Virios Therapeutics, Inc.

(VIRI-NASDAQ)

VIRI: Anticipating Update on IMC-1 Following 'End-of-Phase 2' Meeting with FDA…

Based on our probability adjusted DCF model that takes into account potential future revenues of IMC-1, VIRI is valued at $2.00/share. This model is highly dependent upon continued clinical success of IMC-1 and will be adjusted accordingly based on future clinical results.

Current Price (03/16/23)	$0.30
Valuation	**$2.00**

OUTLOOK

On March 14, 2023 Virios Therapeutics, Inc. (VIRI) announced financial results for the fourth quarter and full year 2022 and provided a business update. Following an extensive analysis of the data generated from the Phase 2b FORTRESS trial, Virios believes that targeting fibromyalgia (FM) patients that have not previously participated in previous FM trial is the optimal approach as it continues the advancement of IMC-1. We anticipate the company conducting an 'End-of-Phase 2' meeting with the FDA in March 2023 to discuss the regulatory pathway for IMC-1. The company will provide a corporate update following receipt of the meeting minutes, which should be approximately 30 days after meeting with the FDA.

The Bateman Horne Center is currently conducting an exploratory clinical trial of IMC-2 (combination of valacyclovir and celecoxib) in patients with Long COVID. Patient enrollment was recently completed and we anticipate topline results in mid-2023.

WHAT'S NEW

Financial Update

On March 14, 2023, Virios Therapeutics, Inc. (VIRI) announced financial results for the fourth quarter and full year 2022. As expected, the company did not report any revenues for the fourth quarter or full year 2022. R&D expenses for the three months ending December 31, 2022 were $1.3 million compared to $2.9 million for the fourth quarter of 2021. The decrease was primarily due to decreased clinical trial expenses for the FORTRESS study. G&A expenses for the fourth quarter of 2022 were $0.8 million compared to $1.3 million for the fourth quarter of 2021. The decrease was primarily due to a reduction in salaries and personnel costs, legal fees, and costs of being a public company.

For 2022, R&D expenses were $8.1 million, compared to $10.8 million for 2021. The decrease was primarily due to reduced expenses for the FORTRESS clinical trial, a decrease in expenses related to the chronic toxicology program, and a decrease in drug development and manufacturing costs. G&A expenses for 2022 were $4.2 million compared to $4.8 million in 2021. The decrease was primarily due to a reduction in salaries and personnel costs, decreased accounting and legal fees, and decreased costs of being a public company.

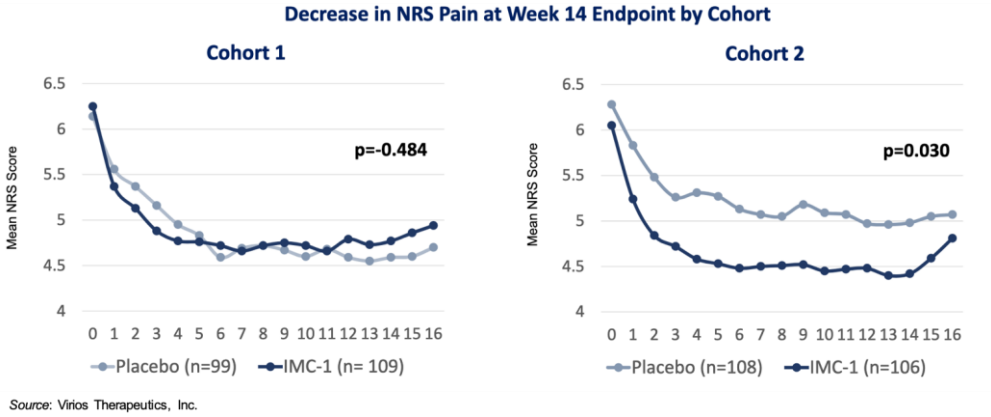

As of December 31, 2022, Virios had approximately $7.0 million in cash and cash equivalents. We estimate the company has sufficient capital to fund operations through mid-2024. As of March 10, 2023, Virios had approximately 18.3 million common shares outstanding and, when factoring in stock options and warrants, a fully diluted share count of approximately 20.9 million.

Business Update

Post-Hoc Analysis of Phase 2b FORTRESS Trial Shows Naïve Patients Responded to IMC-1 Treatment

In September, 2022, Virios announced topline results for the Phase 2b FORTRESS (Fibromyalgia Outcome Research Trial Evaluating Synergistic Suppression of Herpes Simplex Virus-1) trial of IMC-1 for the treatment of fibromyalgia (FM). The FORTRESS trial was a randomized double blind, placebo controlled study of IMC-1. The primary endpoint of the trial was reduction in pain and secondary endpoints included change in fatigue, sleep disturbance, global health status, and patient functionality (NCT04748705). Please see our previous report for a full discussion of the topline results.

Since that time, the company has undertaken a full analysis of the trial results to better understand what may have influenced the final outcome. The initial analysis of the data showed that for patients recruited in the first half of the study (Cohort 1: May 2021 – October 2021), there was a very high placebo response rate. This is in contrast to patients recruited in the second half of the trial (Cohort 2: November 2021 – April 2022), in which the placebo response rate was consistent with prior FM trials. In a post-hoc analysis, the patients recruited from November 2021 – April 2022 demonstrated a statistically and clinically significant improvement in the primary outcome of reduction in pain, which the company believes is unlikely related to chance. This is shown in the following image.

Source: Virios Therapeutics, Inc.

A deeper look at the data showed that "new" patients (recruited into the FORTRESS study via advertising) showed a statistically significant reduction in the primary endpoint, fatigue, anxiety and depressive symptoms, and an overall improvement in their global health status, regardless of when they were enrolled into the study. This is in contrast to "experienced" FM patients who had experience in previous clinical trials and treatment for FM, who did not exhibit any meaningful treatment benefits. The following table shows the primary endpoint of reduction in pain for "new" vs. "experienced" patients.

New vs Existing Patients	N	Placebo Change from Baseline @ Week 14	IMC-1 Change from Baseline @ Week 14	Contrast @ Week 14	P Value
Existing	247	-1.843	-1.594	+0.249	***
Advertising/ New	175	-1.024	-1.689	-0.665	0.016

Source: Virios Therapeutics, Inc.

Interestingly, approximately 70% of patients recruited during the first half of the FORTRESS trial (May 2021 – October 2021) were "experienced" patients. This may help to explain why there was no statistically significant treatment effect for the patients recruited during the first half of the trial, as the "experienced" patients may represent a more treatment refractory population.

With this information in hand, the company has decided that the Phase 3 program will focus on the "new" patient population, with those individuals typically recruited to the trial through advertising. In addition, the company found that dedicated clinical research sites delivered more consistent results, including better placebo response management, as opposed to clinical practice sites, thus the Phase 3 program will focus on dedicated research sites.

Importantly, the safety and tolerability of IMC-1 was better in the FORTRESS trial than in the previous Phase 2a trial, with fewer than 5% of IMC-1-treated patients withdrawing from the study due to adverse events compared to 8.1% withdrawing due to adverse events in the placebo group.

Virios will be conducting an "End-of-Phase 2" meeting with the FDA to discuss its proposed Phase 3 program in March 2023. Following receipt of the meeting minutes, which typically occurs approximately 30 days following the meeting, we anticipate a full update from the company regarding its plans for the Phase 3 program, however at this point we believe it will consist of two, large Phase 3 studies, at least one of which will include a celecoxib-only treatment group in addition to the IMC-1 and placebo treatment groups.

Conclusion

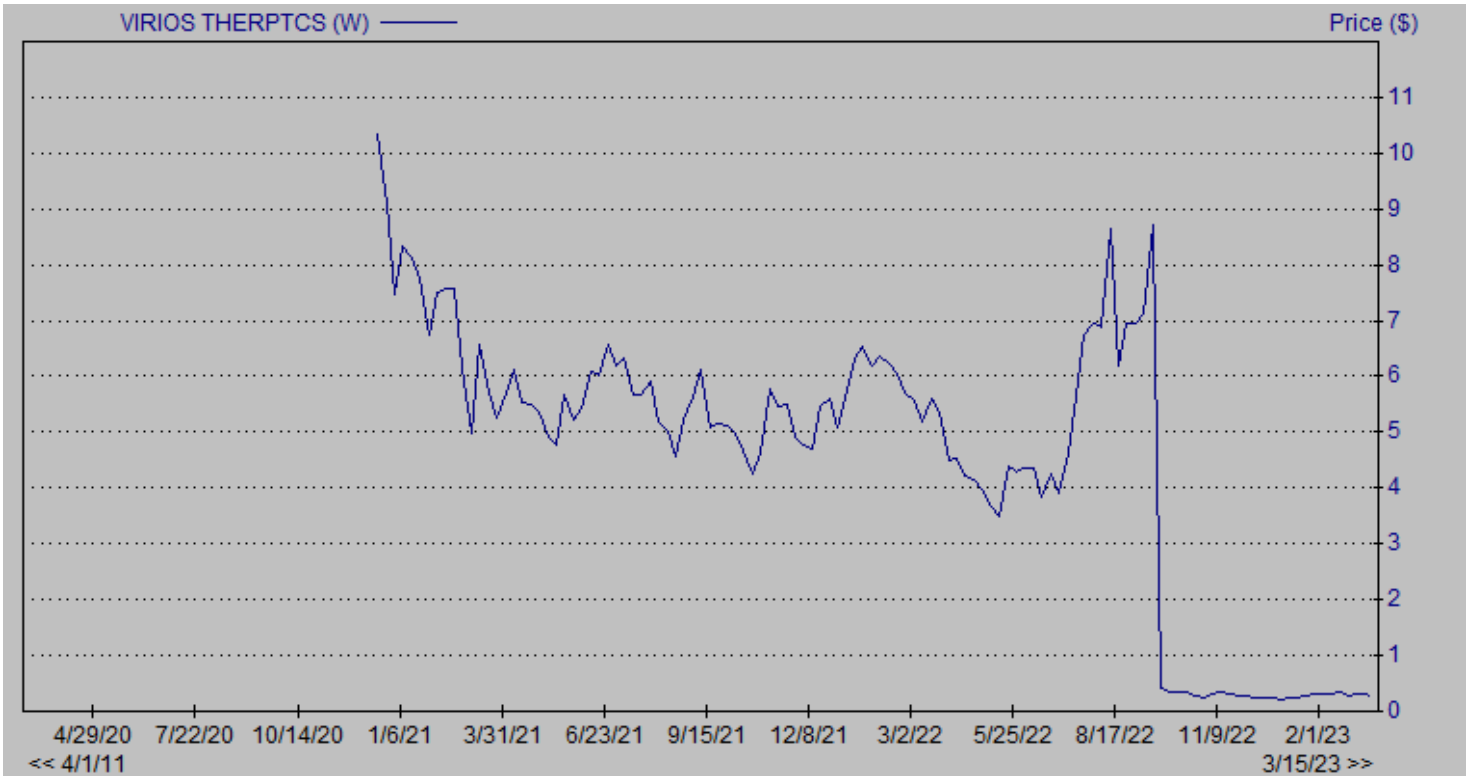

We are anticipating a comprehensive update from the company regarding the Phase 3 plans for IMC-1 in April 2023, at which time we will be publishing a follow up report. The Bateman Horne Center recently completed enrollment in the clinical trial of IMC-2 in patients with Long COVID. We anticipate topline results from that study in mid-2023. With no changes to our model our valuation remains at $2 per share.

DISCLOSURES

The following disclosures relate to relationships between Zacks Small-Cap Research ("Zacks SCR"), a division of Zacks Investment Research ("ZIR"), and the issuers covered by the Zacks SCR Analysts in the Small-Cap Universe.

ANALYST DISCLOSURES

I, David Bautz, PhD, hereby certify that the view expressed in this research report accurately reflect my personal views about the subject securities and issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the recommendations or views expressed in this research report. I believe the information used for the creation of this report has been obtained from sources I considered to be reliable, but I can neither guarantee nor represent the completeness or accuracy of the information herewith. Such information and the opinions expressed are subject to change without notice.

INVESTMENT BANKING AND FEES FOR SERVICES

Zacks SCR does not provide investment banking services nor has it received compensation for investment banking services from the issuers of the securities covered in this report or article.
Zacks SCR has received compensation from the issuer directly, from an investment manager, or from an investor relations consulting firm engaged by the issuer for providing non-investment banking services to this issuer and expects to receive additional compensation for such non-investment banking services provided to this issuer. The non-investment banking services provided to the issuer includes the preparation of this report, investor relations services, investment software, financial database analysis, organization of non-deal road shows, and attendance fees for conferences sponsored or co-sponsored by Zacks SCR. The fees for these services vary on a per-client basis and are subject to the number and types of services contracted. Fees typically range between ten thousand and fifty thousand dollars per annum. Details of fees paid by this issuer are available upon request.

POLICY DISCLOSURES

This report provides an objective valuation of the issuer today and expected valuations of the issuer at various future dates based on applying standard investment valuation methodologies to the revenue and EPS forecasts made by the SCR Analyst of the issuer's business.
SCR Analysts are restricted from holding or trading securities in the issuers that they cover. ZIR and Zacks SCR do not make a market in any security followed by SCR nor do they act as dealers in these securities. Each Zacks SCR Analyst has full discretion over the valuation of the issuer included in this report based on his or her own due diligence. SCR Analysts are paid based on the number of companies they cover. SCR Analyst compensation is not, was not, nor will be, directly or indirectly, related to the specific valuations or views expressed in any report or article.

ADDITIONAL INFORMATION

Additional information is available upon request. Zacks SCR reports and articles are based on data obtained from sources that it believes to be reliable, but are not guaranteed to be accurate nor do they purport to be complete. Because of individual financial or investment objectives and/or financial circumstances, this report or article should not be construed as advice designed to meet the particular investment needs of any investor. Investing involves risk. Any opinions expressed by Zacks SCR Analysts are subject to change without notice. Reports or articles or tweets are not to be construed as an offer or solicitation of an offer to buy or sell the securities herein mentioned.

CANADIAN COVERAGE
