CryoPort Inc (CYRX-OTCQB)

CYRX: Operational Update. Shares Have More Room to Run

Current Recommendation	**Buy**
Prior Recommendation	Neutral
Date of Last Change	08/20/2013
Current Price (05/06/15)	$0.65
Target Price	**$1.50**

OUTLOOK

Following a change in management and additions to the Board, CYRX recently revamped their offerings from a one-sized fits all approach to a more tailored, yet sill comprehensive and turn-key solution to appeal to a broader and more diverse set of customers. With thirteen straight quarters of revenue growth, a recent doubling of the customer base, and consummation of key relationships, these changes are clearly already paying dividends. We expect this record revenue steak to continue. While the company will need to raise additional capital in the near term, we feel that the recent changes, substantial operational progress and improvement in financial results is helping to de-risk an investment in CYRX. We are maintaining our Buy rating.

WHAT'S NEW....

Operational Update: CYRX Brings on Several New Accounts, Expands Services and Enters New Territories…

Activities at CYRX have heated up even more over the last few months and have included consummation of new customer relationships, expansion of others, the introduction of new services and products and entry into at least one new geographical territory. Interest in CYRX's services continues to come from several segments including in-vitro fertilization, cell-based therapies and animal husbandry, areas where CYRX has recently seen increasing demand for their cryogenic shipping solution.

And in addition to growth in customer segmentation, CYRX is also seeing increasing demand for its various service offerings – from logistics to containers to its full turnkey solution. This broadening in both the types of customers that are increasingly showing interest coupled with demand across their menu of offerings is highly encouraging. It also further demonstrates that the company's recent shift from a one-size-fits all approach focused on only a select end-user profile to more of an ala-carte services and product menu appropriate for a much broader customer base is paying significant dividends.

New or expanded relationships that have been recently entered into include:

- Expanded relationship with Sanaria, a biotech focused on the development and production of malaria vaccines. CryoPort is working with Sanaria to provide cold-chain shipping of its vaccines for clinical trials as well as for clinical use in Africa. Vaccines must be kept at specific temperatures in order to maintain their integrity. CYRX's shipping solution provides unparalleled durability, holding time and temperature maintenance, which are all critical for shipping vaccines internationally and particularly to remote parts of Africa with harsh conditions and where Malaria is most problematic
- Kite Pharma (NASDAQ: KITE), a $2.5B biopharma developing novel cancer therapies, will use CYRX's cryogenic shipping and logistics for clinical trials of its lead candidate, KTE-C19, a CAR-T cell therapy for non-Hodgkin's lymphoma
- CYRX expanded their relationship with Fred Hutchinson Cancer Research Center whereby the company will now support more of the cancer center's labs. CYRX is specifically involved in Fred Hutch's research on cord blood transplants and trials for cell-based therapies
- CombiMatrix (NASDAQ: CBMX), a molecular diagnostics company focused on prenatal and postnatal genetic testing, entered into an agreement for CYRX to provide logistics support for distribution of its recently launched IVF genetic test, CombiPGS. CombiPGS targets physicians and will be used prior to implantation to assess the embryos for chromosomal abnormalities.
  As noted, CYRX has made a strong and dedicated move towards the opportunities in in-vitro fertilization. This relationship with CBMX, as well as their recent entry into Nepal with a focus on IVF, are their most recent efforts in this space. We continue to view IVF as holding potential to become a significant driver of demand for CYRX's cryogenic shipping and logistics.
- Roslin Cells, a major U.K.-based developer of cell therapies, chose CYRX to provide logistics for its pluripotent stem cell reprogramming service
- CYRX will be providing logistics support for Capricor's multi-site clinical trials for its lead candidate CAP-1002, being developed for treatment of cardiovascular disease
- Yancey Farms, (per the company's website) "one of the oldest and most respected warmblood breeders in the United States", chose CYRX to ship equine semen for artificial insemination of top German sport horse stallions. Judy Yancey, the founder of the Farm, was the first person to import and market frozen horse semen in North America – which we think provides credibility to the trustworthiness they place in CYRX shipping capabilities.
  And anecdotally, we see this as a vote of confidence in CYRX's capabilities and the quality of their shipping and logistics. Maintaining the integrity and safety of prized and expensive stud horse semen is important and provides piece of mind and assurance that the sample has not been compromised in any way.
  In March CYRX announced introduction of "Vet Secure" a tamper-proof lock on its shippers which international shipping regulations require for shipment of animal husbandry products (such as horse semen)
- CYRX will be supporting NeoStem's (NASDAQ: NBS) late stage clinical trial for its lead cancer candidate, NBS20, which is being developed for the treatment of metastatic melanoma. The NBS20 program has been granted FDA Fast Track status and Orphan Drug designation

In addition to these new and expanded customer relationships, CYRX has made recent headway elsewhere as well. This includes the recent entry into Nepal to support the burgeoning demand for IVF services in that country which is coming from both the Nepalese population as well as from medical tourism.

The company also recently launched a new services offering. In February the company announced the introduction of services to aid in the relocation of facilities used for cryogenic sample collections. CYRX, which will leverage their logistics capabilities, expertise and shipping resources, has already been engaged by a "leading research laboratory and IVF clinic" to provide relocation assistance.

Maintaining Buy Recommendation, $1.50/Share Price Target

Per our methodology below, we see fair value at approximately $1.50/share and are maintaining our Buy recommendation. While the shares have rallied since early this year we still think there is still significant upside and believe the current market price still offers an attractive entry point.

We will issue our next update with CYRX's 10-K filing, expected in the coming weeks.

VALUATION / RECOMMENDATION

Revenue has now posted positive growth thirteen straight quarters on a yoy basis and eight of nine of the last nine quarters on a sequential basis. Gross margin has solidified and will expand – likely substantially so – with higher levels of revenue. Operating expenses have leveled off and we are now seeing much more leverage as the top line continues to grow. On the Q3 call management provided revenue guidance for the first time. They look for 2016 revenue between $10M and $12M, implying growth of ~150% - 200% from our 2015 estimate.

Dis-aggregating their service offerings from a one-size fits all approach to a more customer-centric and customized solution we think has been key with scoring new customers. We attribute the expected ramp in revenue to applying this customer-centric service offering to high-potential growth areas. Management has done an impressive job in identifying new opportunities in the cryogenic shipping space, particularly on the product side where accelerated development of novel biologic therapies and a related increase in clinical programs has created a tailwind for demand of reliable cryogenic shipping.

The company recently beefed up their sales force in order to capitalize on these emerging opportunities. The current base of business should provide a floor on revenue while shipping volume growth from the existing customer portfolio and new customer wins bode well in our opinion for ramping revenue – not just through 2016 but well beyond. With the global cryogenic shipping market aggregating to almost $2B annually and much of this serviced by antiquated and relatively unreliable dry ice containers, we see significant opportunity for CryoPort to take share and steepen the revenue curve.

We look for revenue of $4.0 million in fiscal 2015 and for this to grow to about $57 million in the year 2018.

We continue to value the company based on an industry P/E multiple (currently 18x) and discount this back to the present at 15% / year. We look for EPS of $0.12 in 2018 - based our valuation methodology, this values the stock at approximately $1.50 / share. We remain steadfast believers in CryoPort's potential and think there's significant upside to the share price, particularly over the longer-term. We are maintaining our Buy rating.

DISCLOSURES

The following disclosures relate to relationships between Zacks Small-Cap Research ("Zacks SCR"), a division of Zacks Investment Research ("ZIR"), and the issuers covered by the Zacks SCR Analysts in the Small-Cap Universe.

ANALYST DISCLOSURES

I, Brian Marckx, CFA, CFA, hereby certify that the view expressed in this research report accurately reflect my personal views about the subject securities and issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the recommendations or views expressed in this research report. I believe the information used for the creation of this report has been obtained from sources I considered to be reliable, but I can neither guarantee nor represent the completeness or accuracy of the information herewith. Such information and the opinions expressed are subject to change without notice.

INVESMENT BANKING, REFERRALS, AND FEES FOR SERVICE

Zacks SCR does not provide nor has received compensation for investment banking services on the securities covered in this report. Zacks SCR does not expect to receive compensation for investment banking services on the Small-Cap Universe. Zacks SCR may seek to provide referrals for a fee to investment banks. Zacks & Co., a separate legal entity from ZIR, is, among others, one of these investment banks. Referrals may include securities and issuers noted in this report. Zacks & Co. may have paid referral fees to Zacks SCR related to some of the securities and issuers noted in this report. From time to time, Zacks SCR pays investment banks, including Zacks & Co., a referral fee for research coverage.

Zacks SCR has received compensation for non-investment banking services on the Small-Cap Universe, and expects to receive additional compensation for non-investment banking services on the Small-Cap Universe, paid by issuers of securities covered by Zacks SCR Analysts. Non-investment banking services include investor relations services and software, financial database analysis, advertising services, brokerage services, advisory services, equity research, investment management, non-deal road shows, and attendance fees for conferences sponsored or co-sponsored by Zacks SCR. The fees for these services vary on a per client basis and are subject to the number of services contracted. Fees typically range between ten thousand and fifty thousand USD per annum.

POLICY DISCLOSURES

Zacks SCR Analysts are restricted from holding or trading securities placed on the ZIR, SCR, or Zacks & Co. restricted list, which may include issuers in the Small-Cap Universe. ZIR and Zacks SCR do not make a market in any security nor do they act as dealers in securities. Each Zacks SCR Analyst has full discretion on the rating and price target based on his or her own due diligence. Analysts are paid in part based on the overall profitability of Zacks SCR. Such profitability is derived from a variety of sources and includes payments received from issuers of securities covered by Zacks SCR for services described above. No part of analyst compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in any report or article.

ADDITIONAL INFORMATION

Additional information is available upon request. Zacks SCR reports are based on data obtained from sources we believe to be reliable, but are not guaranteed as to be accurate nor do we purport to be complete. Because of individual objectives, this report should not be construed as advice designed to meet the particular investment needs of any investor. Any opinions expressed by Zacks SCR Analysts are subject to change without notice. Reports are not to be construed as an offer or solicitation of an offer to buy or sell the securities herein mentioned.

ZACKS RATING & RECOMMENDATION

ZIR uses the following rating system for the 1111 companies whose securities it covers, including securities covered by Zacks SCR:
Buy/Outperform: The analyst expects that the subject company will outperform the broader U.S. equity market over the next one to two quarters.
Hold/Neutral: The analyst expects that the company will perform in line with the broader U.S. equity market over the next one to two quarters.
Sell/Underperform: The analyst expects the company will underperform the broader U.S. Equity market over the next one to two quarters.

The current distribution is as follows: Buy/Outperform- 24.7%, Hold/Neutral- 57.5%, Sell/Underperform – 15.7%. Data is as of midnight on the business day immediately prior to this publication.
