

Swingline Expands Stack-and-Shred Family of Products to Cut Your Workload; New Stack-and-Shred 60X Fits Any Size Office and Budget

January 19, 2012

Anyway You Cut It, Swingline Stack-and-Shred Office Technology Offers Best Options for Personal or Business Shredding

LINCOLNSHIRE, Ill., Jan. 19, 2012 /PRNewswire/ -- Swingline®, a worldwide leader in delivering workspace tools for the business, home and mobile office, announced the new Stack-and-Shred 60X paper shredder, the best choice in its class for personal use. With the ability to shred up to 60 stacked sheets of paper at one time, waiting in front of the shredder is a thing of the past. The new Stack-and-Shred 60X is an intuitive and cost-effective device that allows users to simply load a stack of paper, shut the lid and move on. Now, spending less time feeding the shredder and more time checking off your "to-do" list is easy.

The Stack-and-Shred 60X joins the popular Stack-and-Shred 100X paper shredder that differentiates itself from competition with Hands Free Auto+™ technology that automatically rolls and feeds paper into the cutters, so you don't have to. Like its predecessor, the 60X is tailored to work the way that you do - efficiently. It offers quiet operation, an easy user interface, and compact design that fits neatly under your desk for quick access. The Stack-and-Shred 60X is built for productivity and durability, so whether you are shredding paper, staples, paperclips or credit cards, you can cut your workload and spend your time, your way.

Swingline also has expanded its popular Stack-and-Shred family of paper shredders with the addition of the Stack-and-Shred 80X, Stack-and-Shred 250X and Stack-and-Shred 500X. Whether it's home office use, a small office environment or corporate setting, Swingline has a shredder to best suit your needs and budget.

Swingline is the first company to offer hands-free shredding on a full-line basis. Most other shredders that offer auto feed use a standard sheet feeder similar to a printer paper feed. These are prone to frequent jams and are often too oversized for personal use. The Swingline family of paper shredders differentiates itself with a closed-bin activation format and patent pending technology that can handle staples and paper clips in any corner. These features make them a superior choice when compared with standard paper shredders.
