Ohio **Overview** (1 of 2)

CUSTOMERS: 2.1M

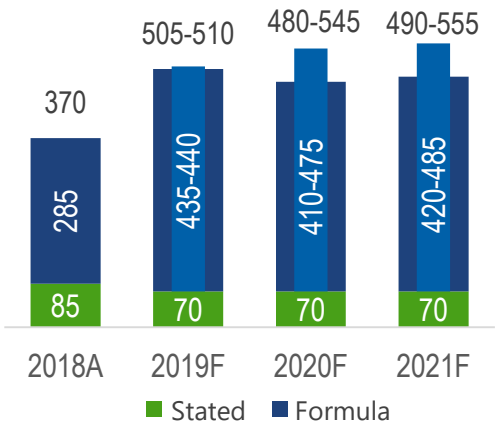

INDUSTRIES SERVED: Primary and Fabricated Metals, Chemical, Automotive, Petroleum, Plastics & Rubber

REGULATORY STRATEGY

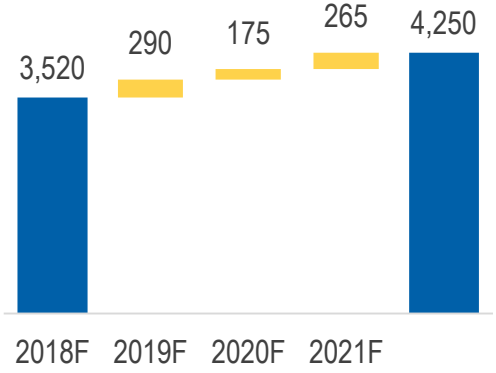

- Utilities are required to file applications to establish either an Electric Security Plan (ESP) or a Market Rate Offer to provide customers default generation service, also known as a standard service offer. ESPs establish the pricing and supply of generation service, and may include provisions regarding distribution system investments, grid modernization, economic development and job retention initiatives, and energy efficiency measures.
- OE, CEI, and TE currently operate under ESP IV, which freezes base rates through its duration ending 5/31/2024
- Rider DMR was approved for a 3 year period and OE, CEI, and TE filed 2 year extension for 2020 and 2021
- Continued use of riders/surcharges to ensure fair & timely recovery

SERVICES PROVIDED

- OE, CEI, and TE provide Distribution service to ~1,050K, 750K and 310K customers, respectively
- Transmission assets are owned and operated by ATSI

Ohio **Overview** (2 of 2)

ROE TRENDS - REGULATORY VIEW

- SEET – established via Ohio statute; administered by PUCO to evaluate the earnings of each electric utility's approved ESP. SEET ROE threshold calculated annually based on comparable companies analysis.
  - Adjustments authorized under ESP IV, e.g. excludes DMR
  - Adjustments for Affiliate Company Earnings Include
    - Subsidiary earnings (PP), associated company revenues/expenses and interest/dividend income
  - Adjustments for Special or Non-Recurring Items Include
    - Pension/OPEB – Mark-to-market
    - Out-of-period activities and one-time gains/losses

RECOVERY MECHANISMS

Rider	Overview	Reconciled
DCR	Recovers return on/of incremental rate base since last rate case; subject to annual revenue caps	Quarterly
DMR	Provides FE with credit support to make grid mod investments; currently authorized to collect $132.5M annually after-tax; excluded from SEET	Quarterly
AMI	Recovery of commission approved grid modernization programs	Quarterly
DSE	Recovery of costs associated with energy efficiency and demand response programs and lost distribution revenues	Semi-Annual
NMB	Recovery of non-market based transmission costs	Annually
GEN	Recovery of purchased power costs associated with being provider of last resort	Annually

STORM COSTS

O&M Deferral: $26M YE 2018 regulatory asset

PENSION/OPEB

Expense recovery based on service costs (last rate case)

TAX REFORM

Tax Rate: All riders updated in 2018; remaining impacts pending in settlement
EDIT: Settlement pending

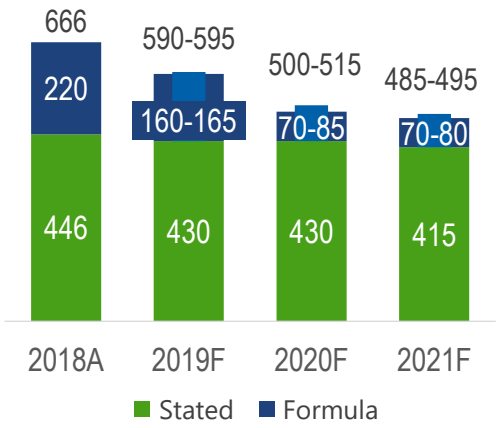

Pennsylvania **Overview** (1 of 2)

REGULATORY STRATEGY

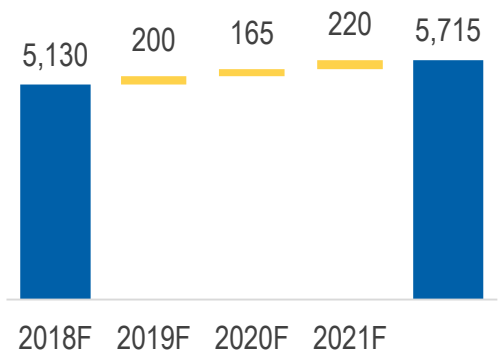

- No current plan to file base rate case for a traditional or alternative ratemaking structure
- LTIIPs require periodic review once every 5 years, and must be filed and approved prior to recovery through the DSIC rider. Companies will make filings later in 2019 which would propose new LTIIPs for the 2020-2024 period. All companies are currently collecting under the DSIC rider.
- Last two PA rate cases (2015, 2017) were settled through Black Box Settlements which allows for parties to reach consensus revenue requirement without specifying agreement on specific individual terms e.g., Allowed ROE, Rate Base, Capital Structure
- PA Act 58 legislation permits, but does not require, alternative ratemaking structures

INDUSTRIES SERVED: Chemical, Primary and Fabricated Metals, Food Manufacturing, Plastic & Rubber

LAST APPROVED RATE CASE STATISTICS (Jan. 2017)

$2.2B Dx Rate Base	9.6% Allowed Return on Equity
55:45 Allowed Debt / Equity	2016 Test Year

SERVICES PROVIDED

- JCP&L provides Distribution and Transmission services to ~1,135K customers
- Transmission service costs recovered through a stated rate

New Jersey **Overview** (2 of 2)

REGULATORY VIEW

- Currently no requirement to file regulatory earnings reports
- IIP rate filings require an earnings test, which calculates a book return based on FERC Form 1 and including limited adjustments
- Rate base
  - Includes: distribution and service company net plant in service; general and intangible plant; property-related ADITs and ADITs related to capitalized interest
  - Excludes: deferred storm expense; non-property ADITs except for ADITs related to capitalized interest and protected NOLs
- Income statement adjustments include:
  - Weather adjusted revenues
  - Remove transmission, production and non-operating items
  - Pension/OPEB – remove mark-to-market and replace with delayed recognition
  - Synchronize interest expense to debt-financed portion of rate base

RECOVERY MECHANISMS

Rider	Overview	Reconciled
SRC	Recovery of storm costs from 2012 major storms through 12/31/19	N/A
NGC	Recover the above-market portion of payments on Non-Utility Generation contracts	Annually
BGS	Recovery of purchased power costs associated with being provider of last resort as well as PJM transmission costs	Quarterly
RRC	Recovery of costs for demand response, energy efficiency, and renewable energy programs	Annually
IIP	Recovery of approved projects to enhance the reliability and resiliency of JCP&L's distribution system	Semi-Annually

- Required Quarterly Earnings Reports (Distribution Only) – derived from FERC Forms 1 and 3 with adjustments to provide a regulatory view similar to rate-making constructs
  - Separation Study is needed to separate PE into WV, MD, and VA and can be accomplished using numerous allocation methods
  - Rate Base Adjustments Include
    - 13-month historical average
    - Removal of allocated transmission and generation plant
  - Income Statement Adjustments Include
    - Pension/OPEB – Remove mark-to-market and replace with smoothing method
    - Removal of allocated transmission plant

RECOVERY MECHANISMS

Rider	Overview	Reconciled
EDIS	Recovery for incremental investments of reliability programs for distribution automation, accelerated underground cable replacement, and substation reclosers	Annually
EmPower	Recovery for costs related to PE's sponsored energy efficiency and conservation programs	Annually
SOS	Recovery of purchased power costs associated with providing default service and PJM transmission costs	Annually

STORM COSTS
Recovery through base rates only

PENSION/OPEB
Recovery of GAAP expense with MTM smoothing

TAX REFORM

ENERGY FOR A BRIGHTER FUTURE

Corporate Responsibility Strategy

We are a
forward-thinking electric utility
powered by a diverse team of employees committed to making
customers' lives brighter, the environment better and our communities stronger

Build a sustainable business with…

Social and Environmental

Employees
- Employee Engagement
- Expanded Diversity & Inclusion

Customers
- Emerging Technologies
- Performance-Based Initiatives

Environment
- Internal Operations
- Renewable Adoption

Communities
- Targeted Giving / Engagement
- Charitable Impact Measurement

Governance

Transparency

Accountability

Built upon the pillars of our mission statement, our Strategy delivers on these opportunities and unlocks potential growth for our stakeholders

Corporate Responsibility – Facts at a Glance

Environmental

- Achieved 62%* reduction in CO_2 emissions since 2005
- Generation fleet carbon emission intensity of 0.49 metric tons/MWh

- Developed UAS program in which drones are being used to improve safety and efficiency and provide unique services throughout our territory
- Four osprey nesting platforms installed on our poles as part of FE's Avian Protection Plan

- Began implementation of a corporate waste reduction initiative
- Continued participation in CDP Climate, CDP Water Reports and EEI's ESG/Sustainability Template

Social

- Systemwide OSHA incident rate of 0.80 which was below EEI industry average of 1.21**
- Experienced zero Systemwide Life Changing Events

- Implemented a Diversity & Inclusion Key Performance Indicator, and developed six Employee Business Resource Groups (EBRGs)
- Participated in and was selected as one of 230 companies for the 2019 Bloomberg Gender Equality Index

- FE Foundation donated over $8M to nearly 1,300 nonprofits in 2018
- Provided the equivalent of 3.3 million meals to feed the hungry in our communities

Governance

- Published a Climate Report, including a 2 degree scenario analysis
- Update to Corporate Responsibility Report will be published in late 2019

- Expanded BOD Corporate Governance Committee to include Corporate Responsibility oversight
- Developed dedicated Corporate Responsibility team within the Strategy organization

- BOD is made up of 36% Diverse Directors (gender, race & ethnicity)
- All Directors are independent, other than the CEO

*Primarily due to retirements and asset sales through 12/31/18. Additional reductions will be recognized upon FirstEnergy Solutions' emergence from Chapter 11 bankruptcy.
**Based on 2015 Edison Electric Institute (EEI) Safety Survey published in 2016.

Climate Risk Report

Fully Regulated Utility

- Transmission
  - Energizing the Future program – Upgrading and modernizing our transmission system to build a smarter, stronger and more secure power grid for the future
- Distribution
  - Investing in projects that create a more resilient, flexible distribution system
  - Evaluating new opportunities that enable emerging technologies to meet the future energy needs of our customers
  - Maintaining service and reliability performance through grid modernization
- Generation Fleet
  - CO_2 reduction goal to reduce emissions by at least 90 percent below 2005 levels by 2045
  - Reduced CO_2 emissions by 62 percent as of year end 2018

Governance Process

- Executive and Board Oversight on climate-related issues
- Strategy and Corporate Responsibility Organization
  - Focused on expanding ESG and corporate responsibility initiatives to inform, engage, and achieve our sustainability goals
- Executive Level Steering Committee
  - Review and guide governance topics
- Shareholder Engagement and Outreach
  - Engage with shareholders with a focus on corporate responsibility and climate related disclosures

Two-Degree Scenario Analysis and Implications

- Two-Degree Scenario (2DS) Analysis
  - Based on the International Energy Agency's 2DS
  - Developed state-level detail for the five states FE primarily operates to study potential impacts to company
  - Results show significant changes in energy use across all sectors of the economy
- Implications
  - Well-positioned to mitigate climate-related risks and act upon related opportunities associated with a lower-carbon future
  - Positioned to enable electrification in the transportation, buildings and industrial sectors
  - Support multi-sector CO_2 emission reductions

Climate Report released April 1, 2019

2019 Corporate Responsibility Internal Initiatives

COMMUNITY
EMPLOYEE VOLUNTEER PROGRAM

WHAT: A program that provides non-bargaining non-physical employees with 16 hours to volunteer in the community

WHY: Aligning to our employees' passions while having the ability to track the number of hours our employees volunteer and better understand the impact of those hours in our communities

EMPLOYEE
TRANSFORMATION TALK

WHAT: A short, powerful talk, 15 minutes or less, similar in concept to TED Talks ®

WHY: Increase employee inclusiveness by connecting them with the bigger company picture through an information session about a key topic or strategy

ENVIRONMENT
EMPLOYEE WASTE REDUCTION PROGRAM

WHAT: Provide ~3,100 employees with reusable drinkware and remove Styrofoam cups from 7 Corporate facilities and implement centralized waste and recycling

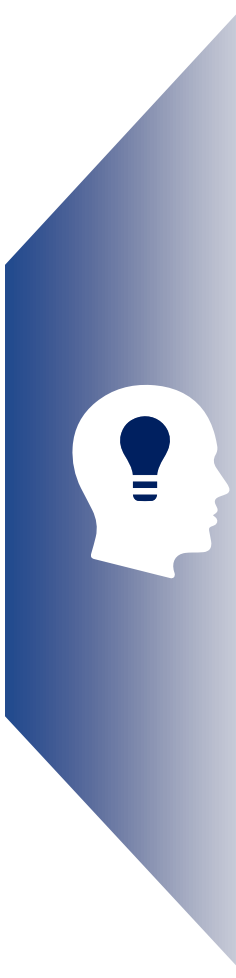

WHY: Average employee wastes ~540 pounds per year and FE purchases enough Styrofoam cups in a year that if stacked up would be as tall as Mt. Kilimanjaro

CUSTOMERS
PROACTIVE COMMUNICATION

WHAT: Increase visibility of customer requested work by proactively communicating the status of new business residential requests

WHY: Improve customer experience by providing customers the ability to monitor the progress of requested work

2019 Corporate Responsibility Report

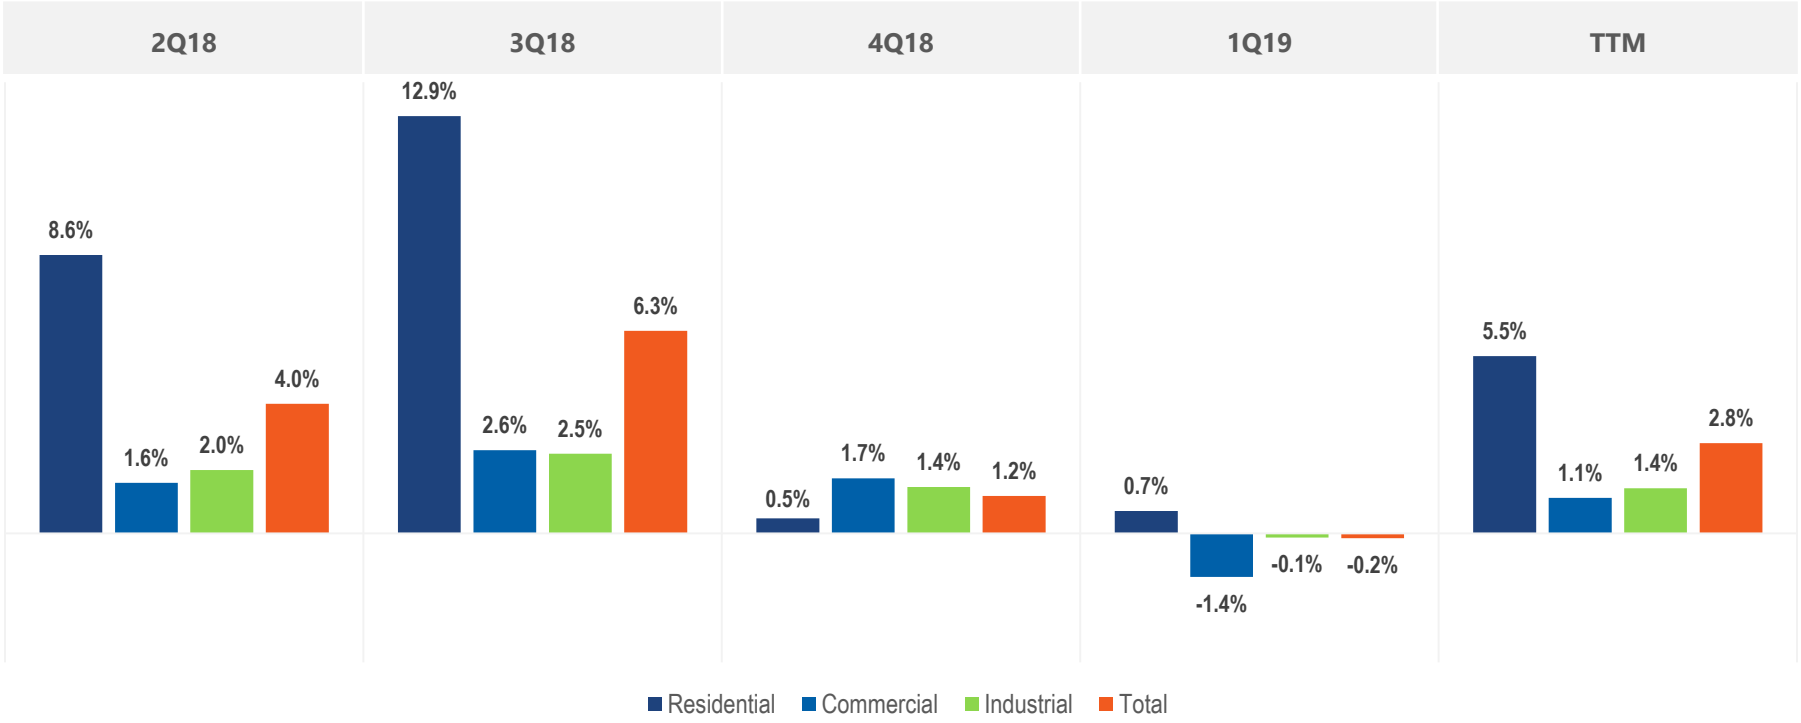

What	• Publish a comprehensive Corporate Responsibility Report and website that will contain tangible examples, and metrics of the ways in which we are living our mission
Why	• Keep our internal and external stakeholders informed about key issues and activities related to corporate responsibility • Educate and engage stakeholders to reinforce the FirstEnergy brand and continue to build our reputation as a good corporate citizen • Provide external stakeholders with comprehensive information in a single, and easy to navigate location
Key Topics	The following topics will be covered but not limited to: • Community Involvement • Distribution – Grid Modernization • Diversity & Inclusion • Emerging Technologies • Environmental • Safety • Transmission – Energizing the Future
Timing	• To be published 4Q 2019

Quarterly Updates

Sales by Class

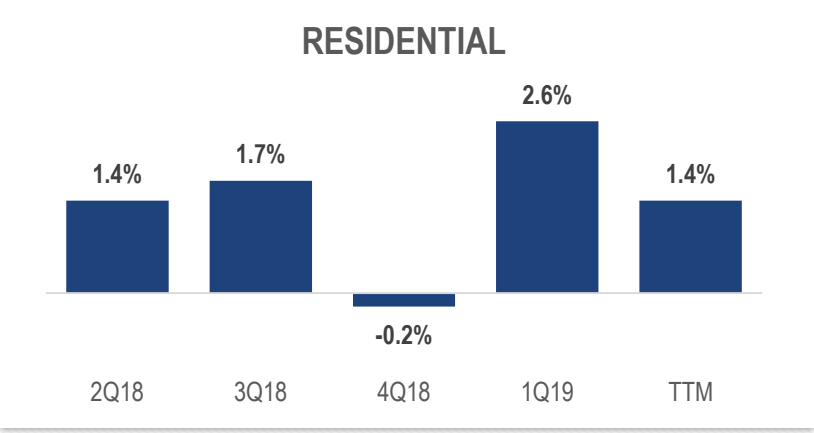

Percent change vs. prior year

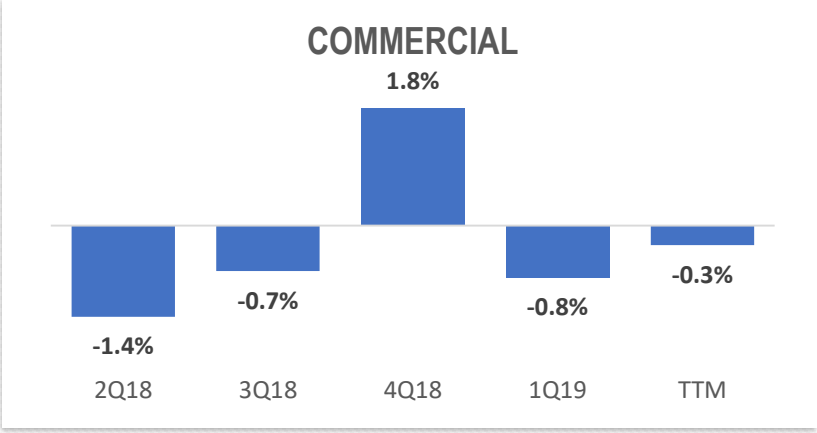

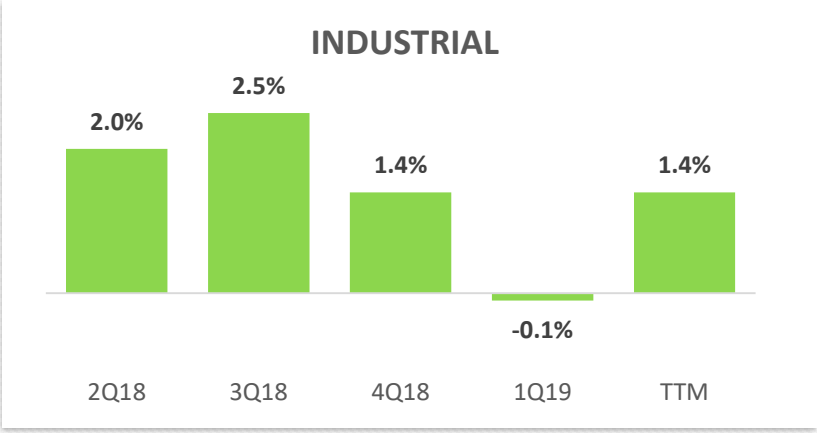

(MWh in thousands)	2Q17	2Q18	3Q17	3Q18	4Q17	4Q18	1Q18	1Q19	TTM 1Q18	TTM 1Q19

Weather Adjusted GWh Sales by Class

Percent change vs. prior year

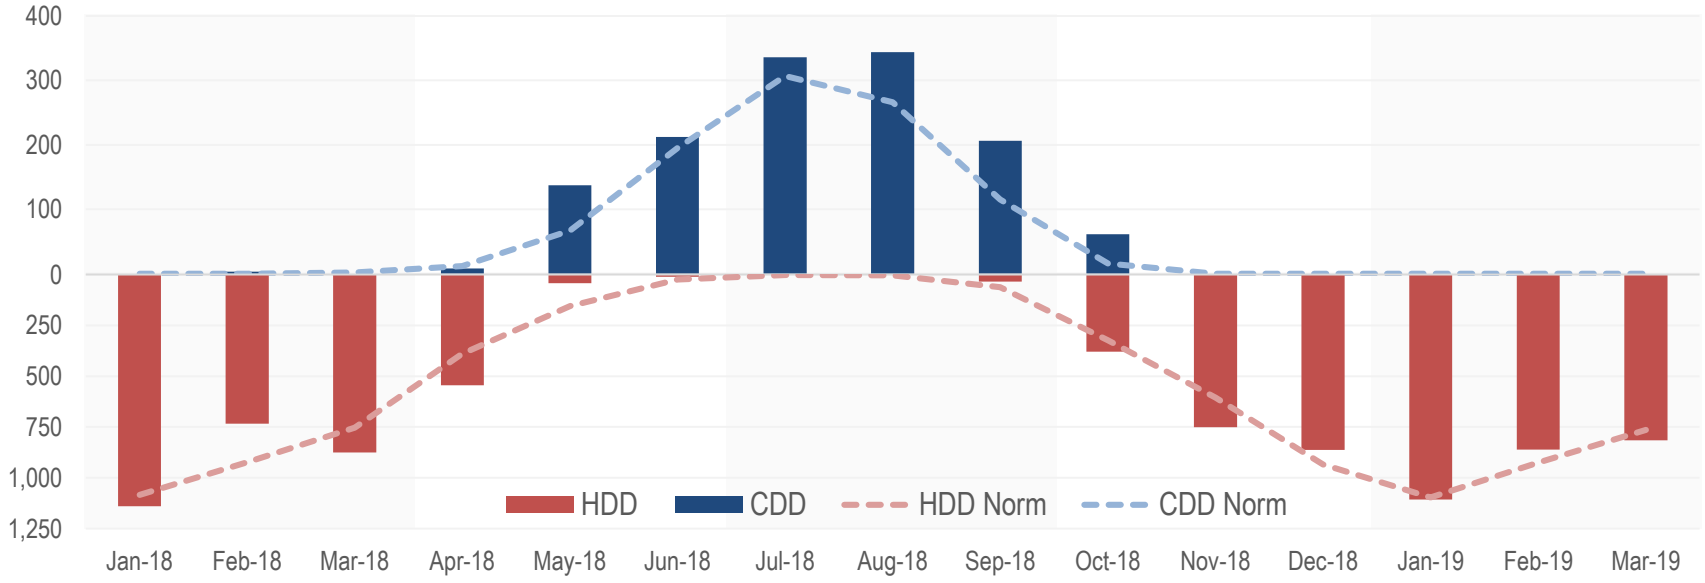

Residential and Industrial sales have seen modest growth over the past year, while Commercial sales have been essentially flat.

Weather Impacts

		OH		PA		NJ		WV		MD		Total	
		Days	%	Days	%	Days	%	Days	%	Days	%	Days	%
1Q19	HDD vs Normal	7	0%	25	1%	19	1%	-117	-5%	-81	-3%	-2	0%
	HDD vs 1Q18	53	2%	40	1%	85	3%	-83	-3%	-21	-1%	35	1%

Potomac Edison-Maryland Rate Case

- On March 22, 2019, the MD PSC approved a distribution base rate increase of $6.2M (4.9% increase in distribution rates)
  - Rates effective March 23, 2019

Rate Case Decision	
Authorized ROE	9.65%
Capital Structure	47% debt / 53% equity; Cost of debt: 4.335%
Rate Base	$462M
Test Year	Historic; 12 months ended June 30, 2018

- Includes new EDIS to recover incremental investments for distribution automation, accelerated underground cable replacement, and substation reclosers
  - Incremental capital investment of $10M-$12M per year
  - EDIS approved for an initial 4-year period, but PE is permitted to return to the MD PSC to make a case for extension of surcharge recovery
- Fully resolves tax reform in Maryland
- A new depreciation study must be filed no later than September 2020
  - Depreciation expense and rates will be further adjusted as a result of the new depreciation study
- A new distribution rate case must be filed within 4 years to align with the targeted end of the EDIS

New Jersey IIP Settlement

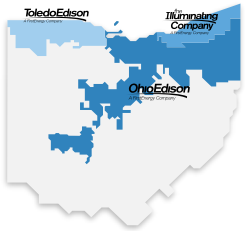

- On July 13, 2018, JCP&L filed “JCP&L Reliability Plus” with the NJ BPU
- On April 23, 2019, reached settlement for 2-year, $97M infrastructure program
  - Supported by BPU Staff, Rate Counsel and NJ Large Energy Users Coalition
  - Upon final approval from BPU, work will occur June 1, 2019 – December 31, 2020

Overview of Infrastructure Projects	
Overhead circuit reliability and resiliency	Enhanced vegetation management, installation of new TripSaver II devices to reduce the number of momentary outages from becoming longer-duration outages
Substation reliability enhancement	Protecting JCP&L substations from storm damage by implementing flood mitigation measures, upgrading distribution substation equipment, enhancing substation fencing and acquiring four mobile substations
Distribution automation	Installing new technology that can pinpoint and isolate damage on the system, which quickly decreases the number of customers affected by an outage

- JCP&L will recover its capital investments through two rate filings
  - Recovering no less than the first 6 months of plant-in-service
  - Second filing, at the end of the program, to recover plant-in-service for the remainder of the program
- Cumulative monthly bill impact of $0.50 or ~0.5% for average residential customer

Ohio Tax Reform/Grid Mod Settlement

- Filed on November 9, 2018; Supplemental Stipulation filed January 25, 2019
- Resolves issues related to federal income tax reform and previously filed grid modernization cases
- Tax Reform Settlement
  - Return to customers all tax savings from Tax Reform related to excess deferred income taxes and current income taxes from January 1, 2018
- Grid Modernization Settlement
  - Recover through Rider AMI up to $516M of capital costs invested over three years related to grid modernization investments
    - Recovery includes return of and on investment, associated taxes, incremental O&M (subject to cap)
- Hearing occurred Feb. 5-6, 2019; Briefs filed Mar. 1, 2019; Reply Briefs filed March 12, 2019

Signatory Parties

- PUCO Staff
- Generation Suppliers
- Environmentalists
- Hospitals
- Industrial Advocates
- Residential Advocates
- Low Income Advocates
- Cable Companies

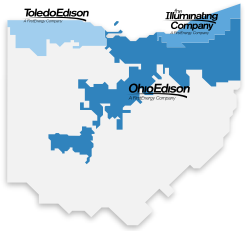

Investments

- 700,000 Advanced Meters and associated AMI technology
- Distribution Automation on 200 Circuits
- Integrated Volt Var Control on 202 Circuits
- Advanced Distribution Management System (“ADMS”)
- Up to $50M in Platform work (Circuit Ties, Reconductoring, etc.)

Benefits

- Reliability and operational improvements
- Reduced energy consumption
- Enhanced data access
- Enable future grid modernization investments

Ohio Rider DMR

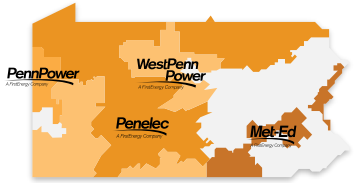

- Rider DMR was approved for a three-year period ending December 31, 2019, with a potential two-year extension
  - Funds to be used, directly or indirectly, in support of grid modernization
- A two-year extension application was filed on February 1, 2019
  - Companies requested an extension of Rider DMR for an additional two-year period, at its current annual amount of $132.5M (after-tax)

Rider DMR would continue under the same terms and conditions
Retention of corporate headquarters and nexus of operations in Akron
No change in control of Ohio utilities
Demonstration of sufficient progress in implementation and deployment of PUCO-approved grid mod programs

- The Companies filed testimony supporting the application on March 1, 2019
- The midterm report by Oxford Advisors, LLC is scheduled to be filed by April 29, 2019
- Several intervenors filed notices of appeal in 2017 with the Supreme Court of Ohio appealing various PUCO entries on their applications for rehearing regarding the Ohio Companies' ESP IV
  - Oral argument on the appeals was held on January 9, 2019

Pennsylvania DSIC Rider

- Rider set to zero when new rates implemented on January 27, 2017
  - Expected to restart when gross plant balances exceed the amount recovered in base rates and if reported ROE does not exceed the PA PUC published benchmark of 9.65% (subject to change)

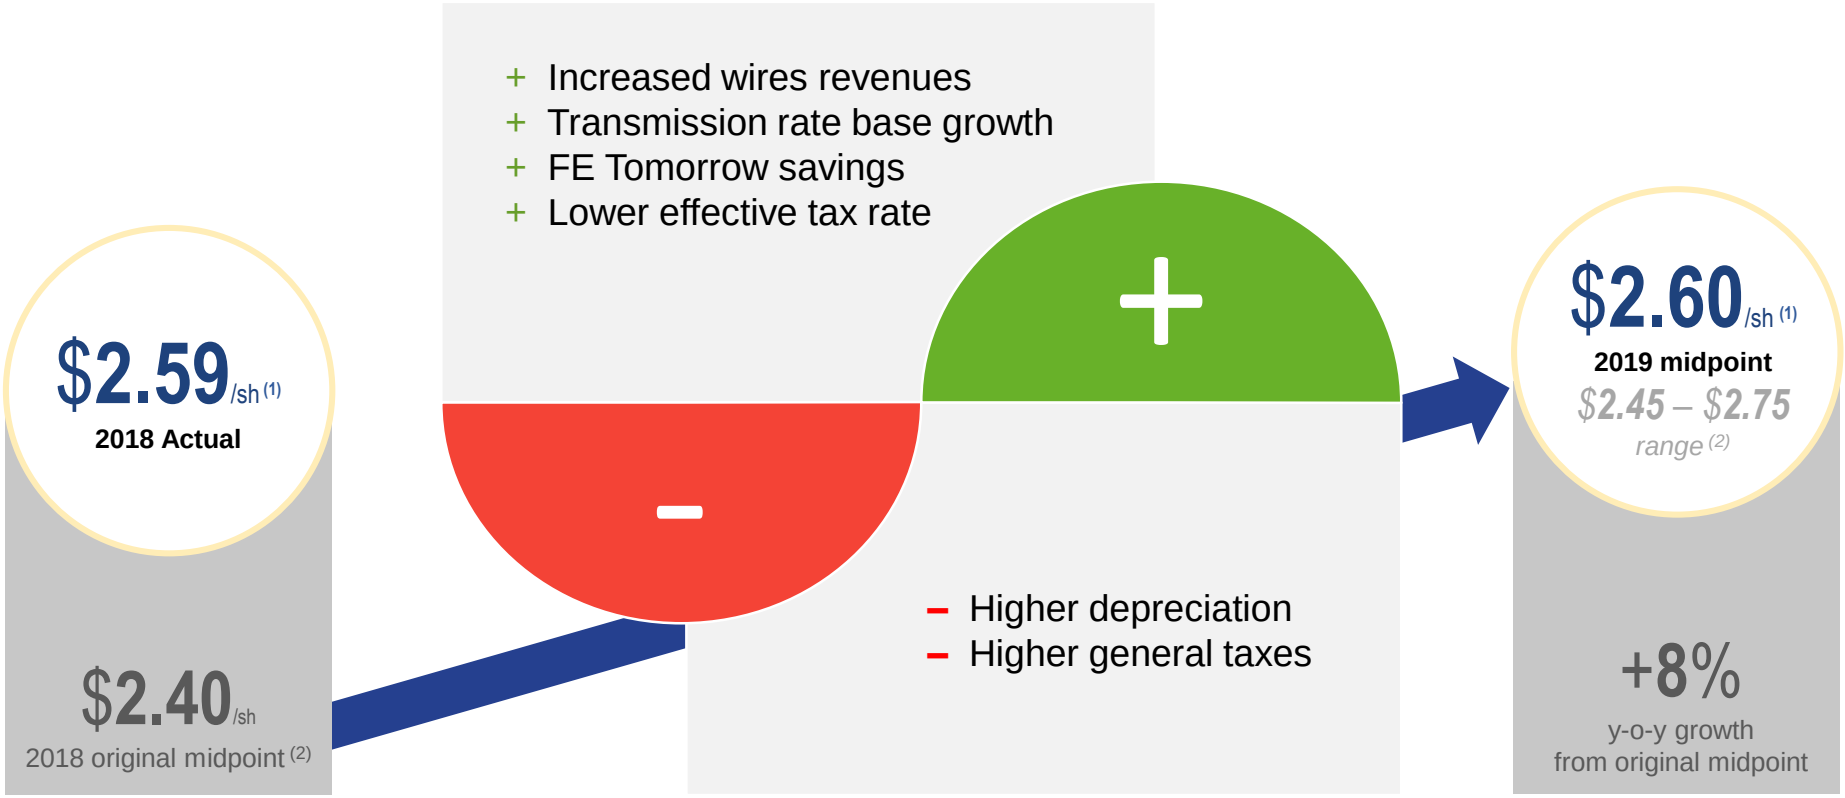

DSIC Rider restarted effective:		
	PP / WPP	April 1, 2018
	PN	October 1, 2018
	ME	January 1, 2019

- Companies filed Revised LTIIPs on January 18, 2019 in compliance with the PA PUC's midterm review of the Companies' LTIIPs

Guidance and Financials

2019 Operating EPS Guidance

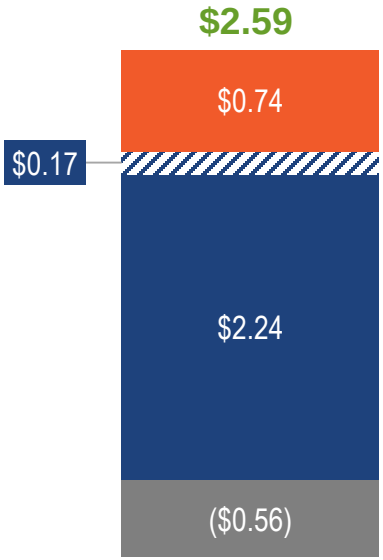

Full year 2019 guidance range of $2.45 - $2.75

(1) See slides 73 and 74 for the 2018 and 2019 GAAP to Non-GAAP earnings reconciliations.
(2) Guidance midpoint is based on fully diluted shares of 538M in 2018 and 540M in 2019. See slide 77.

2019 Operating EPS[1] Guidance

Projecting 7% weather-adjusted, year-over-year Operating EPS growth

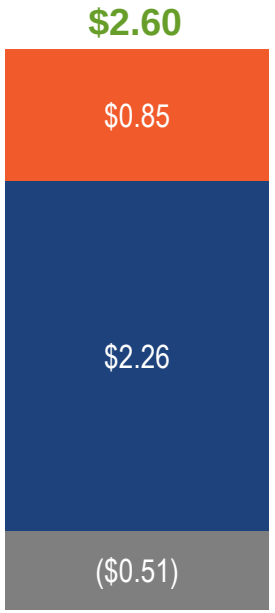

2019 Operating EPS Guidance Range	
Regulated Distribution *(includes Rider DMR)*	$2.16 – $2.36
Regulated Transmission	$0.81 – $0.89
Corp / Other	($0.52) – ($0.50)
	$2.45 – $2.75

Year	Entity	Amount	Purpose
2019F	AGC	$50M	New Issuance

Pension/OPEB Overview

Overview

- FE is the sponsor of the benefit plans for employees at all of FE's subsidiaries
- Pension Status is Open
  - Plan design changed to Cash Balance formula for new hires beginning 1/1/2014
- Pension/OPEB Expense impacts operating (non-GAAP) earnings based on a post-capitalization calculation of net periodic costs (excluding MTM adjustment)

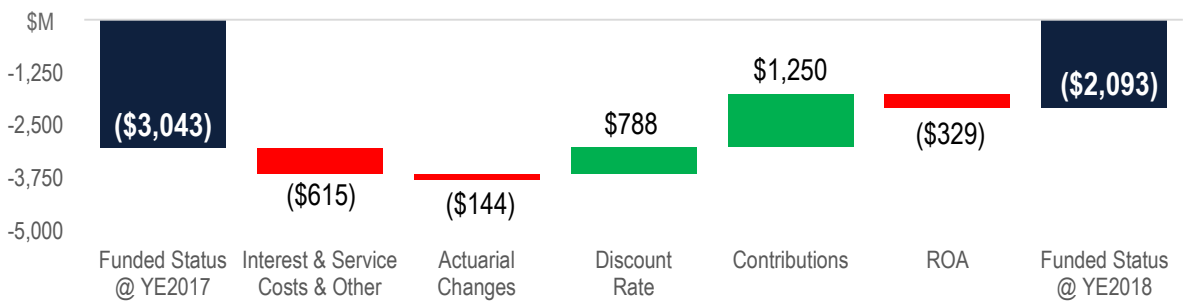

Key assumptions for 2018 expense	
Expected Return on Assets	7.50%
Pension Discount Rate	3.75%
OPEB Discount Rate	3.50%

MTM Method

- Beginning in 2011, adopted MTM method for pension and OPEB accounting
- Net gain or loss is recognized in fourth quarter GAAP results; excluded from operating (non-GAAP) results
  - Preferred method of accounting under GAAP

2018 MTM Drivers	Impact
Lower than expected returns	($680M)
Increase in discount rate	$645M
Other changes (Demographic, VERP, Misc.)	($70M)
Net Income Impact / EPS Impact	**($105M) / ($0.19)**

2018A Qualified Pension Funded Status

2018 Pension/OPEB Summary

Pension/OPEB Funded Status: Year-End 2018A

($M)	Corp	FEU	FES/FENOC	Total	Notes
Qualified Pension	($893)	($403)	($797)	($2,093)	77% funded at 12/31/18; excludes 2/1/19 $500M Contribution
Non-Qualified Pension	(160)	(156)	(69)	(385)	No minimum funding requirements
OPEB	48	(336)	88	(200)	No minimum funding requirements
Total	**($1,005)**	**($895)**	**($778)**	**($2,678)**	

Components of Net Periodic Benefit Costs: 2018A

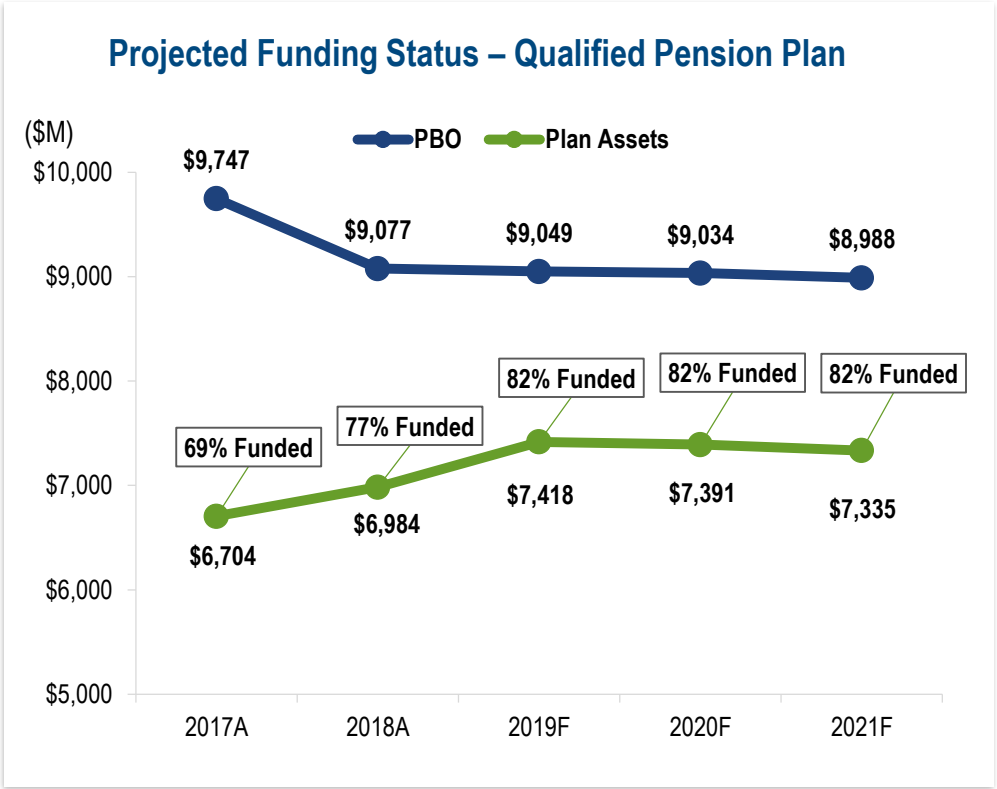

($M)	Pension	OPEB	Total	Post Cap
Service Cost	$224	$5	$229	$140
Interest Cost	372	25	397	397
Expected Return on Assets	(574)	(31)	(605)	(605)
Amortization of prior service cost (credit)	7	(81)	(74)	(74)
Non-GAAP Cost (Credit)	**$29**	**($82)**	**($53)**	**($142)**
Pension/OPEB Mark-To-Market Adjustment	227	(82)	145	145
Settlements, Curtailments (VERP)	31	8	39	39
GAAP Net Periodic Cost (Credit)	**$287**	**($156)**	**$131**	**$42**

2018-2021 Qualified Pension Funding

Significant improvement in funded status projected through 2021

Qualified Pension Plan

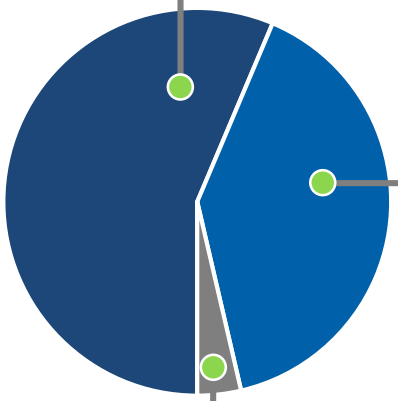

- 2018 actual investment return of -4.2%
- Pension Contributions
  - January 2018: $1,250M
  - February 2019: $500M
- No required contributions through 2021
- Key assumptions:
  - Expected Return on Assets of 7.50%
  - Discount Rate of 4.44% (full yield curve) @ 12/31/18

Capital Expenditures Forecast Summary

$11B – $12B in capital investments 2018-2021 ~55% based on formula rates

	2018A	*Annually* 2019F – 2021F
FE Consolidated Total	**$3.0B**	**$2.8B - $3.0B**

($M)	2018A	2019F	2020F	2021F
Regulated Distribution (~40% formula rates)	**$1,635**	**$1,600-$1,700**	**$1,500-$1,700**	**$1,500-$1,700**
Stated Rate	$1,085	$960-$965	$990-$1,000	$980-$1,000
Formula Rate	$550	$640-$735	$510-$700	$520-$700
Regulated Transmission (80%+ formula rates)	**$1,165**	**$1,200**	**$1,200**	**$1,200**
Stated Rate	$256	$255	$120	$110
Formula Rate	$909	$945	$1,080	$1,090
Corp/Other	**$183**	**$85**	**$90**	**$110**

2019 Cash Forecast

- Stated capital expenditures and dividends are fully funded by FFO
- Formula capital expenditures are funded by a mix of FFO and operating company debt issuances
- $500M voluntary pension contribution was funded by favorable cash position

Note: Sources and Uses amounts use the mid-points from Slide 64 (2019 FFO and FCF Forecast)

(1) See Slide 58 (2019-2021 Financing Plan)

2019 FFO and FCF Forecast

($M)	FE Consolidated 2019F
Cash from Operations (GAAP)	**$2,090 – $2,290**
Working Capital [1]	(25) – (55)
Pension Contributions [2]	500
Funds from Operations (FFO) (Non-GAAP)	**$2,565 – $2,735**
Capital Expenditure	(2,850) – (2,950)
Cash Before Other Items	**($285) – ($215)**
Working Capital/Other [3]	(5) – 125
Pension Contributions	(500)
Cash Before Dividends and Equity	**($790) – ($590)**
Dividends	(820)
Equity [4]	–
Free Cash Flow [5] (Non-GAAP)	**($1,610) – ($1,410)**

(1) Working Capital is included in "Changes in Current Assets and Liabilities" on the Consolidated Statements of Cash Flows
(2) Pension Contribution is included in "Pension Trust Contributions" on the Consolidated Statements of Cash Flows
(3) Includes "Working Capital", asset removal costs which is included in the Consolidated Statements of Cash Flows, and trust interest and dividend income which is included in "Purchases of Investment Securities Held in Trust" on the Consolidated Statements of Cash Flows
(4) Excludes non-cash equity issuances of ~$100M through FE's stock investment and employee benefit plans
(5) Excludes cash items related to debt financing activity

Bank Covenant View of Debt-to-Cap Ratio

Compliant with RCF covenant; $8.3B of additional debt capacity

Debt to Total Capitalization Ratio as defined under the FE Credit Facility:	3/31/2019 $M	3/31/2019 %	12/31/2018 $M	12/31/2018 %
Total Stockholder's Equity (GAAP)	$ 6,932	20%	$ 6,814	20%
Non-cash Charges / Non-cash Write Downs[1]	8,264	23%	8,264	24%
Less: Accumulated Other Comprehensive Income (GAAP)	(36)	0%	(41)	0%
Adjusted Equity (Non-GAAP)[2]	**15,160**	**43%**	**15,037**	**44%**
Long-term Debt and Other Long-term Obligations (GAAP)	18,814	54%	17,751	52%
Currently Payable Long-term Debt (GAAP)	206	1%	503	1%
Short-term Borrowings (GAAP)	1,300	4%	1,250	4%
Reimbursement Obligations	9	0%	10	0%
Guarantees of Indebtedness	187	0%	190	1%
Less: Securitization Debt	(659)	(2%)	(687)	(2%)
Adjusted Debt (Non-GAAP)[2]	**19,857**	**57%**	**19,017**	**56%**
Adjusted Capitalization (Non-GAAP) [2]	**$ 35,017**	**100%**	**$ 34,054**	**100%**

[1] Includes after-tax non-cash charges and non-cash write downs, primarily associated with the impairment of assets and related charges at the competitive energy business, pension and OPEB mark-to-market adjustments, and regulatory asset charges through March 31, 2019, as permitted by FE's current syndicated revolving credit facility (FE Credit Facility) and term loans.

2018 GAAP to Operating (Non-GAAP) Earnings[1] Reconciliation

(In $M, except per share amounts)	2018 Actual			
	Regulated Distribution	Regulated Transmission	Corporate/ Other	FirstEnergy Consolidated
2018A Net Income (Loss) attributable to Common Stockholders (GAAP)	**$1,242**	**$397**	**($658)**	**$981**
2018A Basic Earnings (Loss) Per Share (avg. shares outstanding 492M)	**$2.53**	**$0.81**	**($1.35)**	**$1.99**
Excluding Special Items:				
Impact of full dilution	(0.22)	(0.07)	0.81	0.52
Mark-to-market adjustments – Pension/OPEB actuarial assumptions	0.15	–	0.04	0.19
Regulatory charges	(0.20)	–	–	(0.20)
Debt redemption costs	0.01	–	0.21	0.22
Tax reform	0.04	–	–	0.04
Exit of competitive generation	0.10	–	(0.27)	(0.17)
Total Special Items	**($0.12)**	**($0.07)**	**$0.79**	**$0.60**
2018A Operating Earnings (Loss) Per Share – Non-GAAP (538M fully diluted shares)	**$2.41**	**$0.74**	**($0.56)**	**$2.59**

[1] Operating earnings exclude special items as described in the reconciliation table above and is a non-GAAP financial measure.

Per share amounts for the special items above are based on the after-tax effect of each item divided by the number of shares outstanding for the period assuming full impact of dilution from the $2.5B equity issuance in January 2018 (538M fully diluted shares). The current and deferred income tax effect was calculated by applying the subsidiaries' statutory tax rate to the pre-tax amount if deductible/taxable. The income tax rates range from 21% to 29%.

2019F GAAP to Operating (Non-GAAP) Earnings[1] Reconciliation

(In $M, except per share amounts)	2019 Forecast				2Q19 Forecast
	Regulated Distribution	Regulated Transmission	Corporate/ Other	FirstEnergy Consolidated	FirstEnergy Consolidated
2019F Net Income (Loss) attributable to Common Stockholders (GAAP)	**$1,175 - $1,280**	**$435 - $480**	**($330) – ($320)**	**$1,280 - $1,440**	**$295 - $350**
2019F Earnings (Loss) Per Share	**$2.17 - $2.37**	**$0.81 - $0.89**	**($0.61) – ($0.59)**	**$2.37 - $2.67**	**$0.55 - $0.65**
Excluding Special Items:					
Impact of full dilution	(0.01)	–	0.01	–	–
Regulatory charges	(0.01)	–	–	(0.01)	–
Exit of competitive generation	0.01	–	0.08	0.09	–
Total Special Items	**(0.01)**	**---**	**0.09**	**0.08**	**---**
2019F Operating Earnings (Loss) Per Share – Non-GAAP (540M fully diluted shares)	**$2.16 - $2.36**	**$0.81 - $0.89**	**($0.52) – ($0.50)**	**$2.45 - $2.75**	**$0.55 - $0.65**

[1] Operating earnings exclude special items as described in the reconciliation table above and is a non-GAAP financial measure.

Per share amounts for the special items above are based on the after-tax effect of each item divided by the number of shares outstanding for the period assuming full impact of dilution from the $2.5B equity issuance in January 2018 (540M fully diluted shares). The current and deferred income tax effect was calculated by applying the subsidiaries' statutory tax rate to the pre-tax amount if deductible/taxable. The income tax rates range from 21% to 29%. 2019F Earnings (Loss) Per Share and 2019F Operating Earnings (Loss) Per Share - Non-GAAP are based on 540M shares outstanding.

2018A and 2019F Special Items[1]

- Regulatory charges – Primarily reflects the impact of regulatory agreements or orders requiring certain commitments and/or disallowing the recoverability of costs, net of related credits.
- Mark-to-market adjustments: Pension/OPEB actuarial assumptions – Reflects the change in fair value of plan assets and net actuarial gains and losses associated with the company's pension and postemployment benefit plans.
- Exit of competitive generation – Primarily reflects charges or credits resulting from the exit of competitive operations, including the impact of deconsolidating FES, its subsidiaries and FENOC, following their voluntary petitions for bankruptcy protection on March 31, 2018.
- Debt redemptions costs – Primarily reflects costs associated with the redemption and early retirement of debt and amendments to revolving credit facilities.
- Tax reform – Primarily reflects charges and credits resulting from the Tax Cuts and Jobs Act.
- Impact of full dilution – Represents the dilutive impact of increasing weighted average shares outstanding to reflect the full impact of share dilution from the $2.5 billion equity issuance in January 2018, including preferred dividends and conversion of preferred stock to common shares.

[1] Special items represent charges incurred or benefits realized, including share dilution, that management believes are not indicative of, or may obscure trends useful in evaluating the company's ongoing core activities and results of operations or otherwise warrant separate classification. Special items are not necessarily non-recurring.

Forward-Looking Statements

This presentation includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 based on information currently available to management. Unless the context requires otherwise, as used herein, references to “we,” “us,” “our,” and “FirstEnergy” refer to FirstEnergy Corp. Forward-looking statements are subject to certain risks and uncertainties and readers are cautioned not to place undue reliance on these forward-looking statements. These statements include declarations regarding management's intents, beliefs and current expectations. These statements typically contain, but are not limited to, the terms “anticipate,” “potential,” “expect,” "forecast," "target," "will," "intend," “believe,” "project," “estimate," "plan" and similar words. Forward-looking statements involve estimates, assumptions, known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements, which may include the following (see Glossary of Terms for definitions of capitalized terms): the ability to successfully execute an exit from commodity-based generation, including, without limitation, mitigating exposure for remedial activities associated with formerly owned generation assets; the risks associated with the Chapter 11 bankruptcy proceedings involving FirstEnergy Solutions Corp. (FES), its subsidiaries, and FirstEnergy Nuclear Operating Company (FENOC) (FES Bankruptcy) that could adversely affect us, our liquidity or results of operations, including, without limitation, that conditions to the FES Bankruptcy settlement agreement may not be met or that the FES Bankruptcy settlement agreement may not be otherwise consummated, and if so, the potential for litigation and payment demands against us by FES or FENOC or their creditors; the ability to accomplish or realize anticipated benefits from strategic and financial goals, including, but not limited to, our strategy to operate and grow as a fully regulated business, to execute our transmission and distribution investment plans, to continue to reduce costs through FE Tomorrow, which is the FirstEnergy initiative launched in late 2016 to identify our optimal organization structure and properly align corporate costs and systems to efficiently support FirstEnergy as a fully regulated company going forward, and other initiatives, and to improve our credit metrics, strengthen our balance sheet and grow earnings; legislative and regulatory developments at the federal and state levels, including, but not limited to, matters related to rates, compliance and enforcement activity; economic and weather conditions affecting future operating results, such as significant weather events and other natural disasters, and associated regulatory events or actions; changes in assumptions regarding economic conditions within our territories, the reliability of our transmission and distribution system, or the availability of capital or other resources supporting identified transmission and distribution investment opportunities; changes in customers' demand for power, including, but not limited to, the impact of state and federal energy efficiency and peak demand reduction mandates; changes in national and regional economic conditions affecting us and/or our major industrial and commercial customers or others with which we do business; the risks associated with cyber-attacks and other disruptions to our information technology system that may compromise our operations, and data security breaches of sensitive data, intellectual property and proprietary or personally identifiable information; the ability to comply with applicable state and federal reliability standards and energy efficiency and peak demand reduction mandates; changes to federal and state environmental laws and regulations, including, but not limited to, those related to climate change; changing market conditions affecting the measurement of certain liabilities and the value of assets held in our pension trusts and other trust funds, or causing us to make additional contributions sooner, or in amounts that are larger, than currently anticipated; the risks associated with the decommissioning of our retired and former nuclear facilities; the risks and uncertainties associated with litigation, arbitration, mediation and like proceedings; labor disruptions by our unionized workforce; changes to significant accounting policies; any changes in tax laws or regulations, including the Tax Act, or adverse tax audit results or rulings; the ability to access the public securities and other capital and credit markets in accordance with our financial plans, the cost of such capital and overall condition of the capital and credit markets affecting us; actions that may be taken by credit rating agencies that could negatively affect either our access to or terms of financing or our financial condition and liquidity; and the risks and other factors discussed from time to time in FirstEnergy’s Securities and Exchange Commission (SEC) filings. Dividends declared from time to time on FirstEnergy’s common stock, and thereby on FirstEnergy’s preferred stock, during any period may in the aggregate vary from prior periods due to circumstances considered by FirstEnergy’s Board of Directors at the time of the actual declarations. A security rating is not a recommendation to buy or hold securities and is subject to revision or withdrawal at any time by the assigning rating agency. Each rating should be evaluated independently of any other rating. These forward-looking statements are also qualified by, and should be read together with, the risk factors included in FirstEnergy’s filings with the SEC, including but not limited to the most recent Quarterly Report on Form 10-Q, and any subsequent Quarterly Reports on Form 10-Q and Current Reports on Form 8-K. The foregoing review of factors also should not be construed as exhaustive. New factors emerge from time to time, and it is not possible for management to predict all such factors, nor assess the impact of any such factor on FirstEnergy's business or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statements. FirstEnergy expressly disclaims any obligation to update or revise, except as required by law, any forward-looking statements contained herein as a result of new information, future events or otherwise.

Non-GAAP Financial Matters

This presentation contains references to non-GAAP financial measures including, among others, Operating earnings (loss), Operating earnings (loss) per share, Operating earnings (loss) per share by segment, Adjusted Equity, Adjusted Debt, Adjusted Capitalization, Funds from Operations (FFO) and Free Cash Flow (FCF). Generally, a non-GAAP financial measure is a numerical measure of a company's historical or future financial performance, financial position, or cash flows that either excludes or includes amounts that are not normally excluded or included in the most directly comparable measure calculated and presented in accordance with accounting principles generally accepted in the United States (GAAP). Operating earnings (loss), Operating earnings (loss) per share and Operating earnings (loss) per share by segment are not calculated in accordance with GAAP to the extent they exclude the impact of "special items." Special items represent charges incurred or benefits realized that management believes are not indicative of, or may obscure trends useful in evaluating the company's ongoing core activities and results of operations or otherwise warrant separate classification. Special items also reflect the adjustment to include the full impact of share dilution from the $2.5 billion equity issuance in January 2018. Special items are not necessarily non-recurring. FirstEnergy Corp. (FE or the Company) management cannot estimate on a forward-looking basis the impact of these items in the context of Operating earnings (loss) per share growth projections because these items, which could be significant, are difficult to predict and may be highly variable. Consequently, the Company is unable to reconcile Operating earnings (loss) per share growth projections (i.e. CAGR) to a GAAP measure without unreasonable effort.

Operating earnings (loss) per share and Operating earnings (loss) per share for each segment is calculated by dividing Operating earnings (loss), which excludes special items as discussed above, for the periods presented in 2018 by 538 million shares, 539 million shares in the first quarter of 2019 and by 540 million shares for the full year 2019, which reflects the full impact of share dilution from the equity issuance in January 2018.

Management uses non-GAAP financial measures such as Operating earnings (loss), Operating earnings (loss) per share, FFO and Free Cash Flow to evaluate the company's performance and manage its operations and frequently references these non-GAAP financial measures in its decision-making, using them to facilitate historical and ongoing performance comparisons. Additionally, management uses Operating earnings (loss) per share by segment to further evaluate the company's performance by segment and references this non-GAAP financial measure in its decision-making. Management believes that the non-GAAP financial measures of Operating earnings (loss), Operating earnings (loss) per share and Operating earnings (loss) per share by segment and Free Cash Flow provide consistent and comparable measures of performance of its businesses on an ongoing basis. Management uses Adjusted Equity, Adjusted Debt and Adjusted Capitalization to calculated and monitor its compliance with the debt to total capitalization financial covenant under the FE credit facility and term loans. These financial measures, as calculated in accordance with the FE Credit Facility and term loans, help shareholders understand FE's compliance with and provide a basis for understanding FE's incremental debt capacity under the debt to total capitalization financial covenants. The financial covenants under the FE Credit Facility and terms loans require FE to maintain a consolidated debt to total capitalization of no more than 65%, measured at the end of each fiscal quarter. Management also believes that such measures are useful to shareholders and other interested parties to understand performance trends and evaluate the company against its peer group by presenting period-over-period operating results without the effect of certain charges or benefits that may not be consistent or comparable across periods or across the company's peer group. All of these non-GAAP financial measures are intended to complement, and are not considered as alternatives to, the most directly comparable GAAP financial measures. Also, the non-GAAP financial measures may not be comparable to similarly titled measures used by other entities.

Pursuant to the requirements of Regulation G, FirstEnergy has provided, where possible without unreasonable effort, quantitative reconciliations within this presentation of the non-GAAP financial measures to the most directly comparable GAAP financial measures.
