Diebold Nixdorf Builds Self-Service Checkouts and Kiosk Systems in the U.S.

2025-05-29

New retail technology production line in North Canton, Ohio helps ensure continuity and localized delivery for domestic customers

NORTH CANTON, Ohio, May 29, 2025 /PRNewswire/ -- Diebold Nixdorf (NYSE: DBD), a world leader in transforming the way people bank and shop, has recently extended its U.S.-based production capabilities by establishing a new retail technology line at its North America manufacturing facility in North Canton, Ohio.

Combined with the company's supply chain strategy, this in-house manufacturing approach provides quality, responsiveness and full customer focus for domestic Grocery, General Merchandise, Quick Service Restaurant (QSR) and Fuel & Convenience retailers. This enhancement is a result of Diebold Nixdorf's strategic approach to managing global supply chains and production to achieve greater control and predictability in its manufacturing processes.

Diebold Nixdorf is already building self-ordering kiosks for Tillster, its strategic software and distribution partner in the QSR space, in order to serve major customers, including multiple Top 20 QSR chains in the region.

Perse Faily, chief executive officer at Tillster, said: "Diebold Nixdorf's in-house manufacturing approach enables quick adaptation to customer demands, while the expanded U.S. manufacturing capabilities deliver more reliable supply chains, greater flexibility, and the certainty that we can execute large-scale rollouts seamlessly and on schedule."

The production range of the new retail line in North Canton also includes self-service checkout solutions like the modular **DN Series® EASY** family, enabling various deployment options based on a single platform concept and primarily deployed in the Grocery and General Merchandise industry verticals.

Ilhami Cantadurucu, executive vice president, Global Retail at Diebold Nixdorf, said: "We are delighted to manufacture for our U.S. customers within the country. Not only does this give us greater flexibility, the new production line has also come at exactly the right time, both with respect to our growth objectives in the region and the current macroeconomic environment. In combination with our strong services capabilities, the localization of our solutions delivery gives our North America-based customers additional confidence that they can rely on us to meet their needs."
