

Power Integrations Launches Convenient Online Selection Tool for LED Driver Reference Designs

2/21/2012

SAN JOSE, Calif.--(BUSINESS WIRE)-- Power Integrations (Nasdaq: **POWI**), maker of the world's most efficient, longest-lasting off-line LED driver ICs, today launched an online selection tool that enables users to rapidly identify the best power supply reference design for their LED lighting application. The **LED Design Selector** allows engineers to enter simple selection criteria and provides the best choice from Power Integrations' library of reference design options for LED lighting.

Starting with basic decisions such as application and power level, the **LED Design Selector** enables users to quickly and easily see the filtered, optimized results. For example, the new **LED Design Selector** eliminates the laborious process of screening multiple designs while evaluating the effect of isolated vs. non-isolated topology or power range. After new data are entered, the best solutions are immediately displayed, enabling the designer to make a rapid and informed choice.

Comments Andrew Smith, product marketing manager for LED lighting applications at Power Integrations: "The **LED Design Selector** is ideal for lighting designers working to optimize their LED driver based on multiple electrical and physical design requirements. Using the new tool, engineers can quickly identify the best design approach and clearly understand the design trade-offs."

The **LED Design Selector** is available at <http://www.powerint.com/en/applications/led-driver-ics/led-design-selector>.

About Power Integrations

Power Integrations, Inc. is a Silicon Valley-based supplier of high-voltage integrated circuits and other high-voltage

components used in energy-efficient power conversion. The company's innovative technologies enable compact, reliable AC-DC power supplies for a vast range of electronic products including mobile devices, TVs, PCs, appliances, smart utility meters and LED lights. Since its introduction in 1998, Power Integrations' EcoSmart® energy-efficiency technology has prevented billions of dollars' worth of energy waste and millions of tons of carbon emissions. Reflecting the environmental benefits of the company's products, Power Integrations' stock is included in the NASDAQ® Clean Edge® Green Energy Index, The Cleantech Index®, and the Ardour Global IndexSM. For more information, including design-support tools and resources, please visit www.powerint.com; visit Power Integrations' **Green Room** for a comprehensive guide to energy-efficiency standards around the world.
