Diebold Nixdorf Celebrates 200,000 DN Series® ATM Shipment Milestone

2025-02-05

Company doubles number of shipments in less than 20 months

NORTH CANTON, Ohio, Feb. 5, 2025 /PRNewswire/ -- Diebold Nixdorf (NYSE: DBD), a world leader in transforming the way people bank and shop, recently celebrated the milestone of shipping more than 200,000 **DN Series® ATMs** from its global manufacturing plants. Diebold Nixdorf reached the 100,000-shipment milestone during the first quarter of 2023. Since then, shipments have doubled.

DN Series was designed for always-on availability and provides consumers with a more advanced and personalized banking experience. It was purpose-built as an IoT device for a data-driven service delivery model. DN Series features over 100 IoT-enabled data points that collect and send information to a cloud-based system, the **DN AllConnectSM Data Engine**, a key enabler of **DN AllConnect ServicesSM**. This helps identify a potential failure and trigger proactive services to mitigate future outages, guaranteeing market-leading availability.

The next-generation cash recycling engine in the DN Series provides a 40% reduction in out-of-service rates compared to prior generations of recyclers. In addition, these cash engines are equipped with versatile high-capacity cassettes, significantly reducing the need for cash-in-transit or branch staff interventions.

Jerome Amara, vice president of Core Banking Automation at Diebold Nixdorf, said: "Achieving this deployment milestone underscores our commitment to innovation and accessibility. We empower financial institutions by providing convenient solutions that enable consumers to bank how, when and where they choose."

Our team is committed to deploying advanced technologies worldwide for customers seeking the most integrated functionality within the industry's smallest and most secure footprint."
