CTS Corporation (CTS-NYSE)

CTS : Another pedal to the metal for 2018.

Current Recommendation	**Buy**
Prior Recommendation	Hold
Date of Last Change	08/24/2009
Current Price (11/09/2015)	$18.32
Target Price	**$25.00**

OUTLOOK

After a successful restructuring CTS Corp. is consolidating its operations, which is improving gross margins, and is poised to resume growth. Recent orders are growing rapidly. It is finding new opportunities for its sensor portfolio, piezo ceramic technologies and ClearPlex technology for electronic filtering while it refreshes older product lines and expands offerings, all of which should drive growth in 2016 and beyond. Long term, by 2017, 2014 automotive design wins are expected to kick in to accelerate growth from current levels. We have increased our price target to $25 a share.

RECENT EVENTS

On Nov. 09, 2015 the company announced that it had been awarded a new production program to supply accelerator pedal modules to a major OEM in the European and Asian markets. CTS already has programs with Renault and had announced earlier that there was a new program in Europe but had not disclosed who it was (see the customer chart on page 6)

This is about $23 in total at this time, spread over 5 years with shipments starting in 2018.

A number of companies have announced 3Q15 earnings and have said that the cellular infrastructure market seems to have reached bottom and could show a pick-up in the 4Q15. This is good news since this market has been a difficult market for CST over the last 6 months.

CTS has acquired Filter Sensing Technology (FST), an eight year old company based in Cambridge , Massachusetts. The company has developed technology that measures the levels of soot and ash in the Diesel Particulate Filter (DPF), both on and off road diesel engines. The buildup of ash in the filter affects fuel consumption and the life of the filter. FST also has the technology to break up the ash that is plugging the filter, restoring the filter to an as-new condition and extending the life of the filter with reduced maintenance expense and lower replacement costs over the life of the vehicle.

The radio frequency (RF) sensors developed by the company can be used to measure the composition of gases and liquids within an engine and in many process control systems within, for example, a petroleum refinery.

Financial details were not available. We not think that the acquisition will have a meaningful impact on the revenue of CTS in the near future.

As expected the third quarter was impacted by currency fluctuations, with a weak Euro reducing revenue by $1.7 million. There will also be a negative impact in the fourth quarter.

Weak sales to the auto industry and an inventory adjustment by hard drive manufacturers also had a negative effect so revenue was below our estimate. Despite these problems operating income before other charges was ahead of expectations at $13.3 million versus our estimate of $12.5 million. After adjustments for all non-reoccurring charges net EPS was $0.23 just a penny short of our estimate.

Gross margins improved on a sequential basis, helped by manufacturing operations but no sales in countries with weak currencies. The charges for closing the Canadian facilities include severance pay. These charges should decline in the 4Q15.

Sales to the automobile sector declined partly because some products are being phased out whilst their newer products are replacing them plus the seasonality of the auto industry. These newer products are, usually, more profitable than the older ones they replace. Although the auto industry in the USA has shown above average growth over the last few years, demand in Europe has been soft. Hopefully this will change for the better in 2016 and 2017.

In the HDD business there has been a small inventory adjustment at the customer level. The good news here is that CTS is launching new products which should have a positive impact in 2016.

A $14.5 million charge was taken in the third quarter for remediation of facilities operated by CTS over 10 years ago. Remediation work is expected to start next year. It is difficult to estimate the total cost but CTS has discussed all of the requirements with the EPA and it thinks the charge is sufficient to cover all expenses.

Management expects a sequential increase in revenue in the fourth quarter, followed by single digit growth in 2016 with an increasing growth rate in 2017. Although potential acquisition candidates do exist the prices are high at this point in time. We have not included any acquisitions in our current estimates.

Orders in the 3Q15 were $95 million, $71 million in the auto sector and $24 million in the other businesses. Cash on the balance sheet increased slightly from the 2Q15, to $150.8 million and the stock buy-back continued ($4.3 million in 3Q15).

Second quarter results.

Second quarter revenue exceeded corporate guidance and our estimates. This was an impressive performance, especially since currency fluctuations reduced revenue by $2.1 million. Second quarter orders increased by 90% Y/Y, from $89 million to $169 million. The orders do include products that will not be shipped this year and late next year.

The Euro continues to be below year ago levels but it seems to have weathered the Grecian turmoil and is trading in a narrow band versus the dollar. The Chinese Yuan is also trading in a fairly narrow band but is still well below its value of a year ago. We would expect some currency valuation impact in 3Q15 since the average currency valuations are still below year ago levels, with a significant decline in the Yuan in early August, 2015.

The unfortunate impact of the strong dollars was a reduction in income from the SE Asian operations, which dropped operating income to below our expectations. Despite this, gross margins increased from 32.8% to 33.4%. There is an offset to the currency impact on revenue in that CTS has operations in countries, like Mexico, where they have no sales. The weak Mexican peso had a positive impact on margins in the second quarter.

The company is amending its tax returns from 2006 to 2013 in which the treatment of foreign taxes will be changed from deductions to credits. This added $16 million to net income. In addition it increased its reserve against certain other foreign taxes which was an increase in taxes of $5

million. The company still expects the tax rate for 2015 and future years to be in the low 30s excluding any extraordinary items

The company reported a one-time charges of $2.1 million for continued restructuring, mainly in moving out of Canada. When adjusting EPS for one-time effects, EPS came in at $0.30 versus an adjusted $0.25 last year, up 18%.

CTS Corporation's cash balance was $147 million and the draw down on the long-term revolving credit facility was $89 million. In the quarter the company bought back 462,000 shares spending $8.5 million.

It is possible however that the company may be able to make an acquisition between now and year-end. It continues to look for opportunities in Europe and to expand its technology portfolio. In piezoelectronics, CTS would like to add the ability to manufacture using tape cast and single crystal that would broaden its product offering to meet different specifications. It is also interested in opportunities in piezoelectric components.

Future Acquisitions Could Add Significantly to Revenues

The company is has $150 million in cash, albeit almost all overseas, and plans to use some of it to acquire companies that can:

- lessen its dependence on the light vehicle automotive market
- improve its manufacturing cost structure
- increase exposure to faster growth markets
- reduce taxes, because anywhere else in the world it could invest, would have a lower tax rate than the US.

If we assume that the company can make accretive acquisitions with its excess cash we estimate that it could use $100 million for acquisitions. Using comps of smaller companies the median value of EV/Revenue is 0.67. At that valuation the company could add about $150 million in revenue without any financial strain. However, in the space CTS is shopping, revenue multiples could be much higher. This has been the main reason the company has yet to buy as it finds prices historically high and believes that the auto cycle is at a peak, leading to extreme valuation at this point in time. Alternatively, this might make CTS itself a good acquisition target based on its relatively low revenue multiple.

As a comparison, Sensata Technologies acquired Schrader International, the leader in tire sensors, last year for $1 billion. Schrader was expected to generate $550 in revenue in 2014 giving it a valuation of 1.8 times enterprise value to sales. It also bought DeltaTech Controls for $190 million with the expectation of $125 million in revenues or a 1.5 times sales valuation.

INVESTMENT THESIS

- By reducing its physical locations to 11 (once the Canadian move is complete) lower cost manufacturing facilities, the company is boosting operating margins and has reduced its tax rate.

- The company is now focused on higher margin products and reducing its dependence on the automotive market which could reduce fluctuations in results while increasing its total addressable market.

- With $147 million in cash on the balance sheet (albeit overseas), the company is in an excellent position to pursue growth through acquisition. We believe the company has enough excess cash to buy companies totally upwards of $100 million in incremental revenue.

- New products and the refresh of old products could add to revenues later this year although it could be dampened by currency translation.

- The company has already booked automotive design wins that will develop into meaningful revenues two years out. Based on current design wins, 2017 should show stronger growth.

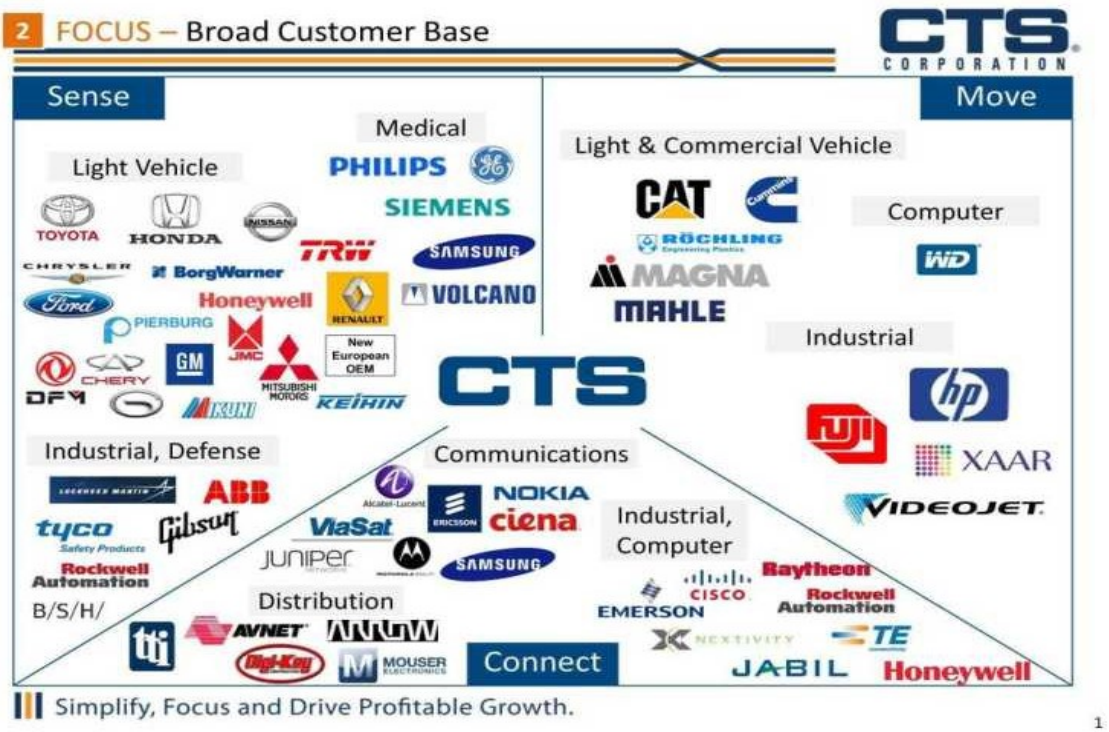

- Once the US Dollar stabilizes against the Euro and the Yuan the company will exhibit much greater sales and earnings growth.

COMPANY BACKGROUND

CTS Corporation (CTS) designs, manufactures, assembles, and sells electronic components and sensors worldwide. Over 65% of revenues are sold to the light vehicle automotive market, but the company is working to reduce that percentage. It has found new customers and markets for existing products. It designs and manufactures an extensive line of vehicle sensors and actuators used in powertrain, safety, fuel and emissions control systems; ceramic and crystal-based engineered electronic components used primarily in wireless communications infrastructure equipment, and piezoelectric materials, heat management and resistive-based components used in medical, defense and aerospace, computer, consumer and industrial equipment applications. On October 3, 2013, its Electronics Manufacturing Solutions (EMS) business was sold for $75 million in cash. The company used the cash generated from the sale to pay down debt and as a war chest for potential acquisitions.

CTS Corp.	2012	2013	2014
Fiscal Year Dec. 31.			
Automotive	$179.66	$270.27	$270.70

A diverse customer base:

with an accelerating order flow:

Will propel revenue and profits to higher levels.

VALUATION

Compared to other companies in its industry, CTS appears slightly undervalued. However, the increasing order flow and resulting growth in earning does not appear to be reflected in its valuation parameters. The stock is selling at a discount to the median EV/EBITDA for the groups and should be valued closer to the median values.

Sensata Technologies is a specialist in sensors and enjoys a much higher profit margin than the others, as well as a higher growth rate fueled by both internal growth and acquisitions. CTS's move towards a higher margin higher growth business given its focus in sensors and similar products it may be valued more like Sensata Technologies (ST) .

As supplier to the automobile industry CTS customers may be subject to civil and regulatory law suits. In the case of Toyota CTS Corp. has been indemnified by Toyota against any claims. We do not think that this lawsuit should have any impact on the price of the company's stock.

HISTORICAL ZACKS RECOMMENDATIONS

© Copyright 2015, Zacks Investment Research. All Rights Reserved.

DISCLOSURES

The following disclosures relate to relationships between Zacks Small-Cap Research ("Zacks SCR"), a division of Zacks Investment Research ("ZIR"), and the issuers covered by the Zacks SCR Analysts in the Small-Cap Universe.

ANALYST DISCLOSURES

I, Ian Gilson, CFA, hereby certify that the view expressed in this research report accurately reflect my personal views about the subject securities and issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the recommendations or views expressed in this research report. I believe the information used for the creation of this report has been obtained from sources I considered to be reliable, but I can neither guarantee nor represent the completeness or accuracy of the information herewith. Such information and the opinions expressed are subject to change without notice.

INVESMENT BANKING, REFERRALS, AND FEES FOR SERVICE

Zacks SCR does not provide nor has received compensation for investment banking services on the securities covered in this report. Zacks SCR does not expect to receive compensation for investment banking services on the Small-Cap Universe. Zacks SCR may seek to provide referrals for a fee to investment banks. Zacks & Co., a separate legal entity from ZIR, is, among others, one of these investment banks. Referrals may include securities and issuers noted in this report. Zacks & Co. may have paid referral fees to Zacks SCR related to some of the securities and issuers noted in this report. From time to time, Zacks SCR pays investment banks, including Zacks & Co., a referral fee for research coverage.

Zacks SCR has received compensation for non-investment banking services on the Small-Cap Universe, and expects to receive additional compensation for non-investment banking services on the Small-Cap Universe, paid by issuers of securities covered by Zacks SCR Analysts. Non-investment banking services include investor relations services and software, financial database analysis, advertising services, brokerage services, advisory services, equity research, investment management, non-deal road shows, and attendance fees for conferences sponsored or co-sponsored by Zacks SCR. The fees for these services vary on a per client basis and are subject to the number of services contracted. Fees typically range between ten thousand and fifty thousand USD per annum.

POLICY DISCLOSURES

Zacks SCR Analysts are restricted from holding or trading securities placed on the ZIR, SCR, or Zacks & Co. restricted list, which may include issuers in the Small-Cap Universe. ZIR and Zacks SCR do not make a market in any security nor do they act as dealers in securities. Each Zacks SCR Analyst has full discretion on the rating and price target based on his or her own due diligence. Analysts are paid in part based on the overall profitability of Zacks SCR. Such profitability is derived from a variety of sources and includes payments received from issuers of securities covered by Zacks SCR for services described above. No part of analyst compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in any report or article.

ADDITIONAL INFORMATION

Additional information is available upon request. Zacks SCR reports are based on data obtained from sources we believe to be reliable, but are not guaranteed as to be accurate nor do we purport to be complete. Because of individual objectives, this report should not be construed as advice designed to meet the particular investment needs of any investor. Any opinions expressed by Zacks SCR Analysts are subject to change without notice. Reports are not to be construed as an offer or solicitation of an offer to buy or sell the securities herein mentioned.

ZACKS RATING & RECOMMENDATION

ZIR uses the following rating system for the 1208 companies whose securities it covers, including securities covered by Zacks SCR:
Buy/Outperform: The analyst expects that the subject company will outperform the broader U.S. equity market over the next one to two quarters.
Hold/Neutral: The analyst expects that the company will perform in line with the broader U.S. equity market over the next one to two quarters.
Sell/Underperform: The analyst expects the company will underperform the broader U.S. Equity market over the next one to two quarters.

The current distribution is as follows: Buy/Outperform- 25.6%, Hold/Neutral- 54.7%, Sell/Underperform – 16.0%. Data is as of midnight on the business day immediately prior to this publication.
