

Kensington Introduces New Ultimate Presenter with Virtual Pointer

July 25, 2017

Innovative, Ergonomically Designed Presentation Tool Works with a Variety of Environments and Screens Enabling Users to Point Anywhere and Present Everywhere, Without Limitations or Restrictions

SAN MATEO, Calif., July 25, 2017 /PRNewswire/ -- [Kensington®](#), a worldwide leader of desktop computing and mobility solutions for IT, business and home office professionals and The Professionals' Choice, introduced today the Kensington Ultimate Presenter™ with Virtual Pointer. The Ultimate Presenter is an innovative, ergonomically designed presentation tool that works for a variety of environments and screens.

Kensington®

Overcoming the limitations associated with traditional lasers, such as bright LED screens or safety regulations, the Kensington Ultimate Presenter is optimized for use in conference rooms with TVs, online meetings with remote participants, and large auditoriums with multiple presentation screens. Complemented by [KensingtonWorks™](#) software for customization, the Ultimate Presenter is the ideal presentation tool for today's digital world.

Kensington also designed the Ultimate Presenter with ergonomic comfort in mind. "Many of today's presenters come with a traditional stick or pen looking design, which lends to wrist discomfort while in use," said Melanie Berry, MPT, Vertical Ergonomics. "As a Physical Therapist and Ergonomics Specialist, I am very impressed by how the Kensington Ultimate Presenter's unique contoured design feels natural and comfortable in my hand when I am delivering a presentation."

[Kensington Ultimate Presenter™ with Virtual Pointer](#) (SKU# K75233; SRP \$99.99)

The Kensington Ultimate Presenter allows users to point anywhere and present everywhere, without limitations or restrictions. Key features include:

- **Virtual Pointer Technology** allows pointer to be viewed on a variety of presentation screens including traditional projection screens, TV displays, bright LED screens, and smart boards, making it the ideal pointer for every presentation scenario, including conference rooms, online meetings, and large auditoriums
- **Online Meeting Compatibility** allows remote participants to see the pointer onscreen when using web meeting tools like WebEx®, GoToMeeting®, Skype™, and join.me®
- **KensingtonWorks™ App** offering customization of pointer size, shape and speed to suit a user's presentation environment, and additional options, such as re-configuring the blackout button for use instead as a start and stop button for your slide presentation
- **Ergonomist Approved Design** that maximizes comfort with a contoured shape that minimizes wrist twist and an intuitive 4-button presentation clicker
- **2.4GHz Receiver with Memory** which provides up to 20 meters (65ft) of wireless range and a microSD slot that holds up to 32GB of memory
- **Compatible** with Microsoft PowerPoint, Microsoft PowerPoint for Mac, Mac Keynote, Adobe PDF and Google Slide
- **Storage Pouch** for conveniently stowing and protecting the presenter when traveling

"Kensington's experience with wireless presenter and ergonomic products provided the foundation for developing the Ultimate Presenter and giving users the greatest flexibility for when and where they can present," said Anita Chang, Global Product Manager. "The Ultimate Presenter software and ergonomic design helps increase productivity and deliver a comfort level that enhances the user presenting experience."
