Cautionary Note Regarding Forward-Looking Statements

This presentation contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact are forward-looking statements. These statements include, but are not limited to, statements regarding our future operating results and financial position, including for the second quarter ending June 30, 2026; anticipated future expenses and investments; expectations relating to certain of our key financial and operating metrics; our business strategy and plans; expectations relating to legal and regulatory proceedings; expectations relating to our industry, the regulatory environment, market conditions, trends and growth; expectations relating to customer behaviors and preferences; our market position; potential market opportunities; and our objectives for future operations. The words "believe," "may," "will," "estimate," "potential," "continue," "anticipate," "intend," "expect," "could," "would," "project," "plan," "target," and similar expressions are intended to identify forward-looking statements. Forward-looking statements are based on management's expectations, assumptions, and projections based on information available at the time the statements were made. These forward-looking statements are subject to a number of risks, uncertainties, and assumptions, including, among others: our ability to successfully execute our business and growth strategy and generate future profitability; market acceptance of our products and services; our ability to further penetrate our existing customer base and expand our customer base; our ability to develop new products and services; our ability to expand internationally; failure to obtain applicable regulatory approvals and satisfy other closing conditions in a timely manner or otherwise for any acquisition we make; the success of any acquisitions or investments that we make; the effects of increased competition in our markets; our ability to stay in compliance with applicable laws and regulations; stock price fluctuations; market conditions across the onchain economy, including crypto asset price volatility; and general market, political, and economic conditions, including interest rate fluctuations, inflation, changes in tariffs and trade restrictions, instability in the global banking system, economic downturns, and other global events, including regional wars and conflicts and government shutdowns. It is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. In light of these risks, uncertainties, and assumptions, our actual results could differ materially and adversely from those anticipated or implied in the forward-looking statements. Further information on risks that could cause actual results to differ materially from forecasted results are, or will be included, in our filings we make with the Securities and Exchange Commission (SEC) from time to time, including our Annual Report on Form 10-K for the year ended December 31, 2025 filed with the SEC on February 12, 2026 and our Quarterly Report on Form 10-Q for the quarter ended March 31, 2026 filed with the SEC on May 7, 2026. Except as required by law, we assume no obligation to update these forward-looking statements, or to update the reasons if actual results differ materially from those anticipated in the forward-looking statements.

Key Business Metrics

This presentation includes certain of our key business metrics that our management uses to help evaluate our business, measure our performance, identify trends affecting our business, and make strategic decisions. Our key business metrics include Monthly Transacting Users, Assets on Platform, Trading Volume, Net Income and Adjusted EBITDA. Definitions of key business metrics can be found in our Quarterly Report on Form 10-Q for the quarter ended March 31, 2026 filed with the SEC on May 7, 2026.

Non-GAAP Financial Measures

This presentation includes financial measures that were not prepared in accordance with U.S. generally accepted accounting principles ("GAAP"). Our non-GAAP financial measures include Adjusted EBITDA, Adjusted Net Income and Adjusted Expenses. Definitions, explanations, and reconciliations to the most comparable GAAP financial measures can be found in the appendix to this presentation ("Appendix").

Webcast Information

We will host a conference call to discuss the results for the first quarter of 2026 on May 7, 2026 at 2:30 pm PT. The live webcast of the call will be available at youtube.com/@coinbase/streams. A replay of the call, as well as a transcript, will be available on our Investor Relations website at investor.coinbase.com.

A world map composed of a grid of small white dots on a blue background. The map is centered and covers most of the frame. The text is overlaid on the map.

Our mission is to increase
economic freedom in the world

Crypto is updating all financial services, AI is an accelerant

Trading

Total Crypto Trading Volume¹ has grown more than 50x over the past ~7 years

\$14T

Total Crypto Trading Volume as of Q1'26

Stablecoins

Stablecoin Market Cap² >\$300B today and expected to 10x to \$3T by 2030³

\$305B

Stablecoin Market Cap as of Q1'26

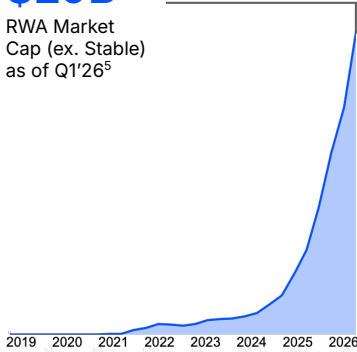

Tokenization

Supply of tokenized RWAs ~\$30B today and expected to reach \$16T by 2030⁴

\$29B

RWA Market Cap (ex. Stable) as of Q1'26⁵

The Onchain Economy

AI-Native Finance

Agents forecast to process \$3-5T of transactions by 2030⁶. Crypto is the native execution rail for the agent-led economy:

- Global
- Efficient
- Programmable
- Always on (24/7)

[1] Total Crypto Market Trading Volume is defined as the total USD value of all crypto matched spot and derivative trading volumes across exchanges defined in our proprietary competitor set during the period of measurement, based on data obtained from CoinDesk Data, CoinMetrics, and Dune. [2] Stablecoin Market Cap is defined as total market capitalization of all stablecoins on the last day of the quarter based on data obtained from CoinDesk Data, CoinMarketCap, and CoinGecko. [3] Per remarks delivered by Treasury Secretary Scott Bessent on November 12, 2025. [4] Source: Boston Consulting Group and ADDX. [5] Source: rwa.xyz, reported as Distributed Asset Value which measures the total value of real-world assets tokenized onchain, excluding stablecoins. [6] Source: McKinsey.

[1] Assets on Platform is defined as the total U.S. dollar equivalent value of crypto assets and payment stablecoins held or managed on behalf of customers in digital wallets on our platform, including our custody services but excluding assets for which the customer holds full or partial keys, calculated based on the market price on the last day of the quarter.

[2] U.S. Crypto Spot Trading Market Share is defined as Coinbase U.S. Crypto Spot Trading Volume divided by U.S. Crypto Market Spot Trading Volume. Coinbase U.S. Crypto Spot Trading Volume is defined as the total U.S. dollar equivalent value of spot matched trades transacted between a buyer and seller transacted on a U.S. exchange through our platform, plus half of the trade value of spot trades that are routed off our platform for fulfillment, during the period of measurement. U.S. Crypto Market Spot Trading Volume is defined as the total USD value of all crypto matched spot trading volumes across U.S. exchanges defined in our proprietary competitor set during the period of measurement, based on data obtained from CoinDesk, CoinMetrics, and Dune.

[3] Market capitalization (end of day) of USDC on March 18, 2026, based on data obtained from CoinDesk.

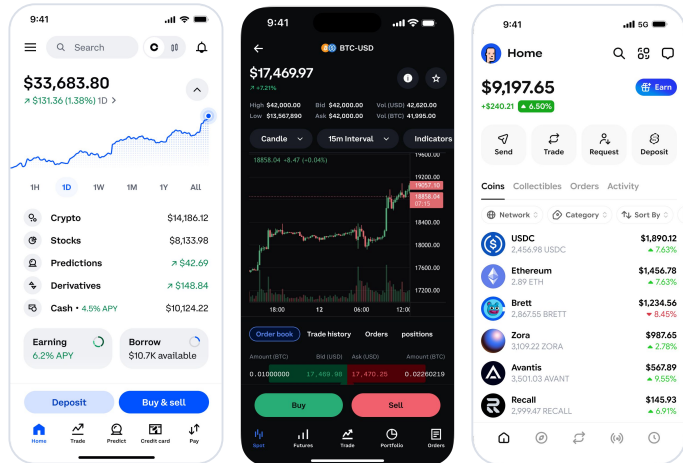

[4] Measured based on when a given product generated \$100 million in quarterly annualized net revenue for the most recent qualifying quarter.

[5] Total Trading Volume comprises Spot Trading Volume and Derivatives Trading Volume. Spot Trading Volume is the total U.S. dollar equivalent value of spot matched trades transacted between a buyer and seller through our platform, plus half of the value of trades that we routed off our platform for fulfillment, during the period of measurement. Derivatives Trading Volume is the total U.S. dollar equivalent value of the notional amount of derivatives trades transacted between a buyer and seller through our platform during the period of measurement. Both measurements represent the product of the quantity of assets transacted and the trade price of the underlying at the time the transaction was executed.

[6] Corporate USDC balances and USDC held on behalf of customers in eligible Coinbase products.

Gained trading market share in a down market

Coinbase Crypto Trading Volume Market Share¹

- Gained share in both spot & derivatives globally, reaching an all-time high (“ATH”) in Crypto Trading Volume Market Share
- Momentum led by product innovation and growth in derivatives
- Growth in global spot share reflecting our position as the most trusted

[1] Coinbase Crypto Trading Volume Market Share is defined as Coinbase Total Crypto Trading Volume divided by Total Crypto Market Trading Volume. Total Crypto Trading Volume is defined as the total USD value of all crypto matched spot and derivative trading volumes across exchanges defined in our proprietary competitor set during the period of measurement, based on data obtained from CoinDesk Data, CoinMetrics, and Dune. Coinbase Total Crypto Trading Volume comprises Spot Trading Volume and Derivatives Trading Volume. Spot Trading Volume is the total U.S. dollar equivalent value of spot matched trades transacted between a buyer and seller through our platform, plus half of the value of trades that we routed off our platform for fulfillment, during the period of measurement. Derivatives Trading Volume is the total U.S. dollar equivalent value of the notional amount of derivatives trades transacted between a buyer and seller through our platform during the period of measurement. Both measurements represent the product of the quantity of assets transacted and the trade price of the underlying at the time the transaction was executed. Coinbase Total Crypto Trading Volume excludes certain Fiat-Stablecoin conversion activity. Competitor volumes in the denominator may include Fiat-Stablecoin trading pairs not captured in our numerator, which may affect comparability across venues.

Coinbase stores the most crypto in the world

Assets on Platform¹ and % of Total Crypto Market Capitalization²

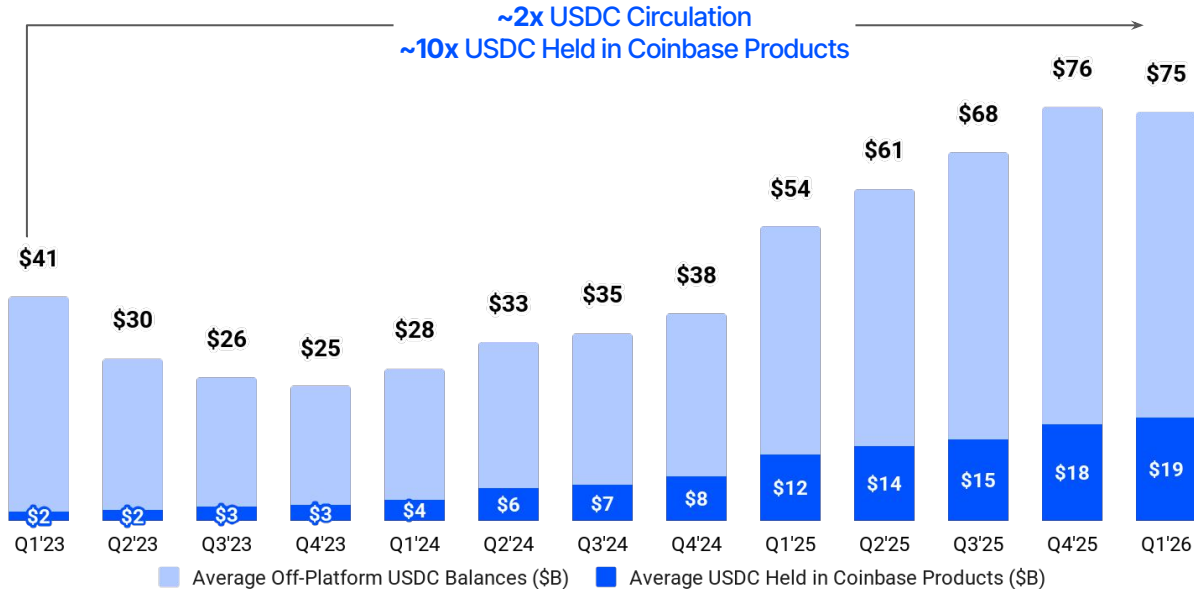

- Leading crypto custodian globally, storing more crypto than any other platform
- 12th consecutive quarter of Q/Q native unit inflows, with strength in majors (BTC/ETH/SOL)
- 3rd consecutive year of growth in AOP as a % of Total Crypto Market Capitalization

[1] Assets on Platform is defined as the total U.S. dollar equivalent value of crypto assets and payment stablecoins held or managed on behalf of customers in digital wallets on our platform, including our custody services but excluding assets for which the customer holds full or partial keys, calculated based on the market price on the last day of the quarter.

[2] Assets on Platform divided by Total Crypto Market Capitalization. Total Crypto Market Capitalization is defined as total dollar value market capitalization of all publicly tradable crypto assets and payment stablecoins on the last day of the quarter, based on data obtained from CoinDesk Data, CoinMarketCap, and CoinGecko.

Coinbase is the distribution engine driving USDC growth and receives ~50% of total USDC economics

Average USDC Held in Coinbase Products¹ and Average USDC Market Capitalization²

- USDC Market Cap reached ATH of ~\$80B in March
- More than 25% of USDC in circulation is held in Coinbase products (ATH)
- Over the past year, we have captured ~50% of all USDC economics; deeper product integration driving greater USDC adoption
- We power USDC's global network effect; our economics scale with adoption

[1] Average USDC Held in Coinbase Products defined as corporate USDC balances and USDC held on behalf of customers in eligible Coinbase products in Q1'26.

[2] Average USDC Market Capitalization defined as average of each day's market capitalization (end of day) of USDC over the period of measurement, based on data obtained from CoinDesk Data, CoinMarketCap, and CoinGecko.

2026 Priorities

1

Everything Exchange

Trade every asset class in one place: crypto, equities, prediction markets, commodities, and FX with deep liquidity and capital efficiency.

2

Stablecoins & Payments

Enable money to move globally at the speed of the internet.

3

Onchain

Update the financial system by bringing trading and payments onchain.

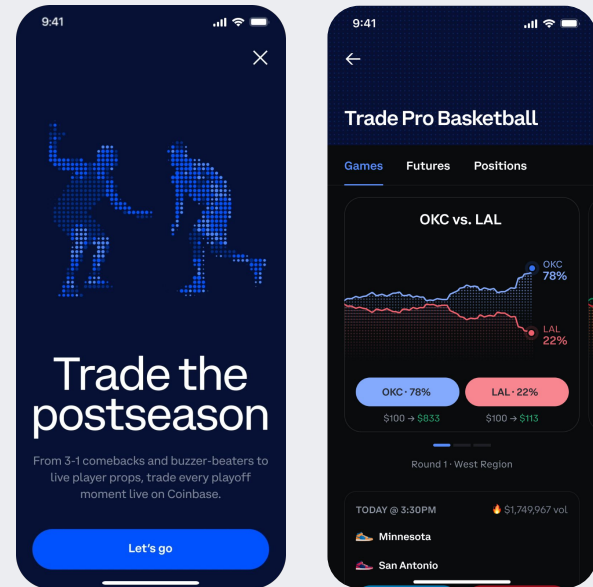

1 Everything Exchange: New asset classes showing signs of success

Derivatives Trading Volume¹ TTM up 169% Y/Y;
retail derivatives annualized revenue **\$200M+**²

Derivatives Trading Volume TTM (\$B)

Prediction markets scaling quickly, reaching **\$100M+**
annualized revenue in March³ (first two full months live)

[1] Derivatives Trading Volume is the total U.S. dollar equivalent value of the notional amount of derivatives trades transacted between a buyer and seller through our platform during the period of measurement.

[2] Measured based on when a given product generated \$200 million in quarterly annualized net revenue for the most recent qualifying quarter.

[3] Measured based on when the product generated \$100 million in quarterly annualized net revenue, calculated as twelve times March revenue.

2 Stablecoins & Payments: Coinbase is accelerating adoption via USDC and Base

[1] Source: Artemis Analytics, reported as "Supply." Current total supply of stablecoins in USD at the end of each period. See also Footnote 4 below.
 [2] Source: Artemis Analytics, reported as "Adjusted Transaction Volume." Adjusted stablecoin transaction volume (MEV and intra-exchange volumes removed) in USD. Measured by stablecoin. See also Footnote 4 below.
 [3] Source: Artemis Analytics, reported as "Adjusted Transaction Volume." Adjusted stablecoin transaction volume (MEV and intra-exchange volumes removed) in USD. Measured by chain.
 [4] USDC and Partner Stablecoins refer to stablecoin issuers with which Coinbase has a commercial partnership and economic relationship.

2 Stablecoins & Payments: We believe agents will outnumber humans and drive the onchain economy

99%+

of onchain agentic commerce completed using USDC in Q1'26

■ base

90%+

of agentic stablecoin transaction volumes were on Base in Q1'26

x402

100M+

total x402 payments processed as of Q1'26

Coinbase is the settlement, distribution, and commerce layer for agents

3 Onchain: DeFi integrations are driving real-world utility

2x Q/Q growth in DEX Trading Volume driven by our native integration in Coinbase app

DEX Trading Volume (\$M)

\$1B+ Y/Y growth in Borrow/Lend balances

Average Borrow/Lend Balances¹ (\$M)

[1] Sum of the average loans outstanding through our Borrow product and the average lend balances through our Lend product in the relevant period. Borrow/Lend balances are powered by onchain DeFi protocols accessible in the Coinbase app.

The future of finance is onchain, and Coinbase is best positioned to power it

1

The onchain
economy has reached
escape velocity

2

Coinbase's full
stack platform
is powering it

3

The next frontier
is agentic and on
Coinbase

Q1 Financial Highlights

Total revenue

\$1.4B

Transaction revenue

\$756M

Subscription & services revenue

\$584M

Net income (loss)

\$(394)M

Adjusted EBITDA¹

\$303M

Cash & cash equivalents

\$10.2B

[1] Adjusted EBITDA is a non-GAAP financial measure. See Appendix for definition and reconciliation.

Q1 Report Card

Strong fundamentals despite macro headwinds

The business is healthy

Gained Market Share

Reached ATH in Coinbase Crypto Trading Volume Market Share

Native Units Up

12th consecutive quarter of net native unit inflows; continue to store the most crypto globally

Green Shoots on Everything Exchange

- **Retail Derivatives:** \$200M+ annualized revenue as of Q1'26
- **Prediction Markets:** \$100M+ annualized revenue as of March
- **DEX Trading:** \$450M+ in cumulative volume as of Q1'26

Proactive Expense Discipline

T&D + G&A well below outlook in Q1

Macro headwinds outpaced growth

Declining Market Cap

Total Crypto Market Capitalization & Total Crypto Trading Volumes both down 20%+ Q/Q

Low Volatility

Suppressed trading activity, particularly in longer-tail assets driven by broader risk-off sentiment

Q1 results were within outlook (or better)

Metric	Q1 Outlook (Feb 2026)	Q1 Actuals	
Subscription & Services Revenue	\$550-\$630 million ¹	\$584 million	
Transaction Expenses	Low-to-Mid teens as a % of net revenue	14.6%	
Technology & Development + General & Administrative Expenses	\$925-\$975 million	\$902 million	
Sales and Marketing Expenses	\$215-\$315 million	\$267 million	
Total Stock-based Compensation	~\$250 million	\$248 million	

[1] Outlook range of \$550-\$630M provided February 2026 was prior to reclassification of stablecoin revenue related to our own corporate balances to Other Revenue.

\$1.4B in Total Revenue, demonstrating financial resilience through a down market

Total Revenue

- TTM Total Revenue
- Total Revenue (\$M)

- \$1.4B total revenue (-21% Q/Q) against a backdrop of decline in crypto market volumes (-28% Q/Q) and spot volumes (-37% Q/Q)
- Transaction revenue decline of 23% Q/Q outperformed decline in market volumes
- S&S 44% of net revenue, providing a durable buffer independent of trading volumes

Transaction revenue outpaced market volume declines due to mix shift and new products

Transaction Revenue

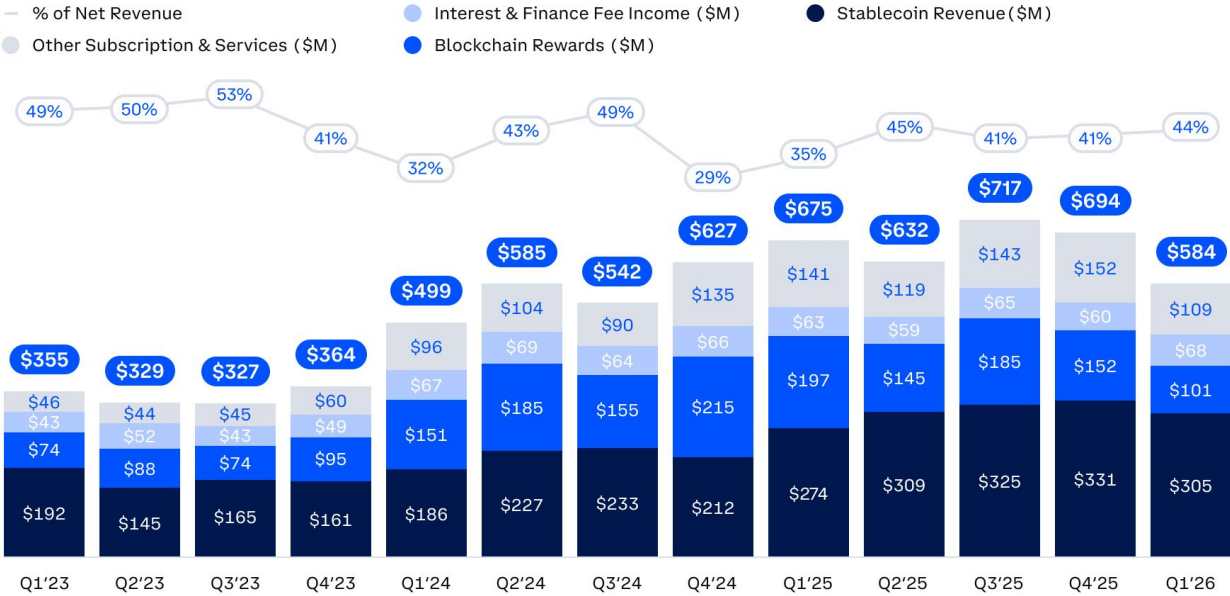

-  Average Crypto Market Cap
-  Other Transaction Revenue (\$M)
-  Institutional Transaction Revenue (\$M)
-  Consumer Transaction Revenue (\$M)

- Consumer transaction revenue of \$567M (-23% Q/Q) driven by consumer spot trading volume decline of 35%, partially offset by mix shift and growth in newer products
- Institutional transaction revenue of \$136M (-27% Q/Q) in line with market declines
- Other transaction revenue of \$53M (-17% Q/Q), reflecting lower instant transfer activity and Base revenue

Subscription and services revenue reached 44% of net revenue, providing a durable buffer to volatility

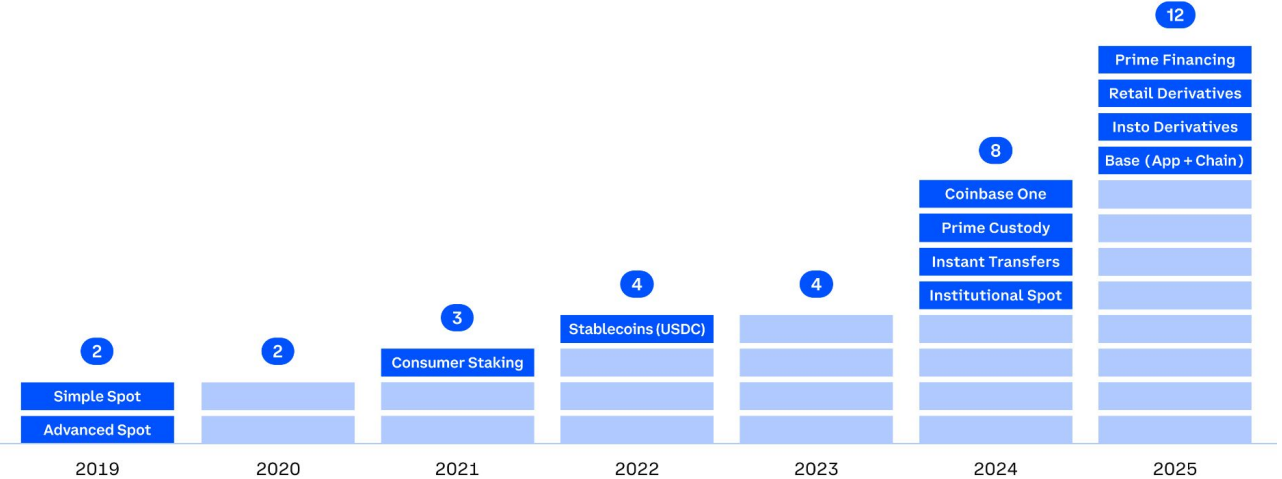

Subscription and Services Revenue

- Stablecoin revenue of \$305M driven by growth in USDC Market Cap and ATH Average USDC Held in Coinbase Products of \$19B
- Blockchain rewards of \$101M from growth in native units staked, offset by price effects
- Interest and finance fee income of \$68M reflecting ATH average daily loan balances
- Continued growth in Coinbase One subs despite market downturn

12 products generating \$100M+ annually, Retail Derivatives and Prediction Markets scaling

Products Generating \$100M+ in Revenue on an Annualized Basis¹

- Continue to scale a portfolio of diversified products, with a strong pipeline of green shoots
- Retail derivatives now annualizing more than \$200M, and on track to be our next \$250M tier product
- Prediction markets is one of our fastest growing products ever, on track to become 13th product with \$100M+ annualized revenue²

[1] Measured based on when a given product generated \$100 million in quarterly annualized net revenue for the most recent qualifying quarter.
 [2] Measured as twelve times March revenue.

Investing strategically through the cycle while maintaining cost discipline

Select Operating Expenses

- Transaction Expense (\$M)
- Sales & Marketing (\$M)
- General & Administrative (\$M)
- Technology & Development (\$M)

- T&D of \$526M (+6% Q/Q) largely driven by one-time costs related to acquisition activity in Q4'25
- G&A of \$376M (-17% Q/Q) as deal-related legal, CX, and policy costs all declined
- Transaction expense of \$196M and S&M of \$267M both down Q/Q as costs flexed with market

13th consecutive quarter of positive Adjusted EBITDA across market cycles

Net Income (Loss) & Adjusted EBITDA¹

- \$303M Adjusted EBITDA in Q1'26, 13th consecutive positive quarter across all market conditions
- Continued commitment to generate positive Adjusted EBITDA in all market conditions

[1] Adjusted EBITDA is a non-GAAP financial measure. See Appendix for definition and reconciliation.

\$12B in available resources – fortress balance sheet with \$1.8B in crypto and marketable investments

Cash & Cash Equivalents

TOTAL: \$10,205M

Crypto Investment Portfolio, Marketable Investments & Strategic Investments¹

2x+ Strategic and Marketable Investments
+80% BTC and +56% ETH Units Held

Note: Figures presented may not sum precisely due to rounding.
[1] Strategic Investments are not 100% liquid investments.

Managing dilution through opportunistic strategic repurchases

Ending Shares Outstanding (M)

~90% of SBC issuance offset since Q4'24
 ~50% of buyback capacity remains as of Q1'26

Metric

Q2'26 Outlook

Q2 Drivers

Transaction Revenue

~\$215 million QTD

Through May 5

Caution extrapolating results

S&S Revenue

\$565-\$645 million

(+) USDC Market Cap & Average USDC Held in Coinbase Products

(+) Native unit growth

(-) Average crypto asset prices

Transaction Expenses

Low-to-Mid Teens

as a % of net revenue

Approximately flat vs. Q1

(+/-) Revenue mix

T&D + G&A Expenses

\$820-\$870 million

(-) Reductions in headcount

(-) Roll-off of 1x deal-related compensation costs

S&M Expenses

\$200-\$300 million

(+) USDC rewards

(-) Seasonal media spend

(-) Variable marketing given softer market

Stock-based Compensation

~\$240 million

(-) In line with reductions in headcount

Restructuring Expense

~\$50-\$60 million

One-time expense to be recognized in Q2

Becoming AI-native is fundamentally increasing our efficiency

Increasing Leverage from AI

Product Velocity Increasing Rapidly

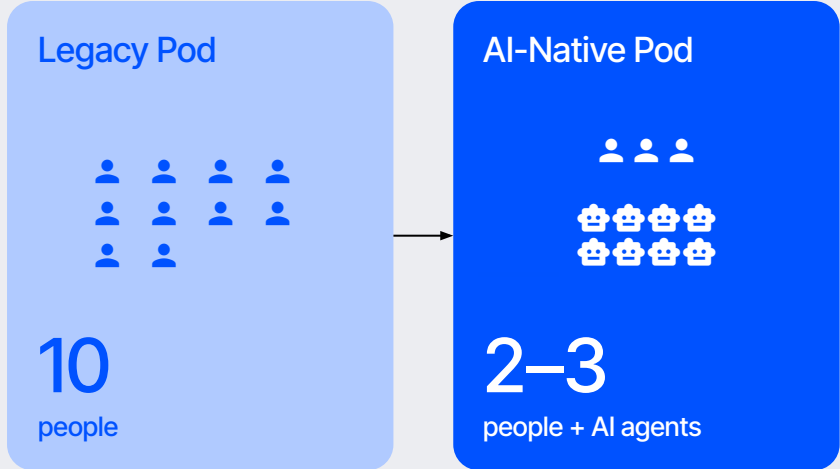

+78% Y/Y

Emphasis on Quality Scaling Even Faster

↑ 3x
Integration test coverage across core services last 6 months

Pod Architecture: Legacy → AI-Native

2026 expense growth outlook driven by USDC Rewards

Adjusted Expenses (\$M)¹

- ~\$500M cost reduction vs. 2025 annualized exit rate²
- 14% headcount reduction
- ~4,300 continuing employees (vs. 4,988 at end of Q1)
- Excluding USDC Rewards growth, we expect Adjusted Expenses to be flat Y/Y

[1] Adjusted Expenses: Technology & Development, General & Administrative and Sales & Marketing Expenses excluding amortization of intangible assets. Adjusted Expenses is a non-GAAP measure. See Appendix for reconciliation.

[2] 2025 annualized exit rate defined as Q4'25 Adjusted Expenses multiplied by 4.

Appendix

Non-GAAP Financial Measures

Adjusted EBITDA

In addition to our results determined in accordance with GAAP, we believe Adjusted EBITDA, a non-GAAP financial performance measure, is useful information to help investors evaluate our operating performance because it: enables investors to compare this measure and component adjustments to similar information provided by peer companies and our past financial performance; provides additional company-specific adjustments for certain items that may be included in income from operations but that we do not consider to be normal, recurring, operating expenses (or income) necessary to operate our business given our operations, revenue generating activities, business strategy, industry, and regulatory environment; and provides investors with visibility to a measure management uses to evaluate our ongoing operations and for internal planning and forecasting purposes. For example:

- We believe it is useful to exclude certain non-cash expenses, such as depreciation and amortization and stock-based compensation, from Adjusted EBITDA because the amounts of such expenses can vary significantly from period to period and may not directly correlate to the underlying performance of our business operations.
- We believe it is useful to exclude certain items that we do not consider to be normal, recurring, cash operating expenses and therefore, not reflective of our ongoing business operations. For example, we exclude: (i) other (income) expense, net, as the income and expenses recognized in this line item are not part of our core operating activities and are considered non-operating activities under GAAP, (ii) gains and losses on crypto assets held for investment because such investments are considered primarily long-term holdings, and (iii) losses, net of recoveries, directly related to the data theft incident announced on the Current Report on Form 8-K we filed with the SEC on May 15, 2025 (the "Data Theft Incident"), including voluntary customer reimbursements, direct legal costs, and reward payments, if any, in connection with the threat actor's arrest and conviction. We do not plan on engaging in regular trading of crypto assets, and, as an operating company, our investing activities in crypto are not part of our revenue generating activities, which are primarily based on transactions on our platform and the sales of subscriptions and services.
- We believe Adjusted EBITDA is useful to measure a company's operating performance without regard to items such as stock-based compensation expense, depreciation and amortization expense, interest expense, other (income) expense, net, and provision for (benefit from) income taxes that can vary substantially from company to company depending upon their financing, capital structures, and the method by which assets were acquired.

Adjusted Net Income (Loss)

In addition to our results determined in accordance with GAAP, we believe that Adjusted Net Income (Loss), a non-GAAP financial performance measure, provides useful information to help investors evaluate our operating performance. We believe it is useful to exclude tax-effected gains and losses on crypto assets held for investment from Adjusted Net Income (Loss) because (i) such investments are considered primarily long-term holdings, (ii) we do not plan on engaging in regular trading of crypto assets, and, (iii) as an operating company, our investing activities in crypto are not part of our revenue generating activities, which are based on transactions on our platform and the sales of subscriptions and services. Additionally, we believe it is useful to exclude tax-effected gains and losses on our marketable and strategic investments from Adjusted Net Income (Loss) because such investments are not part of our core operating activities and are considered non-operating activities under GAAP.

Adjusted Expenses

Adjusted Expenses is defined as the sum of technology and development, sales and marketing, and general and administrative expenses, less amortization of acquired intangible assets. We believe this non-GAAP financial measure provides useful information to help investors evaluate our results of operations excluding amortization of acquired intangible assets, which we do not consider to be normal, recurring, cash operating expenses and which may not directly correlate to the underlying performance of our business operations.

Limitations of Non-GAAP Financial Measures

We believe that non-GAAP financial measures may be helpful to investors for the reasons noted above. However, non-GAAP financial measures are presented for supplemental informational purposes only, have limitations as analytical tools, and should not be considered in isolation or as a substitute for financial information presented in accordance with GAAP. In addition, other companies, including companies in our industry, may calculate non-GAAP financial measures differently or may use other measures to evaluate their performance, all of which could reduce the usefulness of our disclosure of non-GAAP financial measures as a tool for comparison.

Adjusted EBITDA

There are a number of limitations related to Adjusted EBITDA rather than net (loss) income, which is the nearest GAAP equivalent of Adjusted EBITDA. Some of these limitations are that Adjusted EBITDA excludes:

- provision for (benefit from) income taxes;
- interest expense, or the cash requirements necessary to service interest or principal payments on our debt, which reduces cash available to us;
- depreciation and amortization expense and, although these are non-cash expenses, the assets being depreciated and amortized may have to be replaced in the future;
- stock-based compensation expense, which has been, and will continue to be for the foreseeable future, a significant recurring expense for our business and an important part of our compensation strategy;
- net losses or recoveries directly related to the Data Theft Incident;
- net gains or losses on our crypto assets held for investment; and
- other (income) expense, net, which represents net gains or losses on investments and other financial instruments, and other non-operating income and expense activity.

Adjusted Net Income (Loss)

There are limitations related to Adjusted Net Income (Loss) rather than net income, which is the nearest GAAP equivalent, including that Adjusted Net Income (Loss) excludes the tax-effected impact of our crypto investment gains/losses and of our marketable and strategic investments gains or losses.

Adjusted Expenses

There are limitations related to Adjusted Expenses rather than the sum of technology and development, sales and marketing, and general and administrative expenses, including that it excludes amortization of acquired intangible assets, which although non-cash, is an expense related to acquisitions of businesses, which have been and may be significant in the future.

Additional Information

For more information, including reconciliations of these non-GAAP financial measures to their nearest GAAP equivalents, please see the reconciliation of GAAP to non-GAAP results tables in this presentation. Investors are encouraged to review the related GAAP financial measure and the reconciliations, and not to rely on any single financial measure to evaluate our business.
