

Diebold Nixdorf Unveils All-In-One Checkout Solutions Built With Green Technology And Designed For Improved Total Cost Of Ownership

September 9, 2020

DN Series™ BEETLE is a unified POS platform created to quickly adapt to a rapidly transforming retail industry

NORTH CANTON, Ohio, Sept. 9, 2020 /PRNewswire/ -- Diebold Nixdorf (NYSE:DBD) today unveiled the [DN Series™ BEETLE](#) product portfolio – empowering retailers to implement modular technology upgrades to meet their evolving checkout needs for years to come. The newly designed point-of-sale (POS) family, including the **BEETLE A1050 and A1150**, combines the advantages of an all-in-one and modular POS through a click-and-connect mechanism, adapting to different deployment scenarios and reducing the total cost of ownership.

DN Series BEETLE was developed with adaptability, green sustainability and a reduced footprint at its core. The checkout solution is designed for retailers of all types to maximize uptime and protect their investments into the future. It features a common hardware platform consisting of interchangeable central processing units, display panels and integrated peripherals that can be easily mixed and matched to satisfy a wide range of different deployment scenarios.

To demonstrate the company's commitment to sustainability, the systems are specifically designed around energy-saving technologies, including the powerful 8th Generation Intel® Core™ processor (Whiskey Lake-U), the energy-efficient power supply and solid state disk storage media and interfaces that reduce the overall power consumption. With a quiet, fan-less design and sealed housing with no moving parts, DN Series BEETLE has minimal risk of system failure, increasing overall store uptime. Over 90% of the materials used in the DN Series BEETLE can be recycled, making it an environmentally-friendly POS solution.

Hermann Wimmer, senior vice president, Global Retail, at Diebold Nixdorf said: "The DN Series BEETLE checkout solutions are unique in that they are all-in-one, yet still modular. Retailers can easily change configurations over time with our innovative click and connect mechanism, and simple technology upgrades protect previous investments. This next generation of checkout solutions also sets a new bar in green sustainability for the industry while adapting to store environments and business needs faster than ever before."
