MIRA Pharmaceuticals (MIRA-NASDAQ)

MIRA: Expands Pipeline and Increases Capital

MIRA is creating a THC analog that has the same benefits as THC without the negative side effects. We value MIRA at $17.75 using discounted cash flow analysis and a 20% discount rate.

Current Price (03/21/25)	$1.28
Valuation	**$17.75**

OUTLOOK

MIRA Pharmaceuticals is a clinical-stage pharmaceutical company focused on the development and commercialization of new molecular synthetic cannabinoid analog for the treatment of adult patients with neuropathic pain as well as anxiety and cognitive decline typically associated with early-stage dementia.

The company announced that it has signed a letter of intent to acquire a preclinical company that will expand MIRA's pipeline exponentially while injecting capital into the company.

Update

MIRA Pharmaceuticals is a clinical-stage pharmaceutical company focused on the development and commercialization of a new molecular synthetic cannabinoid analog for the treatment of adult patients with neuropathic pain as well as anxiety and cognitive decline typically associated with early-stage dementia. The company also acquired the rights to Ketamir, which, in layman's terms, is a potential derivative of the antidepressant ketamine that has shown indications of having fewer side effects, working more rapidly, and having the opportunity to impact millions of patients that have not responded to other, existing treatments. We have written about the exciting preclinical results for Ketamir-2, the company's novel oral ketamine analog, and the company just announced the beginning of clinical trials, illustrating further important advancement in the approval process.

In addition to all of this, the company just announced that it has signed a binding letter of intent to acquire SKNY Pharmaceuticals, which has a preclinical-stage oral drug candidate for weight loss and smoking cessation. The transaction also involves SKNY contributing $5 million to MIRA in a capital infusion. This is a promising development, with the obesity market estimated at over $150 billion within the next decade (Reuters), while the smoking cessation market is expected to reach nearly $51 billion by 2030 (Grand View Research).

Briefly, the drug candidate being acquired, according to the company, is designed to interact with cannabinoid receptors that have been demonstrated for their role in appetite, metabolism and energy balance regulation, with a similar method of action impacting nicotine dependence.

Obviously, more testing will have to be done and we're excited to see the results of those tests, but this deal is another example of MIRA management looking to add tremendous value for shareholders by greatly expanding the pipeline, while also increasing capital in a very shareholder friendly way.

Another potentially market expanding preclinical announcement was recently made when the company revealed that it has successfully developed Ketamir-2 into a topical treatment for neuropathic and inflammatory pain. This opens up an additional method of treatment and customer base that offers great potential and we are looking forward to the additional testing the company is planning on. Company management noted that the topical formulation is designed for slow release, which enables targeted pain relief, while minimizing systemic exposure.

Ketamir-2 took a major step forward earlier this year with the company announcing that it has received authorization from the Israeli Ministry of Health for its Phase I clinical trial for the treatment of neuropathic pain with initiation scheduled to begin in Q1 and conclude by Q4 2025, with the company believing it will be able to start a Phase 2 trial by the end of the year.

Also supporting that belief is the announcement by MIRA that a preclinical study, which was conducted using a nerve ligation-induced neuropathy model in female rats, showed that low doses of Ketamir-2 provided "significant pain relief" by day 15. Even more encouraging for the potential approval and commercialization of the drug was the announcement that by day 22 of the study, Ketamir-2 provided up to 112% and 70% greater relief than two leading neuropathic pain relief drugs—Pregabalin and Gabapentin, respectively. Sales of these two approved treatments are expected, according to research cited by the company, to reach a combined $7 billion in annual sales by 2033.

As a reminder, the existing treatments also have side effects such as drowsiness, dizziness, cognitive impairment, and weight gain, along with the potential for misuse and withdrawal upon discontinuation. In previous tests, Ketamir-2 has shown none of these side effects and is a non-opioid and has no known risk of dependence.

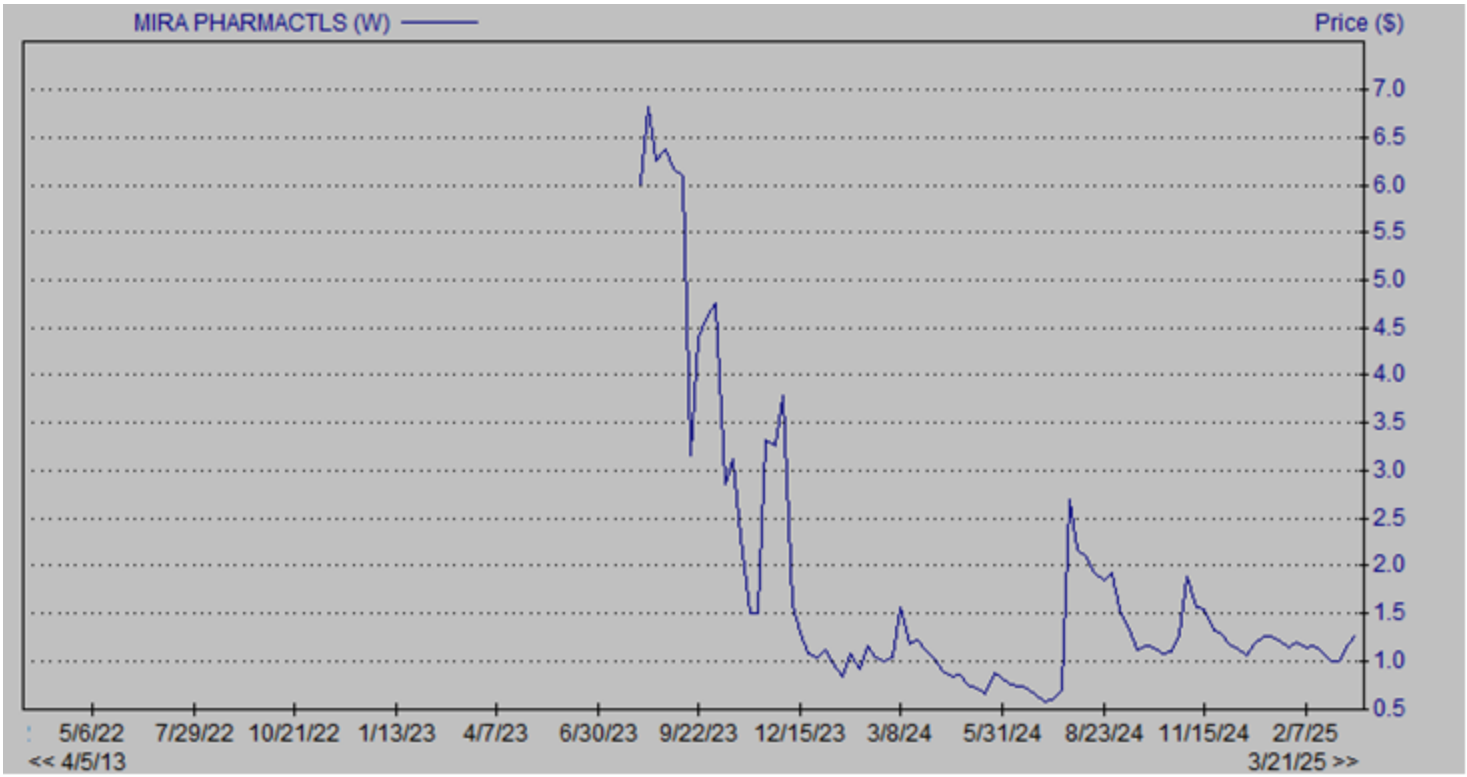

We remain extremely positive on MIRA, and this announcement is yet further confirmation that company management is focused on bringing relief to patients and providing value to shareholders. The company now has three potential groundbreaking therapies and is rightly focusing on the one with the potential to get to market the fastest—Ketamir-2, but also continuing to advance MIRA-55, which we have written extensively about, in the background. We urge investors to look at MIRA and suggest those with a modestly higher risk tolerance consider investing before MIRA announces more positive results or collaborations the stock really starts to move higher.

HISTORICAL STOCK PRICE

DISCLOSURES

The following disclosures relate to relationships between Zacks Small-Cap Research ("Zacks SCR"), a division of Zacks Investment Research ("ZIR"), and the issuers covered by the Zacks SCR Analysts in the Small-Cap Universe.

ANALYST DISCLOSURES

I, Brad Sorensen, hereby certify that the view expressed in this research report accurately reflect my personal views about the subject securities and issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the recommendations or views expressed in this research report. I believe the information used for the creation of this report has been obtained from sources I considered to be reliable, but I can neither guarantee nor represent the completeness or accuracy of the information herewith. Such information and the opinions expressed are subject to change without notice.

INVESTMENT BANKING AND FEES FOR SERVICES

Zacks SCR does not provide investment banking services nor has it received compensation for investment banking services from the issuers of the securities covered in this report or article.
Zacks SCR has received compensation from the issuer directly, from an investment manager, or from an investor relations consulting firm engaged by the issuer for providing non-investment banking services to this issuer and expects to receive additional compensation for such non-investment banking services provided to this issuer. The non-investment banking services provided to the issuer includes the preparation of this report, investor relations services, investment software, financial database analysis, organization of non-deal road shows, and attendance fees for conferences sponsored or co-sponsored by Zacks SCR. The fees for these services vary on a per-client basis and are subject to the number and types of services contracted. Fees typically range between ten thousand and fifty thousand dollars per annum. Details of fees paid by this issuer are available upon request.

POLICY DISCLOSURES

This report provides an objective valuation of the issuer today and expected valuations of the issuer at various future dates based on applying standard investment valuation methodologies to the revenue and EPS forecasts made by the SCR Analyst of the issuer's business.
SCR Analysts are restricted from holding or trading securities in the issuers that they cover. ZIR and Zacks SCR do not make a market in any security followed by SCR nor do they act as dealers in these securities. Each Zacks SCR Analyst has full discretion over the valuation of the issuer included in this report based on his or her own due diligence. SCR Analysts are paid based on the number of companies they cover. SCR Analyst compensation is not, was not, nor will be, directly or indirectly, related to the specific valuations or views expressed in any report or article.

ADDITIONAL INFORMATION

Additional information is available upon request. Zacks SCR reports and articles are based on data obtained from sources that it believes to be reliable, but are not guaranteed to be accurate nor do they purport to be complete. Because of individual financial or investment objectives and/or financial circumstances, this report or article should not be construed as advice designed to meet the particular investment needs of any investor. Investing involves risk. Any opinions expressed by Zacks SCR Analysts are subject to change without notice. Reports or articles or tweets are not to be construed as an offer or solicitation of an offer to buy or sell the securities herein mentioned.

CANADIAN COVERAGE

This research report is a product of Zacks SCR and prepared by a research analyst who is employed by or is a consultant to Zacks SCR. The research analyst preparing the research report is resident outside of Canada, and is not an associated person of any Canadian registered adviser and/or dealer. Therefore, the analyst is not subject to supervision by a Canadian registered adviser and/or dealer, and is not required to satisfy the regulatory licensing requirements of any Canadian provincial securities regulators, the Investment Industry Regulatory Organization of Canada and is not required to otherwise comply with Canadian rules or regulations.
