### 2H 2022 Expectations

- Implied same-store revenue and NOI growth guidance are each top-3 among the multifamily REIT peer group.
- Occupancy is likely to remain high, between 96.7% and 97.0%, on average.
- Year-over-year same-store expense growth trending above 5% due to inflation (utilities, R&M) and real estate taxes.

### Robust Demand & Strong Resident Fiscal Health

- **Peer-leading** effective blended lease rate growth, occupancy, and controllable operating margin in 2Q 2022.
- Demand indicators continue to screen “green” as **consumer financial health remains strong**.

#### Traffic

- Larger funnel versus normal seasonal trends from self-service model.

#### Increase

- Increase of average income per household vs. pre-COVID.

#### Residents per home

- 1.8 (vs. 2.1 pre-COVID).

#### Average rent-to-income ratio

- Low-20% (consistent with history).

#### Collection rates

- 98.0%-98.5%.

#### Minimal

- Concession usage across UDR properties.

#### Less expensive

- 50% Less expensive to rent than own across UDR markets (vs. 35% less expensive pre-COVID).

#### Steady

- 2023 supply deliveries across UDR markets at ~2% of existing stock.

APARTMENT DEMOGRAPHICS AND FUNDAMENTALS

Long-term demographics remain strong for apartments. Since 2010, approximately 28% fewer total housing units have been produced versus total households formed over the same period.

**U.S. POPULATION BY AGE COHORT (MILLIONS)**

- **Domestically Born**
- **Foreign Born**

**PROPENSITY TO RENT BY AGE COHORT**

- **2Q22 TTM (lt. axis)**
- **Increase Since Peak H.O. Rate (bps, rt. axis)**

**Significantly higher propensity to rent due to:**
- Overall housing shortage
- High for-sale home prices
- Pent-up demand (household formation)

Sizeable current primary renter cohort
Larger domestically born future renter cohort
Potential upside from foreign-born growth

**Peak home-buying age ↑ to 34 from 29 in the 1970s.**

**Average age of marriage ↑ to 32 from 22 in the 1970s.**

48% of Millennials have zero down payment savings.

Low absolute and relative affordability represent a barrier to single-family ownership in many U.S. markets, resulting in a larger potential multifamily renter pool. Third-party forecasts indicate ~5 million additional apartments will be needed by 2030 to satisfy housing demand, thereby mitigating the potential supply risk of increased residential completions.

**Renter Conditions – Rent vs. Own**

- UDR Monthly Cost to Rent
- Blended Cost to Own a Home

- Rent-versus-own analysis\(^{(1)}\) shows it is ~50% less expensive (vs. ~35% average pre-COVID) to rent than own across UDR markets.

- This equates to a **15%-20% improvement in relative affordability** compared to pre-COVID levels.

---

\(^{(1)}\) UDR Average Monthly Rent is as of 2Q 2022 and is defined as Total Revenue Per Occupied Home on a Same-Store basis. Blended cost to own a home is calculated using data from Moody’s, National Association of Realtors, and property prices (both single-family and condos) from Zillow for the markets in which UDR operates and is based on UDR’s NOI by market. Monthly mortgage costs assumes a 20% down payment and a 30-year fixed rate mortgage based on historical quarterly rates from Federal Reserve Economic Data. Monthly cost to own also includes taxes and insurance expense assumed at 1/12 of 2% of the historical median home price.
