Financing business optimization generates additional cash and enables increased capital returns

Optimization aims to increase securitization activity

Inventory recapture extends sales pipeline and supports cash flow

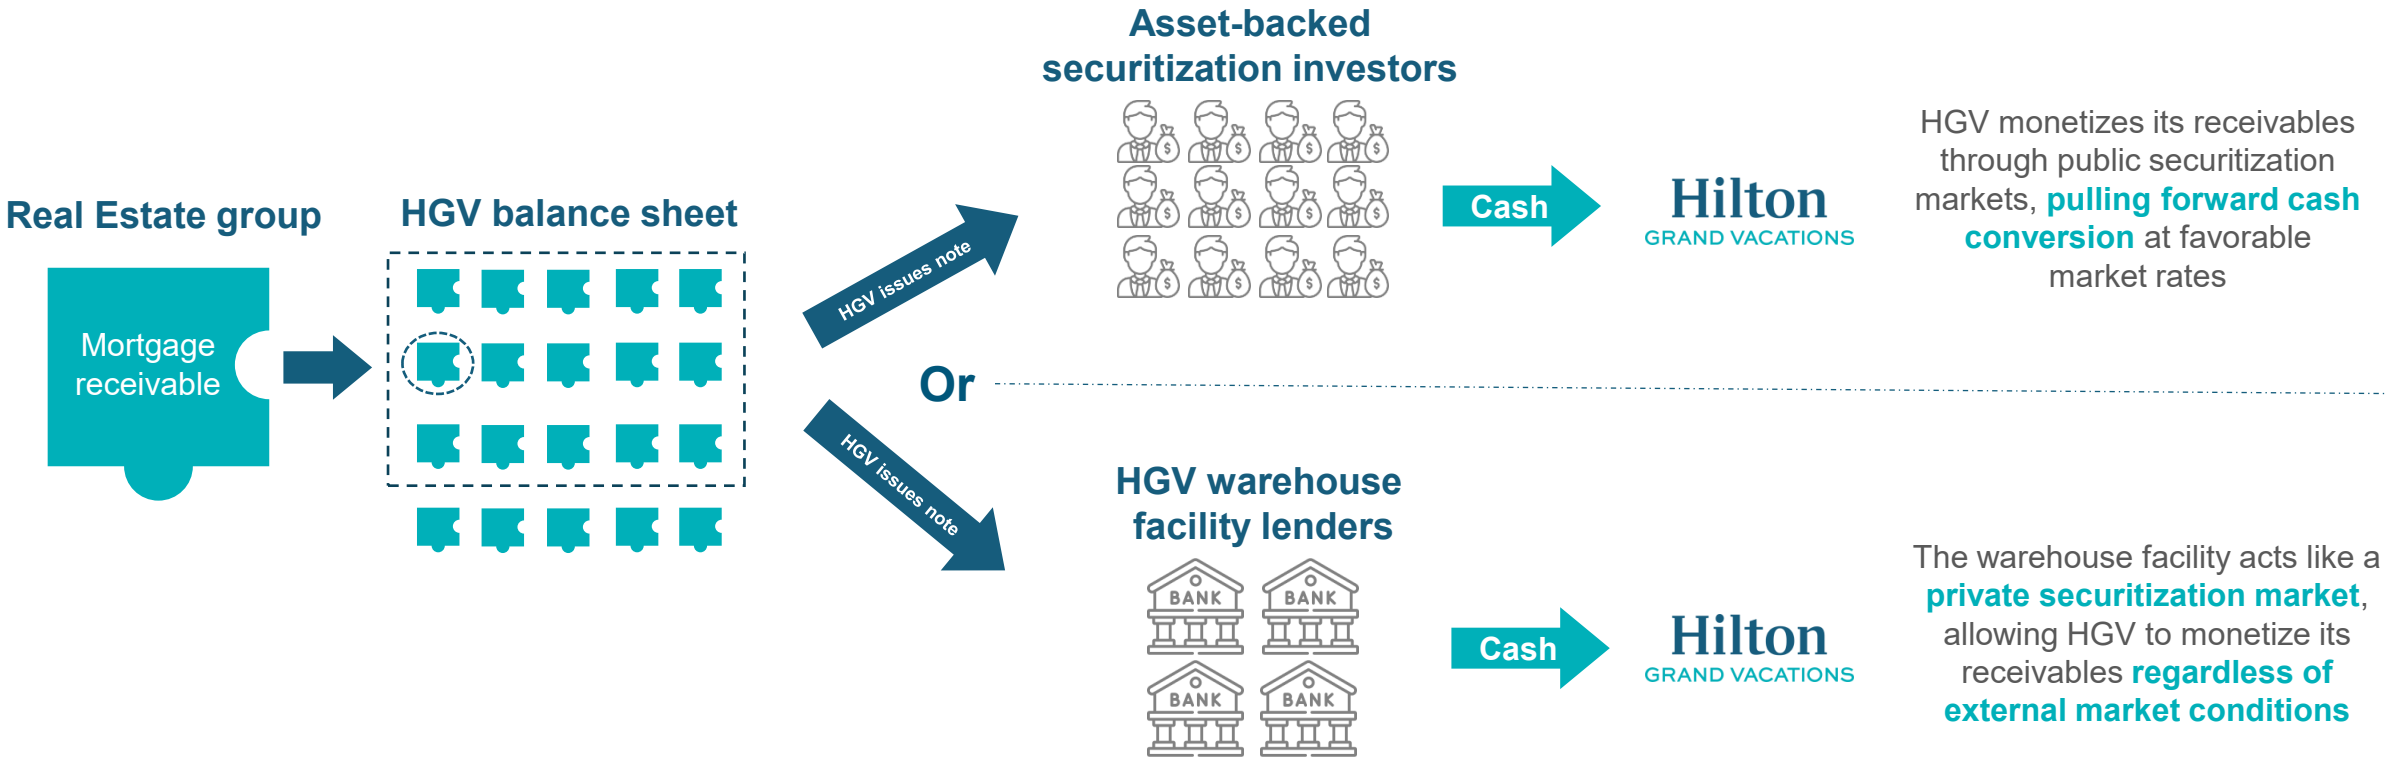

Recaptured inventory

- Can be acquired at an attractive cost, producing higher margin when the inventory is resold
- Is more capital efficient, improving cash flow and returns
- Is acquired in excellent shape owing to HOA-funded maintenance and refresh spending
- Can be resold at prevailing selling price

Securitization overview

Securitizations accelerate the conversion of receivables into cash flow, pulling forward the return of cash versus waiting 7-10 years for the mortgages receivables to pay off

Mortgages are generated from Real Estate contract sales

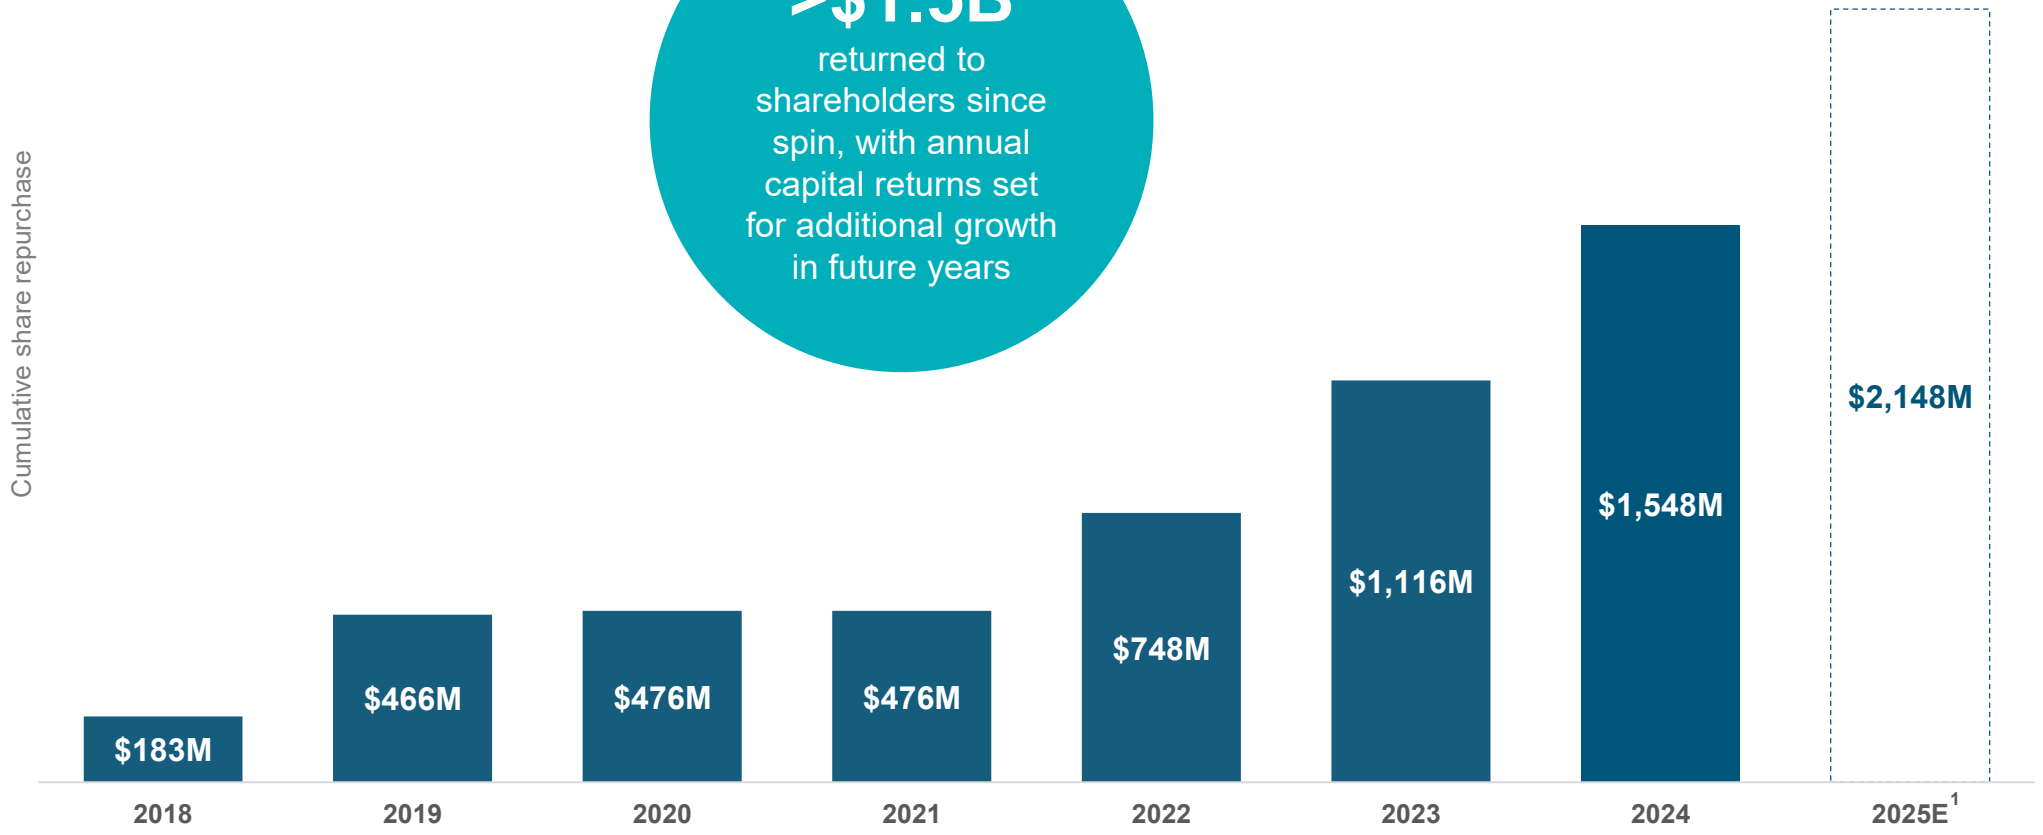

A subset of receivables fitting desired criteria are pooled by HGV and placed into a Trust as collateral for a note offering

Notes issued are fully collateralized by underlying receivables and fully **non-recourse** to HGV

HGV receives cash from the note offering at a fixed interest rate and services the note with funds received from member payments on the underlying mortgage collateral, with the spread between the lending rate and borrowing rate reflected as profit in the financing business

Committed to enhancing shareholder value through capital returns

Discounted vacation packages offer potential buyers the chance to experience our product offering, along with taking a sales tour with an HGV team member

The Discovery Process helps sales team members understand the guest's travel preferences during the sales tour, and attempt to find ownership options that match those preferences

Dual points-based product offering is unique to the industry, maximizing owner choice and flexibility

Advantages for combined entity	✓ **Premium pricing** for certainty of availability in high demand real estate markets ✓ **Inventory sourcing flexibility** and efficiency allows us to employ a **fee-for-service** model with **multiple partners** ✓ Ability to **pre-sell new developments** supports strong project-level cash flow and returns	✓ **Smoother sales and upgrades**, with less specific matching of buyer to property ✓ **Lowers barrier to ownership** and broadens ability to buy into system with more flexible pricing options ✓ **Reduces inventory delivery volatility** and reliance on new builds ✓ Facilitates **inventory recycling**, reducing new build needs
Advantages for buyers and owners	✓ **Guaranteed availability** to reserve purchased week provides peace of mind ✓ **Aspirational** sense of true ownership ✓ **Physical asset** that can be passed down to future generations	✓ **Geographic flexibility** to access network without committing to home resort ✓ **Timing flexibility,** as not tied to a particular time of year or duration

The mechanics of sales deferrals: GAAP versus Economic Impact

Construction projects in connection with the development of inventory can take several years. For **deeded** (Legacy HGV) product, HGV typically pre-sells inventory during this development phase to improve project cash flows and returns on investment

Current accounting standards (ASC 606) require revenue and direct incremental costs from pre-sales to be **deferred** and carried on the balance sheet until project opening, whereupon those deferred amounts are **recognized** on the income statement. This can create a disconnect between actual contract sales performance and GAAP income statement results

Internally, HGV operationally manages and measures business performance based on actual contract sales and **excludes the effects of such deferrals and recognitions** during the reporting periods

Financing: facilitates purchases and generates consistent, high margin fees

- Underwrite mortgage financing for contract sales generated by the Real Estate group
- Disciplined underwriting process with strong average FICO scores
- Growth of fee stream determined by growth of contract sales and propensity to borrow

Attractive net interest margin[1]

	Hilton GRAND VACATIONS
Weighted average interest rate earned	**15.0%**
- Weighted average interest rate paid	**5.4%**
= Net interest margin	**9.6%**
