The First Marblehead Corporation (FMD-NYSE)

FMD: First Quarter – Making Progress – NEUTRAL

Current Recommendation	**Neutral**
Prior Recommendation	N/A
Date of Last Change	06/10/2010
Current Price (11/22/11)	$0.95
Six- Month Target Price	**$1.50**

OUTLOOK

Our recommendation on The First Marblehead Corporation (FMD) is Neutral. FMD is in the initial stages of a turnaround. It has rolled out its new partnered lending program with two lenders, Sun Trust Bank and Kinecta Federal Credit Union, has added tuition payment services to its product line-up through the acquisition of TMS, and recently began using its Union Federal Savings Bank (UFSB) subsidiary to originate private education loans. That said, we believe that any meaningful pickup in revenues will be dependent upon a significant ramp-up in partnered lending and UFSB loan origination and the re-entry of FMD into the securitization market, in which it has not participated since September 2007. Until that time, FMD continues to lose money, though at a decelerating pace, with our diluted loss per share estimates at $0.70 in fiscal 2012 and $0.65 in fiscal 2013, an improvement over fiscal 2011's loss per share of $0.87 before a nonoperating gain. Fortunately, FMD has strengthened its balance sheet, and has an available cash cushion of about $203 million at present, though it is burning cash at the rate of $12-15 million per quarter.

FIRST QUARTER

On November 3, 2011, the Company reported its fiscal 2012 first quarter results for the period ending September 30, 2011. For the quarter, FMD recorded a net loss from education financing of $18.1 million, or a diluted loss per share of $0.18, including a $1.1 million gain on proceeds from the TERI settlement. Excluding the TERI gain, the diluted operating per share loss was $0.19. The total net loss, including the securitization trusts net loss of $69.3 million, was $88.0 million, or a $0.87 loss per diluted share, including an $8.0 million gain on proceeds from the TERI settlement.

Our first quarter loss estimate for the education financing segment was $13.6 million, or a loss of $0.13 per diluted share. The primary reason for the shortfall from our estimate was $4.5 million in new marketing expenses, which boosted total noninterest expense to $31.0 million and compares to our $27.4 million estimate.

Net revenue at $12.5 million fell short of our $14.5 million estimate, though TMS performed satisfactorily. TMS posted administrative fee revenue of $7.3 million on a 4% advance in tuition payments processed to $1.3 billion and net interest income of $0.25 million (since the TMS acquisition occurred on Dember 31, 2010, TMS is not included in the year-ago quarter).

Net income from the GATE Trusts, in which FMD owns 100% of the residual interests, was $1.6 million, or $0.02 per share, the same as it was in the prior-year quarter.

We are changing our education financing diluted per share loss estimate to $0.70 from $0.52 for fiscal 2012, ending June 30, 2012, largely reflecting higher marketing expenses than we had estimated previously. This compares to an education financing net loss of $87.4 million (excluding a $6 million of nonoperating gain) in fiscal 2011, or a $0.87 loss per diluted share. Our initial education financing diluted per share loss estimate for fiscal 2013, ending June 30, 2013, is $0.65.

Below we discuss 2012 fiscal first quarter results in more depth.

Business Review

FMD has had an auspicious launch to its first peak origination student loan season since the beginning of the credit crisis in 2007. Including the Monogram-based loan programs at Sun Trust and Kinecta that began in July and September 2010, respectively, as well as at Union Federal Savings Bank (UFSB), which began on July 1, 2011, the Company has processed over 53,000 private student loan applications representing $557 million in loans, of which it has approved $129.4 million, or almost one-quarter of the $550 million total. Of the total $129.4 million amount approved, $43.6 million has been booked to date.

These metrics demonstrate that loan demand is quite strong and that FMD is accepting only the cream of the crop, the top 23% of all loans submitted. This is further borne out by the credit quality statistics of the loans that have been approved: a weighted-average credit score of 759; 88% are cosigned, 63% are in immediate repayment; 69% have repayment terms of 10 years or less; weighted average interests rates of 6.40% for variable-rate loans and of 8.71% for fixed-rate loans; and 80% of loans are fixed rate, generating a higher margin for FMD.

While the Sun Trust and Kinecta loan programs contribute 300-400 basis points of revenue per loan, the net interest margin is higher for UFSB. At UFSB, the weighted average yield on the education loan portfolio is 6.1%, while funding costs are roughly 100 basis points, leaving a net interest margin of about 5.1%. This is roughly 100-200 basis points larger than the revenue contribution from the SunTrust and Kinecta loan programs.

On both programs, there are additional costs related to defaults and administrative costs. The Company estimates net charge-offs on the UFSB loans at 75-100 basis points and defaults costs on the SunTrust and Kinecta portfolios at 50-75 basis points. In addition, FMD estimates servicing costs on the UFSB

loans at 30-50 basis points. While FMD did not disclose administrative and marketing costs for the SunTrust and Kinecta loan programs, we would assume that they are comparable in size to the servicing costs at UFSB.

Clearly, the UFSB loans are more profitable for FMD than either the Sun Trust or Kinecta loan programs. However, lending capacity at UFSB is limited to $30 million given current regulatory capital constraints, far below the capacity of $200 million at Sun Trust and of $75 million at Kinecta.

There are a couple of options available to FMD to increase lending capacity at UFSB. First, FMD could downstream cash from the holding company as a capital contribution to UFSB. With a larger capital base, UFSB could lend more.

In addition, FMD has been exploring the establishment of a warehouse line of credit at an investment bank, which could house UFSB's education loans until they are ready to be securitized. This would free up capital at UFSB since the loans would be sold to an investment bank.

The investment bank would underwrite the securitization and FMD would earn structural and advisory fees for structuring the transaction, though it is unclear if FMD would earn fees similar to those it received in the past. While we sense nothing is imminent, once loan volume at UFSB reaches $50-100 million, it might make sense financially to go the securitization route, recognizing that FMD has been out of the securitization market since the fall of 2007 and initial terms could be somewhat onerous until FMD regains acceptance in this market.

Future growth prospects for the Monogram loan program appear bright. FMD recently added nine people to its sales staff and now has a 16-member sales team that has visited over 1,100 schools across the country. FMD currently has Monogram lending programs approved on 341 lender list positions in 30 states, a 14% increase from 300 lender list positions at the end of the previous quarter in June. This is expected to grow significantly in 2012 due to the addition of UFSB, though it may require a bit of time for UFSB's loan products to gain market acceptance. Moreover, as these Monogram lending programs mature, the likelihood of repeat business increases.

From a macro standpoint, pressure on the US government's budget could cause a reduction in federal student loan programs, which could benefit private student lenders, including First Marblehead. In addition, as regional banks enter the private student loan sector or expand beyond their lending footprints beyond their territories to enhance diversification, FMD's high-quality Monogram private student education loans could be a good fit.

At TMS, revenues are likely to come in at the upper end of FMD's previously disclosed $25-28 million range in fiscal 2012. TMS accounted for $7.3 million of 2012 first quarter non-interest revenues and $0.25 million of net interest income, with similar contributions expected in the second and third quarters. The fourth quarter is likely to total $4-6 million, with the decline the result of the typical seasonal slowdown in payment processing as the school year winds down.

A new product that FMD began offering in the first quarter is refund management, which fits nicely with other services offered by TMS. TMS provides a debit card to students to pay for living expenses, relieving colleges of the administrative burden of issuing checks periodically for this purpose. Debit cards are initially being issued by a third-party vendor, though at some point in the future could be issued by FMD's UFSB subsidiary.

Financial Review

On November 3, 2011, the Company reported its fiscal 2012 first quarter results for the period ending September 30, 2011. For the quarter, FMD recorded a net loss from education financing of $18.1 million, or a diluted loss per share of $0.18, including a $1.1 million gain on proceeds from the TERI settlement. Excluding the TERI gain, the diluted operating per share loss was $0.19. The total net loss, including the

securitization trusts net loss of $69.3 million, was $88.0 million, or a $0.87 loss per diluted share, including an $8.0 million gain on proceeds from the TERI settlement.

- Education financing net revenue was $12.3 million, reflecting administrative and other fees of $11.0 million (including those of TMS at $7.3 million), $1.0 million from additional structural advisory fee and residual trust updates, and $0.3 million in net interest income.

- Fiscal first quarter education financing non-interest expense was $31.0 million, up $4.1 million sequentially from the $26.9 million posted in the fiscal fourth quarter last year, mainly the result of increased marketing costs

- At the end of the first quarter on September 30, 2011, the education financing segment had total assets were $515.3 million and stockholders' equity of $239.5 million, down $17.8 million from $257.3 million at its fiscal yearend in June.

- At September 30, 2011, the Company recorded $245.4 million in cash, cash equivalents, and short-term investments, down $22.0 million sequentially from $267.4 million at the end of June 2011. Of this amount, about $42.8 million was located at Union Federal Savings Bank, with the $202.6 million balance available to FMD for other corporate purposes.

- Overall, net operating cash usage increased by $5.1 million sequentially, rising to $15.7 million in 2012's fiscal first quarter from $10.6 million for the quarter ended June 30, 2011, with the deterioration largely due to increased marketing expenditures.

- As of the earnings release date, the Company held over 341 positions on the lender lists of colleges and universities across the nation, up 14% from 300 at the end of the last quarter.

- FMD began originating Monogram-based private student loans at its UFSB subsidiary on July 1, 2011, the first day of the 2012 fiscal year.

For the fiscal first quarter, the securitization trusts reported a net loss of $69.3 million, or a $0.68 loss per diluted share. Total net revenue was a negative $64.0 million, as $73.8 million of net interest income was more than offset by a $124.9 million provision for loan losses, which increased $9.2 million sequentially, or 8%, from the June 2011 quarter and was about $10 million below the level of net charge-offs during the quarter. In addition, general and administrative expenses were $12.2 million.

Net income from the GATE Trusts, in which FMD owns 100% of the residual interests, was $1.6 million, or $0.02 per share, the same as it was in the prior-year quarter.

Other News

On November 14, 2011, FMD announced that it sold to VCG Special Opportunities Master Fund Limited (VCG) its variable interests in its National Collegiate Student Loan Trusts (NCSLT Trusts) for $13 million in cash. Notably, this will allow FMD to deconsolidate the NCSLT Trusts from it financial statements, removing assets of $6.7 billion and liabilities of $7.9 billion, while at the same time booking a $1.2 billion gain on the sale, thereby eliminating the deficit in shareholders' equity related to the NCSLT Trusts. Moreover, this sale provides the Company with $13 million in cash immediately for assets that otherwise would not have generated cash flow until 2025.

We note that the Guaranteed Access to Education (GATE) Trusts will not be affected by the NCSLT Trust sale. This means that the GATE Trusts, with approximately $300 million in assets, $310 million in liabilities and generating about $6 million in net income ($0.06 per diluted share) annually, will still be appear on FMD's financial statements.

On November 15, 2011, FMD announced it amended its loan program agreement with SunTrust Bank. Key highlights of the new agreement include: (1) increases lending volume through FMD's Monogram platform as all new SunTrust private education lending activity will occur through First Marblehead by the end of the third quarter of fiscal 2012 (previously SunTrust marketed its own private student loan product, in addition to the Monogram product); (2) extends the agreement to January 31, 2015 from April 20, 2012; (3) prohibits SunTrust Bank from marketing non-FMD products through July 1, 2013; (4) increases the Participation Cap and establishes a 54-month waiting period for FMD withdrawals from the Participation Accounts for all loans with applications received on or after July 15, 2012; (5) prohibits FMD from marketing in certain locations exclusive to SunTrust, including the District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, and Tennessee; (6) requires FMD to maintain minimum staffing levels for sales activities in certain states and a minimum amount of sales-related expenditures for each calendar year for the remaining term of the agreement; and (7) gives FMD the option to securitize or otherwise dispose of education loans made by SunTrust.

On November 17, 2011, FMD disclosed that the Massachusetts Appellate Tax Board (ATB) had issued an order (Order) in the cases relating to the Massachusetts tax treatment of GATE Holdings, Inc. In connection with the Order, FMD expects to recognize an income tax benefit during the fiscal second quarter ending December 31, 2011 of approximately $12.5 million. FMD also expects to make net tax payments for GATE's taxable years ended June 30, 2004, 2005 and 2006 of approximately $5.0 million during its fiscal third quarter ending March 31, 2012. FMD could be required to make additional tax payments for GATE's taxable years ended June 30, 2008 and 2009, which could materially adversely affect its liquidity position.

The Consumer Financial Protection Bureau (CFPB), the agency created by the Dodd-Frank Act to oversee consumer financial affairs in the US, recently announced that it is now seeking comment from the public and the industry on practices related to the private student loan industry, with the view to potentially establishing minimum regulations. We are not sure what impact, if any, this will have on the private student loan industry, in general, and FMD, in particular.

FMD's share price has fallen below the $1.00 per share 30-trading-day standard at the New York Stock Exchange. Importantly, the Company expects to remedy this deficiency within the six-month time frame as required by NYSE regulations. Possible remedies include a reverse stock split or share buyback. A share buyback would require using cash that the Company needs to fund operations and may not be the best use of this limited resource.

OVERVIEW

The First Marblehead Corporation (FMD) provides student loan services to financial and education institutions throughout the United States. These services typically consist of helping these institutions design, originate, manage, and finance private education loan programs that further their strategic and financial goals, while also complying with the loan criteria they have established.

FMD offers these services under the Monogram® platform (Monogram), a new product for FMD that was developed over the last few years. Monogram utilizes FMD's proprietary credit risk analytics models, which are based upon data gathered by FMD over 20 years and among the most sophisticated in the industry. Through the partnered lending program based upon Monogram, FMD receives service fees, as well as a portion of the net interest income generated portfolio of program loans for which they provide credit enhancement

Currently, FMD has two clients using Monogram: SunTrust Bank, headquartered in Atlanta and serving the Southeast and mid-Atlantic regions, with more than $170 billion in assets; and Kinecta Federal Credit Union, a California-based federal credit union with over $3.5 billion in assets. Program size is $200

million for SunTrust and $75 million for Kinecta, and have maturities of early 2015 for SunTrust and late 2012 for Kinecta.

Other businesses of FMD include the administration of the National Collegiate Student Loan Trusts (NCSLT Trusts), in which FMD has no ownership interests (their residual interests were sold to a third party in 2009), and the administration of certain other loan trusts and portfolios, for which FMD receives a fee of 0.05-0.20% of the principal loan balance outstanding.

In addition, with the December 2010 purchase of Tuition Management Systems (TMS) for $47 million, FMD has added a complementary fee-for-service business to its line-up. TMS, one of the nation's largest providers of outsourced tuition planning, billing, counseling, and payment technology services for colleges, universities, and elementary and secondary schools, operates in 47 states and now serves over 770 school clients, including such prestigious institutions as Duke University, Boston College, University of Chicago, MIT, and Carnegie Mellon. TMS is expected by FMD to add approximately $25-28 million of total revenues in fiscal 2012, as well as be earnings accretive within two years of acquisition.

FMD also owns a small federally chartered thrift, Union Federal Savings Bank of North Providence, Rhode Island (acquired in November 2006), that offers residential and commercial mortgage loans, private student loans, and retail savings, money market and time deposit products. FMD had been exploring strategic alternatives for this business, but has retained Union Federal as a vehicle for originating Monogram-based private education loans beginning July 1, 2011.

Financial statements were considerably altered with the beginning of the fiscal 2011 year (ending June 30, 2011), following the adoption of new accounting standards, which required the consolidation of 14 securitizations trusts that had previously been accounted for off balance sheet. Thus, $8.2 billion of securitized loan receivables from the trusts were added to FMD’s balance sheet, along with $9.0 billion of nonrecourse debt issued by the trusts. However, with the recent sale of FMD’s variable interest in the NCSLT Trusts, assets and liabilities of these 11 entities will be deconsolidated in fiscal 2012’s second quarter (ending December 31, 2011), leaving only the assets and liabilities of the GATE Trusts, in which FMD retains a 100% ownership interest, still included in the financial statements.

Because of this change, FMD reports two business segments: education financing, which encompasses the fee-for-service operations of the Company, as well as Union Federal Savings Bank; and securitization trusts, which include the 11 NCSLT Trusts (through September 30, 2011) and 3 GATE Trusts. The results for the education financing segment are generally comparable to the financial reporting used by the Company prior to 2011 fiscal year.

VALUATION

FMD’s stock valuation metrics are depressed. Although FMD is in the initial stages of a turnaround and we are encouraged by the progress made to date, the outlook remains somewhat murky. Moreover, FMD continues to lose money, though at a decelerating pace, with our diluted loss per share estimates at $0.70 in fiscal 2012 and $0.65 in fiscal 2013, an improvement over fiscal 2011’s loss per share of $0.87 before a nonoperating gain

This is reflected in FMD’s stock price. FMD shares have declined 56.2% year to date, compared to a median decrease of 8.8% for financial services companies in the Zacks small-cap index, as shown in the following table.

Turning to Price/Book Value, FMD is valued at 0.40X, well below the industry median of 1.37X. It is also below FMD’s average Price/Book Value of 0.76X for the past year or so.

Applying the 0.76X ratio to our estimated book value for FMD six months out results in a price target of approximately $1.50. We continue to recommend a Neutral on FMD shares.

HISTORICAL ZACKS RECOMMENDATIONS

DISCLOSURES

The following disclosures relate to relationships between Zacks Investment Research ("ZIR") and Zacks Small-Cap Research ("Zacks SCR") and the issuers covered by the Zacks SCR analysts in the Small-Cap Universe.

ZIR or Zacks SCR Analysts do not hold or trade securities in the issuers which they cover. Each analyst has full discretion on the rating and price target based on their own due diligence. Analysts are paid in part based on the overall profitability of Zacks SCR. Such profitability is derived from a variety of sources and includes payments received from issuers of securities covered by Zacks SCR for non-investment banking services. No part of analyst compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in any report or blog.

ZIR and Zacks SCR do not make a market in any security nor do they act as dealers in securities. Zacks SCR has never received compensation for investment banking services on the small-cap universe. Zacks SCR does not expect received compensation for investment banking services on the small-cap universe. Zacks SCR has received compensation for non-investment banking services on the small-cap universe, and expects to receive additional compensation for non-investment banking services on the small-cap universe, paid by issuers of securities covered by Zacks SCR. Non-investment banking services include investor relations services and software, financial database analysis, advertising services, brokerage services, advisory services, investment research, and investment management.

Additional information is available upon request. Zacks SCR reports are based on data obtained from sources we believe to be reliable, but is not guaranteed as to accuracy and does not purport to be complete. Because of individual objectives, the report should not be construed as advice designed to meet the particular investment needs of any investor. Any opinions expressed by Zacks SCR Analysts are subject to change. Reports are not to be construed as an offer or the solicitation of an offer to buy or sell the securities herein mentioned. Zacks SCR uses the following rating system for the securities it covers. Buy/Outperform: The analyst expects that the subject company will outperform the broader U.S. equity market over the next one to two quarters. Hold/Neutral: The analyst expects that the company will perform in line with the broader U.S. equity market over the next one to two quarters. Sell/Underperform: The analyst expects the company will underperform the broader U.S. Equity market over the next one to two quarters.

The current distribution of Zacks Ratings is as follows on the 1040 companies covered: Buy/Outperform- 17.2%, Hold/Neutral- 74.0%, Sell/Underperform – 6.8%. Data is as of midnight on the business day immediately prior to this publication.
