SkyWater Technology Statement of REACH Compliance

Under the European Union EC 1907/2006 regulation, known as REACH (Registration, Evaluation, Authorization, and Restriction of Chemicals), SkyWater Technology products are defined as “articles”. As defined in article 3(3) of REACH regulations, articles do not release substances under normal use.

Registration of substances used in the manufacture of articles does not apply to SkyWater products as SkyWater Technology is a US manufacturing company that does not manufacture product, import, place on the market and use substances in mixtures or in articles. However, SkyWater meets REACH compliance by sourcing only compliant components and following compliant techniques and procedures in the fabrication of our product.

SkyWater is committed to conducting operations in an environmentally, socially, and ethically responsible manner, complying with all applicable laws and regulations of those countries where we do business. This commitment includes the safe use and identification of chemicals per the applicable requirements of the European Community regulation.

SkyWater is also committed to providing our customers with information regarding substances of concern in our products. We continually work with our suppliers to ensure that all pre-registration requirements are met, and they remain in full compliance with current and future REACH requirements.

The updated candidate list of the 205 **SVHCs for authorization** can be found at: <https://echa.europa.eu/candidate-list-table>.

This REACH compliance statement is valid unless superseded by a revised compliance statement provided at a later date.
