Global Quality Policy for FREYR Battery

Objective

The objective of this Global Quality policy is to provide a platform for all quality related topics and aspects performed within FREYR Battery, Inc. and its affiliated companies ("FREYR Battery").

Applicability & Languages

This Policy applies to all our operations and the employees and contractors who work in them. Where FREYR Battery does not have operating control, we encourage our partners to demonstrate the commitments reflected in this Policy.

This policy is written and available in English. Any request for translation shall be subjected to the policy owner for review.

Roles & Responsibilities

The policy is owned by the HSSEQ-function and is subject to an annual review in accordance with the annual quality wheel governed by the HSSEQ-function in FREYR Battery.

The policy has been presented to the Freyr Management Team (FMT) and approved by the CEO.

We expect every employee, director and officer of the subsidiaries and affiliates of FREYR Battery worldwide to comply with this Policy, and we have implemented training and awareness programs to promote understanding of the expectations under this Policy and FREYR Battery's other policies, including our Code of Business Conduct and Ethics. We are also committed to providing interested parties with relevant and appropriate information about the quality of our products.

Requirements

In FREYR Battery, **Quality** is a platform for all operations and a fundamental driver of business excellence. Ultimately, quality is a measurement of our performance as experienced by our customers.

Our ambition is to grow a continuous supply of world leading battery cells and modules in the quest for decarbonizing energy- and transportation systems. We believe we can achieve this through a rigorous focus on quality at all levels of the organization and throughout our value chain. We are committed to seeking continuous improvement in the pursuit of quality and the satisfaction of our customers.

Our products and services are developed based on customer and stakeholder needs. The development, manufacturing and sales of our products and services is performed assuring we are compliant with all relevant requirements and standards.

In FREYR Battery we measure our level of quality according to:

- Customers' and stakeholders' needs & expectations
- Adherence to legal & regulatory frameworks relevant to our products and services
- Internal measures of efficiency, effectiveness and excellence in our processes and operations.

The quality of our products and services is assured throughout the value chain from suppliers and all internal processes and is carefully evaluated before products and services are delivered or served to our customers, using well-established risk assessment methods. These evaluations are, integrated into FREYR Battery's product development and manufacturing processes, and continue from the early stages of a product's design through their use and disposal. We are committed to the principle that our products will be safe for customers and the environment when used and disposed of as intended.

We strive to continually improve all our processes, products, and services. We embrace the "right from me" concept and build on the personal responsibility to meet expectations of colleagues, partners, and customers. Quality thereby also becomes a platform for the safety of our internal working conditions as well as the safety of our products and services.
