

Kensington Introduces KeyFolio Secure — Ultimate Companion for iPad 2 Offers Productivity, Protection and Security

May 15, 2012

Now businesses and individuals can have both security and productivity; integrated wireless Bluetooth keyboard and ClickSafe® lock allow content creation safely on-the-go

Redwood Shores, Calif. – May 15, 2012 - [Kensington Computer Products Group](#), the worldwide leader in physical security products for the mobile professional, today introduced Kensington® KeyFolio™ Secure, a security case for the iPad® 2. The new KeyFolio Secure extends Kensington's popular KeyFolio family of products by incorporating the easy-to-use ClickSafe one-click locking mechanism and built-in security anchor. Now people can be more productive wherever they use their iPad with a case that features a built-in Bluetooth keyboard, an adjustable stand and advanced protection from damage or theft.

Kensington has a 30-year heritage pioneering the development of physical security for computers. Its award-winning ClickSafe lock designs provide a first line of defense for laptops and tablets. The new security case builds on that heritage, and on the success of Kensington's celebrated line of KeyFolio keyboard cases for tablets. Since the original KeyFolio for iPad debuted in September 2010, Kensington continues to expand its collection to offer enhanced productivity and protection for all types of tablets— including the new iPad, Samsung Galaxy Tab™, Motorola XOOM™ and any 10" tablets.

The new KeyFolio Secure Case is optimized for touch typing and features a high-performance removable, wireless Bluetooth keyboard with one-button pairing. The case itself folds flat and protects the iPad from wear and scratches. It includes an adjustable stand to achieve the optimal angles for both viewing and typing.

The built-in ClickSafe lock is engaged with an almost effortless one-click action. Constructed from high carbon steel cables with a corrosion-proof steel lockhead, it delivers strong first-line of defense for devices and data.

"A recent study showed that 79% of business executives polled always use their iPads when they are on the road, and more than half use it for business communication. As tablet devices proliferate and are used in both professional and personal environments, it's important for people to protect both the device and the valuable data it holds," said George Foot, Vice President of marketing and development at Kensington. "Whether you rely on a laptop or a tablet computer, Kensington continues its innovative development of accessories that increase security and productivity. "

KeyFolio™ Secure Security Case for iPad 2, Bluetooth® Keyboard & ClickSafe® Lock (K67746US; SRP \$129.99)

The Kensington KeyFolio™ Secure is the perfect combination of iPad productivity and security wherever you go. The protective case prevents damage, and the ClickSafe lock acts as a first line of defense against theft. The stand adjusts to the optimal working or viewing angle. The one-touch pairing Bluetooth® keyboard delivers seamless operation for work-anywhere productivity.

- Security case holds iPad 2 in place
- Folds flat for in-case use and protects your tablet from wear and scratches
- Tactile keyboard with high-performance keys optimized for touch typist
- Convenient loop to hold your stylus or pen
- Easy port access to all iPad controls and 30-pin connector
