

Kensington Announces General Availability of Ultimate Presenter with Virtual Pointer

September 26, 2017

Award-Winning Presentation Tool Works Across Multiple Environments and Screens, with New Customization Features Added for a more Productive and Personalized Presentation Experience

San Mateo, Calif., Sept. 26, 2017 /PRNewswire/ -- [Kensington](#)[®], a worldwide leader of desktop computing and mobility solutions for IT, business and home office professionals and The Professionals' Choice, today announced that the Kensington Ultimate Presenter[™] with Virtual Pointer is now generally available. A recipient of the prestigious 2017 Red Dot Product Design award for design innovation and quality, the Ultimate Presenter is compatible with a variety of presentation environments and screens, and features new customization settings for a more personalized and productive user experience.

Kensington[®]

While Bright LED screens or safety regulations can pose limitations with traditional lasers, the Kensington Ultimate Presenter is optimized for use in conference rooms with TVs, online meetings with remote participants, and large auditoriums with multiple presentation screens for greater user flexibility. Kensington has removed the laser from the pointing feature to help address the growing need for a presentation tool that can be used where laser devices are not allowed as well as for online meetings where remote participants can see the pointer onscreen when using web meeting tools. The presenter is also adaptable and customizable to the user, with its companion software [KensingtonWorks[™]](#) for assigning different features to the top button. New customization features include mouse click, pen and magnifier, to improve upon the user experience.

[Kensington Ultimate Presenter[™] with Virtual Pointer](#) (SKU# K75233; SRP \$99.99) The Kensington Ultimate Presenter allows users to point anywhere and present everywhere, without limitations or restrictions. Key features include:

- **KensingtonWorks[™] App** offering customization of pointer size, shape and speed to suit a user's presentation environment, and additional options, such as re-configuring the blackout button for use instead as a start and stop button for your slide presentation. New features include
 - Mouse Click, for playing videos or opening links while presenting;
 - Magnifier, which allows presenters to zoom in on particularly detailed slide content when needed;
 - Pen enables the presenter flexibility to draw the audience's attention and adds emphasis to particular sentences and areas of the presentation
- **Online Meeting Compatibility** allows remote participants to see the pointer onscreen when using web meeting tools like WebEx[®], GoToMeeting[®], Skype[™], and join.me[®]
- **Virtual Pointer Technology** allows pointer to be viewed on a variety of presentation screens including traditional projection screens, TV displays, bright LED screens, and smart boards, making it the ideal pointer for every presentation scenario, including conference rooms, online meetings, and large auditoriums
- **Ergonomist Approved Design** that maximizes comfort with a contoured shape that minimizes wrist twist and an intuitive 4-button presentation clicker
- **2.4GHz Receiver with Memory** which provides up to 20 meters (65ft) of wireless range and a microSD slot that holds up to 32GB of memory
- **Compatible** with Microsoft PowerPoint, Microsoft PowerPoint for Mac, Mac Keynote, Adobe PDF and Google Slide
- **Storage Pouch** for conveniently stowing and protecting the presenter when traveling

"Providing an innovative presentation tool for a variety of environments and screens, the Kensington Ultimate Presenter with Virtual Pointer is designed to help people be more effective and efficient in their presentations," said Anita Chang, Global Product Manager. "The presenter overcomes the screen limitations and regulatory restrictions of traditional laser pointers, while offering an ergo-friendly design, versatile storage, and customization options for different presentation scenarios."

Kensington's full line of [wireless presentation remotes with red and green laser pointers](#) are designed with intuitive controls and thoughtful features that let users spend more time focused on their audiences. Features include extended wireless range, an intuitive 4-button presentation clicker design, and built-in memory to store presentations.
