.

The Company acquired a 50% interest in Centre Consortium LLC (“Centre”) during August 2019. The Company had significant influence over the entity, but did not have power or control. The investment was included in Other under other non-current assets in the table above. On August 18, 2023, the Company entered into a share transfer agreement to exchange its 50% interest in Centre to its joint venture partner, Circle US Holdings, Inc., for 3.5% of the fully diluted equity of Circle Internet Financial Limited at an estimated fair value of \$51.1 million, which is included in strategic investments in the tables within this Note and is accounted for under the measurement alternative. In connection with this transaction, the Centre joint venture was terminated, and the Company recorded a gain of \$49.9 million, which is included in other (income) expense, net in the consolidated statement of operations during the year ended December 31, 2023.

Measurement alternative investments

The changes in the carrying value of strategic investments accounted for under the measurement alternative are presented below (in thousands):

	Year Ended December 31,	
	2023	2022
Carrying amount, beginning of period	\$ 315,285	\$ 352,431
Net additions ⁽¹⁾	60,979	62,975
Upward adjustments	62	900
Previously held interest in ORDAM (see Note 4)	(20,000)	—
Impairments and downward adjustments	(25,980)	(101,021)
Carrying amount, end of period	<u>\$ 330,346</u>	<u>\$ 315,285</u>

(1) Net additions include additions from purchases and reductions due to exits of securities and reclassifications due to changes to capital structure.

Upward adjustments, impairments, and downward adjustments from remeasurement of investments are included in other (income) expense, net in the consolidated statements of operations. As of December

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

31, 2023, cumulative upward adjustments for investments held as of that date were \$4.9 million and cumulative impairments and downward adjustments were \$127.0 million. As of December 31, 2022, cumulative upward adjustments for investments held as of that date were \$4.9 million and cumulative impairments and downward adjustments were \$102.0 million.

12. ACCRUED EXPENSES AND OTHER CURRENT LIABILITIES

Accrued expenses and other current liabilities consisted of the following (in thousands):

	December 31, 2023	December 31, 2022
Accrued payroll and payroll related	\$ 224,237	\$ 90,257
Other accrued expenses	89,254	75,532
Income taxes payable	17,366	5,534
Obligation to return collateral ⁽¹⁾	1,063	26,874
Short-term borrowings	—	20,519
Other payables ⁽²⁾	115,130	112,520
Total accrued expenses and other current liabilities	<u>\$ 447,050</u>	<u>\$ 331,236</u>

(1) See Note 13. *Collateral* for additional details on obligation to return collateral.

(2) Includes other payables denominated in crypto assets. See Note 15. *Derivatives* for additional details.

Short-term borrowings include borrowings with open terms or amounts payable within the next 12 months or sooner at the option of the Company or the lender. The weighted average interest rate on these borrowings was 4.49% per annum as of December 31, 2022.

13. COLLATERAL

Company assets pledged as collateral

The Company's assets pledged as collateral and recognized within prepaid expenses and other current assets in the consolidated balance sheets, consisted of the following (in thousands, except units):

	December 31, 2023		December 31, 2022	
	Units	Fair Value	Units	Fair Value
USDC ⁽¹⁾	51,879,705	\$ 51,880	47,633,897	\$ 47,634
Bitcoin ⁽²⁾	—	—	650	10,743
Fiat	N/A	1,191	N/A	41,630
Total		<u>\$ 53,071</u>		<u>\$ 100,007</u>

(1) As of December 31, 2023 and 2022, the Company had pledged USDC that served exclusively as collateral for certain crypto asset borrowings with a fair value of at least 100% of the loan amount outstanding.

(2) As of December 31, 2022, the Company had pledged Bitcoin that served exclusively as collateral for fiat loans with a fair value of at least 110% of the loan amount outstanding. No Bitcoin was pledged as collateral as of December 31, 2023.

The Company had \$29.6 million and \$0 of USDC collateral pledged as of December 31, 2023 and 2022, respectively, not included in the table above nor recognized as assets pledged as collateral in the consolidated balance sheets as they did not meet the derecognition criteria.

See the consolidated balance sheets, Note 2. *Summary of Significant Accounting Policies*, and Note 15. *Derivatives* for information on the borrowings associated with this collateral. The aggregate carrying value of these borrowings and related derivatives was \$63.0 million and \$151.5 million, as of December 31, 2023 and 2022, respectively.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

Borrower assets pledged as collateral

The Company's obligation to return borrower collateral, which is included within accrued expenses and other current liabilities in the consolidated balance sheets, by type of asset pledged as collateral, consisted of the following (in thousands, except units):

	December 31, 2023		December 31, 2022	
	Units	Fair Value	Units	Fair Value
USDC	—	\$ —	26,873,830	\$ 26,874
Fiat	N/A	1,063	N/A	—
Total		\$ 1,063		\$ 26,874

The Company did not rehypothecate the collateral above at either date, though it had the right to do so.

The Company had \$712.6 million and \$136.0 million of collateral assets pledged by borrowers as of December 31, 2023 and 2022, respectively, denominated in USDC, fiat, or crypto assets where the Company did not have a right to use the collateral or the collateral did not meet the recognition criteria. These amounts are not included in the table above nor in the consolidated balance sheets as the collateral did not meet the recognition criteria.

See Note 6. *Accounts and loans receivable, net of allowance* for information on the loans associated with this collateral.

14. INDEBTEDNESS

The components of indebtedness were as follows as of December 31, 2023 (in thousands, except percentages):

Indebtedness	Effective Interest Rate	Principal Amount	Unamortized Debt Discount and Issuance Costs	Net Carrying Amount
0.50% 2026 Convertible Notes due on June 1, 2026	0.98%	\$ 1,273,013	\$ (15,378)	\$ 1,257,635
3.38% 2028 Senior Notes due on October 1, 2028....	3.57%	1,000,000	(8,218)	991,782
3.63% 2031 Senior Notes due on October 1, 2031....	3.77%	737,457	(6,917)	730,540
Total		\$ 3,010,470	\$ (30,513)	\$ 2,979,957

The components of indebtedness were as follows as of December 31, 2022 (in thousands, except percentages):

Indebtedness	Effective Interest Rate	Principal Amount	Unamortized Debt Discount and Issuance Costs	Net Carrying Amount
0.50% 2026 Convertible Notes due on June 1, 2026	0.98%	\$ 1,437,500	\$ (23,339)	\$ 1,414,161
3.38% 2028 Senior Notes due on October 1, 2028....	3.57%	1,000,000	(10,022)	989,978
3.63% 2031 Senior Notes due on October 1, 2031....	3.77%	1,000,000	(10,691)	989,309
Total		\$ 3,437,500	\$ (44,052)	\$ 3,393,448

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

Convertible senior notes

In May 2021, the Company issued an aggregate principal amount of \$1.4 billion of convertible senior notes due in 2026 (the “2026 Convertible Notes”) pursuant to an indenture, dated May 18, 2021 (the “Convertible Notes Indenture”), between the Company and U.S. Bank National Association, as trustee. The 2026 Convertible Notes were offered and sold in a private offering to qualified institutional buyers pursuant to Rule 144A under the Securities Act of 1933, as amended (the “Securities Act”).

The 2026 Convertible Notes are senior unsecured obligations of the Company and bear interest at a rate of 0.50% per year payable semi-annually in arrears on June 1 and December 1 of each year, beginning on December 1, 2021. The 2026 Convertible Notes mature on June 1, 2026, unless earlier converted, redeemed or repurchased. The proceeds received of \$1.4 billion were net of a 1% original issue discount. In June 2023, the Company paid \$45.5 million to repurchase \$64.5 million of aggregate principal amount of the 2026 Convertible Notes with a carrying value of \$63.6 million, net of unamortized issuance costs and original issue discount of \$0.9 million and legal fees of \$0.3 million. In November 2023, the Company paid \$80.9 million to repurchase \$100.0 million of aggregate principal amount of the 2026 Convertible Notes with a carrying value of \$98.8 million, net of unamortized issuance costs and original issue discount of \$1.2 million. The Company recorded a corresponding net gain on extinguishment of long-term debt during the year ended December 31, 2023 of \$35.8 million in other (income) expense, net within the consolidated statements of operations.

The initial conversion rate and conversion rate for the 2026 Convertible Notes is 2.6994 shares of the Company's Class A common stock per \$1,000 principal amount of 2026 Convertible Notes, which is equivalent to an initial conversion price of approximately \$370.45 per share of the Class A common stock. The conversion rate and conversion price are subject to customary adjustments under certain circumstances in accordance with the terms of the Convertible Notes Indenture.

The 2026 Convertible Notes will be convertible at the option of the holders before December 1, 2025 only upon the occurrence of certain events, and from and after December 1, 2025, at any time at their election until the close of business on the second scheduled trading day immediately preceding June 1, 2026, only under certain circumstances. Upon conversion, the Company may satisfy its conversion obligation by paying or delivering, as applicable, cash, shares of the Company's Class A common stock or a combination of cash and shares of the Company's Class A common stock, at the Company's election, based on the applicable conversion rate. In addition, if certain corporate events that constitute a make-whole fundamental change (as defined in the Convertible Notes Indenture) occur, then the conversion rate will, in certain circumstances, be increased for a specified period of time. Additionally, in the event of a corporate event constituting a fundamental change (as defined in the Convertible Notes Indenture), holders of the 2026 Convertible Notes may require the Company to repurchase all or a portion of their 2026 Convertible Notes at a repurchase price equal to 100% of the principal amount of the 2026 Convertible Notes being repurchased, plus accrued and unpaid special interest or additional interest, if any, to, but excluding, the date of the fundamental change repurchase.

Discounts on the 2026 Convertible Notes reflect a 1% original issue discount of \$14.4 million and debt issuance costs related to the 2026 Convertible Notes of \$19.4 million, which include commissions payable to the initial purchasers and third-party offering costs.

Capped calls

On May 18, 2021, in connection with the pricing of the 2026 Convertible Notes, the Company entered into privately negotiated capped call transactions (the “Capped Calls”) with certain financial institutions (the “option counterparties”) at a cost of \$90.1 million. The Capped Calls cover, subject to customary adjustments, the number of shares of the Company's Class A common stock initially underlying the 2026 Convertible Notes. By entering into the Capped Calls, the Company expects to reduce the potential dilution to its Class A common stock (or, in the event a conversion of the 2026 Convertible Notes is settled in cash, to reduce its cash payment obligation) in the event that at the time of conversion of the 2026

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

Convertible Notes its Class A common stock price exceeds the conversion price of the 2026 Convertible Notes. The Capped Calls have an initial strike price of approximately \$370.45 per share of Class A common stock and an initial cap price of approximately \$478.00 per share of Class A common stock.

Senior notes

In September 2021, the Company completed the issuance of an aggregate principal amount of \$1.0 billion of senior notes due on October 1, 2028 (the “2028 Senior Notes”) and an aggregate principal amount of \$1.0 billion of senior notes due on October 1, 2031 (the “2031 Senior Notes” and together with the 2028 Senior Notes, the “Senior Notes”). The Senior Notes were issued within the United States only to persons reasonably believed to be qualified institutional buyers pursuant to Rule 144A under the Securities Act, and outside the United States to non-U.S. persons pursuant to Regulation S under the Securities Act.

In August and September 2023, the Company paid \$177.2 million to repurchase \$262.5 million of aggregate principal amount of the 2031 Senior Notes with a carrying value of \$259.9 million, net of unamortized issuance costs of \$2.6 million and legal fees of \$1.1 million. The Company recorded a corresponding net gain on extinguishment of long-term debt during the year of \$81.6 million in other (income) expense, net within the consolidated statements of operations.

The Company issued the Senior Notes at par and paid approximately \$24.0 million in total debt issuance costs, which includes commissions payable to the initial purchasers and third-party offering costs. Interest on the Senior Notes is payable semi-annually in arrears on April 1 and October 1 of each year, beginning on April 2022 at 3.375% per annum for the 2028 Senior Notes and 3.625% per annum for the 2031 Notes. The entire principal amount of the Senior Notes is due at the time of maturity, unless repurchased or redeemed at an earlier date. The Senior Notes were issued pursuant to an indenture, dated September 17, 2021 (the “Senior Notes Indenture”), among the Company, the Guarantor (as defined below) and U.S. Bank National Association, as trustee.

The Senior Notes are redeemable at the Company's discretion, in whole or in part, at any time. If redeemed prior to October 1, 2024 for the 2028 Senior Notes and October 1, 2026 for the 2031 Senior Notes, the redemption price is subject to a make-whole premium calculated by reference to then-current U.S. Treasury rates plus a fixed spread, plus any accrued and unpaid interest. If redeemed on or after those respective dates, the make-whole premium does not apply.

In addition, prior to October 1, 2024, the Company may redeem up to 40% of the aggregate principal amount of the Senior Notes with net cash proceeds from certain equity offerings at a redemption price equal to 103.375% of the principal amount of the 2028 Senior Notes to be redeemed and 103.625% of the principal amount of the 2031 Senior Notes to be redeemed, in each case, plus any accrued and unpaid interest. Upon the occurrence of a change of control triggering event (as defined in the Senior Notes Indenture), the Company must offer to repurchase each series of Senior Notes at a repurchase price equal to 101% of the principal amount of the Senior Notes to be repurchased, plus any accrued and unpaid interest, to, but excluding, the applicable repurchase date.

The Senior Notes are guaranteed by one of the Company's domestic subsidiaries, Coinbase, Inc. (the “Guarantor”).

The indenture governing the Senior Notes contains customary covenants that restrict the ability of the Company and certain of its subsidiaries to incur debt and liens. The Company is not aware of any instances of non-compliance with the covenants as of December 31, 2023.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

Interest

The following table summarizes the interest expense for the 2026 Convertible Notes and the Senior Notes (in thousands):

	Year Ended December 31,		
	2023	2022	2021
Coupon interest.....	\$ 73,861	\$ 77,235	\$ 24,129
Amortization of debt discount and issuance costs	8,830	8,653	5,031
Total	<u>\$ 82,691</u>	<u>\$ 85,888</u>	<u>\$ 29,160</u>

15. DERIVATIVES

The following outlines the Company's derivatives:

Type of Derivative	Description of Derivative	Location of Host Contract and Derivative on Balance Sheets
Crypto asset futures	The Company entered into short positions on futures contracts to minimize the exposure on the change in the fair value price of crypto assets held.	Accounts and loans receivable, net of allowance
Accounts and loans receivable denominated in crypto assets	Accounts receivable denominated in crypto assets: The Company provided services for which, under the contract, the customer pays in crypto assets. The amount of crypto assets are fixed at the time of invoicing. The right to receive fixed amounts of crypto assets consists of a receivable host contract and an embedded forward contract to purchase crypto assets. Crypto asset loans receivable: The Company lends crypto assets to institutions. The amount of crypto assets are fixed at the time of loan origination.	Accounts and loans receivable, net of allowance
Crypto assets pledged as collateral	The Company enters into certain borrowing arrangements that require the Company to post collateral in the form of crypto assets. If the lender has the right to use the crypto asset collateral, the Company presents the collateral pledged as a right to receive a fixed amount of crypto assets.	Prepaid expenses and other current assets
Foreign currency forward contracts	The Company entered into foreign currency forward contracts, with maturities of 12 months or less, to offset the foreign currency exchange risk of its assets and liabilities denominated in foreign currencies. These contracts are not designated as hedging instruments and reduce, but do not entirely eliminate, the impact of foreign currency exchange rate movements on the Company's assets and liabilities.	Prepaid expenses and other current assets/ Accrued expenses and other current liabilities
Other payables denominated in crypto assets	The Company entered into arrangements that result in the obligation to deliver a fixed amount of crypto assets in the future.	Accrued expenses and other current liabilities
Crypto asset borrowings	The Company borrowed crypto assets that resulted in the obligation to deliver a fixed amount of crypto assets in the future.	Crypto asset borrowings

Impact of derivatives on the consolidated balance sheets

The following table summarizes the notional amounts of derivative instruments outstanding, measured in U.S. dollar equivalents (in thousands):

	December 31, 2023	December 31, 2022
Designated as hedging instrument⁽¹⁾		
Crypto asset futures ⁽²⁾	\$ —	\$ 136,230
Crypto asset borrowings	31,666	80,999
Not designated as hedging instrument		
Crypto asset futures ⁽²⁾	—	12,462
Accounts and loans receivable denominated in crypto assets	16,335	101,598
Crypto assets pledged as collateral	—	13,103
Other payables denominated in crypto assets	20,092	4,267
Crypto asset borrowings	12,503	70,462

(1) For risk management purposes, the Company applies hedge accounting using these derivative instruments in qualifying fair value hedges to primarily hedge the fair value exposure of crypto asset prices.

(2) Derivative notional amounts are reference amounts from which contractual payments or settlement are derived and do not represent a complete measure of the risk profile of the Company's exposure to derivative instruments.

The following tables summarize information on derivative assets and liabilities that are reflected on the consolidated balance sheets, by accounting designation (in thousands):

	Gross Derivative Assets			Gross Derivative Liabilities

- (1) Represents money market funds. Excludes \$1.4 billion of corporate cash held in deposit at banks and \$88.8 million held at venues, which were not measured and recorded at fair value as of December 31, 2023. Excludes \$2.0 billion of corporate cash held in deposit at banks and \$143.2 million held at venues, which were not measured and recorded at fair value as of December 31, 2022.
- (2) Represents money market funds. Excludes customer custodial funds of \$1.3 billion and \$3.0 billion held in deposit at financial institutions and not measured and recorded at fair value as of December 31, 2023 and 2022, respectively.
- (3) Includes crypto assets held that have been designated as hedged items in fair value hedges and excludes crypto assets of \$404.7 million and \$222.8 million held at cost as of December 31, 2023 and 2022, respectively.
- (4) See Note 15. Derivatives for additional details.

The Company did not make any transfers into or out of Level 3 of the fair value hierarchy during the years ended December 31, 2023 and 2022.

Safeguarding customer crypto assets and liabilities represent the Company's obligation to safeguard customer crypto assets. Accordingly, the Company has valued the assets and liabilities using quoted market prices for the underlying crypto assets which is based on Level 2 inputs.

Level 3 contingent consideration arrangement liability

The following table presents a reconciliation of the contingent consideration arrangement measured at fair value on a recurring basis using significant unobservable inputs (in thousands):

	Year Ended December 31,	
	2023	2022
Balance, beginning of period	\$ 1,855	\$ 14,828
Change in fair value	436	(8,312)
Settlement	(2,291)	(4,661)
Balance, end of period	<u>\$ —</u>	<u>\$ 1,855</u>

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

In connection with the contingent consideration arrangement, the Company issued 57,640 and 28,422 shares of its Class A common stock in 2022 and 2023, respectively, pursuant to the terms of the arrangement. As of December 31, 2023, all contingencies related to this arrangement were resolved. Contingent consideration arrangements are included in other non-current liabilities and changes in fair value are recognized through other (income) expense, net in the consolidated statements of operations.

Assets and liabilities measured and recorded at fair value on a non-recurring basis

The Company's non-financial assets, such as goodwill, intangible assets, property and equipment, and crypto assets held but not designated in hedging relationships are adjusted to fair value when an impairment charge is recognized. The Company's strategic investments are also measured at fair value on a non-recurring basis. Such fair value measurements are based predominantly on Level 3 inputs. The carrying value of the Company's strategic investments is predominantly adjusted based on an Option-Pricing Model that uses publicly available market data of comparable companies and other unobservable inputs including expected volatility, expected time to liquidity, adjustments for other company-specific developments, and the rights and obligations of the securities the Company holds. Fair value of crypto assets held are predominantly based on Level 1 inputs.

Assets and liabilities not measured and recorded at fair value

The Company's financial instruments, including certain cash and cash equivalents, restricted cash, certain customer custodial funds, USDC, accounts receivable, fiat loans receivable, customer custodial cash liabilities, and short-term borrowings are not measured at fair value. The carrying values of these instruments approximate their fair values due to their liquid or short term nature. If these financial instruments were recorded at fair value, they would be based on Level 1 inputs, except for short-term borrowings and loans receivable which would be based on Level 2 and Level 3 inputs, respectively.

The Company estimates the fair value of its 2026 Convertible Notes and Senior Notes based on quoted prices in markets that are not active, which is considered a Level 2 valuation input. As of December 31, 2023, the estimated fair value of the 2026 Convertible Notes and Senior Notes were \$1.2 billion and \$1.4 billion, respectively.

17. CAPITAL STOCK

Preferred stock

In connection with the Direct Listing, the Company's amended and restated certificate of incorporation (the "Restated Certificate of Incorporation") became effective, which authorized the issuance of 500,000,000 shares of undesignated preferred stock with a par value of \$0.00001 per share with rights and preferences, including voting rights, designated from time to time by the Company's board of directors (the "Board").

Common stock

Pursuant to the Restated Certificate of Incorporation, the Board is authorized to issue 10,000,000,000 shares of Class A common stock, 500,000,000 shares of Class B common stock, and 500,000,000 shares of undesignated common stock.

Dividend rights

Shares of Class A common stock and Class B common stock will be treated equally, identically and ratably, on a per share basis, with respect to dividends that may be declared by the Board.

Voting rights

Holders of Class A common stock are entitled to one vote per share, and holders of Class B common stock are entitled to 20 votes per share. Holders of Class A common stock and Class B common stock

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

generally vote together as a single class on all matters (including the election of directors) submitted to a vote of the stockholders of the Company.

Right to receive liquidation distributions

Upon a liquidation, dissolution or winding-up of the Company, the assets legally available for distribution to stockholders would be distributed ratably among the holders of Class A common stock and Class B common stock and any participating preferred stock or new series of common stock outstanding at that time, subject to prior satisfaction of all outstanding debt and liabilities and the preferential rights of and the payment of liquidation preferences, if any, on any outstanding shares of preferred stock or new series of common stock.

Conversion

Shares of Class B common stock are convertible at any time at the option of the holder into shares of Class A common stock on a one-to-one basis. In addition, each share of Class B common stock will automatically convert into a share of Class A common stock upon a sale or transfer (other than with respect to certain estate planning and other transfers). Further, upon certain events specified in the Restated Certificate of Incorporation, all outstanding shares of Class B common stock will convert automatically into shares of Class A common stock. Once converted into Class A common stock, the Class B common stock will not be reissued.

18. STOCK-BASED COMPENSATION

Stock plans

The Company maintains four equity incentive plans: the 2013 Plan, the 2019 Plan, and the 2021 Plan (together, the “Plans”), and the ESPP. Following the Direct Listing, the Company has only issued awards under the 2021 Plan and the ESPP, and no additional awards will be granted under the 2013 Plan and 2019 Plan. In addition, certain of the Company’s existing options assumed in connection with acquisitions are governed by the terms of the acquired company’s equity awards plan.

In February 2021, the Board approved and adopted the 2021 Plan. The 2021 Plan became effective on March 31, 2021, the date immediately prior to the effective date of the Company’s registration statement for the Direct Listing. The 2021 Plan serves as the successor to the 2019 Plan. Outstanding awards under the 2013 Plan and 2019 Plan continue to be subject to their original terms and conditions. The 2021 Plan provides for the granting of incentive stock options, RSUs, restricted stock, stock appreciation rights and performance and stock bonus awards to assist in attracting, retaining and motivating employees. The number of shares available for grant and issuance under the 2021 Plan will be automatically increased on January 1st of each of the first ten fiscal years during the term of the 2021 Plan by the lesser of (a) five percent of the total number of shares of all classes of the Company’s common stock issued and outstanding on an as converted to common stock basis on each December 31st immediately prior to the date of increase or (b) such number of shares determined by the Board.

As of December 31, 2023, there were 28,948,240 shares of Class A common stock subject to issued and outstanding options, RSUs and PRSUs, and 3,568,760 shares of Class B common stock subject to issued and outstanding options under the Plans. Under the 2021 Plan, there were 49,433,488 shares of Class A common stock available for future issuance.

Stock options

Options granted under the Plans may be either incentive stock options (“ISOs”) or nonqualified stock options (“NSOs”). ISOs may be granted only to Company employees (including officers and directors who are also employees). NSOs may be granted to Company employees and non-employees.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

Options under the Plans may be granted for contractual periods of up to ten years and at prices determined by the Board, provided, however, that the exercise price of an ISO and NSO shall not be less than 100% of the estimated fair value of the underlying shares on the date of the grant (110% if granted to a stockholder who owns more than ten percent of the total combined voting power of all classes of stock of the Company or any parent or subsidiary).

Under the 2013 Plan and 2019 Plan, options granted to new employees of the Company generally vest over four years and vest at a rate of 25% upon the first anniversary of the issuance date and 1/48 per month thereafter. Refresher options granted to existing employees of the Company generally vest in equal monthly installments over four years. No additional awards have been or will be granted under the 2013 Plan and 2019 Plan following the Company's Direct Listing.

Under the 2021 Plan, options are granted to executives and eligible non-executive employees which vest in equal quarterly installments over a period of three years.

The 2013 Plan and 2019 Plan allow for a 7 year exercise window post-termination for employees of the Company who have provided at least two years of continuous service to the Company as of their termination date.

A summary of options activity for the year ended December 31, 2023 is as follows (in thousands, except per share and years data):

	Options Outstanding	Weighted Average Exercise Price per Share	Weighted Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value
Balance at January 1, 2023	31,795	\$ 23.31	7.0	\$ 504,222
Granted	843	73.07		
Exercised	(3,039)	15.84		
Forfeited and cancelled	(902)	40.90		
Balance at December 31, 2023	<u>28,697</u>	<u>\$ 25.01</u>	<u>6.1</u>	<u>4,295,055</u>
Exercisable at December 31, 2023	22,560	\$ 25.43	6.0	3,371,636
Vested and expected to vest at December 31, 2023	22,593	\$ 25.42	6.0	3,376,658

During the year ended December 31, 2023, the Company granted stock options for the purchase of 842,617 shares of Class A common stock with a weighted-average grant date fair value of \$40.85 per share to certain employees of the Company. The stock options vest over three years at a rate of 1/12 per quarter.

As of December 31, 2023, there was total unrecognized compensation cost of \$70.1 million related to unvested stock options. These costs are expected to be recognized over a weighted-average period of approximately 2.3 years.

The intrinsic value is calculated as the difference between the exercise price of the underlying stock option award and the estimated fair value of the Company's common stock. The aggregate intrinsic value of stock options exercised during the years ended December 31, 2023, 2022 and 2021 was \$226.5 million, \$336.3 million and \$5.9 billion, respectively.

During the years ended December 31, 2023, 2022 and 2021, 4,567,625, 7,592,673, and 14,966,504 stock options vested with a weighted-average grant date fair value of \$15.93, \$12.46, and \$8.74 per share, respectively.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

The assumptions used under the Black-Scholes-Merton Option-Pricing Model to calculate the fair value of the options granted to employees were as follows:

	Year Ended December 31,		
	2023	2022	2021
Dividend yield	0.0%	0.0%	0.0%
Expected volatility	90.5%	59.3%	44.0%
Expected term (in years)	5.8	5.8	4.8
Risk-free interest rate	3.9%	2.1%	0.5%

Early exercise of stock options

As of December 31, 2023 and 2022, there were 29,430 and 166,481 shares, respectively, subject to repurchase related to stock options early exercised and not yet vested, but that are expected to vest. Class A common stock purchased pursuant to an early exercise of stock options is not deemed to be outstanding for accounting purposes until those shares vest. The Company excludes unvested shares subject to repurchase in the number of shares outstanding in the consolidated balance sheets and consolidated statements of changes in preferred stock and stockholders' equity. As of December 31, 2023 and 2022, the Company recorded a liability related to these shares subject to repurchase in the amount of \$0.6 million and \$3.3 million, respectively, which is included within accrued expenses and other current liabilities on the accompanying consolidated balance sheets.

Chief Executive Officer performance stock options

On August 11, 2020, the Company granted its Chief Executive Officer an option award to purchase up to 9,293,911 shares of Class A common stock, at an exercise price of \$23.46 per share. Vesting of the award is dependent on both performance-based and market-based conditions being met. The total grant date fair value of this award was \$56.7 million.

The performance condition was contingent on the Company's registration statement being declared effective by the SEC under the Securities Act. The occurrence of this event was considered to not be probable until such time that it occurred. During April 2021, as a result of the Company's registration statement being declared effective by the SEC, the performance condition of the option award granted to the Chief Executive Officer was met. No awards vested at that time as none of the accompanying market-based conditions had been met.

The market conditions are contingent on the Company's Class A common stock price achieving certain stock price target milestones. On July 8, 2021, the first price target of the award was met, resulting in the vesting of 3,159,930 shares of Class A common stock subject to the option award. During the years ended December 31, 2023, 2022 and 2021, compensation expense of \$3.9 million, \$3.9 million and \$29.5 million was recognized related to this award, respectively.

Restricted stock units

The Company grants RSUs that vest upon the satisfaction of a service-based condition. In general, the RSUs vest over a service period ranging from one to four years. Once vested, the RSUs are settled by delivery of Class A common stock.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

A summary of RSU activity for the year ended December 31, 2023 is as follows (in thousands, except per share data):

	Number of Shares	Weighted- Average Grant Date Fair Value Per Share
Balance at January 1, 2023	5,329	\$ 127.85
Granted	9,408	58.04
Vested	(10,278)	71.40
Forfeited and cancelled	(1,443)	116.14
Balance at December 31, 2023	3,016	\$ 108.07

During the years ended December 31, 2022 and 2021, the weighted-average grant date fair value per share granted was \$112.35 and \$233.24, respectively. During the years ended December 31, 2023, 2022, and 2021, the aggregate fair value as of the vest date of RSUs that vested was \$753.9 million, \$947.9 million, and \$644.2 million, respectively.

In December 2022, the Company modified certain RSU awards held by 1,198 employees to accelerate vesting of the remaining unvested awards on December 21, 2022 instead of the original vest date of February 20, 2023. The modification of awards did not result in any incremental compensation cost, however \$36.1 million of stock-based compensation expense was accelerated and recognized upon modification.

As of December 31, 2023, there was total unrecognized compensation cost of \$284.2 million related to unvested RSUs. These costs are expected to be recognized over a weighted-average period of approximately 1.3 years.

President & Chief Operating Officer performance award

On April 20, 2023, the Company's Compensation Committee granted the President & Chief Operating Officer an award of PRSUs covering a target of 401,983 shares of Class A common stock and up to a maximum of 803,966 shares of Class A common stock (the "2023 COO Performance Award").

Up to 40% of the 2023 COO Performance Award is subject to vesting based upon achievement of certain cumulative revenue and cumulative adjusted EBITDA target values which are separately evaluated for the period commencing January 1, 2023 and ending on December 31, 2025, subject to her continued employment until February 20, 2026 (the "Financial Performance Tranches"). Up to 60% of the 2023 COO Performance Award is subject to vesting in increments based upon a relative shareholder return target value for the three annual periods between January 1, 2023 and December 31, 2025, and the three year period between January 1, 2023 and December 31, 2025, subject to her continued employment through the applicable year end dates (the "Market Tranches"). The total grant date fair value of the Market Tranches of this award was \$25.1 million, while the grant date fair value of the Financial Performance Tranches was \$19.5 million assuming maximum achievement.

During the year ended December 31, 2023, stock-based compensation expense of \$9.8 million was recognized related to this award.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

A summary of PRSU activity for the year ended December 31, 2023 is as follows (in thousands, except per share data):

	Number of Shares	Weighted- Average Grant Date Fair Value Per Share
Balance at January 1, 2023	—	\$ —
Granted	804	55.42
Balance at December 31, 2023	<u>804</u>	<u>\$ 55.42</u>

As of December 31, 2023, there was total unrecognized compensation cost of \$15.3 million related to the unvested Market Tranches of these PRSUs, which are currently expensing. These costs are expected to be recognized over a weighted-average period of approximately 1.9 years. The Company is not yet recognizing expense with respect to the Financial Performance Tranches; the full grant date fair value of these tranches is unrecognized.

Restricted common stock

In connection with the Company's acquisitions, the Company has issued shares of restricted Class A common stock. Vesting of this restricted Class A common stock is dependent on a service-based vesting condition that is generally satisfied over three years. The Company has the right to repurchase shares at par value when the vesting condition is not satisfied. Activity of restricted Class A common stock is as follows (in thousands, except per share data):

	Number of Shares	Weighted- Average Grant Date Fair Value Per Share
Balance at January 1, 2023	1,275	\$ 139.72
Granted	263	64.51
Vested	(966)	132.53
Forfeited and cancelled	(29)	171.85
Balance at December 31, 2023	<u>543</u>	<u>\$ 114.22</u>

During the years ended December 31, 2022 and 2021, the weighted-average grant date fair value per share granted was \$137.05 and \$180.33, respectively. During the years ended December 31, 2023, 2022, and 2021, the aggregate fair value as of the vest date of restricted common stock that vested was \$56.0 million, \$148.6 million, and \$65.0 million, respectively.

As of December 31, 2023, there was total unrecognized compensation cost of \$33.2 million related to unvested restricted Class A common stock. These costs are expected to be recognized over a weighted-average period of approximately 1.4 years.

Employee Stock Purchase Plan

In February 2021, the Board approved and adopted the ESPP. The ESPP became effective on April 1, 2021, the effective date of the Company's registration statement for the Direct Listing. The ESPP allows eligible employees the option to purchase shares of the Company's Class A common stock at a 15% discount, over a series of offering periods through accumulated payroll deductions over the period. The ESPP also includes a look-back provision for the purchase price if the stock price on the purchase date is lower than the stock price on the offering date.

The number of shares available for grant and issuance under the ESPP will be automatically increased on January 1st of each of the first ten fiscal years during the term of the ESPP by the lesser of (a) one percent of the total number of shares of all classes of the Company's common stock outstanding

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

on an as converted to common stock basis on each December 31st immediately prior to the date of increase or (b) such number of shares determined by the Board or the compensation committee of the Board.

The grant date of the initial offering period was May 3, 2021, and that offering period ended on April 30, 2023. Subsequent offering periods commence each May and November after the start of the initial offering period. For the years ended December 31, 2023, 2022 and 2021, total compensation expense of \$17.3 million, \$28.4 million and \$9.4 million, respectively, was recognized related to the ESPP. As of December 31, 2023 and 2022, the Company recorded a liability of \$4.1 million and \$6.7 million, respectively related to the accumulated payroll deductions, which are refundable to employees who withdraw from the ESPP. This amount is included within accrued expenses and other current liabilities on the accompanying consolidated balance sheets. As of December 31, 2023, there were 9.0 million shares of Class A common stock available for issuance under the ESPP.

Stock-based compensation expense

Stock-based compensation is included in the following components of expenses on the accompanying consolidated statements of operations (in thousands):

	Year Ended December 31,		
	2023	2022	2021
Technology and development	\$ 476,478	\$ 1,093,983	\$ 571,861
Sales and marketing	59,000	76,153	32,944
General and administrative	245,190	395,687	215,880
Restructuring	84,042	—	—
Total	<u>\$ 864,710</u>	<u>\$ 1,565,823</u>	<u>\$ 820,685</u>

During the years ended December 31, 2023, 2022 and 2021, \$53.6 million, \$118.0 million and \$3.5 million of stock-based compensation expense was included in capitalized software, respectively. During the years ended December 31, 2023, 2022, and 2021, the Company recognized an income tax benefit of \$205.6 million, \$246.6 million, and \$1.4 billion, respectively, related to stock-based compensation expense. The income tax benefit related to stock-based compensation expense in 2021 reflects excess tax benefits primarily related to deductible stock option exercises in connection with the Direct Listing.

19. OTHER (INCOME) EXPENSE, NET

Other (income) expense, net consisted of the following (in thousands):

	Year Ended December 31,		
	2023	2022	2021
Foreign exchange losses, net	\$ 10,609	\$ 161,749	\$ 40,989
(Gains) losses on strategic investments	(24,368)	101,219	(19,602)
Gain on extinguishment of long-term debt	(117,383)	—	—
Other	(36,441)	2,505	(924)
Total other (income) expense, net	<u>\$ (167,583)</u>	<u>\$ 265,473</u>	<u>\$ 20,463</u>

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

20. INCOME TAXES

The components of income (loss) before income taxes were attributable to the following regions (in thousands):

	Year Ended December 31,		
	2023	2022	2021
Domestic	\$ (113,067)	\$ (3,071,951)	\$ 2,977,406
Foreign	36,222	7,369	49,541
Total income (loss) before provision for income taxes	<u>\$ (76,845)</u>	<u>\$ (3,064,582)</u>	<u>\$ 3,026,947</u>

Benefit from income taxes consisted of the following (in thousands):

	Year Ended December 31,		
	2023	2022	2021
Current			
Federal	\$ 8,761	\$ 1,654	\$ (51,942)
State	24,236	3,985	4,456
Foreign	11,621	22,763	8,642
Total current	<u>44,618</u>	<u>28,402</u>	<u>(38,844)</u>
Deferred			
Federal	(218,165)	(361,056)	(438,810)
State	416	(126,713)	(93,959)
Foreign	1,415	19,734	(25,560)
Total deferred	<u>(216,334)</u>	<u>(468,035)</u>	<u>(558,329)</u>
Total benefit from income taxes	<u>\$ (171,716)</u>	<u>\$ (439,633)</u>	<u>\$ (597,173)</u>

The effective income tax rate differs from the statutory federal income tax rate as follows:

	Year Ended December 31,		
	2023	2022	2021
U.S. statutory rate	21.00%	21.00%	21.00%
State income taxes, net of federal benefit	6.08	5.04	(4.67)
Foreign rate differential	(0.14)	(0.02)	(1.09)
Non-deductible compensation	(48.93)	(1.34)	0.83
Equity compensation	43.51	(3.43)	(31.95)
Adjustment to prior year provision	24.85	(0.23)	0.14
Research and development ("R&D") credits	62.20	1.40	(9.60)
Change in valuation allowance	195.59	(6.37)	1.65
Foreign tax credit	6.31	—	—
Foreign Derived Intangible Income ("FDII")	0.65	—	—
Global Intangible Low Taxed Income ("GILTI")	(18.55)	(0.94)	—
Uncertain tax positions	(56.06)	(0.60)	3.07
Other	(13.05)	(0.16)	0.89
Effective income tax rate	<u>223.46%</u>	<u>14.35%</u>	<u>(19.73)%</u>

The Company's effective tax rate of 223.46% for the year ended December 31, 2023 is due primarily to a reduction of a valuation allowance related to impairment charges on crypto assets held and strategic investments and tax benefits related to Federal R&D credits, reduced by certain nondeductible

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

compensation, tax on non-U.S. earnings, and other nondeductible expenses related to political contributions.

The Company's effective tax rate of 14.35% for the year ended December 31, 2022 reflects a tax benefit on pretax loss reduced by certain nondeductible compensation and a valuation allowance recorded on impairment charges related to crypto assets held and strategic investments.

The Company's effective tax rate of (19.73)% for the year ended December 31, 2021 reflects a tax benefit on pretax income due primarily to deductible stock option exercises as a result of the Direct Listing, and R&D credits.

The Company's effective tax rate can be volatile based on the amount of pretax income or loss in the reporting period. For example, when pretax income is lower, the effect of reconciling items to the U.S. statutory rate, such as nondeductible expenses, will have a greater impact on the effective tax rate.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes.

Significant components of the Company's deferred tax assets and liabilities consisted of the following (in thousands):

	December 31,	
	2023	2022
Deferred tax assets		
Safeguarded crypto liabilities	\$ 46,437,843	\$ 19,086,117
Accruals and reserves	13,847	6,248
Net operating loss carryforward	55,563	396,613
Lease liability	4,494	19,967
Tax credit carryforward	351,003	301,862
Stock-based compensation	21,284	24,527

Total net deferred tax assets	\$ 1,272,233	\$ 1,046,791

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

As of December 31, 2023, the Company had \$1.3 billion in net deferred tax assets. At each reporting date, management considers new evidence, both positive and negative, that could affect its view of the future realization of deferred tax assets. On the basis of this evaluation, only the portion of the deferred tax asset that is more likely than not to be realized was recognized. However, if the Company is not able to generate sufficient taxable income from its operations in the future, then a valuation allowance to reduce the Company's U.S. deferred tax assets may be required, which would increase the Company's expenses in the period the allowance is recognized.

Activity related to the Company's valuation allowance consisted of the following (in thousands):

	Year Ended December 31,		
	2023	2022	2021
Balance, beginning of period	\$ 252,258	\$ 54,383	\$ 5,174
Charged (credited) to expenses	(150,008)	197,875	49,209
Balance, end of period	<u>\$ 102,250</u>	<u>\$ 252,258</u>	<u>\$ 54,383</u>

The Company's valuation allowance as of December 31, 2023 was lower compared to 2022 driven by the increase in the fair value of crypto assets held during the reporting period. The valuation allowance as of December 31, 2023 includes allowances primarily related to California R&D credits, and realized and unrealized capital losses on crypto assets and Coinbase Ventures investments.

In accordance with the Company's adoption of SAB 121, the Company recognized a deferred tax liability on the safeguarded asset and an offsetting deferred tax asset on the safeguarded liability. In the unlikely event of loss or theft to the safeguarded asset, the Company may be obligated to indemnify the customer for the loss, and could result in a change to the net deferred tax asset. As of December 31, 2023, the Company has not recognized any potential loss event and the SAB 121 deferred tax asset and liability are equal and offsetting.

As of December 31, 2023, the Company also had R&D credits of \$260.6 million and \$97.5 million for federal and state income tax purposes, respectively. If not utilized, the federal research and development credits will expire in various amounts beginning in 2042. However, the state of California research and development credits can be carried forward indefinitely. The Company also had U.S. federal net operating loss carryforwards of \$105.0 million as of December 31, 2023, and an estimated \$1.3 billion as of December 31, 2022. On the Company's 2022 tax return, the Company elected to capitalize expenses which replaced the estimated 2022 net operating loss carryforwards. The U.S. federal net operating losses carry forward indefinitely. Additionally, the Company had U.S. state net operating losses of approximately \$331.7 million as of December 31, 2023. Generally, California and other significant U.S. states have a twenty-year carryforward for net operating losses.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

Activity related to the Company's unrecognized tax benefits consisted of the following (in thousands):

	Year Ended December 31,		
	2023	2022	2021
Balance, beginning of period	\$ 124,106	\$ 111,019	\$ 12,807
Settlements	—	(6,128)	—
Increase related to tax positions taken during a prior year	30,685	13,940	—
Decrease related to tax positions taken during a prior year	—	(9,187)	—
Increase related to tax positions taken during the current year ..	16,902	14,462	98,212
Balance, end of period	<u>\$ 171,693</u>	<u>\$ 124,106</u>	<u>\$ 111,019</u>

As of December 31, 2023 and 2022, the Company had \$171.7 million and \$124.1 million, respectively, of unrecognized tax benefits, of which \$126.8 million and \$114.4 million, respectively, would reduce income tax expense and affect the effective tax rate, if recognized. It is reasonably possible that the balance of unrecognized tax benefits could decrease within the next twelve months as a result of audit closures. The potential reduction in unrecognized tax benefits is \$71.8 million, of which \$67.4 million would favorably impact the Company's effective tax rate. The Company accounts for interest and penalties related to exposures as a component of income tax expense. The Company recorded \$1.6 million and \$0.5 million of accrued interest and penalties, respectively, as of December 31, 2023 and \$0.5 million and \$0.3 million of accrued interest and penalties, respectively, as of December 31, 2022.

The Company files U.S. federal, state, and foreign income tax returns in jurisdictions with varying statutes of limitations. Currently these statutes of limitations are open from 2020 forward for the United States, 2018 forward for California, 2021 forward for the United Kingdom, and 2019 forward for Ireland. The Company is currently under audit by the IRS with respect to its federal income tax returns for 2020 and 2021, and California with respect to its state income tax returns for 2018 and 2019. The Company is also under audit in the United Kingdom, Germany and India for 2021.

Net income (loss) per share attributable to common stockholders, diluted	<u>\$ 0.37</u>	<u>\$ (11.83)</u>	<u>\$ 14.50</u>

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

Certain shares of the Company's restricted Class A common stock granted as consideration in acquisitions and the Company's preferred stock outstanding during 2021 are participating securities. These participating securities do not contractually require the holders of such shares to participate in the Company's losses.

The rights, including the liquidation and dividend rights, of the holders of Class A common stock and Class B common stock are identical, except with respect to voting. As a result, the undistributed earnings are allocated on a proportionate basis and the resulting income (loss) per share will, therefore, be the same for both Class A common stock and Class B common stock on an individual or combined basis.

The following potentially dilutive shares were not included in the calculation of diluted shares outstanding as the effect would have been anti-dilutive (in thousands):

	December 31,		
	2023	2022	2021
Stock options	6,743	31,795	6,134
RSUs	929	5,329	151

ESPP	918	1,945	295
Restricted common stock	263	1,602	5
PRSUs	322	—	—
Total	12,612	44,551	6,585

22. COMMITMENTS AND CONTINGENCIES

Indemnifications

In the event any registrable securities are included in a registration statement, the Company's Amended and Restated Investors' Rights Agreement (the "IRA") entered into with certain of the Company's stockholders provides indemnity to each stockholder, their partners, members, officers, directors, and stockholders, legal counsel, and accountants; each underwriter, if any; and each person who controls each stockholder or underwriter, against any damages incurred in connection with investigating or defending any claim or proceeding arising as a result of such registration from which damages may result. The Company will reimburse each such party for any legal and any other expenses reasonably incurred, provided that the Company will not be liable in any such case to the extent the damages arise out of or are based upon any actions or omissions made in reliance upon and in conformity with written information furnished by or on behalf of such stockholder or underwriter and stated to be specifically for use therein.

The Company also has indemnity agreements with certain officers and directors of the Company pursuant to which the Company must indemnify the officer or director against all expenses, judgments, fines, and amounts paid in settlement reasonably incurred in connection with a third party proceeding, if the indemnitee acted in good faith and in a manner reasonably believed to be in or not opposed to the best interests of the Company, and in the case of a criminal proceeding, had no reasonable cause to believe the indemnitee's conduct was unlawful.

It is not possible to determine the maximum potential exposure under these indemnification agreements: (i) because the facts and circumstances involved in each claim are unique and the Company cannot predict the number or nature of claims that may be made; (ii) due to the unique facts and circumstances involved in each particular agreement; and (iii) due to the requirement for a registration of the Company's securities before any of the indemnification obligations contemplated in the IRA become effective.

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

The Company has also provided indemnities or similar commitments on standard commercial terms in the ordinary course of business.

Legal and regulatory proceedings

The Company is subject to various litigation, regulatory investigations, and other legal proceedings that arise in the ordinary course of its business. The Company is also subject to regulatory oversight by numerous regulatory and other governmental agencies. The Company reviews its lawsuits, regulatory investigations, and other legal proceedings on an ongoing basis and provides disclosure and records loss contingencies in accordance with the loss contingencies accounting guidance. In accordance with such guidance, the Company establishes accruals for such matters when potential losses become probable and can be reasonably estimated. If the Company determines that a loss is reasonably possible and the loss or range of loss can be estimated, the Company discloses the possible loss in the consolidated financial statements.

In July and August 2021, three purported securities class actions were filed in the U.S. District Court for the Northern District of California against the Company, its directors, certain of its officers and employees, and certain venture capital and investment firms. The complaints alleged violations of Sections 11, 12(a)(2) and 15 of the Securities Act, in connection with the registration statement and prospectus filed in connection with the Direct Listing. In November 2021, these actions were consolidated and recaptioned as *In re Coinbase Global Securities Litigation*, and an amended complaint was filed. The plaintiff seeks, among other relief, unspecified compensatory damages, attorneys' fees, and costs. The Company disputes the claims in these cases and is vigorously defending against them. Based on the preliminary nature of the proceedings in these cases, the outcome of these matters remain uncertain and the Company cannot estimate the potential impact, if any, on its business or financial statements at this time. The Company has subsequently received, and expects to receive in the future, similar shareholder claims.

In October 2021, a purported class action captioned *Underwood et al. v. Coinbase Global, Inc.*, was filed in the U.S. District Court for the Southern District of New York against the Company alleging claims under Sections 5, 15(a)(1) and 29(b) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and violations of certain California and Florida state statutes. On March 11, 2022, plaintiffs filed an amended complaint adding Coinbase, Inc. and Brian Armstrong as defendants and adding causes of action. Among other relief requested, the plaintiffs sought injunctive relief, unspecified damages, attorneys' fees and costs. On February 1, 2023, the court dismissed all federal claims (with prejudice) and state law claims (without prejudice) against Coinbase Global, Inc., Coinbase, Inc. and Brian Armstrong. Subsequently, on February 9, 2023, the plaintiffs appealed that ruling to the U.S. Court of Appeals for the Second Circuit, and the parties completed briefing the appeal on September 13, 2023. Oral argument took place on February 1, 2024. The defendants continue to dispute the claims in this case and intend to vigorously defend against them. Based on the nature of the proceedings in this case, the outcome of this matter remains uncertain and the Company cannot estimate the potential impact, if any, on its business or financial statements at this time.

In December 2021, a shareholder derivative suit captioned *Shin v. Coinbase Global, Inc.*, was filed in New York state court against the Company and its directors, alleging breach of fiduciary duties, unjust enrichment, abuse of control, gross mismanagement, and waste of corporate assets, and seeking unspecified damages and injunctive relief. The Company has subsequently received, and expects to receive in the future, similar derivative claims. The Company disputes the claims in these cases and intends to vigorously defend against them. Based on the preliminary nature of the proceedings in these cases, the outcome of these matters remain uncertain and the Company cannot estimate the potential impact, if any, on its business or financial statements at this time.

During 2022, the Company's subsidiary, Coinbase, Inc., which holds a BitLicense from the New York Department of Financial Services ("NYDFS") and is therefore subject to examinations and investigations by the NYDFS, was subject to an investigation by the NYDFS relating to its compliance program including

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

compliance with the Bank Secrecy Act and sanctions laws, cybersecurity, and customer support. In January 2023, the NYDFS announced a consent order focused on historical shortcomings in Coinbase, Inc.'s compliance program. Pursuant to the consent order, Coinbase, Inc. paid a \$50.0 million penalty in January 2023 and agreed to invest an additional \$50.0 million in its compliance function by the end of 2024.

In April 2022, a dissenting stockholder to the Company's acquisition of FairXchange, Inc. ("FairX") filed a Verified Petition for Appraisal of Stock in the Court of Chancery of the State of Delaware seeking, among other relief, an appraisal of the fair value of their common and preferred shares of FairX stock. Petitioners contend that the valuation of FairX was higher than the valuation ascribed by the parties at the time of the transaction. The case is captioned *Hyde Park Venture Partners Fund III, L.P. et al. v. FairXchange, LLC, et al.* Trial took place in November 2023 and post-trial briefing and argument is scheduled to be completed in March 2024. A settlement offer was made and rejected in November 2023. Based on the nature of the proceedings in this case, the outcome of this matter remains uncertain and the Company cannot reasonably estimate the potential impact, if any, on its business or financial statements at this time.

In June 2023, the SEC filed a complaint in the U.S. District Court for the Southern District of New York against the Company and Coinbase, Inc. alleging that Coinbase, Inc. has acted as an unregistered securities exchange, broker, and clearing agency in violation of Sections 5, 15(a) and 17A(b) of the Exchange Act and that, through its staking program, Coinbase, Inc. has offered and sold securities without registering its offers and sales in violation of Sections 5(a) and 5(c) of the Securities Act. The SEC has also alleged that the Company is liable for the alleged violations as an alleged control person of Coinbase, Inc. The case is captioned *SEC v. Coinbase, Inc. et al.* The SEC seeks, among other relief, injunctive relief, disgorgement and civil money penalties. The Company and Coinbase, Inc. filed an answer to the SEC complaint in June 2023, dispute the claims in this case, and intend to vigorously defend against them. On August 4, 2023, the Company and Coinbase, Inc. filed a motion for judgment on the pleadings. The SEC filed its response on October 3, 2023 and the Company and Coinbase, Inc. filed their reply on October 24, 2023. Oral argument took place on January 17, 2024. Based on the preliminary nature of the proceedings in this case, the outcome of this matter remains uncertain and the Company cannot estimate the potential impact, if any, on its business or financial statements at this time. An adverse resolution of the SEC's lawsuit could have a material impact on the Company's business and financial statements.

In June 2023, the Company and Coinbase, Inc. were issued notices, show-cause orders, and cease-and-desist letters, and became the subject of various legal actions initiated by U.S. state securities regulators in the states of Alabama, California, Illinois, Kentucky, Maryland, New Jersey, South Carolina, Vermont, Washington and Wisconsin alleging violations of state securities laws with respect to staking services provided by Coinbase, Inc. In July 2023, the Company and Coinbase, Inc. entered into agreements with state securities regulators in California, New Jersey, South Carolina and Wisconsin, pursuant to which customers in those states will no longer be able to stake new funds, in each case pending final adjudication of the matters. In October 2023, the Company and Coinbase, Inc. entered into a similar agreement with the Maryland state securities regulator. The Company and Coinbase, Inc. dispute the claims of the state securities regulators and intend to vigorously defend against them. Based on the preliminary nature of these actions, the final outcome of these matters remains uncertain and the Company cannot estimate the potential impact on its business or financial statements at this time. An adverse resolution could have a material impact on the Company's business and financial statements.

The Company has, from time to time, received investigative subpoenas and requests from regulators for documents and information about certain customer programs, operations, and existing and intended future products, including the Company's processes for listing assets, the classification of certain listed assets, its staking programs, and its stablecoin and yield-generating products.

Except as otherwise disclosed, the Company believes the ultimate resolution of existing legal and regulatory investigation matters will not have a material adverse effect on the financial condition, results of

Coinbase Global, Inc.
Notes to Consolidated Financial Statements

operations, or cash flows of the Company. However, in light of the uncertainties inherent in these matters, it is possible that the ultimate resolution of one or more of these matters may have a material adverse effect on the Company's results of operations for a particular period, and future changes in circumstances or additional information could result in additional accruals or resolution in excess of established accruals, which could adversely affect the Company's results of operations, potentially materially.

Tax regulation

Current promulgated tax rules related to crypto assets are unclear and require significant judgments to be made in interpretation of the law, including but not limited to the areas of income tax, information reporting, transaction level taxes and the withholding of tax at source. Additional legislation or guidance may be issued by U.S. and non-U.S. governing bodies that may differ significantly from the Company's practices or interpretation of the law, which could have unforeseen effects on the Company's financial condition and results of operations, and accordingly, the related impact on the Company's financial condition and results of operations is not estimable.

23. RELATED PARTY TRANSACTIONS

Revenue and accounts receivable

Certain of the Company's directors, executive officers, and principal owners, including immediate family members, are users of the Company's platform. The Company recognized revenue from related party customers of \$17.9 million, \$12.9 million and \$29.1 million for the years ended December 31, 2023, 2022 and 2021, respectively. As of December 31, 2023 and 2022, amounts receivable from related party customers were \$3.4 million and \$1.3 million, respectively.

Customer assets and liabilities

As of December 31, 2023 and 2022, safeguarding customer crypto assets and safeguarding customer crypto liabilities for related parties were \$8.8 billion and \$3.5 billion, respectively. As of December 31, 2023 and 2022, customer custodial funds and customer custodial cash liabilities due to related party customers were \$348.0 million and \$14.2 million, respectively.

Prepaid and other assets

During the years ended December 31, 2023 and 2022, the Company invested an aggregate of \$4.0 million and \$13.8 million, respectively, in investees in which certain related parties of the Company held an interest over 10%.

Expenses

During the year ended December 31, 2023, the Company incurred \$2.5 million for professional and consulting services provided by entities affiliated with related parties. There were no professional and consulting services provided by entities affiliated with related parties to note during the years ended December 31, 2022 and 2021.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our disclosure controls and procedures are designed to ensure that information we are required to disclose in reports that we file or submit under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), is recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Our management, with the participation and supervision of our Chief Executive Officer (our principal executive officer) and our Chief Financial Officer (our principal financial officer), has evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of December 31, 2023. Based on such evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that as of December 31, 2023, our disclosure controls and procedures were, in design and operation, effective at a reasonable assurance level.

Management’s Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) and 15(d)-15(f) under the Exchange Act) to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Our management, under the supervision of our Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of our internal control over financial reporting based on the criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, our management has concluded that our internal control over financial reporting was effective as of December 31, 2023. The effectiveness of our internal control over financial reporting as of December 31, 2023 has been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their report, which is included in Part II, Item 8 of this Annual Report on Form 10-K.

Changes in Internal Controls Over Financial Reporting

There were no changes to our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the most recently completed fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations on the Effectiveness of Controls

The effectiveness of any system of internal control over financial reporting, including ours, is subject to inherent limitations, including the exercise of judgment in designing, implementing, operating, and evaluating the controls and procedures, and the inability to eliminate misconduct completely. Accordingly, in designing and evaluating the disclosure controls and procedures, management recognizes that any system of internal control over financial reporting, including ours, no matter how well designed and operated, can only provide reasonable, not absolute assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply its judgment in evaluating the benefits of possible controls and procedures relative to their costs. Moreover, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. We intend to continue to monitor and upgrade our internal controls as necessary or appropriate for our business but cannot assure you that such improvements will be sufficient to provide us with effective internal control over financial reporting.

Item 9B. Other Information

Rule 10b5-1 Trading Plans

The Company's directors and officers (as defined in Rule 16a-1(f) under the Exchange Act) ("Section 16 officers") are only permitted to trade in the Company's securities pursuant to a prearranged trading plan intended to satisfy the affirmative defense of Rule 10b5-1(c) under the Exchange Act (a "Rule 10b5-1 Plan"). During the three months ended December 31, 2023, one of the Company's Section 16 officers adopted a Rule 10b5-1 Plan. Additionally, during the three months ended December 31, 2023, entities affiliated with one of the Company's directors adopted prearranged trading plans intended by such entities to qualify as Rule 10b5-1 Plans. All such Rule 10b5-1 Plans were entered into during an open trading window in accordance with the Company's Insider Trading Policy and Trading Plan Policy.

On December 1, 2023, Alesia Haas, the Company's Chief Financial Officer, entered into a Rule 10b5-1 Plan (the "Haas Plan") providing for the potential sale of (a) up to 255,565 shares of Class A common stock owned by Ms. Haas and (b) the number of shares of Class A common stock necessary to cover the exercise price, taxes, commissions and fees associated with the exercise of up to 686,873 shares of Class A common stock pursuant to stock options owned by Ms. Haas, in each case, so long as the market price of the Class A common stock satisfies certain threshold prices specified in the Haas Plan, between an estimated start date of March 5, 2024 and December 31, 2024, or earlier, upon the completion of all transactions subject to the trading arrangements specified in the Haas Plan or the occurrence of certain events set forth therein.

On November 29, 2023, Andreessen Horowitz Fund III, L.P., Andreessen Horowitz Fund III-A, L.P., Andreessen Horowitz Fund III-B, L.P., Andreessen Horowitz Fund III-Q, L.P., AH Parallel Fund III, L.P., AH Parallel Fund III-A, L.P., AH Parallel Fund III-B, L.P., AH Parallel Fund III-Q, L.P., Andreessen Horowitz LSV Fund I, L.P., Andreessen Horowitz LSV Fund I-B, L.P., and Andreessen Horowitz LSV Fund I-Q, L.P. (collectively, the "Funds"), each of which is an affiliate of Marc Andreessen, a member of the Company's board of directors, entered into a Rule 10b5-1 Plan (the "a16z Plan") providing for the potential distribution of up to 14,018,115 shares of Class A common stock owned by the Funds to the limited partners of the Funds (the "Distributions"), so long as the market price of the Class A common stock is higher than certain minimum threshold prices specified in the a16z Plan, during the period beginning on January 2, 2024 and ending on May 26, 2024, such earlier date as the distribution of all shares specified in the a16z Plan is completed or the occurrence of certain events set forth therein.

On December 1, 2023, AH Capital Management, L.L.C., an affiliate of Mr. Andreessen, a member of the Company's board of directors, entered into a Rule 10b5-1 Plan (the "AH Capital Plan") providing for the sale of any and all shares of Class A common stock received by AH Capital Management, L.L.C. in connection with the Distributions by the Funds, during the period beginning on January 2, 2024 and ending on May 26, 2024, such earlier date as sale of all shares specified in the AH Capital Plan is completed or the occurrence of certain events set forth therein.

Item 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections

Not applicable.

PART III

Item 10. Directors, Executive Officers and Corporate Governance
