Chesapeake Financial Shares, Inc. (CPKF - OTCQB)

CPKF: Accelerating Growth in Merchant Card and Lending Operations Propels EPS Gains

Current Recommendation	**Hold**
Prior Recommendation	Buy
Date of Last Change	01/09/2014
Current Price (12/18/15)	$17.30
Twelve-Month Target Price	**$17.75**

OUTLOOK

We are raising both our 2015 and 2016 diluted EPS estimates— to $1.70 from $1.60 in 2015 and to $1.80 from $1.65 in 2016, mainly to reflect stronger-than-expected revenue growth in the merchant card division (we have increased our estimates for merchant card revenues by an additional $0.3-0.4 million, on top of recent prior increases of $2.1 million in 2015 and $2.9 million in 2016). Our 2015 estimate excludes a $0.7 million aftertax gain ($0.18 per diluted share) on the retirement of the trust preferred securities during 2015's first quarter. We estimate that loan growth of 3% in 2015 and of 7% in 2016 (with 2016 up from our 4% estimate previously, mainly due to higher growth expectations for commercial real estate and cash management) will offset a declining net interest margin (down about 25 basis points to 4.35% in 2015 and an additional 5 basis points to 4.30% in 2016). Headwinds primarily reflect staff expansion and related compensation costs, as CPKF is building up operations. As a result, we project that compensation costs will rise about 7% in 2015 (up from our 2% estimate previously) and a further 8% in 2016 (up from our 7% estimate before). Despite these near-term expense pressures, we view these moves positively as CPKF is laying the groundwork for future loan growth in 2016 and beyond. CPKF recently increased the dividend 7%, and has increased its annual dividend payment every year for the past twenty-four years since 1991. In 2015 for the eighth consecutive year, Chesapeake Financial Shares, Inc. has been included in the American Banker magazine listing of the "Top 200 Community Banks" in the United States, ranking #34 out of about 6,000 community banks.

THIRD QUARTER

We are raising both our 2015 and 2016 diluted EPS estimates— to $1.70 from $1.60 in 2015 and to $1.80 from $1.65 in 2016, mainly to reflect stronger-than-expected revenue growth in the merchant card division (we have increased our estimates for merchant card revenues by an additional $0.3-0.4 million, on top of recent prior increases of $2.1 million in 2015 and $2.9 million in 2016). Our 2015 estimate excludes a $0.7 million aftertax gain ($0.18 per diluted share) on the retirement of the trust preferred securities during 2015's first quarter.

A few months ago, CPKF added a new high-volume merchant that processes several million dollars of card volume per month, following the recent hire of a new merchant card division head with extensive knowledge of the industry at Chesapeake Payment Systems, who wishes to further expand this business. More recently, CPKF approved three new independent sales organizations (ISOs), all of which will begin merchant card processing in 2016's first quarter. Thus, we expect a steady growth in this business throughout the year. Moreover, additional upside is possible in 2016 should CPKF add more merchants in 2016.

We estimate that loan growth of 3% in 2015 and of 7% in 2016 (with 2016 up from our 4% estimate previously, mainly due to higher growth expectations for commercial real estate and cash management) will offset a declining net interest margin (down about 25 basis points to 4.35% in 2015 and an additional 5 basis points to 4.30% in 2016). Moreover, the Company experienced $241,000 in net securities gains in 2015's first quarter as it sold roughly $3 million of municipal securities to reposition this portfolio to longer maturities to improve yields. This repositioning continued into the third quarter, generating an additional $215,000 in net securities gains. In total, this added $456,000 to net revenues in 2015, which will become a headwind in 2016.

Other headwinds primarily reflect staff expansion and related compensation costs. In 2015, CPKF is building up operations. The Company hired a new commercial lender in the Richmond, Virginia market; in October 2015 opened a loan production office in Chester, Virginia (for commercial loans); hired a new sales representative for the cash flow business in the first quarter; and opened a new branch in Richmond late in the third quarter in late September, which will entail the hiring of about four new employees (this is down from the eight new hires originally expected as four positions have been filled with internal transfers). As a result, we project that compensation costs will rise about 7% in 2015 (up from our 2% estimate previously) and a further 8% in 2016 (up from our 7% estimate before). Despite these near-term expense pressures, we view these moves positively as CPKF is laying the groundwork for future loan growth in 2016 and beyond.

To review, CPKF's third quarter net earnings rose $0.7 million year over year, or 81%, to $1.7 million, while 2015's third quarter diluted EPS grew by $0.17, or 79%, to $0.40 from $0.23 posted a year ago. Results in 2014 exclude a $1.1 million pretax gain on the redemption of trust preferred securities ($780,000 or $0.19 per share on an aftertax basis). (All per share data in this report have been adjusted for a 6-for-5 stock split, paid to shareholders in mid-October 2014.)

This was significantly better than our estimate, which had called for a $0.3 million increase in net earnings to $1.2 million (off by $0.5 million) and a $0.07 rise in diluted EPS to $0.30 (off by $0.10).

The primary reasons for the difference between reported results and our estimate was that net revenues were $0.8 million more than the $10.3 million we had anticipated, largely consisting of noninterest income that was $0.9 million higher than our projection as most line items came in better than expected, partly offset by net interest income that was $0.1 million lower than our estimate.

On the other hand, total noninterest expense of $9.1 million was $0.4 million more than we had projected, primarily reflecting compensation expense that was $0.4 million higher than anticipated.

The major reasons for the third quarter's $0.7 million gain in net earnings versus the prior-year quarter were a $1.9 million, or 54%, advance in noninterest income and a $0.1 million, or 92%, drop in the provision for loan losses, which were partly offset by a $0.1 million decrease in net interest income and a $1.1 million rise in total noninterest expense from greater compensation costs and merchant card expense.

CPKF opened a new branch in Richmond, Virginia in late September 2015 and in October 2015 opened a loan production office in Chester, Virginia (for commercial loans), as part of its long-term strategy emphasizing planned thoughtful expansion.These two locations will house all of CPKF's Richmond area associates, from loan production to banking to wealth management.

On July 17, 2015, CPKF's Board of Directors approved a 6.7% increase in the quarterly dividend to $0.12 from $0.1125, paid on September 15, 2015 to shareholders of record on September 1, 2015. Notably, CPKF has increased the annual dividend payment every year for the past twenty-four years since 1991.

This feat was recently recognized by SNL Financial in a report that cited CPKF as one of only 20 banks in the country (and only two in Virginia) to increase dividends by at least 2% per year and at least a cumulative 30% over the past five years. The company recorded cumulative dividend growth of 51.1% over the 2008-2013 period.

In 2015 for the eighth consecutive year, Chesapeake Financial Shares, Inc. has been included in the American Banker magazine (formerly US Banker magazine) listing of the "Top 200 Community Banks" in the United States. The bank ranked at #34 in the nation out of approximately 6,000 community banks in the study, up from #148, when CPKF first broke into the rankings in 2008. The ranking is based on a three-year average of return on average equity (ROAE), which for CPKF was12.64%.

Below, we discuss third quarter results more fully. Our projections are shown at the back of the report.

Net Interest Income

Net interest income fell $0.1 million, or 1%, year over year in the third quarter to $5.8 million ($0.1 million below our $5.9 million estimate), as a 4% increase in average interest-earning assets was partly offset by a 4.33% net interest margin that was 22 basis points lower than the 4.55% earned in the year-ago quarter. The net interest margin rose 1 basis points from 4.32% in the second quarter, and was 2 basis points below our 4.35% estimate.

We are maintaining our NIM estimates at 4.35% for 2015 and at 4.30% for 2016.This compares to a 4.60% NIM in both 2014 and 2013. The decreases reflect the fact that competitive pricing pressures continue to be somewhat fierce. We note that CPKF's balance sheet was slightly asset sensitive at the end of the third quarter, which will likely expand the net interest margin in a rising interest-rate environment.

Noninterest Income

Noninterest income increased $1.9 million, or 54%, year over year to $5.3 million due to higher merchant card income (up $1.0 million), securities gains net of OREO expense (up $0.5 million), other income (up $0.3 million), and cash flow income (up $0.1 million). A few months ago, CPKF added a new high-volume merchant that processes several million dollars of card volume per month, following the recent hire of a new merchant card division head with extensive knowledge of the industry at Chesapeake Payment Systems, who wishes to further expand this business. More recently, CPKF approved three new independent sales organizations (ISOs), all of which will begin merchant card processing in 2016's first quarter. Thus, we expect a steady growth in this business throughout the year.

We have increased our estimates for merchant card revenues by an additional $0.3-0.4 million, on top of recent prior increases of $2.1 million in 2015 and $2.9 million in 2016. Moreover, additional upside is possible in 2016 should CPKF add more merchants in 2016.

This largely accounts for the gains in our projections of noninterest income of $1.3 million to $19.0 million in 2015 (up from our prior estimate of $17.7 million) and of $1.0 million in 2016 to $19.9 million (an increase from our previous estimate of $18.9 million).

Loss Provision

The loan loss provision declined by $138,000 to $12,000 from $150,000 in the year-ago quarter and was lower than our $72,000 estimate. Loan loss reserves fell $0.6 million to $5.6 million (1.42% of loans) compared with the third quarter (1.57% of loans), and were $1.0 million below the $6.6 million (1.68% of loans) in the year-ago quarter.

Including the loss allowance for cash flow receivables, the total loan loss allowance fell to $6.6 million (1.59% of loans plus cash flow receivables) from $7.7 million (1.89% of loans plus cash flow receivables) at the end of the comparable year-ago quarter and, and was down from the $7.1 million (1.72% of loans plus cash flow receivables)at the end of the previous quarter.

As to other asset quality measures, CPKF recorded net charge-offs of $589,000 in the third quarter. This compares to net charge-offs of $50,000 in the year-ago quarter and net charge-offs of $445,000 for the full year in 2014.

We are estimating that the loss provision will drop sharply to $0.2 million in 2015 from $0.6 million in 2014, and will rise to $0.3 million in 2016.

We project that the total loss allowance will fall from 1.88% of total loans plus receivables at the end of 2014 to 1.57% at yearend 2015 and to 1.44% by the end of 2016.

Noninterest Expense

Noninterest expense advanced $1.1 million, or 14%, to $9.1 million ($0.4 million more than the $8.7 million we had projected) from the prior-year quarter, largely reflecting greater compensation costs (up $0.5 million) and merchant card expense (up $0.7 million).

The efficiency ratio improved modestly, falling to 83.2% from 84.6% in the year-ago quarter, but deteriorated from the second quarter's 75.0%.

We project that compensation costs will rise about 7% in 2015 (up from our 2% estimate previously) and a further 8% in 2016 (up from our 7% estimate before). Despite these near-term expense pressures, we view these moves positively as CPKF is laying the groundwork for future loan growth in 2016 and beyond

Our estimates of noncompensation costs are relatively unchanged at $18.0 million in 2015 and $18.2 million in 2016.

In total, we believe that the efficiency ratio will weaken slightly, rising from 80.5% for 2014 to an estimated 80.8% in 2015 (our prior estimate was 80.3%) before improving to 79.3% in 2016 (our prior estimate was 79.7%).

Income Taxes

The Company had an effective tax rate of 16.7% in the third quarter, compared to a tax rate of 23.8% in the prior-year quarter and our 20.0% effective tax rate estimate.

We are decreasing our estimate of the effective tax rate in 2015 to 18.7% from 19.5% and projecting a 19.0% tax rate for 2016. This compares to a full-year effective tax rate of 12.7% in 2014.

Net Income

CPKF's third quarter net earnings rose $0.7 million year over year, or 81%, to $1.7 million, while 2015's third quarter diluted EPS grew by $0.17, or 79%, to $0.40 from $0.23 posted a year ago. Results in 2014 exclude a $1.1 million pretax gain on the redemption of trust preferred securities ($780,000 or $0.19 per

share on an aftertax basis). (All per share data in this report have been adjusted for a 6-for-5 stock split, paid to shareholders in mid-October 2014.) This was significantly better than our estimate, which had called for a $0.3 million increase in net earnings to $1.2 million (off by $0.5 million) and a $0.07 rise in diluted EPS to $0.30 (off by $0.10).

Profitability

CPKF posted a 9.0% ROE and 0.99% ROA for the third quarter of 2015, compared to 5.4% and 0.55%, respectively, in the prior-year quarter.

Loans and Asset Quality

Gross loans increased $5 million, or about 1%, year over year, and about $2 million, or ½%, sequentially to $395 million.

By category, construction and land development loans jumped $5.7 million, or 14% to $46 million; cash management receivables surged $2.7 million, or 13%, to $24 million; other loans rose $1.4 million, or 10%, to $16 million; commercial real estate increased $5.4 million, or 4%, to $147 million; and 1-4 family loans rose $1.0 million, or 1%, to $107 million.

On the negative side, commercial and industrial loans decreased $11.1 million, or 14%, to $70 million and consumer loans fell $0.5 million, or 5%, to $9 million

We estimate that loan growth of 3% in 2015 and of 7% in 2016, with 2016 up from our 4% estimate previously, mainly due to higher growth expectations for commercial real estate and cash management. This compares to actual growth of 2.3% in full-year 2014.

Asset quality measures improved in the third quarter, as CPKF continues to receive pay downs on one large problem credit and expects to be completely out of this credit by the end of the first quarter 2016. Nonaccrual loans fell by $2.5 million, or 20%, to $8.8 million, while restructured loans increased by $0.2 million, or 6% to $3.6 million and other real estate owned decreased by $23,000, or 1%, to $2.1 million.

In total, nonperforming assets (NPAs), including troubled debt restructurings that are current in payments, fell 52 basis points to 3.43% of outstandings + OREO at September 30, 2015 from 3.95% of outstandings + OREO at June 30, 2015, and decreased 47 basis points year over year from 3.90%.

The loss allowance as a percent of nonperforming assets increased sequentially to 39% from 38%, reflecting the decrease in nonperforming assets, partly offset by a decline in the loss reserve for loans and cash flow receivables.

Liquidity and Funding

Cash and equivalents decreased $5 million to $20 million sequentially, while the securities portfolio fell $1 million to $187 million. By category, the municipal securities portfolio was flat at $121 million, the US government-related securities was stable at $31 million, and the private-label mortgage securities portfolio fell $1 million to $35 million.

On a relative basis, the private-label mortgage securities portfolio was 19% of the entire available-for-sale securities portfolio, US government-related securities were 16%, and the municipal securities portfolio was 65%.

CPKF’s liquidity ratios deteriorated compared to the previous quarter, reflecting the decrease in cash and equivalents and the securities portfolio. At September 30, 2015, liquid assets represented 8% of total assets (flat with the end of the second quarter) and covered purchased funds by 65% (down from 66%), while loans plus receivables accounted for 63% of total assets (up from 62% at June 30, 2015).

Core deposits grew by $4 million, or 1%, sequentially to $490 million and funded 117% of loans and receivables.

Capital Adequacy and Dividends

The Company's capital adequacy ratios increased 8 basis points during the quarter, with the Tier 1 capital ratio rising sequentially to 14.23% at the end of 2015's third quarter from 14.15% at June 30, 2015, and the Total capital ratio also increasing to 15.48% from 15.40%.

Total shareholders' equity increased $1.7 million during the third quarter, largely due to a $1.0 million increase in retained earnings and a $0.6 million increase in unrealized gains on securities available for sale.

Reflecting these factors plus a 10,000 decrease in common shares outstanding, tangible book value per share rose during the third quarter, by $0.46 per share to $18.61 from $18.15. The total equity to total assets ratio also improved due to the gain in total common shareholders' equity, increasing by 24 basis points to 11.21% from 10.97%.

OVERVIEW

Chesapeake Financial Shares, Inc. (CPKF or the Company) is a financial holding company headquartered in Kilmarnock, Virginia, with $666 million in total assets at September 30, 2015. CPKF is predominantly a small business lender with 13 branch offices and one loan production office that serve customers in the eastern region of Virginia between the Potomac and James Rivers. CPKF, which began as Lancaster National Bank on April 13, 1900, has a long history and strong ties with the communities it serves.

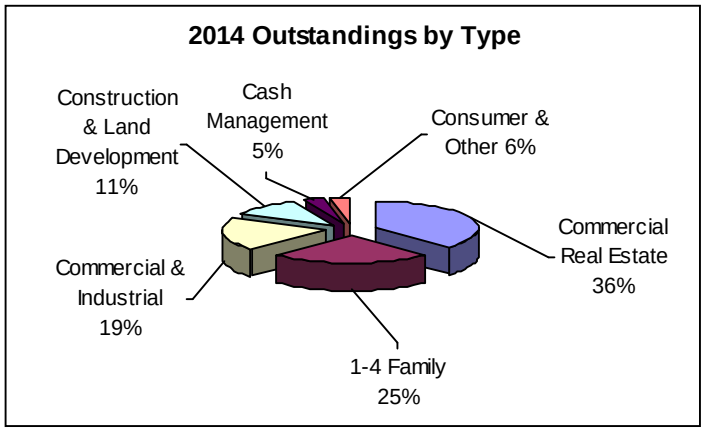

Operations are carried on through Chesapeake Bank, a state-chartered bank as well as Federal Reserve and FDIC member bank, and Chesapeake Investment Group, Inc. (CIG), an independent wealth management firm that manages about $356 million in assets (at 2014 yearend) through its subsidiaries involved in asset management (CIG is a registered investment adviser), brokerage, and trust services. Other activities of the Company include Chesapeake Payment Systems, Cash Flow program, Clear Sky accounts, and its secondary market mortgage banking operation.

Chesapeake Payment Systems offers merchant processing services such as credit card and debit card processing, electronic benefits transfers, and loyalty and gift card processing to companies involved in travel, entertainment, restaurant, hospitality, retail, mail order, and e-commerce. At yearend 2014, Chesapeake Payment Systems had 535 merchants in its system and processed over $129 million in merchant card transactions. In addition, Chesapeake Payment Systems has also partnered with three independent sales organizations (ISOs) to expand its processing footprint.

The Cash Flow program, which provides an attractive financing option to growing businesses, involves the purchase of the client company's accounts receivables. The Cash Flow program is currently offered in the Eastern half of the United States and had 77 customers at the end of 2014.

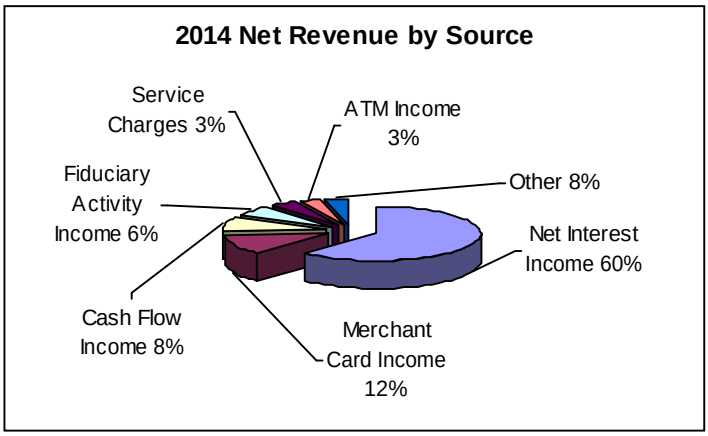

Clear Sky accounts, which offer internet-based retail deposit services for checking and saving accounts and certificates of deposit (CDs), expands CPKF's retail deposit base geographically. At December 31, 2014, Clear Sky deposits totalled $30 million, with customers in all 50 states.

Through Chesapeake's secondary market mortgage banking operation, the Company services a $219 million loan portfolio (as of December 31, 2014) of residential mortgage loans for Federal Home Loan Mortgage Corporation (FHLMC or Freddie Mac), for which it earns a 25 basis-point fee (approximately $560,000 annually) on the outstanding loan portfolio balance. Additionally, CPKF earns a pare-off fee for residential mortgage loans that are originated and closed with FHLMC, which added $272,000 to revenues in 2014 (both types of fees are included in other noninterest income in the Company's financial statements).

The lending portfolio is dominated by real estate loans, as shown in the chart at left. At December 31, 2014, the lending book consisted of commercial real estate (accounting for 36% of total gross outstandings), 1-4 family (25%), commercial and industrial (19%), construction and land development (11%), cash flow (5%), and consumer and other (6%). A majority of loans are secured, usually by real estate, inventory, accounts receivable, equipment, machinery, or corporate assets.

At December 31, 2014, the liquidity portfolio, which consists of cash, short-term investments, federal funds sold, and US agency mortgage obligations, represented about 9% of total assets and 19% of the securities portfolio. In addition, the available-for-sale portfolio includes municipal and private label mortgage securities, which accounted for 64% and 17%, respectively, of the total. Core deposits represented 85% of total deposits at December 31, 2014, with certificates of deposit larger than $100,000 at 15%.

In 2014, net interest income contributed 60% of net revenue, with a significant 40% coming from noninterest income sources. Major contributors to noninterest income include merchant card income (12% of net revenues), cash flow income (8%), income from fiduciary activities (6%), service charges on deposit accounts (3%), and ATM income (3%).

VALUATION

CPKF stock is up 11.9% year to date, better than the 10.2% median gain for the small-cap bank industry, as well as the 2.6% price decline for the S&P 500, as shown in the following table.

At its current price, CPKF is trading at a discount to the industry median P/E of 12% in 2016, based upon our current CPKF EPS estimate for 2016. This is above the average 35% P/E discount for CPKF, based upon recent historical P/E averages. Applying the historical discount of 35% to our 2016 EPS estimate results in a price of about $12.75.

Turning to Price/Tangible Book Value, CPKF is valued at 0.94X versus the industry median of 1.30X. This represents a 28% discount, well below the average historical premium of 15% for CPKF since mid-2008. Applying the historical premium of 15% to our estimated book value for CPKF twelve months out results in a price of approximately $22.75.

While we recognize that CPKF is still undervalued particularly on a book value basis (CPKF's current book value is $18.61), we believe that there is no immediate catalyst to drive the stock price higher over the near term.

Accordingly, we have chosen the $17.75 midpoint of the wide range of values based upon CPKF's 2016 P/E of $12.75 and Price/Tangible Book Value of $22.75 as our new target price.

HISTORICAL ZACKS RECOMMENDATIONS

DISCLOSURES

The following disclosures relate to relationships between Zacks Small-Cap Research ("Zacks SCR"), a division of Zacks Investment Research ("ZIR"), and the issuers covered by the Zacks SCR Analysts in the Small-Cap Universe.

ANALYST DISCLOSURES

I, Ann H. Heffron, CFA, CPA, hereby certify that the view expressed in this research report accurately reflect my personal views about the subject securities and issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the recommendations or views expressed in this research report. I believe the information used for the creation of this report has been obtained from sources I considered to be reliable, but I can neither guarantee nor represent the completeness or accuracy of the information herewith. Such information and the opinions expressed are subject to change without notice.

INVESMENT BANKING, REFERRALS, AND FEES FOR SERVICE

Zacks SCR does not provide nor has received compensation for investment banking services on the securities covered in this report. Zacks SCR does not expect to receive compensation for investment banking services on the Small-Cap Universe. Zacks SCR may seek to provide referrals for a fee to investment banks. Zacks & Co., a separate legal entity from ZIR, is, among others, one of these investment banks. Referrals may include securities and issuers noted in this report. Zacks & Co. may have paid referral fees to Zacks SCR related to some of the securities and issuers noted in this report. From time to time, Zacks SCR pays investment banks, including Zacks & Co., a referral fee for research coverage.

Zacks SCR has received compensation for non-investment banking services on the Small-Cap Universe, and expects to receive additional compensation for non-investment banking services on the Small-Cap Universe, paid by issuers of securities covered by Zacks SCR Analysts. Non-investment banking services include investor relations services and software, financial database analysis, advertising services, brokerage services, advisory services, equity research, investment management, non-deal road shows, and attendance fees for conferences sponsored or co-sponsored by Zacks SCR. The fees for these services vary on a per client basis and are subject to the number of services contracted. Fees typically range between ten thousand and fifty thousand USD per annum.

POLICY DISCLOSURES

Zacks SCR Analysts are restricted from holding or trading securities placed on the ZIR, SCR, or Zacks & Co. restricted list, which may include issuers in the Small-Cap Universe. ZIR and Zacks SCR do not make a market in any security nor do they act as dealers in securities. Each Zacks SCR Analyst has full discretion on the rating and price target based on his or her own due diligence. Analysts are paid in part based on

the overall profitability of Zacks SCR. Such profitability is derived from a variety of sources and includes payments received from issuers of securities covered by Zacks SCR for services described above. No part of analyst compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in any report or article.

ADDITIONAL INFORMATION

Additional information is available upon request. Zacks SCR reports are based on data obtained from sources we believe to be reliable, but are not guaranteed as to be accurate nor do we purport to be complete. Because of individual objectives, this report should not be construed as advice designed to meet the particular investment needs of any investor. Any opinions expressed by Zacks SCR Analysts are subject to change without notice. Reports are not to be construed as an offer or solicitation of an offer to buy or sell the securities herein mentioned.

ZACKS RATING & RECOMMENDATION

ZIR uses the following rating system for the 1216 companies whose securities it covers, including securities covered by Zacks SCR:
Buy/Outperform: The analyst expects that the subject company will outperform the broader U.S. equity market over the next one to two quarters.
Hold/Neutral: The analyst expects that the company will perform in line with the broader U.S. equity market over the next one to two quarters.
Sell/Underperform: The analyst expects the company will underperform the broader U.S. Equity market over the next one to two quarters.

The current distribution is as follows: Buy/Outperform- 25.3%, Hold/Neutral- 56.9%, Sell/Underperform – 13.7%. Data is as of midnight on the business day immediately prior to this publication.
